inviolability of the hierarchy and the pope as the fountainhead of justice, while the *Donation of Constantine*, concocted on even more audacious lines, asserted that no earthly potentate may rule where God's anointed has his throne. In 962 Otto was crowned as the emperor of what is known as the Holy Roman Empire. Otto owed his crown to the chair of St. Peter, but had the power of deposing Christ's vicar and determining his successors; nevertheless this union of two world-rulers—one supreme in secular matters, the other in the spiritual realm—was a fact of transcendent historical moment. Hildebrand, a native of Tuscany, educated in the Cluny monastery at Rome though not himself a monk, was gifted with the instincts of leadership and a genius for statesmanship, and under the name of Gregory VII. ascended the throne of St. Peter in the year 1073 to claim absolute power in the affairs of the Church, the right to depose kings and to sit in judgment on their sins. On a memorable occasion during the year 1077 he proved his strength by reducing the defiant Henry IV. to penitence at Canossa, and his humiliation of the king of Germany had been preceded by threatening Philip I., king of France, with deposition, if he did not mend his ways. The policy of State domination was carried on by his successors Urban II., and, more notably, Innocent III. The protest of Arnold of Brescia, a pupil of Abelard, who advocated a return to apostolic simplicity and the abandonment of secular pretensions, was unavailing. The answer of the papacy was the destruction of the heresy of the Cathari and the Albigenses and the establishment of the Inquisition, while the policy of asserting independent control over the kings of France, Germany, and England was continued until 'Innocent III. had as his vassals the majority of the princes of Christendom.'¹ On the other hand, this struggle weakened the moral influence of the papacy. The Latin Empire in the East fell, and the Crusades (*q.v.*) came to an end in 1272. Monasticism under Bernard (*q.v.*) of Clairvaux (1090-1153) and the Cistercians assumed a more rigid tone and discipline, and the mendicant orders of St. Francis and St. Dominic aroused the conscience of the Church to the needs of the common people, social and spiritual. The Fratres Minores in particular enshrined in their labours and their lives of frugality and simplicity an ideal of self-renunciation joyous rather than austere, and by their care for the poor and their own self-imposed poverty leavened the decadence and corruption of the age with the true spirit of the Christian gospel.²

(c) *Modern period.*—The two and a half centuries which constitute the later Middle Ages (from the death of Boniface VIII. to the beginning of the Reformation—1303 to 1517) may be conveniently included under this head as bringing to a climax the tendencies prophetic of and preparatory to the rise of Protestantism. The famous papal bull *Unam Sanctam*, issued by Boniface VIII. in 1302, had declared that the belief that every human creature is subject to the pope was necessary to salvation. It was burnt by Philip IV. 'the Fair' of France in Notre Dame, and its author, when about to excommunicate Philip, was made a prisoner in a rising instigated by Philip and a month later died of a broken heart. Such was the tragic end of the papal claim to a world-leadership. The *de Monarchia* (c. 1314) of Dante expressed the sentiment of hostility to the papal ambition for temporal power and was significant of the growing

reaction against papal pretensions. The 'Babylonian captivity' of the papacy at Avignon was a further blow to the prestige of the holy see. While William of Occam (1280-1347) placed the emperor and the general council above the pope as his judges, and Marsilius of Padua in his *Defensor Pacis* assumed the rôle of higher critic in the matter of the supremacy of St. Peter and the primacy of the Roman see, France reduced the pope to complete submission and Germany disregarded his anathemas. When Wyclif protested that the papal office was poisonous to the Church, the great schism which had resulted in the election of two popes in 1378 was the basis of his argument—an argument which became irresistible when, on the failure of the Council of Pisa in 1409 to solve the problem, three popes instead of two widened the schism. Five years later the Council of Constance condemned John Hus to death.¹ Stimulated by the writings of Wyclif, he had inaugurated a new religious movement in Bohemia and had been invited to the council under a safe-conduct granted by the Holy Roman Emperor Sigismund. There he expounded his views and was called upon to retract what were considered to be erroneous teachings subversive of the authority of the pope. He refused on the grounds of fidelity to conscience, was condemned and on 6th July 1415 burned. A year later his friend and disciple, Jerome of Prague, suffered the same fate. The essence of the Hussite movement was its insistence on the rights of conscience and its appeal to a higher tribunal than that of pope and council. On the other hand, the Council of Constance had ended the schism by asserting its supreme authority over pope and Church. It had established its right to regulate the action of the pope and 'had secured the transformation of the papacy from an absolute into a constitutional monarchy'²—an event of great significance for the future history of the papacy. Constantinople fell in 1453, and in the latter half of this century the popes sought to restore their waning supremacy by invoking crusades against the Muslim. Savonarola (*[q.v.]* 1452-98), a Dominican monk of Florence under the rule of the Medici, became alarmed by the prevailing decadence of morals, and owing to his zeal for the purification of society was excommunicated by Pope Alexander VI., who after failing to bribe him into silence secured his death by working on the hostility of the Florentines to their noblest fellow-citizen. Such movements as those of Hus and Savonarola, who were both martyrs in the cause of a higher morality, and the exemplification of an inward and spiritual religion in the lives of mystics like Tauler and Thomas à Kempis,³ were signs of the coming change. It was in vain that Pope Leo X. (1513-21) secured the repeal of the 'pragmatic sanction'—by which Louis IX. of France had in 1269 asserted the right of the State to refuse papal taxation—and in vain that his imitation of the warlike policy of his predecessor Julius II. and his successful diplomacy had enabled him to recover something of the old papal prestige. It was but a momentary rekindling of the embers of a dying cause. The Reformation had arrived. It is true that the Protestant movement,⁴ triumphant in Northern and Central Europe, was checked in Italy, though even in the native land of the papacy hatred of the vices and corruptions of the papal régime rallied many adherents to the new movement. The traditional greatness of an institution which had brought wealth and influence to the Italian

people evoked a patriotic response to the forces of the Counter-Reformation. Moreover, the foundation of the Society of Jesus by Loyola (1491-1556),¹ with its régime of unquestioning obedience to the will of its general and its unswerving devotion to the papal see, was a powerful factor in withstanding the advance of Protestantism, while by its missionary zeal it carried Roman Catholic influence into new lands and reconquered lost territory. The Council of Trent met in 1545 and after two interruptions produced in 1563 under Pius IV. the famous *Professio Fidei*, to which all teachers and ecclesiastics were required to assent. The Catholic theologian Bellarmine with uncompromising dogmatism expounded the Tridentine symbol and the Roman Catechism, which even more rigidly supported the papal supremacy, and his labours for orthodoxy were continued by the Jesuit theologians Suarez and Petavius, while the mysticism of Francis of Sales, Molinos, and Fénelon wielded a powerful influence in favour of the Roman type of piety. The publication of the Catechism, the Breviary, and the Missal, together with an authorized edition of the Vulgate, aided the work of the Counter-Reformation by providing standards of Catholic orthodoxy. The Inquisition² was re-organized and carried on in Italy, though not with the fanatical excesses which in Spain under Torquemada had covered the holy office with lasting infamy. The *Index Expurgatorius* pronounced its ban on all anti-Roman books and particular passages of books. In 1685 the repeal of the Edict of Nantes, which was the great charter of Huguenot rights in France, marked the climax of a half-century of persecution and political ostracism. In the 18th cent. the efforts of the Western Church to withstand the Protestant movement had spent their vigour, just as Protestantism had lost its earlier glow and enthusiasm. A spiritual and intellectual lassitude prevailed—a reaction partly from the theological strife of the previous generations and partly from the dynastic struggles caused by the ambitions of Louis XIV. and Frederick the Great. The Society of Jesus was temporarily extinguished. Where religious reforms were attempted—e.g., by Joseph II. in Austria—they proved abortive, probably because they were inspired by the free-thinking spirit rather than by genuine religious earnestness.

Under the French revolution the Church shared the fate of all the privileged classes, and the Catholic religion was formally abolished as being hostile to the new republic. The Goddess of Reason was enthroned in Notre Dame, and Robespierre's attempt to restore religion by enforcing a belief in God only checked for a moment the torrent of infidelity. In 1801 Napoleon concluded a concordat with Pius VII., in which the Catholic religion was declared to be the religion of the majority of the French people; but he provoked the pope's hostility by demanding the right to appoint a patriarch of France, the abolition of clerical celibacy, and the support of the pope against England. Excommunication of Napoleon was followed by a protracted struggle with the pope, which was only ended in 1814 by the fall of Napoleon. In Germany the ecclesiastical states were secularized and subjected to civil rule. In Spain the Inquisition was abolished. The pope espoused the cause of absolutism which the formation of the Holy Alliance of European Powers was intended to uphold, in order to prevent revolutionary and democratic movements aimed at the authority of kings. In 1814 the Jesuit order was revived. Lamennais's attempt in France to associate ultramontane ideas of the pope's spiritual

² See art. INQUISITION and OFFICE, THE HOLY.

supremacy¹ with the advocacy of freedom of worship and liberty of conscience was repudiated by Pope Gregory XVI. On the other hand, in England Catholic emancipation released Roman Catholics from the political disabilities imposed at the Restoration. In 1846 Pope Pius IX. began his policy of liberalism by providing for his kingdom a constitutional system and cherished a scheme for the unifying of Italy under his control. A quarter of a century later, on the capture of Rome by Victor Emmanuel (1870), Italy was unified under one kingdom with Rome as its capital, and the pope's temporal authority was finally lost. In 1854 Pius IX. had promulgated on his own authority without any conciliar sanction the dogma of the immaculate conception (*g.v.*), and in 1870 at the Vatican Council the dogma of papal infallibility² was decreed in spite of the opposition of the 'Old Catholics'³ of Germany, who held that the concurrence of pope and council was required for the validity of a doctrinal definition. Some of these, like Hefele, submitted, but Döllinger and his associates seceded and formed a confederation of English, Americans, Swiss, Russians, and Greeks, while in Paris Pere Hyacinthe Loyson formed an Old Catholic congregation. But the movement never captured the people. Both England and Germany were alarmed by the ultramontane policy of the papacy, and Germany under Bismarck gave political protection to the Old Catholics. In France the National Assembly in 1871 was possessed with the ultramontane ideals, and the Government four years later authorized the foundation of Catholic universities. The inevitable reaction followed, and under Ferry and Gambetta (1880-81) the 'March decrees,' breaking up the Jesuit Society and congregations not recognized by the State and requiring Catholic students to be enrolled in State universities, were carried. During the last generation the secularist movement in France advanced stage by stage—until in 1905 the separation of Church and State was decreed by the French government and all churches and church property became the possession of the State. A situation was thus created for both Catholics and Protestants which called for voluntary generosity on the part of their adherents, with the result that the cause of religion in France has not lost but rather gained in public esteem.

Even from this rapid survey, which has selected what may be called decisive events illustrative of the political aims of the papacy and the development of ecclesiastical life and order within the Roman Church, we may infer what the Western Church has stood for in European history since the days of Constantine. Its aim has been to include humanity within its spiritual fold, while exerting a dominating control over the secular fabric of the State, its kings and governing authorities. This fundamental dualism of spiritual authority and temporal domination, which reached its climax in the Holy Roman Empire, was held to be the secret of progress religious and social, and none can deny the splendour of the conception which inspired Hildebrand and lifted the Mediæval Church to a position of majestic influence and striking prosperity. But it was a glorious dream destined to vanish at the touch of reality, a harmony of incompatible opposites which could not endure, a service of two masters which was to end in disillusion and disaster. The interpenetration of Catholicism with political ambitions and with worldly aims of kingly power tended to weaken its spiritual life. History has but recorded its verdict on the unreality of the Western claim to catholicity by adopting the

³ See art. INFALLIBILITY.

limiting epithet 'Roman' in its designation of the Catholic Church of the West.¹ The narrowness of its conception of what constitutes catholicity abides, even when we take into account its splendid annals of saintliness, piety, missionary zeal, its strength and compactness of organization—a bulwark in dark and barbaric ages conserving spiritual truth and light against the powers of evil—its enduring services in the task of redeeming the world from atheism and saving it from sin, and further in its self-renouncing ministries to the poor, the sufferers and outcasts of mankind. From age to age it has received warnings and calls to forsake the path of earthly domination and to seek only the unity and freedom of the spirit; but its answer is the dogma of papal infallibility, which is the admission of a fatal weakness—a bold but despairing attempt to enforce an authority which cannot endure the light of reason and spiritual liberty. Paganism and traditionalism are the perils of most forms of faith—the one, according to Sabatier,² finding 'its most obvious and crudest expression in Catholicism, in the constitution of its priestly hierarchy, in the *opus operatum* of its sacraments, and all the superstitious practices with which Catholic devotion persists in overlaying itself'; the other revealing itself in the Catholic apotheosis of the past—whether the history of a period or the body of custom, tradition, and dogma—which in the course of time becomes a hindrance and a despotism fatal to spiritual progress. And the view that the Western Church has been materialized and narrowed by its persistent policy of confining the Spirit within forms and rites and hierarchical authority, and by its fatal distrust of reason and conscience, is confirmed as we trace the attitude of Rome to the developments of Christian thought in the ages under review.

3. Development of theology and religious thought in the Church of the West.—(a) *Early period: Augustinianism and influence of Greek theology.*—The evolution of the Christian Church into the unity of Catholicism was not entirely a development of organization necessitated by its progress over the Roman Empire and moulded by its imperial environment and its secular relationships. The external and institutional form of the Latin Church cannot be explained if the influence of its theological standpoint and its fundamental dogmas is ignored. Its claim to authority over the soul and conscience of mankind was based on a type of theology to which the distinguishing epithet 'Latin' has invariably been applied. From this point of view Augustine is more palpably the founder of the Western Church than St. Peter. This remarkable thinker³ is revered by the Catholic and the Protestant alike: by the former because of his emphasis on the authority of the Church and the impossibility of salvation outside the Church, by the latter because of his assertion of the divine sovereignty and of predestination (*q.v.*) and his interpretation and practice of evangelical and experimental piety. But, though it is true that his personal witness to Christianity lifts him beyond all the divisions of Christianity, the fact remains that he devoted all the resources of his intellect and spiritual zeal to the service of the Catholic Church, which he believed to be the only possible medium of salvation to the world. The grace (*q.v.*) which saved came indeed from above,

but it was deposited with the succession of bishops who alone were empowered to administer it to the elect. His God was essentially a deistic or transcendent Deity dwelling apart from mankind and regulating human affairs by His commissioned agents, the hierarchy of the Catholic Church. Original sin (*q.v.*) was an effectual barrier to man's reconciliation with God; and Augustine placed a greater emphasis on the external rite of baptism (*q.v.*) as a mode of regeneration than on the merits of Christ. The power of sin which is seated in the will could be broken only by the agency of the Church as the appointed channel of grace. In fact, 'grace' takes the place of Christ in Augustinian theology: on the one hand, it is the sovereign will of God who decrees the salvation of the elect, and, on the other, 'a kind of spiritual potency' deposited in the hierarchy and mediated by the priesthood in the sacraments to the people. Only a portion of the race could be generated in baptism; the residue were doomed to eternal punishment. It was by these views that Augustine made possible the development of the Church of the 5th cent. into the papal empire of the Middle Ages. There is hardly a distinctively Roman doctrine or practice—purgatory, the intermediate state, the celibacy of the clergy, the invocation of saints, reverence for relics and images, the distinction between mortal and venial sins, the loss of unbaptized children—which cannot be found at least in germ among his opinions. With all its defects, however, this can be said in favour of the Augustinian theology, that it consolidated the Western Church, its thinking and its discipline, and saved it from the wave of Muhammadanism which overwhelmed the Church of the East. Augustine was powerfully influenced by the Platonism of the Alexandrian teachers, especially in his earlier life; but his mature treatises show but scanty traces of sympathy with the standpoint of the Greek theologians and are obsessed by his theory of the Church, which in its rigidity and narrowness reveals the mind of a great ecclesiastic rather than of a profound philosopher.

It has often been asked if the principles of Greek theology influenced the thought of the West. While it is universally agreed that the Latin Church borrowed freely from the customs and ritual of paganism, to what extent was its dogmatic teaching affected by the views of Clement of Alexandria, who proclaimed the continuity between Christianity and the higher thought of the Greek philosophers? The Platonists of Alexandria derived this idea of continuity from the truth of the divine immanence (*q.v.*) in human nature, taught that the Incarnation revealed the organic union between God and man and was the real atonement for sin, asserted that there was no opposition between reason and faith, regarded the Church as a community whose spiritual life was that of the Logos (*q.v.*) and its sacraments as symbols of inner processes, and proclaimed that heresy was an aid to the discovery of truth. Origen¹ followed with a profounder learning and philosophic insight to lay the foundation of the doctrine of the Trinity in his teaching respecting the 'eternal generation of the Son.' Athanasius (*q.v.*) shaped in an atmosphere of controversy the orthodox Trinitarian formula against the deistic interpretation of Arius, and secured the insertion of the vital term *ὁμοούσιος* in the Nicene symbol. His triumph is for ever significant, and the creeds of Christendom show that Greek thought fulfilled a providential task in the reconciliation of Christianity with reason, while the genius of Latin Christianity built up on the model of the empire the government, law, and constitution of the Church. In other words, the Western Church, while in the

spirit of Tertullian's *Prescription of Heresy* always hostile to heretical thought¹ and the independent activities of reason, owed to Greek theology the intellectual gift, the philosophic insight and accuracy of definition, the logical subtlety and lucidity by which alone the truth could be established on a firm basis. It owed its symbols and the power of defending them, its doctrine, and its apologetic to Greek theology; but the findings of Greek theology were held to be valid only when enforced by its authority. Without the benediction of the hierarchy, no truth, no new conception of truth, could be tolerated. Indeed, there were certain principles of Greek thought, such as the essential kinship of man with God, which the Western Church has never regarded with complete conviction; rather it has clung to the conception of the infinite distance between the human and the divine which was characteristic of the theology of Antioch. It has to be remembered that, when Greek theology passed into the Western Church, new peoples and races were coming to the front and were eventually to be won to Christianity; hence the method of presenting the simpler type of Christian thought based on Church authority, rather than the more intellectual and philosophic aspects of the truth, might be justified on grounds of expediency. It remains true, however, that the earlier Greek theology of the Alexandrian type has never really rooted itself in the consciousness of the Latin Church; its breadth and universality of vision, its synthesis of the human and divine, has illuminated but not transformed the dogmatic teaching of Catholicism. With Clement and Origen Rome has shown less affinity than with the pseudo-Dionysius. The *Celestial Hierarchy* (translated by John Scotus Erigena), with its ranges of angelic intermediaries between God on the one hand and the bishops and deacons of the Church and finally common humanity on the other, and with its path to God by the practice of Oriental asceticism, was the very negation of the sane and logical teaching of the Christian Platonists of Alexandria.

(b) *Mediæval period: scholasticism.*—The age of Charlemagne marked a low stage of religious thought, although the culture of John Scotus Erigena,² based on his knowledge of Greek and in particular of Plato and Origen, enabled him to produce a philosophy of religion far ahead of his times. Alcuin of York was a popular teacher, but he was not an original theologian and has a larger place in the history of the Roman liturgy as a compiler of the Lectionary and works of private devotion. It is significant that in the 9th cent. the dogma of transubstantiation³ first became the subject of formal discussion. Neither Cyprian nor Tertullian was an exponent of a materialistic conception of the Lord's Supper, while Augustine held that its benefits were available only for the elect. To the monk Paschasius Radbertus, who wrote about 831 a treatise *De Corpore et Sanguine Domini*, belongs the credit of introducing the view that the presence of Christ was not in the soul of the worshipper but in the eucharistic elements. On the other hand, the early Middle Ages had rejected the image-worship of the degenerate East, and it was at a later period, when society was in the state of confusion and unrest caused by the invasions of Huns and Northmen, Danes and Saxons, that a reaction in favour of the Church as the one stable institution and refuge in a world of chaos took place: the great cathedrals were built; gifts of nobles and people were lavished on majestic Gothic temples; art ministered to religious devotion in music, in the impressive ritual and fair

pageantries of worship, in the composition of hymns like the *Dies Iræ* and the *Stabat Mater*,¹ which broke with the classic models of poetry, and in the mysteries and miracle-plays staged within the sacred walls. Above all, the scholastic theology of which Anselm² was the intellectual offspring expressed the wide-spread feeling that the dogma and ritual of the Church must be harmonized with the intellect and adjusted to the conscience of mankind. If monasticism fostered piety and devotion, scholasticism in schools and universities endeavoured to establish the Christian Church and its doctrine on an intellectual basis. Abelard (*q.v.*) resisted the blind acceptance of traditional dogmas, while sects like the Cathari and Waldenses (*q.v.*) upheld the principle that the Spirit of God was not limited in its operations to the Church but illuminated the soul of man. The supporters of the authority of the Church became alarmed by the prevalence of such teaching. The condemnation of Abelard at the instance of the saintly Bernard of Clairvaux was upheld by the Council of the Lateran (1215), which formally decreed the dogma of transubstantiation. Fourteen years later the Council of Toulouse declared it a sin for the laity to possess a Bible or to read the Psalter or the Breviary in the vernacular. *The Book of Sentences* by Peter the Lombard became the accepted standard of orthodoxy. And finally Thomas Aquinas (*q.v.*) took up the task of reconciling faith and reason and, as a counterblast to the Platonism of Scotus Erigena and Abelard, called to his aid the *a posteriori* method of Aristotle.³ Rejecting the philosophy which had always produced rationalism—so he believed—by its search for reality in an ideal realm, he based his argument on the views of a thinker to whom reality lay in the actual physical universe. To Thomas Aquinas the ground of truth was in the visible Church, the sole channel of salvation, and in its dogmatic system with its corollaries of transubstantiation, purgatory, and indulgences.⁴ The Roman Church has never abandoned the Thomist theology; and whenever, as in this generation, the human reason, curious of the secrets of the universe and enlightened by new discoveries and new aspects of truth, strives to relate traditional dogmas to the larger knowledge won by science and historical research, the papal authority bases its defence of accepted truth on the conclusions of the *Summa Theologiæ*.⁵

(c) *The Reformation Age to modern times: Protestantism, Rationalism, Modernism.*—The attempt of Aquinas to compromise with reason came too late. Reason, which had been flouted and repressed, took its revenge. The papacy had flourished on the ignorance of the masses. It had built itself up on a distrust of humanity, which was believed to be unequal to self-government and to stand in need of a controlling visible authority. In the dark ages, let it be admitted, there were grounds for this view of mankind. The world was in the melting-pot. The Church ministered to a great need. By the Crusades it introduced men to new lands and gave them knowledge of other nations than their own; by the worship of relics it cherished a vivid consciousness of the past; by the veneration of the saints it contributed to human reverence; by its art and ritual it ennobled and enlightened personality; by monasticism it ministered to the soul of the individual and recognized its claims; and by scholasticism it quickened the processes of the human mind. But a new order had arisen, and the Church, which had

conferred indisputable benefits on the world, was found unequal to the opportunity. The world had widened; new nations and new languages had appeared. Latin was no longer a medium of communication for the Western world. Wyclif's translation of the Scriptures into homely English had opened the way to a new authority. The Bible, not the Church, was the source of revelation. Mysticism, whether of the Frankish saints belonging to the order of St. Victor, who used the tender and almost voluptuous imagery of love, or of the German saints like Eckhart and Tauler, whose expositions were cast in a sterner and more ethical mould, impressed on the world the truths of the immediate intuition of God by the soul and the divine immanence. The air of Europe was alive with new currents of spiritual and intellectual power. Even prior to the fall of Constantinople in 1453, when Greek scholarship and learning sought a fresh habitation in the cities of Europe, the Renaissance had inaugurated in Italy under Petrarch and Boccaccio the cult of beauty and classical literature and evoked a new sense of the many-sided interest of the present life—in a word, the humanism which was henceforth not only to transform the intellectual and ethical life of society as a whole but also to modify the Christian outlook on the world and the course of Christian thought and theology. It was on the intellectual side an expression of the individualism which within the realm of the spirit ecclesiasticism had failed to quench. By the work of Wyclif and Hus, by evangelical movements like that of the Waldensians, by the mysticism of the cloister and the pulpit and lay-societies such as the 'Friends of God' in Germany,¹ the individual soul had expressed its spiritual conviction and ideals and the way had been prepared for a revolution in Christian thought. Luther² entered into the heritage won for spiritual freedom by Wyclif and Hus, the latter of whom had died for the rights of conscience. The Reformation was not a break but a fresh stage in the evolution of Christianity. It was the re-assertion of vital principles of faith which had found expression from time to time in the history of the Church from the days of St. Paul onwards. In essence, the position taken up by Luther was not the negative conviction that certain abuses which called for destruction had crept into the Church: he declared afresh the positive conditions of human salvation. He began with the people, not the cloister, nor the hierarchy. It is true that he rejected the claims of Rome as the primal and absolute authority upon whose will depended the destiny of the soul; but his rejection arose from his broad and clear conception of the value of the individual soul. His emphasis on justification by faith was in effect a plea for human rights—the right of access to God and the right of communion with Him as the condition of ultimate salvation. In other words, Luther came into conflict with the Latin Church because it was founded on ideas repugnant to the Christian conscience. The practice of selling indulgences by which the sinner obtained remission of the 'temporal' penalties of his offence was to him only one among many results of the false assumptions on which Rome based her claims, viz. the supreme authority of the episcopate as constituting the Church and the denial of spiritual privilege to the laity (*q.v.*): He opposed the fatal distinction which the Mediæval Church had emphasized between things divine and human as inherently incompatible with each other—the distinction which had created the opposites, Church and State, clergy and people, nature and grace. It followed, if this dualism was erroneous,

that a layman had the power to interpret the written revelation which hitherto had been claimed as a priestly prerogative. Finally, from these premises flowed the truth of private judgment (*q.v.*)—a position upon which Melancthon temporized when he appealed for the retention of a visible authority while admitting its human origin. In Switzerland Zwingli (*q.v.*) and Calvin¹ were the outstanding personalities of the new movement. The former by his emphasis on the divine immanence re-affirmed the standpoint of Greek theology, and he was Greek in his denial of original sin, in his assertion of the salvability of the heathen, and in his doctrine of the sacraments as symbolic and memorial. Calvin stood for order and discipline, and founded a Church the polity of which took root in Scotland, the Netherlands, in Germany, in Switzerland, in France among the Huguenots, and in England among the Puritans. He held that the Church consisted of the elect and that the clergy were endowed by the Holy Spirit in ordination with powers which gave them authority over the people. It was, however, less an ecclesiastical administrator than as a theologian that he left his mark upon the world. His rigid insistence on the verbal inspiration of Scripture, his theory of the fall and election, his rejection of the doctrine of immanence, his assertion of the divine sovereignty which rendered God remote from nature and humanity and made progress depend on His arbitrary will, are the familiar elements of his theology. As compared with Zwingli, he continued the Latin tradition, but, on the other hand, he was essentially Protestant in his doctrine of the individual who, though his conscience was controlled by the clergy, yet owed his ultimate destiny to the sovereign majesty of God—a theory which made for human freedom and was destructive of clerical tyranny, while it disposed at once of the customs of image-worship and Mariolatry and brought to the profession of the Christian a robust ethical standard based on the teaching and example of Christ. As Thomism was wrought into the texture of Dante's *Divina Commedia*, Calvinism received a majestic setting in the epic of Milton, while Bunyan made an appeal alike to the humblest and to the most enlightened intellects by his immortal delineation of the Reformed theology in the *Pilgrim's Progress*.²

Protestantism left its mark on Catholicism by producing the kindred movements of Jansenism (*q.v.*) and Gallicanism (*q.v.*), the former for ever to be associated with Pascal as the latter was thenceforth to be distinguished by the great name of Bossuet. Pascal (*q.v.*) opposed the Jesuits with much of the Calvinistic fighting spirit and stands in the line of Augustine and Calvin as a theologian, though at heart a melancholy sceptic who never succeeded in harmonizing his beliefs with the dictates of reason and conscience. Calvinistic Protestantism had left to Christian thought the necessity of defending the Scriptures in an age of cold and unsparing rationalism. The *Augsburg Confession* (1530) and the *Institutes* of Calvin had proclaimed Scripture to be the very word of God—in fact it was the infallible external authority by which Protestantism had superseded the authority of Rome. The 18th century, the age of Voltaire and Rousseau in France and of the English deists,³ notwithstanding its opposing tendencies—Cambridge Platonism (*q.v.*) upholding the divinity of reason, natural theology contesting the supremacy of revealed religion, new scientific discoveries revealing the reign of law in nature, the attack on the miraculous elements of Christian truth—was not wholly the barren and unspiritual

epoch which it is often supposed to have been. The controversy aided the progress of vital Christianity in the sense that the deists were really preparing the ground for a sounder and more rational conception of the divine nature and government, while their opponents remained loyal to the truth of a divine revelation which had been made directly to the human soul. In fact, the evangelical revival under Whitefield and Wesley¹ provided a memorable and impressive demonstration of the truth which the orthodox apologists had propounded, by bringing to the soul of the 'common people' a divine salvation and assurance of pardon which were declared to be available for simple faith. The 'saving faith,' which enabled the sinner by immediate contact with God to find peace and the strength for a new life of ethical holiness, was the mighty note upon which a renaissance of spiritual religion sounded abroad its message of hope for a world in transition.

The Illuminism of Germany² may also be claimed as a renaissance of the spirit, if on intellectual lines, by virtue of its proclamation of the gospel that the moral consciousness is divinely inspired, and that the Divine Spirit, acting through the letter of Scripture but not bound to it, is universally revealing Himself in history. But the witness of Lessing (1729-81) was of less value as an exposition of the Christian view of history than that of a greater thinker, Schleiermacher (*q.v.*), to whom belongs the credit of originating the critical method as applied to Scripture and religion. His clear grasp of the solidarity of the race, his disbelief in the individualism of Protestant and Catholic as expressed in the doctrines of election and probation, his loyalty to the Church as an institution which expressed the idea that man is saved as the member of a redeemed family, and his conception of the progressiveness of revelation place him in the succession of Greek theologians as they make him the most formative of the Christian thinkers of the last century. His firm conviction of the immanence of God powerfully affected the art, literature, philosophy, and science of the 19th century. Romanticism, the poetry of Wordsworth and Shelley, the truth of evolution as expounded by Darwin, the art of Turner and his interpreter Ruskin, the Christian socialism of Maurice (*q.v.*) and Kingsley, Hegelianism,³ and the Neo-Hegelianism (*q.v.*) of the Cairds and T. H. Green (*q.v.*)—all these phases and movements indicate the prevalence of a new spirit. The Victorian Age was in effect a period of revolt. The triumph of the critical and scientific method was not less marked in the realm of theology than in other fields of knowledge. De Maistre⁴ (1754-1821) in France and John Henry Newman (*q.v.*), from quite different standpoints, opposed what appeared to them the deadly liberalism of Christian thought. Tractarianism resulted in a revival of mediæval practice and ritual in the worship of the Church of England; but Anglo-Catholicism has never, like Roman Catholicism, repudiated the methods and results of modern criticism. Mediævalism in the Anglican Church has shown itself in ecclesiastical observance and in a revival of the Catholic view of the continuity of orders and ecclesiastical tradition, but the Erastianism of the English Church has been a safeguard against the triumph of a narrow orthodoxy and has in fact aided the forces of liberal thought. As we have already seen, the Roman Church under Pius IX. and his successors has shown itself impervious to the newer currents of theological thought. The critical method is anathema to

Rome. Science, comparative religion, psychology, have their place in the world, but are banned by the infallible fiat of the Church, whenever Catholic dogma is subjected to the test of their new light.

Newman paved the way to Modernism (*q.v.*)—the name given by Pope Leo XIII. (1878-1903) to the liberalizing movement within the Roman Church—by his famous *Essay on the Development of Christian Doctrine* (1845, new ed. 1878), but the logical issues of his attempt to bridge the chasm between Protestantism and Catholicism were repudiated by the papal see when they were expounded by Alfred Loisy and George Tyrrell. Pius X. (1903-14) in his decree *Lamentabili* (July 1907) condemned the 60 propositions in which he summed up the Modernist doctrine, and by his encyclical *Pascendi* shortly afterwards reasserted the scholastic dogmas of the Middle Ages as the necessary faith of a true Catholic.

The drift to Rome of individual mediævalists within the Anglican pale will continue, but there are no signs of any approach to reunion between Rome and Anglicanism, the validity of whose orders received contemptuous rejection in the bull *Apostolicæ Curæ* (1906). Roman Catholicism and the Holy Orthodox Church remain disjoined, apparently without the slightest sign of a possible reconciliation. In the Reformed and Protestant Churches the cause of intellectual and religious freedom has triumphed beyond the reach of reaction, while there are symptoms both in England and in Scotland of a growing movement towards reunion—in England taking the form of a proposed federation of the Free Churches, which inherit the Protestant tradition, while in Scotland the union of the Established Church and the United Free Church is widely desired and anticipated. Generally speaking, among such Churches the necessary re-adjustments of religious thought and restatements of doctrine are likely to be carried through without any controversial strain, while the authority of the Scriptures will be associated with a more profound and broader view of the Spirit of Truth as 'the Lord and Giver of Life,' not only to the writers and 'holy men' of the Scripture dispensations, but to all the saints of Christ in all ages and in the future. Already with this larger conception of revelation as the perpetual work of a controlling Spirit who is the eternal source of light amidst the fluctuations of dogmas, institutions, and forms, the religious outlook of Western Christendom has tended to a clearer vision of the social and spiritual needs of humanity. The reaction of the European War, which has affected nearly every country in the world, has deepened the sense of international solidarity and has created the ideal of a League of Nations. Whether this new vision of brotherhood will result in a new synthesis of the rival ideals of Catholic and Protestant remains to be seen. For the moment the vision of a new Catholicism of Christendom appears to be both less convincing and less capable of realization than that of a political League of Nations. The old Catholicism, in the sense of ecclesiasticism, is dead or dying. So long as Rome claims absorption into her fold as the price of Christian reunion and so long as she asserts her mediæval standard of authority, she will stand outside the progressive movements of social and spiritual thought. The trend of the modern mind is against any external authority, whether of pope or priesthood or sacred book; and this is in effect a reaction against the extravagant claims which both Catholic and Protestant have put forth on behalf of their respective standards of authority—claims which offend the moral consciousness and intellect of mankind. Nevertheless, the Holy Catholic Church and the written Word

¹ See artt. EVANGELICALISM, METHODISM.

² See artt. ENCYCLOPEDISTS, ENLIGHTENMENT, LESSING.

³ See artt. HEGEL.

⁴ Cf. his work *Du Pape*², Lyons, 1819.

alike reveal the directing and controlling authority of the Spirit of Truth: the one proclaims the reality of the *consensus sanctorum*—the community of experience and witness—in the life of Christendom; the other declares the reality of God's perpetual self-revelation in the history of the race. In this corporate and individual response to the Spirit of God, of which both the Scriptures and the Church as an institution are witnesses, is to be found the ground of our hope for mankind. The future lies with the religion of the Spirit of Christ which under many forms of worship, systems of discipline and organization, with interpretations and settings suited to the various peoples of the world, will yet embody the Christian idea. The essence of Christianity is not to be confined to this or that dogma, creed, or institution, but is at once a spiritual experience and an activity of love—a kingdom of heaven within—inspired by the unifying control of the Spirit of Truth over the individual and collective consciousness of mankind. However desirable the consummation of an organic union of Christendom may be to many minds, a review of the history of the Church affords but scanty support to the idea that this result is attainable, or that, granting the possibility of its attainment, it would minister to the highest welfare of humanity. On the other hand there is a wide-spread and growing assent to the interpretation of both Scripture and history which favours a unity that will be not less real because it will co-exist with diversity—the *ἐνότης πνεύματος* for which St. Paul intercedes—*the oneness given by the Divine Spirit who at once overrules and is immanent within the whole body of the faithful upon earth.*

LITERATURE.—The leading authorities have already been given under articles referred to above. For the general history of the Western Church the reader should consult lists under artt. CHRISTIANITY, PAPAcy, CHURCH; for doctrine CHURCH, DOCTRINE OF (Roman Catholic), CREEDS, CONFESSIONS, and special phases under their own heading—*e.g.*, ARIANISM, NESTORIANISM, etc.; for worship SACRAMENTS (Christian, Western), EUCHARIST, etc.; for law LAW (Christian, Western). In a useful chapter entitled 'Bibliographical Suggestions' in Williston Walker, *A Hist. of the Christian Church*, Edinburgh, 1919, the reader will find the most recent literature in Church History indicated and classified. R. MARTIN POPE.

WHEEL.—See JEWEL (Buddhist), PRAYER-WHEELS.

WHEEL OF THE LAW.—This Buddhist expression is derived from the earlier Buddhist legend of the Mystic Wheel. This legend, or edifying fairy tale, is told in almost identical terms in several of the most ancient Buddhist documents.¹ It is none the less essentially Buddhist because several details (the ethical, not the essential ones) can be traced back to details in one or other of the pre-Buddhistic sun-myths. The Wheel is said to be one of the treasures of a righteous king who rules in righteousness; and it is because of that righteousness that the Wheel appears. The legend says:

'When he [*i.e.* the king; the names of course differ] had gone up on to the upper storey of his palace on the sacred day, the day of the full moon, and had purified himself to keep the sacred day, there then appeared to him the heavenly treasure of the Wheel, with its nave, its tire, and all its thousand spokes complete.

Then the king arose from his seat, and reverently uncovering his robe from his right shoulder, he held in his left hand a pitcher and with his right he sprinkled water over the Wheel, as he said: "Roll onward, O my lord the Wheel! O my Lord, go forth and overcome."

Then the wondrous Wheel rolled onward toward the region of the East. And, after it, went the king with his fourfold army (cavalry and chariots, war-elephants and men). And wheresoever the Wheel stopped, there too the king stayed, and with him all his army in its fourfold array.

Then all the rival kings in the region of the East came to the king and said: "Come on, O mighty king! Welcome, O mighty

king! All is thine, O mighty king! Do thou, O mighty king, be a Teacher to us!"

And the king said: "Ye shall slay no living thing. Ye shall not take that which has not been given. Ye shall not act wrongly touching the bodily desires. Ye shall speak no lie. Ye shall drink no maddening drink. And ye may still enjoy such privileges as ye have had of yore."¹

Then all the rival kings in the region of the East became subject to the king. And the wondrous Wheel having plunged down into the great waters in the East, rose up out again, and rolled onward to the South . . . and to the West . . . and to the North [and all happened in each region as had happened in the region of the East].

Now when the wondrous Wheel had gone forth conquering and to conquer over the whole earth to its very ocean boundary, it returned back again to the royal city and remained fixed on the open terrace in front of the entrance to the inner apartments of the great king, shedding glory over them all.²

So far the appearance and work of the Wheel. In another passage we are told that on the approach of the death of the righteous king the Wheel falls from its place, and on his death or abdication disappears. Should the successor carry on the Law of the Wheel, it will reappear and act as before, and this may continue for generations. But, should any successor fail in righteous rule, then the country will fall gradually into utter ruin, and remain so for generations till the Law of the Wheel has been revived. Then only will the Wheel reappear and with it wealth and power and the happiness of the people. All this is set out at length in the *Chakka-vatti Sīha-nāda Suttanta*.

The *Chakka-vatti*, literally the 'Wheel-turner,' and by implication the ruler who conducts himself (and whose subjects therefore conduct themselves) according to the Law of the Wheel, is the technical term for the righteous king or over-lord. It has not been found in any pre-Buddhistic literature; and, though it is so frequent in later books, it has, in Hindu works, lost its ethical connotation, and simply means a war-lord, a mighty emperor, 'one who unhindered drives the wheels of his chariot over all lands.' But it should be noticed that the wondrous Wheel of the Buddhist legend is not really a chariot wheel. The idea of sovereignty is no doubt linked up with it. The Wheel, however, is a single disk, not one of a pair. And it is very clear that it is really a reminiscence, not of a chariot wheel, but of the disk of the sun, which travels over all lands from sea to sea and sheds glory over all. By the pouring of new wine into the old bottles, it is the sun-god himself, transmuted into a forerunner of the king of righteousness, whose rule of life brings happiness to all.

This is the legend made use of to give a title to the doctrine of the reign of law, the basis of the reformation we call Buddhism and which the leaders of that reformation called 'the Law.' The discourse summarizing this doctrine, the first discourse delivered by the founder of the new movement, is entitled 'The Setting in Motion onwards of the Wheel of Law' (*Dhamma-chakkappavattana*). The allusion is to the action of the king of righteousness in the foregoing legend when he baptizes the Wheel, and exhorts it to roll onward, to go forth and overcome. The allusion is apt; and it gains both in poetry and in its appeal to the mental attitude of the time by the irony with which it enlists the service of the ancient and repudiated sun-god in the propagation of the Buddha's doctrine that the gods too are under the domain of law. Just so was Brahmā made into a convert to the new teaching, and the old god of war and drink, the mighty Indra, had been transmuted into the peace-loving and sober Sakka, devoted to the doctrine of the reign, not of divine whim, but of law.

Very naturally the early European writers on Buddhism, ignorant of the legend of the Wheel,

¹ On this phrase see *Dialogues of the Buddha*, ii. 203; *Kindred Sayings*, i. 15.

² *Dialogues of the Buddha*, ii. 202-204.

¹ *E.g.*, the *Mahā Sudassana Suttanta*, *Dīgha*, ii. 172; the *Chakka-vatti Sīha-nāda Suttanta*, *Dīgha*, iii. 61.

and ignorant also of the doctrine of the reign of law, completely failed to understand this curious title of the oldest summary of the new teaching. It would be wearisome to point out all their mistakes. Perhaps the worst of the many blunders is the identification of the Wheel with what Anglo-Indian writers call, quite erroneously, the praying-wheels of Tibet. They are not so called by any authority, Tibetan or Buddhist. They are not praying-wheels, but wheels of good luck, containing an invocation to some deity—the contrary therefore to the old doctrine of the Wheel. We may learn some day what the original meaning in Tibetan of *Om mañi padme Hūm* really was. The phrase is not likely to be less than about 1400 years later than the time of the Buddha. And it is most unlikely that, after that long lapse of time, any memory of the legend of the Wheel or of its adoption to the title of the First Discourse had still survived. To judge from what we know of Lāmaism, the Tibetans had quite forgotten that, in early Buddhism, the reign of gods had been superseded by the reign of law (or, to express the same fact in modern technical terms, that animism had given way to normalism).

It remains to add that some centuries after the canon had closed we find also another use of the figure or simile of the wheel. Only the wheel is here, not the disk of the sun, but a chariot wheel. The figure is used of the circle or cycle of rebirths. Mrs. Rhys Davids has pointed out the use of this simile in Greek and Sanskrit,¹ and it has since then been discovered in Pali.² This is in harmony with the doctrine of the Wheel of Law in early Buddhism, but it is a supplementary idea, and has a different origin, and is never called the Wheel of the Law. It is *samsāra-chakka*, not *dhamma-chakka*.

WIDOW.—See MARRIAGE, SATĪ.

WIFE.—See MARRIAGE.

WILL.—The word 'will' (Gr. *βούλησις*, Lat. *voluntas*, Germ. *Wille*, *Wollen*, Fr. *volonté*) is used in a wide variety of senses by philosophical and psychological writers. In the widest sense it means all the 'active powers' which the Aristotelian bipartite division in psychology contrasted with the 'intellectual,' and so includes all striving, appetite, and interest, even at an infraconscious level. In the narrowest sense it is taken to mean, or at least to imply, deliberate and responsible choice.

1. **Physiological basis.**—The analysis of will in the widest sense requires the analysis of the physiology of movement. Physiologists base their conceptions upon reflex action, and then discuss the integration of reflexes in the brain and spinal cord. The unit of this explanation is the simple reflex. The stimulation of an end-organ *must* issue in movement, and a simple reflex is the simplest possible response of an organism to stimulation. The simplicity of a simple reflex, however, is the result of analysis rather than a fact of observation. What we find in fact is a combination of reflexes into reflex patterns of various kinds.

All reflexes take place through a chain or are of neurons which passes through the central nervous system, and it is important to notice the differences

¹ *Visuddhi Magga (PTS)*, 1920, p. 198.

² *JRAS*, 1894, p. 388; cf. also Mrs. Rhys Davids, *Buddhism*, p. 98, and art. *PAṬICCA-SAMUPPĀDA*, vol. ix. p. 674.

between the stimulation of a bare nerve-trunk and of a reflex arc. The latter shows slower speed, a marked 'after-discharge,' irreversibility of direction, greater liability to fatigue, notable inhibition, and 'refractory phase,' together with a very marked response to cumulative stimulation where the stimuli are too weak to lead to movement severally. These differences, taken conjointly, show that reflex action, so far from being a mere conduit of nervous discharge, is, even in its simplest form, a kind of response in which the organism counts for more than the stimulus.

Simple reflexes are allied when two or more work together. They alternate, *e.g.*, in the rhythmic contraction of the flexor and extensor muscles in walking. They compensate one another, inhibit one another, and form reflex patterns of great variety. The main points to notice about them, however, are (1) the way in which they reinforce one another in their conjoint eventual discharge through a final common path, and (2) the co-ordination of them in time. The first phenomenon is so marked that some observers believe that reflex patterns work on the 'all or nothing' principle. The second appears in its primary form in the successive stimulation of antagonistic reflexes, and many physiologists suppose this temporal co-ordination to be the principal office of the central nervous system.

This general conception applies to all reflex movements, and its connexion with will becomes manifest when we consider the relation between the nerve-endings specially adapted to the reception of distant stimuli and the muscles of the skeletal system. These skeletal muscles (with unimportant exceptions) are the voluntary ones, and they are intimately connected with senses like sight or hearing which are affected by stimuli from a relatively distant point of origin. It is easy to interpret these facts in a way that has great significance for the economy of organic behaviour. To use Sherrington's terms, while some reflexes are 'consummatory,' those connected with the skeletal muscles are for the most part 'precurrent.' They do not enjoy, but anticipate. The union between sight and the skeletal muscles enables the animal to adapt itself in advance. The end of its action, to be sure, is consummatory, swallowing or being swallowed; but the means to this end is a preparation in the way of movement—crouching, stalking, running, leaping. It is significant in this regard that the head is the organ of the 'distant' senses and of balance. For the head is the rudder of the body, and it steers the quicker in proportion as the path of the nervous impulse to the brain is shorter.

Psychology is concerned with consciousness, first and foremost, and the reasonable inference from this evidence is that consciousness continues the work of the nervous system. Pleasure gives an added zest to action; pain is the body's spur to release from its distress. Consciousness, again, implies a certain 'togetherness' of experiencing. A certain minimum of memory is held together in our consciousness, and this acquired experience is at the behest of action. Consciousness, once again, is most acute in connexion with the organs of exploration, and the connexion between eye or ear or finger-tip and the skeletal or voluntary muscles indicates that consciousness widens the range of precurrent adjustments especially in point of time.

2. **Instinctive action.**—The theory of impulse and instinct is the natural corollary to this account of neural integration. The connexion between reflexes and impulses or appetites is plainly very close indeed, and instincts are the great racial patterns of co-ordinated action. The moor-hen has a diving 'set' in its muscles when it is little

more than a fledgling, and it dives as soon as cause and opportunity offer.

The question how far human action or the action of the higher animals is fundamentally instinctive is still hotly debated, but the debate tends to become verbal since the partisans of the instincts insist upon the indefinite pliability of these responses, while their opponents try to narrow instincts down to mere racial routine. The other point in the dispute is the relation of nature to nurture, and this also is a thorny topic which a wise man leaves alone. It is clear, however, that most human activities, whether or not they have become habitual, are acquired in individual experience (even if they are grafted upon a primitive instinctive root), and all these problems are highly speculative in comparison with the fact of the reflective adaptation of human beings to their circumstances. Again, there is another reason why the analysis of will suffers when psychologists devote themselves exclusively to speculative theories concerning the instincts. However important the instincts may be, and however closely allied with normal human perception and action, the consciousness in instinctive behaviour does not differ in kind from acquired or from reflective consciousness, and its principal features cannot be discerned so readily at the instinctive level of consciousness as at others. It is best, therefore, to try to give a direct psychological analysis of the consciousness in ordinary human action.

3. Ideo-motor theory.—Probably the simplest type of conscious action is that which is called ideomotor. This occurs when the thought of a movement leads directly (so far as consciousness is concerned) to the execution of the movement. A great many movements need no other explanation. Those who take the injunction 'Kill that fly!' seriously begin hostilities as soon as they see the fly; and 'Eight o'clock and time to get up' is frequently a sufficient and the only mental prelude to getting out of bed in the morning.

These instances show that the idea of a movement tends of itself to the execution of the movement, and some psychologists, generalizing somewhat hastily, have concluded that all voluntary action is ideomotor and nothing else. According to this theory, we learn from impulse, instinct, imitation, and random muscular play what movements can be executed. The immediate antecedent of any movement which is consciously directed, however, is the temporary dominance in our consciousness of the idea of that movement; and this idea is always the cause of the movement.

This theory is plausible because the idea of a future action is a *sine qua non* of voluntary action of any kind, but there are serious objections to it. (1) Our ideas of movement are usually suffused with feeling and tense with conscious endeavour. It is a mistake, therefore, to suppose that these feelings, desires, and strivings do not play their part as directly and as effectually as the bare idea of movement. (2) There is universal testimony to prove that much of our action does not seem to be merely ideomotor. The bare idea of movement is sometimes merely an idea. We may have to strive most resolutely to bring ourselves to the point of acting—i.e., we may have to reinforce the idea by endeavouring after its end. And sometimes we have to choose between several conflicting ideas of movement simultaneously present to minds.

Since the ideomotor theory does not dispense these facts (it would not be worth considering if it did), it has to provide an alternative explanation, and so it maintains that striving or choice in these cases secures the temporary dominance of some particular idea of movement. The only possible cause of conscious action, according to this way

of it, is a man's temporary single-mindedness towards the idea of the action, and his temporary oblivion of all else. Choice or striving influences the action at second remove, and causes the temporary dominance of the idea of the action.

This theory is unnecessarily complicated. We seem to ourselves to choose this or that, and not merely to attend to some idea of movement exclusively; and there is no good reason why this seeming should not be actuality. Again, the idea of our chosen course of action often does not seem to be the only alternative before the mind either at the time of choosing or afterwards, even granting that we ought to stick to our plan, after we have adopted it, on pain of inefficiency or Hamlet-like vacillation. It is false in fact, therefore, that conscious action is always preceded by this exclusive possession of consciousness. Moreover, this theory is just an attempt to save the 'strongest motive' theory with as little violence as may be. It is assumed that action must be due to the 'strongest motive'; and therefore the motive which immediately precedes the action is assumed to be either predominant or else the only one present; but this argument is circular, since there is no way of telling which motive is the strongest except by saying, *après coup*, that it was *the* motive of the action which followed in fact. Again, even if this theory could account for most specific voluntary movements, it would still be too narrow for voluntary choice as a whole. When a barrister resolves to make out a case for his client, or a journalist tries to discover the gist of Einstein's theory or of Ludendorff's influence, the movements they make in the way of speaking, writing, or travel are quite subsidiary in importance. And the ideomotor theory simply omits these cases. Movements are seldom chosen for their own sakes. They are usually chosen because they are means to an end, and the ideomotor theory is so preoccupied with the means that it neglects the end altogether.

This theory, indeed, is too intellectual; for it resolves action into the automatic effect of mere thinking, and rejects the primary and direct influence of interest, passion, and striving. This mistake is not uncommon; it permeates, e.g., the Benthamite theory of psychological hedonism (*q.v.*). To say, with Mill,¹ that 'happiness is the sole end of human action' may mean many things. It might mean, e.g., that no one, on reflexion, judges anything to be good except his own happiness; and in that case the theory would have no bearing on unreflective action. It might also mean that the anticipation of pleasure is the only possible motive for action. This form of the argument is required as a premiss in many of the utilitarian arguments, and it is preposterously false. In impulsive or instinctive action, e.g., the impulse comes first, and the gratification follows; and the banked dispositions which are the root of psychasthenia (in nine cases out of ten) must exist before there is pain in the baulking of them.

4. Reason and will.—On the other hand, many theories are not intellectual enough, for they take volition to be an affair of impulse or desire, and they leave no place for reflexion, except the recognition of means and the discovery of bad reasons for some sentimental or impulsive *parti pris*. Most of the modern theories of this type, it is

¹ Bentham's argument (*Introd. to the Principles of Morals and Legislation*, ch. i. § 1) is even more explicitly fallacious. 'Nature,' he says, 'has placed mankind under the governance of two sovereign masters, pain and pleasure. It is for them alone to point out what we ought to do, as well as to determine what we shall do. On the one hand the standard of right and wrong, on the other the chain of causes and effects are fastened to their throne. They govern us in all we do, in all we say, in all we think: every effort we can make to throw off our subjection, will serve but to demonstrate and confirm it.'

true, do not seem to have descended *in linea recta* from Hume, but Hume gave what is still the clearest and the most concise expression of them.

Reason, he says, can have no original influence on the will, for reason is either the abstract demonstration of relationships or else the discovery of causes and effects. The will, however, has to do with sensible realities and not with abstract relationships; and the discovery of causes and effects cannot concern us in the least if we are indifferent to them. Hume assumes in the next place that the difference between interest and indifference is wholly identical with the presence or absence of passion, and then he argues with perfect logic that 'since reason alone can never produce any action, or give rise to volition, I infer, that the same faculty is as incapable of preventing volition, or of disputing the preference with any action or emotion.'¹ He concludes that the so-called contrast between reason and passion is really the battle between calm emotions and sudden, tempestuous ones.

There is a double fallacy in this argument. (1) Even if reason were restricted to the means to action, and if the knowledge of these causes and effects were indifferent without emotion, it would not follow that reason was ineffective when allied with emotion. (2) Reason (unless it is robbed of this function by an arbitrary definition) can discriminate the values of ends as well as ascertain the means to them. The values that are important for action, to be sure, are those which are felt with emotion and followed with conviction, but this fact does not imply that the intellectual recognition of these values is of no account.

This consequence would not follow even if all these values were themselves emotions. That, however, is not the case. The principal values which we admit to be intrinsically good are happiness, social intercourse, knowledge, beauty, and righteousness; and perhaps also the bearers of these values—Plato, who had the knowledge, Keats, who was touched with the beauty, Cato, who did what was right, and the greyhound which leaps with the joy of coursing. Most of these values are not emotions, though all are felt with emotion. And there is another point. A man's emotion is his own; and, if nothing but emotion could touch his will, the happiness of others or the honour of his country could not influence him directly. In fact, however, we do not merely judge intellectually that another's good is worth as much as ours, but we frequently choose to sacrifice our own good to his. This personal sacrifice, it is true, is sometimes superficial only. That occurs when we choose a less obvious instead of a more commonplace personal satisfaction; and the existence of non-rational but altruistic impulses and emotions certainly lessens the gap between this theory and the facts. But often we have to accept the truth that a man may sacrifice ease, culture, and leisure to undertake work which he loathes, though he knows that his own loss is certain. For the good, he thinks, constrains him.

5. Analysis of voluntary action.—We may now analyse deliberate voluntary action. Action of this kind implies knowledge of the means which are needed, choice between alternative ends, and the belief that we can achieve, or help to achieve, the end by adopting the means. The end, to be sure, may not be wholly attainable by us, but we believe, in that case, that we can contribute towards its attainment; and, for the rest, the thought of *will* implies the thought of *can*. No one deliberately chooses anything which he knows to be utterly out of his reach. We choose between alternatives which we believe are within our power, and our choice, in the end, is a choice between conflicting values.

The difficulties of voluntary choice are due to the false perspective which nearer values may have in comparison with more remote ones, to pre-occupation with our own personal welfare and our consequent blindness towards the claims of other

people, to our lack of acquaintance with many attainable values, to our ignorance concerning the means which are necessary in fact, to the difficulty of knowing for certain which consequences are most probable, to the doubt whether some means could ever justify some ends, and so on. This subject is too wide to be treated adequately here, even in outline. And there are other complications.

(1) We usually have too little time for mature reflexion. Most of our deliberations are cut short because life is brief and the need for action clamant. We have to distinguish, therefore, between voluntary action and deliberate reflective action. Voluntary action is the genus of which deliberate choice is the species. It implies the adoption of an end (the fact of 'consent') together with belief in the possibility of attaining the end; but there need not be choice between alternatives, since we may be too much pressed for time to take account of more than the first expedient that occurs to us, and our belief may be little more than a vague expectation that something may be done on the lines we have adopted.

(2) The analysis given above was restricted to the deliberate choice of a single course of action, but will is a subtler thing than this, with a wider net. When we speak of a formed will, we mean the whole character of a man so far as it can be expressed in action. A man's habits of choice pertain to his will as well as his choice on this or the other occasion, and so do his capacities and his general aims. The formed or stable will, therefore, has to be examined very carefully in connexion with physiological and instinctive dispositions on the one hand and with conscious personality on the other, and the ramifications extend very far. On the other hand, there are limits set to it through the fact of personality and its 'tunicle' the body (to use Berkeley's phrase). We have no acquaintance with any will that is superpersonal, and, in particular, we are not acquainted with any *volonté générale*. The will of society is not a will any more than the spirit of the times is a mind. The general will, so called, means (a) that the majority of the members of a community may resolve, or act as if they had resolved, to pursue a common end which each of them furthers in his own way; and (b) that each member must take account of the other members in considering the ends to be attained and the means of attaining them. More than that it should not mean.

6. Voluntarism.—The most interesting questions arising out of the theory of will are voluntarism, or the metaphysical theory that the will is sovereign over the self or the world, and the perennial problem of the freedom of the will.¹ While voluntarism has many varieties, its main contention is either that knowledge is a phase of willing (or, perhaps, subordinate to it) or else that will is the *causa essendi* of all existing things. Knowing, we are told, must be only a phase of willing, because all speculative activities are either virtual actions or else merely delayed reactions. The psychology of development, *e.g.*, shows that knowledge is a kind of virtual action. *Am Anfang war die That*. Man's earliest and most fundamental business is just to adapt himself to his environment, and so his earliest and most important knowledge is only a retainer to this fundamental need. And it is claimed that knowledge never outgrows its small-clothes. The life of nations, broadly speaking, is the application of their knowledge in the way of machinery, armaments, navigation, and government for the ultimate purpose of maintaining human subsistence as

¹ *Treatise of Human Nature*, bk. ii. pt. iii. § 3.

¹ See art. FREE WILL.

agreeably as possible on a large social scale. The theoretical adventures of the intellect are practical in their germ and in their fruit, and belief is either action or readiness for action.

This line of argument is obviously inconclusive. Even if it be granted that man, at the beginning, had to use all his wits to keep alive, and that most of the able-bodied members of a community have still, in a way, to co-operate for this purpose, there is plainly a huge lacuna between the premisses of this argument and its conclusion. For, even if much knowledge has to be given to the necessities of action, it does not follow that all must be given. The argument, indeed, is quite consistent with the belief that knowledge, originally a servant, may become a master and reign in its own right, or that it is possible, in an ordinary human community, for many people to spend their lives in the pursuit of knowledge for its own sake, and for all members of the community to do so at some times. And the facts seem to support this hypothesis. Those who maintain that all knowledge is only a preparation for action may be invited to say what preparation for action is implied in my knowledge that Bolingbroke wore a wig, or that Sophocles was a greater poet than Dryden, and to explain why gossipy reminiscences or intellectual curiosity concerning Chinese puzzles (to mention trivial instances only) must be 'virtual actions.' They may also be reminded that practical men need not act the worse because their information is accurate. True belief is the most useful guide to action, but some truths do not concern action directly, and it is only a quibble to say that any connexion with action, however remote, is the same thing as 'virtual action.'

Similar arguments apply to the theory that all speculation is delayed reaction and nothing else. It is true, no doubt, that there cannot be deliberate reflective choice without delay in reaction, and that deliberation is a speculative activity. But controversies with circle-squarers, *e.g.*, are not merely delayed reactions; and it is a fallacy to argue either that all speculation is only delayed reaction because some speculations imply delayed reactions, or that the speculative activities which may occur during certain delayed reactions are themselves *only* delayed reactions.

The theory that knowledge is subordinate to will is based either on psychological description or on metaphysical grounds. In the former case it is argued, as a matter of psychological fact, that knowledge is only the attempt to discover ways and means for satisfying impulses. It is sufficient to reply to this argument that these impulses may include curiosity and disinterested impulses towards knowledge for its own sake, and that, even if impulses are always the primary *causes* of knowledge, it does not follow that the effect is subordinate to the cause.

The metaphysical argument is a *non sequitur* of the same type. It maintains that effects are always subordinate to their conditions, and that will is the cause of all mental process including every piece of knowing. This principle, as we have seen, is false, and, apart from that, the premiss of the argument is highly dubious. Will, in the sense of striving or of deliberate choice, is not the sole cause of mental process in any intelligible sense. We have no right to exclude any antecedent from the list of causes of any effect if this antecedent is always present in fact, and if it always seems to play its part along with the other antecedents. And knowledge and feeling are antecedents of any mental process just as plainly as will is. This metaphysical argument, in a word, finds no support in the psychological phenomenon of will.

It may be argued, to be sure, that the scholastic maxim *Operari sequitur esse* is false, or that 'function always determines structure'; and views of this kind (usually with more enthusiasm than knowledge) may even claim kinship with certain modern theories of physics. These arguments are irrelevant, however, because voluntarism is meaningless unless it is based on the psychological phenomenon of willing. The will, as we experience it, is at best only a useful analogy for such theories; and those pluralisms which maintain that the *conatus* (or the desires and appetitions) of every existing thing is its *causa essendi* cannot claim more than a metaphorical support from the facts of will, as we find them. A spiritualistic pluralism of this kind¹ may be true in fact; and voluntarism, possibly, may be the least inept name for it, but it is not a logical consequence from the relation of willing to personality, and it becomes nothing but conjecture when this vague psychological analogy is extended to unconscious things.

LITERATURE.—On the physiology of willing: C. S. Sherrington, *The Integrative Action of the Nervous System*, London, 1906.

On ideomotor action: W. James, *The Principles of Psychology*, London, 1891, many subsequent ed., vol. ii. ch. xxvi.; G. F. Stout, *A Manual of Psychology*³, do. 1913, bk. i. ch. ii. § 2.

On psychological hedonism: Bentham, *Introductio ad Principes Morals and Legislation*, London, 1789 (*Works*, ed. J. Bowring, Edinburgh, 1838-43, vol. i. ch. i.); J. S. Mill, *Utilitarianism*, ch. iv. (any ed.).

On the influence of reason and emotion in willing: Hume, *Treatise of Human Nature* (ed. T. H. Green and T. H. Grose, new ed., 2 vols., London, 1888, or T. Selby-Bigge, Oxford, 1888), bk. ii. pt. iii. § 3; W. McDougall, *An Introductio to Social Psychology*¹, London, 1913, ch. i. f.; Bertrand Russell, *Principles of Social Reconstruction*, do. 1916, ch. i.; Graham Wallas, *The Great Society: a Psychological Analysis*, do. 1914, ch. iii.

On the analysis of choice: Aristotle, *Nicomachean Ethics*, bk. iii. ch. ii.

On voluntarism: Schopenhauer, *Die Welt als Wille und Vorstellung* (any ed.), and the works, *e.g.*, of Fichte or Bergson.

WIND, WIND-GODS.—See AIR AND GODS OF THE AIR.

WINGS (Greek and Roman).—Wings, as an attribute of animals to whom they do not properly belong, were borrowed by the Greeks from Oriental art, mostly that of Mesopotamia.² They probably appeared first on composite animals into which the bird form entered as an element, such as the gryphon; but they seem to have been applied almost indiscriminately to quadruped and even human forms as symbolic of divine strength and swiftness. It is doubtful, however, whether this symbolism was what attracted the early Greeks; more probably it was the decorative value of wings, as seen in Oriental carvings and woven stuffs, that first appealed to the Greek artistic sense, though they doubtless were given a symbolic meaning in later Greek art.

In the art of Crete and Mycenæ we find both gryphons and sphinxes with wings, but we have no means of judging whether these had any meaning or were merely borrowed as elements of decoration; the fact that the sphinx is female and winged suffices to show that it came from Mesopotamia and not from Egypt. But the frequent appearance of winged creatures is conspicuous in the great influx of Eastern influence, at first through the medium of the Phoenicians and later, more directly, in the 'Orientalizing' Greek vases and in decorative carvings and reliefs of a similar period. On the sub-Mycenæan vases of Cyprus are various winged animals, including centaurs (a winged centaur appears in Mesopotamia about 1200 B.C.). On the later Orientalizing pottery from Rhodes, Asia Minor, and Corinth

¹ See art. PLURALISM, § 2.

² See art. ART (Greek and Roman), § 3 f.

the commonest winged forms, other than birds, are the gryphon, the sphinx, human-headed birds, and human beings; winged horses are also found, especially in chariots of the gods, on Melian and other vases, and winged horses, sea-horses, boars, and other animals, such as the gryphon and sphinx, are common on the so-called 'island gems' and on early coins.

In many of these cases it is evident that the decorative value of the wings, as helping the design to fill a given field, has been paramount; but there are other examples, in which a symbolic meaning may be inferred, and where such winged forms have become the accepted type of characteristic creations of Greek myth. In most of these instances, however, the types were not invented or composed by the Greek artist to express the idea of the myth, but were adopted from foreign or borrowed forms. Thus there is no evidence that the Sirens (*q.v.*) were thought of by Homer and his contemporaries in the form assigned to them by later art; either a fancied appropriateness or a chance coincidence may sometimes have led to such identifications. The type of the human-headed bird was not, however, used only for the Sirens; it occurs constantly on tombs or in connexion with them, and appears to represent a death-dæmon. The best known instance is on the misnamed 'Harpy monument,' which, though not Greek but Lycian, shows evident affinity with Greek ideas. Here the figures in question have not only human heads and breasts, but also human arms, as well as birds' legs and talons, both of which they use to carry off the souls of the dead. Thus they show the same unnatural reduplication of limbs which we find in other winged creatures, and which the human-headed bird sometimes escapes. The wings, here as in human or quadruped winged forms, appear to grow from the shoulder-blades, and yet to work independently of the arms. Such an inorganic composition seems to confirm the view that the wings, except where they belong properly to the bird form, are borrowed from an art in which they were purely symbolic. The funereal connexion in the case of the Siren may perhaps be explained by Egyptian influence, since the human-headed bird is used in Egypt as a symbol of the soul. It is often found as the crown of a tombstone in Athens.

It is not certain that the wonder-horse, Pegasus, was at first thought of as having wings; he appears without them on an early relief; but he early adopted the winged form in which he has been familiar to all later art. Gryphons have a place in myth, since they fought with the Arimaspi in the far North; though they have beaks, their body is that of a quadruped rather than a bird, and their wings are consequently as much out of place as on a horse or lion.

What is, however, most characteristic of the Greek application of wings is their addition to the human form. This also appears first in borrowed forms, such as that of the Oriental Artemis; a similar form is that of the Gorgon, whose hideous grimacing face is set in a human body with wings; here again we have no evidence that the 'head of the terrible monster, the Gorgon,'¹ was thought of in this form by the poet of the *Odyssey*. Another shape akin to the Gorgon is the Harpy. This sometimes seems to be a death-dæmon, though the bird-like figures on the Harpy tomb are probably wrongly named. On early vases Harpies appear in completely human form, winged, and sometimes with talons or claw-like hands; there is no doubt as to identification, since the name is written beside them. These Harpies are sometimes interpreted as malevolent wind-dæmons;

¹ *Od.* xi. 634.

and this is consistent with the tale of their being chased away by the Boreads, the sons of the North Wind. Wind-gods generally appear as winged human figures, and the small winged figures that are common on early vases—*e.g.*, those of Cyrene—are probably to be interpreted thus. Boreas himself, who is represented on Attic vases and elsewhere as carrying off Oreithyia, appears as a winged, bearded man, sometimes with a mane of feathers for hair and beard.

It is probable that in early Greek art such winged figures are used with many different meanings; but they come to be differentiated into two main types of constant occurrence—the winged nude male figure or Eros, and the winged draped female figure or Nike. The sculptor Archermos of Chios is said to have been the first to represent Nike with wings, and the statue in which he did this has been discovered in Delos; it represents a female figure in rapid flight, with wings not only on the shoulders, but also on the ankles. Floating figures of winged Victories, as symbolical of victory either in war or in athletic contests, are extremely common throughout Greek and Roman art. Nike was placed on the outstretched right hand of the colossal gold and ivory statues of Zeus and Athene at Olympia and Athens, by Phidias. Eros in earlier Greek art always appears as a youth of fully-grown proportions, though sometimes of diminutive size. In the Hellenistic and Roman ages he becomes the baby Cupid familiar to Renaissance and modern art, and his wings are correspondingly small. Iris, as the messenger of the gods, is usually winged, and so is hardly to be distinguished from Nike, apart from her attribute of the rainbow.

A different series of winged figures, usually diminutive, represent the souls of the dead; as such they are sometimes depicted on Attic vases as hovering about the tomb. Similarly, in the weighing of the Keres of two warriors by the gods—as of Achilles and Hector in the *Iliad*—the usual representation is of two minute winged figures placed in the scales. Homer describes them as *δύο κήρη . . . θανάτοιο*,¹ and hence it seems doubtful whether the two figures are to be regarded as the souls or lives of the heroes or rather their fates of death. But the resemblance to the little souls on the vases is striking. Keres (*q.v.*) seems to vary in meaning between death-dæmons, who seem usually thought of as horrible, though not necessarily winged, and ghosts or souls of the dead, who almost always are winged. But the Psyche of later times, who is associated with Eros and has butterfly wings—sometimes even takes the shape of a butterfly—is a creation of later allegory. Death (Thanatos) often appears as a winged figure in art; on Attic funeral vases he, with his brother Sleep, often bears the deceased to the tomb. Sleep is similar to him, but beardless, while he is bearded; and both usually have similar wings growing from their shoulders. But in the beautiful figure of Sleep of the Praxitelean age the god has only a small pair of wings growing from his temples: a similar position for the wings is seen in later sentimental versions of Medusa, who has exchanged the horror of the Gorgon for a death-like beauty, and occasionally in other figures.

A variation on wings actually growing from a part of the body, head, or limbs is seen in wings that can be attached to some article of dress, and so put on and off. The most familiar example is offered by the winged sandals of Hermes, which he lends to Perseus; the notion of lending wings to the feet is also seen in the earliest Nike, and in later allegorical figures such as Kairos (Occasion). Hermes sometimes wears also wings attached to

¹ *Il.* xxii. 210.

his cap; the resemblance to wings on Scandinavian helmets is probably accidental. Wings are sometimes attached to other objects—e.g., to the tripod of Apollo when he travels on it,¹ or to the chariot on which Triptolemus carries the gift of corn over the earth, or to that in which Medea escapes after her revenge on Jason. Other gods also have means of swift flight, as exemplified by Athene, when she describes how she came *περὶ ἄτερ βοιβόουσα κόλπον αἰγίδος*.²

It is with much the same associations that gods are often described as coming like birds or even taking the shape of birds. The fatal attempt of Dædalus and Icarus to fly with mechanical wings is probably to be regarded as similar magic. The desires of mankind in this direction are wittily parodied in Aristophanes' *Birds*.

In Roman art the types handed down from the Greek and Hellenistic periods frequently recur, but without any essential additions or difference. Victories, both in the round and in relief, are especially common, and are chiefly interesting as supplying the type which was later to be adopted—with change or rather absence of sex—for the angel of Christian art.

So far, though the position of wings has been noted, nothing has been said as to their shape. The wings of early decorative types are almost always curved back at the end, in a manner which, if not quite unnatural, is at least greatly exaggerated. This is a characteristic which is also found among the winged creatures of Oriental art, and is borrowed from them, but is emphasized for decorative reasons in archaic Greek art. When wings came to be applied freely by Greek artists to various figures, human and other, they naturally supplemented and corrected the conventional forms by their own observation, using especially the wings of large birds as their models, often probably those of the eagle. The wings are frequently outstretched as in flight; when lowered, they do not lie folded close to the body, as in the case of a bird, but usually project at right angles behind the back of the figure. Smaller wings show many varieties; thus, according to H. Brunn,³ the wings on the temples of the head of Sleep are those of a night-hawk. Such variety of imagination was readily suggested by the subjects themselves.

LITERATURE.—J. Langbehn, *Flügelgestalten der ältesten griech. Kunst*, Munich, 1881; G. Weicker, *Der Seelenvogel in der alten Litt. und Kunst*, Leipzig, 1902; articles on subjects quoted above in Roscher and Daremberg-Saglio—e.g., 'Sphinx,' 'Harpyia,' 'Nike,' 'Eros,' 'Keres.'

E. A. GARDNER.

WISDOM.—As distinguished from the reasoned, systematic view of the world and man which is the conscious aim of philosophy (*q.v.*), wisdom may be defined as the direct, practical insight into the meaning and purpose of things that comes to 'shrewd, penetrating, and observant minds, from their own experience of life, and their daily commerce with the world.'⁴ It is the fruit not so much of speculation as of native sagacity and wit. Consequently, while philosophy appeals only to the intellectual *élites*, wisdom appeals to all who are interested in life and have understanding enough to appreciate a word of truth well spoken. In spite of this distinction, however, the two are closely allied. The knowledge of life reached intuitively by wisdom is the raw material out of which philosophical systems are evolved. And in its bolder flights wisdom moves in the atmosphere of philosophy.

1. Proverbial wisdom.—The beginnings of wisdom are found embodied in the terse, sen-

¹ *Mon. dell' Inst. di Corr. Arch.* i. [1832] 46.

² *Esch. Fum.* 404.

³ *Griechische Götterideale in ihren Formen erläutert*, Munich, 1893, p. 31.

⁴ J. Morley, *Studies in Literature*, London, 1891, p. 67.

tentious sayings known as proverbs (*q.v.*). The art of proverb-making is universal. It flourishes among the rudest of tribes as well as among the more brilliantly endowed peoples of India, Greece, and Palestine. Collections of high value—in substance often much alike—come to us from such widely separated sources as the North American Indians and Negroes and the natives of Australasia and West Africa. But among the most interesting, not only for their intrinsic merit, but also for the light they shed on the development of Semitic wisdom, are those of the Arabs, as they are preserved for us in the great thesaurus of al-Maidānī († A.D. 1124) and still thrown out with astonishing ease by the sharp-edged Bedouin tongue. The simplest are brief similitudes (*amthāl*), like 'bolder in onset than 'Amr b. Kulthūm,' 'faster friends than the two palm-trees of Hulwan,' and 'more unlucky than the hamstringer of the she-camel' (*Qudar al-Ahmar*). But many are finely-polished epigrams on human life, distinguished alike for their literary grace and for the keenness of their moral perception. Though in general the motive is enlightened self-interest, they are by no means forgetful of the nobler qualities of character. Especially do they delight in extolling the virtues of contentment, cheerfulness, truth, self-respect, restraint in word and action, perseverance, kindness, friendship, neighbourliness, hospitality, and love of home and country. In all this they are a mirror of Arabian life at its best.

2. Egyptian wisdom.—While the proverbial lore of Arabia brings us close to the running fountain of Semitic wisdom, the Egyptian sages had at a far earlier date evolved a gnomic literature, in the shape of books of moral precept or instruction (*seb'oyet*), full of sound sense, and sometimes even high moral excellence. The earliest of these books, the *Wisdom of Imhotep*, chief architect of Zoser, founder of the IIIrd dynasty, is known to us only from allusions in later literature; but two products of the IIIrd and Vth dynasties, the *Wisdom of Kechemne* and the *Wisdom of Ptah-hotep*, not only enjoyed wide popularity in their own day, but have been preserved in MSS of the Middle Kingdom. The former is a simple treatise on deportment; the latter covers a much wider range, offering 'maxims of beautiful speech' (as the author himself phrases it) on such subjects as diligence, courtesy, faithfulness to trusts, humility, self-restraint, purity, loyalty to friends, love of wife and family, kindness to dependents. Of similar tenor, though richer in content, and fresher and more artistic in expression, are the later *Maxims of Anī* (from the XXIst dynasty), urging not merely the moral virtues of purity, temperance, modesty of speech, a gracious demeanour alike at home, in the street, and in social fellowship, kindness, consideration for the poor and aged, reverence towards parents, but also the strictly religious obligations of chaste and loving worship, prayer, praise, and sacrifice.

'Celebrate thou the festival of thy God, and repeat the celebration thereof in its appointed season. Bear testimony [to Him] after thy offering.'

'The sanctuary of God abhorreth noisy demonstrations. Pray thou with a loving heart, and let thy words be secret. Do this, and He will do thy business for thee. He will hearken unto thy words, and He will receive thy offering.'

'Devote thyself to God, take heed to thyself daily for the sake of God, and let to-morrow be as to-day. Work thou [for Him]. God seeth him who worketh for Him, and He esteemeth lightly the man who esteemeth Him lightly.'

Couched in a more cynical vein is the *Wisdom of Amenemhet I.*, founder of the XIIth dynasty, written shortly before his death (c. 1980 B.C.). Embittered by the rebellion of his subjects, he warns his son Sesostrius against putting any con-

¹ Tr. from E. A. Wallis Budge, *The Literature of the Ancient Egyptians*, p. 228 ff.

fidence in those around him. The only influence that really appeals to men is terror; so let him 'harden himself against all subordinates,' know neither friends nor intimates, 'wherein there is no end,' and guard himself well as he sleeps, 'for a man has no people in the day of evil.' Equally depressing are the *Lament of Khekeperre-Sonbu*, priest of Heliopolis under Sesostris II. (1906-1887 B.C.), with its dismal picture of the corruptions of the time, the *Dialogue of a Misanthrope with his Soul*, ending in a wistful longing for death as the only release from evil, and the *Admonitions of Ipuwer*, the gloom of which, however, is relieved at the end by the vision of a righteous ruler, 'with no evil in his heart,' who goes about like a 'shepherd,' gathering together his scattered and 'fevered' herds. On a different key are the *Precepts of Duauif*, urging his son Pepi to diligence in learning, as the most 'beautiful' and honourable of callings, and the remarkable *Song of the Harper*, which finds the only consolation against the vanity and transience of life in the frank pursuit of pleasure.

'Give comfort to thy heart,
And let thy heart forget these things;
What is best for thee to do is
To follow thy heart's desire as long as thou livest.
Anoint thy head with scented unguents,
Let thine apparel be of byssus
Dipped in costly [perfumes],
In the veritable products (?) of the gods.

Enjoy thyself more than thou hast ever done before,
And let not thy heart pine for lack of pleasure.

Pursue thy heart's desire and thine own happiness.
Order thy surroundings on earth in such a way
That they may minister to the desire of thy heart;
[For] in length that day of lamentation shall come,
Wherein he whose heart is still shall not hear the lamentation.
Never shall cries of grief cease
To beat [again] the heart of a man who is in the grave.'¹

3. **Babylonian wisdom.**—Thus far the cuneiform records have yielded little in the way of wisdom literature. In Rawlinson, II. p. 16, however, there is found an interesting bilingual tablet (Sumerian and Assyrian), containing a number of riddles, proverbs, and gnomic maxims, apparently but specimens of a class (selected for the training of scholars in 'the grammatical construction of short phrases'), and therefore evidence that in Babylonia also proverbial wisdom was the basis of more conscious reflexion on life and conduct. The following may be quoted as typical:

'The life of yesterday goeth on daily the same.'²
'Thou goest and takest the field [*i.e.* property] of thine enemy;
The enemy hath come and taken thy field.'³
'If the seed be not good, the stalk will not grow, nor will grain be produced.'⁴
'I am a young heifer, yoked with a mule;
On the wagon to which we are harnessed . . . I bear the yoke.'⁵
'What man eateth when he is dead?
Why then should he toil when he is alive?'⁶
'In the case of incurable sickness and insatiable hunger, a box full of silver and a chest full of gold are powerless to restore the health and to satisfy the hunger.'⁷
'He who says, "O that I might have revenge, and more so!"
draws from a well without water, pours from a skin that is empty.'⁸

The Epicurean tendency revealed in the Egyptian *Song of the Harper* finds expression also in a remarkable fragment from the Gilgames epic;⁹ while the high ethical and religious note we have heard in *Ptah-hotep* and *Ani* rings through the Wisdom Tablet¹⁰ deciphered and translated by K. D. Macmillan.

¹⁰ *Brit. Mus. K.* 7597.

'Their freedom (?) thou shalt not take away,
Thou shalt not tyrannically oppress them.
For this [or, he who gets thus], his god is angry with him:
It is not pleasing to Samaš, he will requite him with evil.

Give food to eat, give wine to drink,
Seek the right, provide for and . . .
For this [or, he who acts thus], his god is pleased with him:
It is pleasing to Samaš, he will requite him [with good].

Thou shalt not slander, but speak kindly,
Thou shalt not speak evil, but show mercy.
Him who slanders and speaks evil,
With its recompense will Samaš visit (?) his head.

Thou shalt not make large thy mouth, but guard thy lip;
In the time of thine anger thou shalt not speak at once.
If thou speakest quickly, thou wilt repent (?) afterward,
And in silence wilt thou sadden thy mind.

Daily present to thy god
Offering and prayer, appropriate to incense.
Before thy god mayest thou have a pure heart,
For that is appropriate to the deity.'¹

Akin to the more pessimistic wisdom literature of Egypt is the *Lament of Tâbi-utul-ellil*,² in which the old king grieves over his own misfortunes and the general evil in the world. As for himself, he has sought consistently to honour God's name and follow His righteous ways.

'I myself took thought only for prayers and supplication.
Prayer was my rule, sacrifice my order,
The day of God's honouring was my heart's joy,
The day of following after the goddess was for me gain and riches . . .

I taught my land to keep God's name;
To honour the name of the goddess I cautioned my people.'³

But how very differently from his deserts has God treated him.

'My house is become a prison for me,
In the chains of my flesh are my arms laid,
In my own bonds (?) are my feet cast.

With a whip he has beaten me, not . . .
With a staff he has pierced me, the point was strong.
All day long doth follow the avenger,
In the middle of the night he lets me not breathe for a moment.'⁴

Both theme and language remind one of Job. But the *dénouement* is different. Whereas Job returns to a deeper, more personal faith in God, the Babylonian sage finds no help in god or goddess. God's ways are too inscrutable for man to rely on Him. The only hope is in the mercy of one's 'guardian angel'—the ancestral spirit of the family.

'But I knew the time, of all my family,
When among the guardian angels their divinity had mercy.'⁵

4. **Chinese wisdom.**—Passing eastward to China, we enter upon a larger field. The grave, practical temperament of the Chinese predisposed them to ethical reflexion. And the logical sharpness and balanced harmony of their speech made it a happy medium for sententious expression. The old classics, especially the *Shu King*, are rich in proverbial lore. Confucius and his grandson Tse-sse, Mencius (*q.v.*), and the Confucian school generally⁶ are distinguished, not for originality or depth of thought, but for the terseness and point of their sayings as well as for the attractive grace of their personalities. Even the mystical and sceptical writers, like Lao-tse, Yang Chu, and Hui Shih, make their impression not so much by the reasoned compactness of their systems as by the beauty and force of their aphorisms. Chinese literature as a whole is 'seasoned with the salt' of proverbs. And the common people are not far inferior to their masters in the art. 'Chinamen may be almost said to think in proverbs.'⁷ And instruc-

tion in proverbs is a main element in the education of the young.

The centre of interest throughout is the *Tao*—the true or normal way of life. Various qualities are singled out by the classical writers as essential to an all-round moral character. But these are reduced by Confucius to the five cardinal virtues of benevolence, righteousness, propriety, wisdom, and sincerity.¹ As a virtue, therefore, wisdom (*chih*) is moral rather than intellectual. It includes, no doubt, knowledge of men and their affairs, acquaintance with the rules of propriety, and the command of language, as the key to success in the world; but its chief concern is with matters of ethical conduct. The wise man (*tse*) is he who knows the principles of right living and is able to instruct his fellows in them. Still higher stands the sage or holy man (*shêng jên*), who not merely knows these principles, but conducts his life in perfect harmony with them and thus becomes the moral teacher and guide of the ages. Such a man is the constant subject of praise in the Chinese classics:

¹ Perfection of nature is characteristic of Heaven. To attain to that perfection belongs to man. He who possesses that perfection hits what is right without any effort, and apprehends what is true without any exercise of thought,—he is the sage who naturally and easily embodies the right way. He who attains to perfection is he who chooses what is good, and firmly holds it fast.² 'Therefore the movements of the superior man [sage] mark out for ages the path for all under heaven; his actions are the law for ages for all under heaven; and his words are the pattern for ages for all under heaven. Those who are far from him look longingly for him, and those who are near are never weary of him.'³

'The superior man [sage] does not, even for the space of a single meal, act contrary to virtue. In moments of haste, he cleaves to it. In seasons of danger, he cleaves to it.'⁴ He fulfils completely the rules of a virtuous life: 'when you go abroad, to behave to every one as if you were receiving a great guest; to employ the people as if you were assisting at a great sacrifice; not to do to others as you would not wish done to yourself; to have no murmuring against you in the country, and none in the family.'⁵

As the personal embodiment of the mean—i.e. the harmony of all the virtues—'he is all-embracing like heaven, deep and active as a fountain.' 'He is seen, and the people all reverence him; he speaks, and the people all believe him; he acts, and the people are all pleased with him.'⁶

'A man who commands our liking is what is called good. He whose goodness is part of himself is what is called a real man. He whose goodness is accumulated in full measure is called a beautiful man. He whose completed goodness is brightly displayed is called a great man. When this great man exercises a transforming influence [over others], he is what is called a sage.'⁷

On the more philosophical developments of Chinese wisdom see artt. MYSTICISM (Chinese), PHILOSOPHY (Chinese).

5. Indian wisdom.—The wisdom of the Semitic and Turanian races we have found to be predominantly practical; that of the higher Indo-European peoples is as distinctively intellectual. This underlying quality of Indian wisdom is suggested from the outset in the name Veda, 'knowledge,' applied to its classical literature; and bright foregleams of its future triumphs in speculative thought appear even in the *Rigveda*, with its questionings as to the 'wood' and the 'tree' from which were fashioned 'the earth and the heaven,'⁸ and its bold theories of the evolution of *sat*, the existent, from *asat*, the non-existent.⁹ At the same time, the poets of the *Rigveda* are not lost in the empyrean. They have a true feeling for human life, both in its dignity and in its weakness, and clothe this in sententious sayings which are worthy of comparison with the best in other literatures. Some are mildly humorous,

such as the song on the pursuit of gain,¹ others pathetic, like the fine *Lament of the Gambler*,² still others cynical, especially those that moralize on women and their ways.³ But others strike a high note—e.g., the hymn in praise of wise speech,⁴ and that on generosity:

'Who has the power should give unto the needy,
Regarding well the course of life hereafter:
Fortune, like the chariot wheels revolving,
Now to one man comes nigh, now to another.

Ploughing the soil, the share produces nurture;
He who bestirs his feet performs his journey;
A priest who speaks earns more than one who's silent;
A friend who gives is better than the niggard.'⁵

In the *Upaniṣads* and the fully developed Vedantic system⁶ the incipient gnosticism of the Vedic poets reaches its climax. The *summum bonum* is union with Brahman, attained by the *jñāna-mārga*, 'way of knowledge,' though on the higher planes even knowledge is dispensed with, and the individual soul with all its activities is merged in the tideless ocean of the unknown and unknowable. The same intellectualism pervades the other orthodox systems⁷ as well as the heresies of Jainism and Buddhism. Salvation is won by *vidyā* (Pāli *viñña*), *jñāna*, or *prajñā* (Pāli *pañña*), knowledge of the real, *bodhi*, enlightenment (as distinguished from *avidyā*, ignorance, i.e. mere empirical knowledge, *māyā*, illusion, delusion). But for the ordinary man this way of salvation is too high to attain to. Thus we find a lower way offered him—the *karma-mārga*, 'way of works,' or salvation through sacrifice and moral conduct. The choicest expression is given to this 'way' in the later dramas and epics, notably the *Mahābhārata* and the *Rāmāyana* (*qq.v.*), the former of which is 'an inexhaustible mine of proverbial philosophy'⁸—and in the *nīti*, or wisdom literature, which corresponds very closely to the gnomic poetry of Greece. The outstanding examples of *nīti*—the *Pañchatantra* and *Hitopadeśa*—are manuals of instruction for rulers. But others, both Sanskrit and vernacular, are written for the people. With these may be classed the ethical sections of the *Bhagavad-Gītā* (*q.v.*), and the beautiful catena of Buddhist aphorisms entitled the *Dhammapada*, 'Pathway of Virtue.' A few examples of this wisdom may be given:

'To injure none, by thought or word or deed,
To give to others, and be kind to all—
This is the constant duty of the good.'⁹

'High-minded men delight in doing good,
Without a thought of their own interest;
When they confer a benefit on others,
They reckon not on favours in return.'¹⁰

'Hear thou a summary of righteousness,
And ponder well the maxim: Never do
To other persons what would pain thyself.'¹¹

'A man of truest wisdom will resign
His wealth, and e'en his life, for good of others;
Better abandon life in a good cause,
When death in any case is sure to happen.'¹²

'The good show pity even to the worthless,
[As] the moon irradiates the meanest hovel.'¹³

'Act then and do thine own appointed task,
In every action my [*i.e.* Kṛṣṇa's] assistance ask;
Do all with heart and soul absorbed in me,
So shalt thou gain thine end and be from trouble free.'¹⁴

'Like a beautiful flower, full of colour but without scent,
are the fine but fruitless words of him who does not act accord-

ingly. But like a beautiful flower, full of colour and full of scent, are the fine and fruitful words of him who acts accordingly.¹

'Do not have evil-doers for friends, do not have low people for friends: have virtuous people for friends, have for friends the best of men.'²

'Let no man forget his own duty for the sake of another's, however great; let a man, after he has discerned his own duty, be always attentive to his duty.'³

'If anything is to be done, let a man do it, let him attack it vigorously! A careless pilgrim only scatters the dust of his passions more widely.'⁴

6. Greek wisdom.—Intellectualism is as definitely the quality of Greek wisdom as of Indian. *Σοφία* (from root *sap*, 'to know') is primarily 'cleverness' or 'skill' in any of the arts or professions of life—*e.g.*, carpentry,⁵ medicine or surgery,⁶ poetry,⁷ music and singing.⁸ Thence it comes to mean 'sagacity,' 'soundness of judgment,' 'intelligence,' 'prudence,' 'political tact,' and general 'knowledge of life,' sometimes with the sinister suggestion of 'shrewdness,' 'cunning,' 'craft.' Finally, it is applied to knowledge in the pure sense of the term—'learning,' 'science,' and 'philosophy' (as the harmony of all the sciences).

The beginnings of Greek wisdom are found in the outcrop of gnomic poetry associated with the names of Hesiod (*q.v.*), Mimnermus, Solon, Phocylides, and especially Theognis (*q.v.*), who crystallized the current morality in lucid phrases and thus became the favourite teachers of their people. As a whole, their wisdom is trite and prosaic, the key-notes being moderation (*μηδὲν ἄγαν*) and fitness of act to time and situation (*καρπὸν γνῶθι*), though they have all an instinct for justice as the fundamental element in every true life. Through most of them, also, runs the strain of melancholy which reaches such tragic depths in later Greek literature.⁹ The Seven Wise Men did little more than point the maxims of the poets. Chilon's *γνῶθι σεαυτὸν*, 'Know thyself,' however, lent the initial impulse to the great philosophical movement in Greece. Its first efforts, no doubt, were spent in rather futile cosmogonic speculations; but Pythagoras held fast to the idea 'that philosophy was above all "a way of life,"'¹⁰ while the fragments of Heraclitus and Democritus (*q.v.*) abound in moral maxims of considerable insight and aptness of expression. With the Sophists (*q.v.* *σοφισταί*, 'masters of wisdom') the interest reverted once for all to the problems of human life and conduct. In their persons the pursuit of wisdom—practically equivalent to intellectual culture as a preparation for private and public life¹¹—became a conscious profession. The love of money, so often associated with professionalism, the critical and sceptical tendency of their teaching, the charge that they subordinated moral issues to expediency—that in fact they identified right with might¹²—all conspired to bring the later Sophists into disrepute as subverters of the popular faith and jugglers with the great spiritual realities of life. As a school, however, they deserve credit for having broken the crust of dead tradition, and cleared the way for the intellectual renaissance under Socrates and his disciples.

Socrates (*q.v.*) refused to be called either a *σοφός* or a *σοφιστής*. For him God alone was wise; and the man who claimed actual possession of wisdom was guilty of presumption, if not blasphemy.¹³ Taking up, then, a term already used by Pythagoras, he described himself as *φιλόσοφος*, 'a lover

of wisdom.' The wisdom he thus sought was essentially ethical: it turned on the principles of virtuous conduct. But with Socrates virtue was identical with knowledge. The enlightened understanding was *ipso facto* morally good character. On this basis Plato (*q.v.*) built up his majestic system of ethical idealism, with its four cardinal virtues—wisdom, courage, temperance, and justice. Of these, wisdom, or rationality, is the highest phase of virtue, for it inspires and regulates the whole inner life.¹ Though he recognizes the rationality of virtue in all men, Plato was conscious of a distinction between the virtue of the work-a-day world and that of the philosopher, who spends his days in the disinterested pursuit of truth.² The distinction thus vaguely apprehended by Plato was sharply drawn by Aristotle (*q.v.*). Practical wisdom, prudence, or good sense (*φρόνησις*) deals with matters of ordinary human interest; speculative wisdom, which is wisdom *par excellence* (*σοφία*), with the first principles of things. The former enables a man to apply the 'right rule' to every line of activity, whether professional, civic, or strictly moral; the latter leads, by a union of science and intuitive apprehension, to a knowledge of 'those things which are most precious in their nature.'³

The later schools also honoured wisdom as the root of all the virtues. For only through wisdom was man able either to know or to pursue the true end of life. Naturally their conceptions of wisdom differed according to their different ideals. For the Sceptics (*q.v.*) it meant the wholesome sense of the relativity of knowledge that permitted a man to suspend judgment where it was impossible to be certain; for the Epicureans (*q.v.*) the insight into life's conflicting motives and desires that set him free from false opinion and helped him to choose the sweetest and most lasting pleasures; for the Stoics (*q.v.*) the grasp of truth, both human and divine, that made him possessor of all virtue, freedom, and inward happiness. In their delineations of the 'wise man' the Stoic writers reach their highest level. He knows all there is to know, for he alone maintains that serenity of soul which is the spiritual presupposition of knowledge. He is thus fitted for every sphere of life. He is likewise free from fault or failing, weakness or passion. He is lord of his actions, as being responsible only to himself. He is truly rich, for he has all he needs. He is also happy at all times and under all circumstances, for the springs of his happiness are in himself.⁴

7. Hebrew wisdom.—In Israel we pass once more to the practical side of wisdom. *חָכְמָה* is used in a general sense of 'skill' in the ordinary affairs of life—*e.g.*, technical work (Ex 28⁸ etc.), spinning (Ex 35²⁵), war (Is 10¹³), seamanship (Ps 107²⁷), and often of 'sound judgment' in administration (Gn 41^{38f}, Dt 34⁹, 1 K 3¹² etc.)—but it comes to be applied peculiarly to 'moral principle.' The wise man is he who directs his life worthily and well. His wisdom is thus virtually equivalent to 'goodness.' And the root of this wisdom lies in religion. The fool says in his heart, 'There is no God' (Ps 14¹); the wise man makes God the centre of all his thoughts, hopes, and endeavours. For him 'the fear of the Lord' is not only 'the beginning' (Pr 1⁷), but also 'the crown' and 'the perfect fulness' of wisdom (Sir 1^{10f}).

As elsewhere, the simplest expressions of Israelite wisdom are in the shape of proverbs. Originally pointed similes (*m'shalim*), like the Arabic *amthâl*—*e.g.*, 'Like Nimrod a mighty hunter before the

Lord' (Gn 10⁹), or 'Like mother, like daughter' (Ezk 16⁴⁴)—they gradually assume the perfect balance of thought and literary finish which we find in the couplets of Proverbs and Ben Sira. These two collections are a compendium of Hebrew wisdom at its purest. In clear-cut vignettes they portray the good man at his various tasks—as workman, citizen, neighbour, friend, husband, and father—and unveil the principles by which he conducts his life. The general motive may be eudæmonistic. Both collections show an undisguised appreciation of the good things of this world—its prizes, honours, riches, and pleasures—and direct men to the best way of winning these. Nevertheless, the moral tone is throughout honest and true. Righteousness is the first concern. Only as men follow after righteousness do they reach prosperity. In the emphasis thus laid on righteousness the proverbs of Israel outshine all other prudential literature. And at their higher levels they draw very near to the standard of Christ.

With this growing refinement in the art of proverbs there developed in Israel also a more professional interest in wisdom. On the pages of the greater prophets 'the wise' appear as a separate gild of spiritual advisers, whose 'counsel' ranked in influence with the *torāh* of the priests and the 'word' of the prophets (Is 29¹⁴, Jer 18¹⁸ etc.). In the post-Exilic period the 'wise men' practically replaced the prophets as moral guides and teachers. Gaining wisdom from the study of the older Scriptures, or through prayer and supplication, or in the school of experience, as they wandered about the world, 'travelling through strange countries,' mingling with kings and princes, and 'testing the good and evil among men' (Sir 39¹²), they took their stand in the market-place, or at the corners of bustling streets, or by the gates where people congregated, and appealed to the simple ones to embrace wisdom and to fools to turn from their folly and live (Pr 1²⁰, 8²⁵), or in their homes and lecture-halls instructed their pupils in the ways of wisdom (Sir 51²³). Out of this formal discipline arose not merely the gnomic wisdom of the *Pirkē Abōth*, 'Sayings of the Fathers,' but also the wisdom-speculation which we find in later elements of Proverbs, in the Apocryphal books of Sirach, Wisdom of Solomon, Enoch, Baruch, and 4 Maccabees, and in outside sources like Philo and the Odes of Solomon.

In Pr 8²² Wisdom appears as the first creation of God, the 'foster-child' who played beside Him as He wrought His mighty works and now moves among men as His mouth-piece and representative on earth. It seems hardly possible here to deny the fertilizing influence of Greek thought. Yet the picture is Hebrew in its essence. Wisdom is no archetypal hypostasis emanating from the divine. She is still the impersonation of a moral quality, endowed with life by Jahweh, whose place in creation she nowhere usurps. The ethical character of Wisdom is equally evident in the great Song of Praise, Sir 24³², where Wisdom is ultimately identified with 'the law that Moses commanded,' which found its resting-place and seat of authority in Israel. A similar linking of Wisdom with the Law appears in Bar 4¹⁵ and 4 Mac 1¹⁷. Following out the more ethical line, Enoch 42¹ 49¹ etc. pictures her as descending from heaven to earth, being rejected by men, returning to heaven, and there awaiting the Messianic age, when she will be poured out in her fullness on the elect. A much bolder attitude is assumed in Wis 7²², where she is celebrated as the spiritual 'artificer of all things,' an 'effulgence of the everlasting light, and an unstained mirror of the power of God,' which by her purity and mobility

'penetrates and permeates all things.' Here the concrete imagination of Israel has been caught up in the full sweep of Greek influence, and we seem to be actually moving within the inner circle of Neo-Platonic speculation. But the most systematic attempt to blend Hebrew wisdom with Greek idealism is met with in Philo (*g. v.*), whose doctrine of the Logos finds poetical reflexion in certain of the Odes of Solomon (12⁹, 13¹², 16⁹, etc.).

In other phases of Hebrew literature there is a decided protest against the current ideas of wisdom. The book of Job challenges the whole theory that outward prosperity is the reward of righteousness, while Koheleth leaves us with the cynical conclusion that 'all is vanity.' Elsewhere the speculations of the wise are traversed by a species of agnosticism which insists that Wisdom is undiscoverable by man. The most brilliant poetic expression is given to this tendency in the Song of Wisdom incorporated in Job 28. The poet has sought wisdom in the depths of the earth, where miners dig for gold and silver, in the heights of heaven, whither the eagles soar in flight, and in the desert places, where the beasts roam in solitary majesty. But nowhere can he find the object of his quest. A still more depressing view is expressed in 'the words of Agur, the son of Jakeh,' incorporated in Proverbs:

'I am wearied, O God, I am wearied;
I am altogether spent.
I am but a brute, and no man:
I have nought of human intelligence.
No wisdom have I learned,
No knowledge I have of the Holy One.
Who is He that hath mounted to heaven, and come down.
That hath gathered the wind in His fists,
The waters hath wrapped in His cloak,
And established all ends of the earth?
What is His name, and His son's name,
If thou dost know?'¹

It is significant, however, that Hebrew scepticism never touches the being of God. The beginning of wisdom was 'the fear of the Lord'; and, even when wisdom was despaired of, the fear of the Lord remained the sheet-anchor of faith and hope. However perplexed he was with the mysteries of Providence, Job still clung to God; and at the end he rose beyond himself and his questionings to a new sense of God's wisdom, power, and grace in the boundless universe of nature. Even Koheleth's pessimism is quickened by the fear of God into a certain sanctified common sense. The poet of Job 28 has failed to reach wisdom. But 'God knoweth the place thereof'; He hath 'established and searched it out' (v. 28⁷). And for Agur, too, God is the great energizing Force behind all the phenomena of nature. He may not be able to 'name' Him; yet he feels His presence all about him. And to Him he addresses his prayer:

'Give me neither poverty nor riches,
Feed me with food sufficient for my wants;
Lest I be full, and deny thee,
And say, Who is Jahweh?
Or be poor, and steal,
And profane the name of my God.'²

8. Christian wisdom.—Early Christianity is a return from speculation to the simple realities of faith and life, which are 'hid from the wise and prudent,' but 'revealed unto babes' (Mt 11²⁵, Lk 10²¹). In preaching the gospel of the Kingdom Jesus avoided the idiom of the schools and addressed men in that concrete, parabolic style which we have found to be of the essence of the popular proverb. But those who listened to His preaching found in it a 'wisdom' beyond that of all their teachers (Mt 13⁵⁴, Mk 6²). He Himself claimed to be 'greater than Solomon,' to hear whose wisdom the queen of Sheba came 'from the uttermost parts of the earth' (Mt 12⁴², Lk 11³¹). And this because He had been supremely endowed

1 301-4.

2 308f.

with 'the grace of God' (Lk 2⁴⁰), so that the words He uttered were the very wisdom of God (Mt 11²⁷, Lk 10²²). To Jesus 'wisdom' was that practical understanding of the mind of God, that entire sympathy with His will and purpose, which enabled men to walk in His ways and do His will 'on earth as in heaven' (cf. Mt 6^{10f.}, 7²¹ etc.). The same idea is set forth in Ja 3^{38f.}, where 'the wisdom that is from above' is contrasted with the wisdom that is 'earthly, sensual, devilish' by the fruit it yields in purity, meekness, gentleness, mercy, and 'a good conversation.' The Pauline Epistles and the Fourth Gospel show a much closer affinity with the Wisdom literature. The apostle, it is true, renounces the 'wisdom of the wise,' which leads to no real knowledge of God, and even obscures the gospel of 'Christ crucified' (1 Co 1^{20f.}). But in Him he finds a wisdom higher than that of men, even 'the power of God, and the wisdom of God' (v. 24). In the sacred quaternity of graces personally manifested in Christ—wisdom, righteousness, sanctification, and redemption—wisdom takes the foremost place (v. 30). But the pursuit of wisdom is reserved for the full-grown in Christ (τέλειος), who alone have minds to comprehend the hidden mysteries of God (2⁶). Himself increasingly filled with the spirit of heavenly wisdom, St. Paul elaborates in the Epistles to the Colossians and Ephesians a real speculative philosophy, based on Him 'in whom are hid all the treasures of wisdom and knowledge' (Col 2³). Adapting ideas and phrases from the Wisdom of Solomon, he worships Christ as 'the image of the invisible God, the firstborn of the whole creation,' by whom all things were created—that are in heaven, and that are in earth, visible and invisible—in whom all subsist, and through whom all are destined in the fullness of time to be 'gathered into one' (Col 1^{15f.}, Eph 1^{9f.}). Yet the apostle does not lose sight of the practical aspects of the case. For him true Christian wisdom is still that which consists in 'the knowledge of God's will' (Col 1⁹) and leads to a consistent 'walk' before those both without and within the fold (4⁵). Similarly, the Logos philosophy of the Fourth Gospel is valuable only for its results in character. The Logos became flesh and dwelt among us, that we might behold His glory—'glory as of the only begotten of the Father'—and be progressively transformed into the image of that glory (Jn 1^{14f.}).

WISDOM TREE.—The venerable *Bo*-tree at Anurādhapura is the oldest historical tree in the world. The planting of the *Bo*, or *Bodhi*, tree (the Sinhalese *Bo* is merely a contraction of the Pali *Bodhi*, both meaning wisdom) is recorded at length in the Chronicles of Ceylon as having taken place in about 245 B.C.¹ Incidental references, in later centuries, to repairs to the enclosure, or to gifts of staircases or statues or ornaments by subsequent kings, show how great was the care that was continually devoted to it.² It is now (1920) 2165 years old.

Its botanical name is *ficus religiosa* (the Anglo-Indian *pipal*), and trees of this kind can put out fresh roots if a branch be planted, or if soil be heaped up near the base of the trunk. The soil has been thus so often raised that the tree now appears as three distinct trees (three branches of the old tree), growing from different points of an enclosed plateau about 25 ft. above the level of the spot where the tree was originally planted. A winding staircase of stone leads up to the enclosure of this plateau. Wherever the branches threaten to become too long they have been propped up by rough supports of wood or masonry. A stone slab, a *malāsana*, or flower-stand, has been provided for the memorial presentation of the white blossoms of the *champaka*. Everything about the spot gives the impression of a hoary antiquity. But we could not be sure of the identity of the tree without the long chain of documentary evidence.³ The trees are somewhat like elms in size and shape; but the tapering leaves, about six inches long and four inches across the broadest part, are lighter in colour underneath, and the never-ceasing rustling of the leaves causes a constant flash of vanishing and reappearing light and colour curiously suggestive of one of the main doctrines both of the ancient Buddhist and of much modern philosophy.

Anurādhapura (*g.v.*) and the country round had been for nearly seven centuries, from the middle of the 12th to the middle of the 19th cent., almost abandoned. The Tamils, after centuries of intermittent attempts to take it, had been driven back to the north of the island. The Sinhalese, outnumbered ten to one, had retired to the fastnesses of the mountains to the south. East to west the jungle stretched from shore to shore, and north to south for a hundred miles. In what had been the most populous and prosperous part of Ceylon there were left a few far-scattered peasantry and woodmen; and the great capital had become a few mud huts. But there were always devoted *bhikkhus* to tend the *Bodhi*, the Wisdom Tree. A railway now runs through the jungle, and roads have been made. The magnificent reservoir, 50 miles in circumference, which had supplied half the country-side with water, has been restored to working order; and population and prosperity are slowly being restored. One consequence is

¹ *Dīpavaṃsa*, ch. xvi.; *Mahāvamsa*, ch. xix.

² See the appendix to vol. ii. of J. E. Tennent's *Ceylon* for a long list of such references.

³ Much of this is given in an appendix to the second volume of Tennent's *Ceylon*.

that a constant stream of pilgrims comes from all parts of the world to pay reverence to the tree.

Various different, and indeed contradictory, explanations have been given of this reverence paid to the *Bodhi*-tree. The oldest explanation is that given in Ceylon itself. This can be gathered from different passages in the Chronicles and in the Commentaries on the canon, and is best summarized in a book called the *Mahā-bodhivamsa* ('Story of the great Wisdom Tree'), probably written about A.D. 950. It is an amplified version in bombastic Sanskritized Pali prose of what had been already said in the older authorities just referred to; and, however interesting as a literary work, the oldest to show that acquaintance with Sanskrit then just beginning in Ceylon, it really adds nothing to the historical details contained in the older documents. The Ceylon view is that the tree is held in so much affectionate esteem and awe because it was grown from a branch of the original *Bodhi*-tree at Gayā (*q.v.*) in India (often distinguished as Bodh-Gayā, 'Gayā of the Wisdom Tree') under which the Buddha had actually sat when he passed through the intense mental crisis, the turning-point of his career, which led to his coming forward as the teacher of a new religion. The 'wisdom' is the wisdom, not of the tree, but of the teacher. It is derived not from the tree, or from any fruit of the tree, but from the mental struggles and the victory won by the founder of their faith. They adore the tree, not because of the power of any spirit or dryad within the tree, but because the outward form of it is a constant reminder of what they hold to have been the most important event in the history of the world. In other words, their attitude towards the tree is much the same as that of many Christians towards the Cross. And, just as opponents of Christianity have thought, quite illogically, that they could score a point against it by showing that the cross was a religious symbol (with quite different associations) before the rise of Christianity, so opponents of Buddhism have sought, and quite successfully, to show that the tree was a religious symbol (with quite different associations) before the rise of Buddhism. They fail to see that that is not the point. Granted that other people had previously used the same (or a similar) symbol in a different sense, the question is: In what sense did the Buddhists use it? We shall deal with only the more important of these theories of the tree.

James Fergusson, the eminent historian of Indian architecture, held that the main features of 'Turanian' belief were tree- and serpent-worship, that the despatch of a branch of the *Bodhi*-tree by Aśoka to Ceylon is a proof of the Turanian tree-worship practised by that Buddhist emperor of India, and that the monuments show that early Buddhism was a 'Turanian' faith. What exactly he means by Turanian he does not state. The conclusions put forward in his massive volume, entitled *Tree and Serpent Worship*, have not been accepted by any other scholar who has written on the subject.

E. Senart, the editor of the *Mahāvastu* and the interpreter of Aśoka's inscriptions, will have none of this. He holds that Buddhism was, in its origin, Aryan; that it was derived almost entirely from the Brahman mythology contained in the Vedic records; that the legend of the Buddha is almost a myth; that in that myth the tree is almost, if not quite, as important as the teacher; and that the tree is the cloud-tree of the famous atmospheric struggle for the rain when the god with his thunderbolt defeats the demon who keeps back the rain in the clouds. The wisdom of the tree is the ambrosial rain, for is not their *nibbāna* sometimes called by the Buddhists 'ambrosia'?¹ All the author's literary skill, poetic imagination, and great learning have not availed to secure acceptance for this theory. For no attempt is made to explain how or why or when or where the transmutation of the one set of ideas into the other can have taken place.

Heinrich Kern, the late professor of Sanskrit at Leyden, was of yet another opinion. In his view the Buddhist accounts of their teacher's life are a euhemerized sun-myth. The Buddha is really the sun, and his disciples are the stars. He regards the tree, not (with Senart) as the cloud-tree, but as 'the world

tree, the tree of life.' This is obscure, as the two are quite different; and he refers only to a post-Buddhist *Upaniṣad* (*Kaṭha*, vi. 1) which does not clearly speak of either.¹ Even if it did, what evidence could that be of Buddhist belief?

It should be pointed out, firstly, that these theories are mutually exclusive, and cannot be combined. If any one of them is right, then each of the others is wrong. Secondly, they are all almost exclusively based, so far as the Buddhist side of the question is concerned, on late records—records eight hundred years or more later than the events they purport to describe. To the present writer it seems indisputable that, if a historian wishes to ascertain the genesis of a 'legend,' the only scientific method is, first of all, to ascertain what is the earliest form in which the legend is recorded. The earliest form of the legend about the original tree is as follows.

It is well known that there is no consecutive life (or legend) of the Buddha in the canon. But there are incidental references to certain episodes in his career. Of these at least twelve refer to the episode of the Wisdom Tree. But only two of them even mention the tree; and then it is merely to say that when seated under the tree the Teacher thought such and such things. This simple fact is enough to dispose of the theory that the tree was nearly, if not quite, as important as the teacher.² In one of the longer composite Suttantas contained in the *Digha* there is a short account of six previous Buddhas with a sketch of the life of Vipassi, the first of the six. This is so evidently drawn up as a mere imitation of the life of the historical Buddha that it is suggestive to find that the sketch contains no reference to a wisdom tree. This is the more remarkable since in the tabular paragraphs giving certain details about each of the six the name of the tree under which each attained to enlightenment is also given. In none of the cases is the tree called a wisdom tree.

If the above statements of fact are correct, it follows that the expression 'wisdom tree' or 'tree of enlightenment' does not occur at all in any of the oldest of those canonical works which deal with the Dhamma (the law or religion), that it occurs once in all the other canonical works on the Dhamma, that it occurs only once in those that deal with the regulations of the order (the *Vinaya*), that that single reference is in the very latest portion of the *Vinaya*,³ and that the expression is then used merely to distinguish from other trees of the same kind and name that particular one under which the teacher was seated when he obtained enlightenment.

For the later history of the original 'wisdom tree' at Bodh-Gayā in India see art. GAYĀ.

WORD (Sumerian and Babylonian).—1. Original ideas.—The Sumerian vocable for 'word,' or formal expression of command, is *inim*, deflected early to *enem*, and it was carefully distinguished from the noun *dug*, 'discourse,' 'speech,' and the verb *dug*, 'to speak.' *Inim*, *enem*, is always a noun and was translated into Semitic by *amātu*. Both *enem* and *amātu* obtained the secondary meanings 'affair,' 'matter' (Latin *res*). The Sumerian word also developed the sense 'incantation,' *i.e.* the formal words of the magician, and hence the reduplicated form *inim-inim-ma* (pronounced *inim-nim-ma*) became the ordinary rubric in the magic literature for 'incantation' (Semitic *šiptu*). The present writer derives the noun *inim* from the verbal root *nim*, 'utter a decision,' 'issue a formal word,' whence is also derived the noun *nam*, 'fate,' 'decision.' The Semitic noun *amātu* is derived from a root *wamā* (אמא), 'speak,' 'curse,' found otherwise only in Aramaic in the forms *iāmā*, 'āmā'. The Sumerians and consequently the Semites regarded a formally spoken 'word,' containing the force of a command or promise, as a definite and real thing. It possessed magical and terrible power if it issued from a deity, from a priest, or from a human being under formal circumstances. Hence witnesses who were present at a legal transaction which ordinarily involved an oath were called *galu inim-inim-ma*, 'men of the words,' or men who were present when formal 'words' or matters were arranged. A witness is sometimes called *inim-zu*, 'one who knows the word,' *i.e.* one who knows what formal words were stated in a transaction.

The formally spoken word of any of the great gods was regarded by the Sumerians as a real divine entity. For the early period we have only the personal names of Sumerians as a source for our study, but undoubtedly the conception of the word as an agent of god's wrath, which became in later times one of the principal features of Sumerian-Babylonian religion, arose long before the liturgical texts in which alone this doctrine has been preserved. This is the aspect of the word which was chiefly developed in Sumerian theology, but they also held that the *enem*, or word, of a great god might be a good and kind agent of deity when not uttered in wrath to punish the sins of men. Before 2900 B.C. occur such personal names as the following: *Enem-ma-ni-zid*, 'His word is true,' *i.e.* the god's word is a faithful support; ¹ *Enem-azag-zu-da-ri*, 'The word of the wise one is eternal.'² In the period of Ur (25th cent.) occur the names *Enem-dug-ga-ni*, 'His good word,'³ and *Enim-Bau-ni-gi*, 'The word of the goddess Ban is true.'⁴ Even in a passage to the destructive word of the gods Anu, Enlil, Marduk, and Nebo from a liturgy

of the 21st cent. a line runs, 'His word has no evil,' *i.e.* does no wrong.¹ It is, therefore, certain that the Sumerian conception of the word of the gods was not necessarily that of an avenging messenger. Nor is the idea of a curse inherent in the original use of the term. They simply attributed to the formally spoken word of a great god a semi-personality; they thought of it as a divine agent.²

2. The 'word of wrath.'—The Sumerian liturgies in all periods of their evolution chant at great length the destructive work of the avenging word which is sent by the angered gods to chastise mankind for their sins.³ In the earliest known liturgical fragment (period of Gudea, c. 2650) a passage to the *Verbum Irae* occurs.

'Thy Word upon the sea has been projected and returns not.'⁴

But passages on the 'word of wrath' must have been employed in public choral services in pre-Sargonic times, *i.e.* before 2800 B.C. The name *Enem-dug-dug-ga-ni an-düb*, 'The word which he spoke shakes the heavens,' is found on a temple record of Lugalanda (c. 2850),⁵ and an abbreviated form of it, *Enem-du-du*, occurs in the period of Ur.⁶ This name, like so many Sumerian personal names, has been taken from the liturgies, and the line which supplied it recurs frequently in passages to the destructive word.

'The Word which on high shaketh the heavens,

The Word which beneath causes the earth to tremble.'⁷

That alone is conclusive evidence for the existence of this theological conception and for these doleful descriptions of the destructive word in public song services at the very beginning of Sumerian civilization.

In the earlier stages of Sumerian liturgical worship, when only single song melodies or lamentations were employed, we find references to this idea. A long lament of the Weeping Mother, who is represented, as so frequently in later compositions, in the rôle of a mother-goddess wailing for her people, has in the very opening lines a passage which attributes all the woes of humanity to the words of Anu and Enlil. Sin invariably provokes the anger of the gods and they send the 'word of wrath' to hasten forth and afflict mankind. Hence the great earth-mother, who loves men and shares their sorrows, is also afflicted by the word.

'In the home it causes life to cease, in the flocks (?) it causes

life to cease,

To the wedded ones it causes life to cease, among children it causes life to cease.

It has taken them as prey, it has caused them to disappear.

His Word speeds me, speeds me forth, as oft as it comes to me my face is prostrated.

When the Word of Anu came to me,

When the Word of Enlil came to me,

When to my temple he came,

When by the mountain road he entered.'⁸

A liturgy of the compiled type, which preceded in order of evolution the canonical compositions of the Isin period,⁹ has a remarkable melody of the Weeping Mother, in which she thus describes the misery of the city Ur:

'May Anu prevent his Word.

May Enlil order kindness.

⁴ *ib.*

Its foundations it has annihilated and reduced to the misery of silence.

Unto Anu I cry, "How long?"

Unto Enlil I myself do pray.

"My city has been destroyed," will I tell them.

"Ur has been destroyed," will I tell them.¹

The fifth melody of this early liturgy is the *Verbum Iræ*, and henceforth all the canonical Sumerian liturgies contain one song to the 'word of wrath.' Before giving a selection from this most notable song to the word, let us note that the idea of *enem*, 'word,' had become so fully associated with divine wrath that it was called *ud*, *udde*, 'storm,' 'angry spirit.' Portions of this melody to the word of Enlil follow:

'Enlil utters the angry spirit and the people wail.

The angry spirit has destroyed prosperity in the land and the people wail.

The angry spirit has taken peace from Sumer and the people wail.

He sent the woeful spirit of wrath and the people wail.

Kingaludda and Uddagubba into his hand he entrusted.

He has spoken the angry spirit which exterminates the Land

and the nation wails.

Enlil sent the fire-god as his helper.

The mighty wrathful spirit of Anu was spoken and the people wail.

The city Ur like a garment thou hast destroyed, like . . . thou hast scattered.²

The above is the most important passage in Sumerian literature for the personification of the word. Enlil sends two messengers, Kingaludda and Uddagubba, to attend the word as he goes forth to execute vengeance upon mankind for their sins. The name Kingaludda means 'messenger of the angry spirit,' and Uddagubba means 'he who stands by the angry spirit.' Both of these are minor deities, and the former became a well-known demon.³ Here also the fire-god is sent forth by the earth-god Enlil as an attendant of the angry spirit—an idea which survived in post-Exilic Hebrew in connexion with the visitation of the *rūah*, or spirit, of Jahweh among men. Joel describes the visitation of God's spirit in the words:

'I will place marvels in heaven and earth, blood, and fire, and pillars of smoke.'⁴

And the idea appears notably in the gift of tongues at Pentecost in NT times:

'And there came suddenly from heaven a sound as of a rushing mighty wind, and it filled the whole place in which they were sitting, and there appeared unto them cloven tongues as of fire.'⁵

In all the canonical Sumerian liturgies which were borrowed by the Semites and continued in use down to the age of Alexander the Great, and even into the era of the Seleucidae, is found at least one song to the spirit of wrath. Since the word (*enem*) or spirit (*ud*) of Anu, the heaven-god and father of all gods, almost invariably comes first, we infer that the spoken word issued from heaven is the original idea, and then the same power was attributed to Enlil, the earth-god, and to a few others of the great deities. The following list of partially restored liturgies in which the song to the word or spirit has been preserved is in the present stage of Sumerology exhaustive:

- (1) Enlil series: *babbar-ri babbar-ri-gim te-ga-bi zal*, 'Like the sun, like the sun his approach illuminates'; inserted in the first melody.⁶ Here *ud* and *enem* are both employed. 'Spirit (*ud*) that brings the youth to extremity, spirit that brings the maid to extremity. Spirit that destroys the stalls, spirit that desolates the folds. Possessor of *wisdom*, spirit whose intentions are not discerned.

Spirit that reduces all things to obedience.

The word of Enlil rushes forth and eye beholds it not.⁷

¹ Selections from the fourth melody of Nippur 7030, published in *SLP*, no. 11.

² Selection from the fifth melody of Nippur 7030.

³ See the note in *SLP*, p. 233.

⁴ J1 280.

⁵ Ac 22r.

⁶ Langdon, *Sumerian Liturgical Texts*, 153, 16-159, 25. It is probable that this liturgy contained a section entirely devoted to the word. A Weeping Mother series employs the same hymn; see below, no. 16.

- (2) Enlil series: *elum gudsun-e mu-zu kurkurra*, 'Mighty one that overwhelms, thy name is upon all lands'; fourth song.¹

'A tempest it is, shattering the mountains.

As for the lord his word is a tempest.

The heart of the mighty one is a tempest.

The heart of Enlil is a tempest.²

- (3) Enlil (?) series: *uddam gu-de-de-ās*, 'When like a storm he cries'; first song on tablet 2 of the Assyrian edition; song to the *enem* of Anu, Enlil, and Adad.²

- (4) Weeping Mother series: *nimala gu-de-dūg ki-bi ba-da-nad*, 'The cow wailed and in her place lay down'; song to the word inserted in the first melody, lines 11-15.³ An extremely long hymn to the word of Anu and Enlil of this series occupies two tablets.³

- (5) Nergal series: a long hymn to the word of Nergal; the last song of the series, followed by the *ersemma*, or recessional.⁴

- (6) Nergal series: two long hymns to the word of Nergal, the first of which is a duplicate of the one cited in no. 5; the last two songs of a liturgy to Nergal followed by the *ersemma*.⁵

- (7) Nebo series: two songs to the word of Nebo in the third tablet of the series *ukkin-ta eš-bar-ra ti-la*, 'In the assembly wisdom is departed.'⁶

- (8) Weeping Mother series: contains two passages to the word of Anu and Enlil inserted into two songs.⁷

- (9) A liturgy of songs, all devoted to the word. Particular attention is given to the word of Marduk, and the Weeping Mother is represented in two songs as afflicted by the word:

'The exalted one like a wind, like a wind,

The exalted one like a wind has cast me down, even me.

The exalted one, the lord of lands,

He of intangible thoughts, whose word is true,

Against whose command there is no turning back,

The exalted Enlil, the utterance of whose mouth is unalterable.

This angry spirit destroys the folds, rends the stalls.

My roots are rent, my forests are despoiled of leaves.

Like a lone willow-tree by the river's bank he has made me,

Like a cedar in the desert he has made me.

Like a lone tamarisk in the storm he has made me.

Behold the mighty one like a lone rush-reed has brought me low.⁸

An exceedingly difficult passage attributes the following expression to the mother-goddess:

'I am the word of the lord, because of its misery wailing I sit.'⁸

The first half of the line is interpreted to mean that the mother-goddess is possessed by the wrathful word, she is completely in its power.⁹

- (10) Nergal series: *agalgalla šel-susu*, 'Flood that drowns the harvest'; a song to the word of Nergal is inserted into the first litany, and it was followed by a second hymn to the word which has not yet been recovered.¹⁰

- (11) A liturgy to the word of Anu arranged to commemorate the destruction of the city Ur: *anna ehume ū-a enemman-ū*, 'Of exalted heaven lofty is his word.' The first two tablets only are preserved. They include hymns to the words of the moon-god, the sun-god, and the thunder-god. The second song of the liturgy, following upon the hymn to the word of Anu and Enlil, is devoted to the Weeping Mother.¹¹

- (12) Selection from an unknown series containing two hymns to the word. The first hymn begins, 'His word hastens forth from Ekur, his word is the burden of the storm.' It is an old hymn to the word of Enlil, the earth-god. The litany includes references to the word of Ea, of Damkina his spouse, of Marduk, of Nebo and of Sakut, all of which are said to proceed from Ekur, the temple of Enlil in Nippur.¹² The second hymn on this tablet is among the most remarkable of all the songs to the word. Fifteen

¹ The text (after Zimmern) is ed. in *SLP*, pp. 292-303; see, for the song to the word, p. 299.

² See Langdon, *Babylonian Liturgies* (hereafter cited as *BL*), p. 25.

³ Published in *BL*, p. 43, and *SBP*, pp. 13-35.

⁴ Published in *BL*, no. 73, pp. 47-49, and to be restored from the duplicate, *SBP*, p. 76.

⁵ Text in G. Reinsner, *Sumerisch-babylonische Hymnen*, Berlin, 1896, no. 7; ed. in *SBP*, pp. 76-78.

⁶ *BL*, pp. 65-68.

⁷ For the text see *BL*, plates lix-lxx. For a tr. of the first passage see p. 74. For the second passage see pp. 107f. and 74 f.

⁸ That is clearly the meaning of the line (see *SBP*, p. 46, 15, where the end of the line should be read *še-ān-du (m-dū)*).

⁹ The series was called *uddam ki-ām-(mu)-ūš*, 'Like the wrathful spirit (his word) has been established.' Six songs of tablets 1 and 2 are edited in *SBP*, pp. 33-55. The remainder of the series, i.e. tablets 3-6, are supposed to contain similar material.

¹⁰ K. 69, ed. in J. Bollenrucher, *Gebete und Hymnen an Nergal*, Leipzig, 1904, pp. 32, 40-35, 35. See also for variant of a part of this song to the word, *SBP*, 43, 49-47, 13.

¹¹ Ed. in *SBP*, pp. 68-67.

¹² This remarkable hymn to the word is ed. in *SBP*, pp. 72-74 (lines 1-30), and the remainder of the hymn will be found on pp. 76-78, lines 16-reverse 4.

lines from the end of the composition have been preserved, but the opening lines are lost. It reads:

'its *Azil* (*buluppū*) distresses small and great.
Small and great it crushes and pours into a heap.
When on the river it rushes, a deluge it causes.
When on the Tigris it rushes, a deluge it causes.
When on the Euphrates it rushes, a deluge it causes.
[When on the . . . it rushes, a deluge it causes].¹
When it hastens in the ravines of the hills a deluge it causes.
When the Lord² speaks, then it hastens and a deluge it brings.
The child-bearing mother wailed, "Behold my son doth send (the word)."
The mother Damkina wailed, "Behold my son doth send."
Unto her chamber she entered, she hastened (wailing), "Behold my son doth send."
Son whom in the sacred bowl I baptized, "Behold my son doth send."
Son who from the stone bowl has eaten, "Behold my son doth send."
He who ate has of himself grown great, "Behold my son doth send."
Him that with a measuring-rod I proved, "Behold my son doth send."³

We have here an interesting situation. Damkina, a mother-goddess, wife of Ea the water-god, laments the ruin caused by the word of her own son Marduk.

- (13) Nergal series, second tablet: a long hymn to the word of Nergal occupies nearly the entire tablet; it is followed by a short song in which Nergal is impetrated to send his destructive word upon all wicked lands.⁴
(14) Enlil series: title unknown. Only one tablet of the series has been recovered. The liturgy contained two short hymns to the word of Enlil at the end of this tablet.⁵
(15) Enlil series: *ame barana-ra*, 'The hero to his sanctuary.' Four of the six tablets of this liturgy are known.⁶ The liturgy contained at least one song to the word of Enlil.⁷
(16) Weeping Mother series: *uru bulage*, 'She whose city was destroyed.' Four of the six tablets of this liturgy are known. Tablet 5 has a song to the word of Enlil, identical with the one employed in the first tablet of the Enlil series, no. 1 above.⁸

3. The spirit (*ud*).—In the preceding discussion some attention is necessarily given to the identification of the word of a god with his breath or spirit. As in the case of the 'word' (*enem*, *inim*), the term for 'spirit' or 'breath' (*ud*) of a god had not originally a destructive and violent sense, but its use in that sense became almost universal and consequently should be rendered in most passages by 'angry spirit,' 'spirit of wrath.' In all of the present writer's translations 'angry spirit' renders the Sumerian *ud*=Semitic *ūmu*. The Sumerian *ud* is the ordinary word for 'day,' and so is the Semitic *ūmu*. The Sumerians, and after them the Semites, conceived the breath of a god as a warm flood of light. When a god's anger was aroused, his breath went forth as a storm, and consequently both *ud* and *ūmu* came to mean 'storm.' But the original idea of the divine spirit or breath must be defined. A passage on the wrathful word of Enlil is introduced by the remarkable statement, 'The utterance of thy mouth is a beneficent wind, the breath of life of the lands.' The soul of the god is here defined as a kindly wind⁹ which gives life to mankind.¹⁰ A proper name of a man in the period of the Ur dynasty was *Udde-nigšag*, 'the spirit (of god) is a blessing,' and another is *Udde-nigšig*, 'the spirit is goodness.'¹¹ A name in the pre-Sargonic period is *Ud-mukuš*, 'the spirit has become reconciled.'

¹ This line is omitted on the variants.

² Marduk is referred to here.

³ The text of this hymn has been reconstructed from Reisner, plate 14=SBP, p. 74; BL, no. 41, and a small fragment published by Bruno Meissner, *Assyriolog. Studien* (MVG xv. 5), Leipzig, 1912, no. 3, p. 79.

⁴ Ed. in SBP, pp. 80-83.

⁵ See SBP, p. 92, 8-13, for the first hymn to the word in this liturgy; and for the second hymn which followed here, see H. Zimmern, *Sumer. Kultlieder aus alt-babylon. Zeit*, Leipzig, 1913, no. 195, obv. 6ff.

⁶ Reisner, no. 26, tablet 3; no. 33, tablet 6. Nos. 14 and 15 belong to the series, but cannot be fixed in order.

⁷ See SBP, pp. 99, 36-100, 59.

⁸ Tr. in SBP, pp. 187, 19-183, 37.

⁹ With this aspect of the divine breath is to be compared the Hebrew *ruah* of Gn 6³, 'Not shall my spirit abide in man.'

¹⁰ SBP, p. 124, 17-18.

i.e. the wrath of god is appeased.¹ It is said of the mother-goddess Ishtar, *ud-de-da ba-e-sig*, 'by the spirit thou art filled,' *i.e.*, the spirit of one of the great gods was given unto her.² She is thus endowed with supreme power. In the same manner kings are given the divine 'word.' Ur-Ninā is called the man *inim-sig aNinā*, 'unto whom was given the word of the goddess Ninā.'³ Ur-Bau is described as the man *inim-ma-sig-ga aInnini*, 'unto whom was given the word of Ishtar.'⁴ It is obvious, therefore, that the spirit or breath of a god was practically identical with his word, and it was personified as an agent of good works. This phase of its activity as a *verbum creator*, a spirit of wisdom and cosmic reason, appears only in Semitic texts where the Semitic word *mummu* is employed. In Sumerian texts the beneficent and philosophic aspect of the word is wholly overshadowed by its activity as an agent of wrath.

'The spirit (*ud*) of the heart of Anu which has become evilly disposed,' says a line of a hymn to the word, and the *ud* is called the messenger of the lord of the lands (*i.e.* Enlil).⁵ Another passage states explicitly, 'The spirit is the word of Enlil.'⁶ The expression, 'the merciless spirit,' was so common that it appears in grammatical texts.⁷ And, when the wrathful word had executed judgment on the earth, the god who sent him forth recalled him. 'When Anu spoke, the word returned to its place.'⁸

4. The 'word of wrath' in Hebrew.—The Sumerian belief in the wrathful word of the gods passed into late Hebrew theological beliefs. The description of Jahweh's word by an Alexandrian Jew in the Greek book, the *Wisdom of Solomon*, is obviously under the influence of Sumerian liturgies which were being sung everywhere in Babylonia at that time:

'Thine all-powerful Word leaped from heaven down from the royal throne,
A stern warrior, into the midst of the doomed land,
Bearing as a sharp sword thine unfeigned commandment,
And standing filled all things with death.'⁹

A post-Exilic Psalm reflects clearly the Sumerian idea:

'He sendeth his commandment upon the earth;
His Word runneth very swiftly.'¹⁰

Even more direct is the evidence of the post-Exilic Isaiah, for here we have words written by a prophet who almost certainly lived in Babylonia.

'So shall my word be which goeth up from my mouth; it shall not return unto me void,
For it shall have done that which I desired,
And shall have accomplished that for which I sent it.'¹¹

5. The word as creative wisdom.—The Sumerians and Babylonians invariably regarded water as the uncreated first principle and source of all things created. The creative form or principle resided in the primordial watery chaos. Since we do not have any Sumerian sources for the doctrine of the cosmic word, but only a syllabar which gave the term, now unfortunately broken away, it is impossible to state exactly what it was. Evidence deduced above for the beneficent activity of a god's word and breath induces the conjecture that the Sumerians employed the term *inim*, 'word,' for cosmic creative form or reason. At any rate we know that the term *mummu*¹² was said to mean 'loud voice,' apparently because the roar of the thunder- or rain-god was adopted as a term for the indwelling wisdom of water. We know that *ud*,

¹¹ Is 55¹¹.

¹² Commonly supposed to be Semitic. *Mummu* may be, however, Sumerian and a word for 'form.' See Thureau-Dangin in *RAssyr* xvi. [1920] 166, n. 3. The Semitic interpretation of

'breath,' 'storm,' was also identified with the thunder-god.¹ *Mummu* at any rate was the accepted Semitic² term, and means 'voice.' It was personified and survived in the writings of the Greek historian Damascius as *Möymis*. According to Damascius, *Mummu* was the intelligible world and the only-begotten son of *Apsü*, the nether sea of fresh water, and *Tiamat*, the salt water sea. Since all things descended from water and wisdom resided in water, *Enki*, god of water, was called *mummu bān kala*, 'Mummu (creative reason) which creates all things.' Also *Nebo*, god of writing and son of *Enki*, was identified with *mummu*, 'who fashions the things created.' When *Marduk*, at the hands of the Babylonian priests, became the son of *Enki* and creator of the world, he also was identified with *mummu*.

According to Sumero-Babylonian philosophy, the reality of anything consists in its 'form' (*ḥar*; Semitic *uṣurtu*), i.e. the divine mental concept which is revealed to mankind by its name. For example, the word 'bowl' is a name by means of which its 'form' or the divine concept is revealed to man. All knowledge is revelation, and the reality of things is not their tangibility but the mental concept, and things cannot exist until a god has this mental concept. Fundamentally all things, material and immaterial, rest upon the mental activity of the water-god, which is *mummu* and was personified cosmic reason. Hence the universe was conceived to be held together by a band or cord, *riksu*, *markasu*, a divine creative reason. Such was the philosophic and mystic concept of the word in Babylonia.³

6. The Greeks borrow the Babylonian idea of creative reason.—There can be little doubt but that *Thales*, founder of the Ionian school of hylozoism, who regarded water as the first principle, borrowed his ideas from Babylonia. Here in the Ionian school of *Thales*, *Anaximander*, and *Anaximenes*, all of *Miletus*, cosmic substance

itself is reason, wisdom, and harmony.¹ That strikingly corresponds to the activity of the Babylonian *Logos* or *Mummu*. *Heraclitus* (*q.v.*) of *Ephesus*, who developed the ideas of his predecessors at *Miletus* at the end of the 6th cent. shortly after the fall of *Babylonia*, adopted fire as the universal element, sometimes defined as hot breath in his writings. He is the originator of the cosmic philosophy of 'becoming,' the ceaseless transformation of all things from fire or heat through various stages back again to fire. And the cosmic law or reason working beneath all this process of becoming is *λόγος*, or the word. We do not know whether the earlier Ionian philosophers employed *λόγος* in this sense, but there seems to be an apparent connexion between the creative wisdom or word of the Babylonians and the law of eternal becoming or the 'word' of *Heraclitus*.²

7. Influence of Babylonian creative word in Hebrew.—The Hebrew employs both 'word' (דבר) and 'spirit' (רוח) in much the same way as the Babylonians employed *mummu*. We have seen that the Sumerians and Babylonians regarded the spoken word and the breath of the god as intimately connected and originally as beneficent agents. Although Hebrew has not the profound mystic and cosmic philosophy of the Babylonian, there is an obvious connexion between the two cultures at this point. We may not infer borrowing here, but the similarity must be noted. A passage of an Exilic Psalm confirms the suspicion that the writer knew Babylonian theological ideas:

'By the word of Jahweh were the heavens created,
And by the breath of his mouth all their host.'³

WORSHIP (Primitive).—What is worship? The word itself is English, and almost untranslatable into other languages. Originally it implied acts prompted by veneration, but with stress of time and weight of usage it has come to be applied to the whole range of religious behaviour, so that one might well say that worship is the active side of religion. Even so, the meaning does not stop with the notion of act; it is also the attitude which prompts the act; it is the belief which stays the attitude; it is the faculty which empowers the belief. In each of these guises it is multiform: *qua* act it includes cult and tabu, rites sacramental *mummu* as 'voice' would then be based upon a false etymology or be influenced by their use of the term *amātu*, 'word,' as a *verbum creator*.

¹ R. E. Brünnow, *A Classified List of . . . Cuneiform Ideographs*, pt. i., Leyden, 1887, no. 7791. It should be noted also that the Hebrews often spoke of the breath (רוח) of Jahweh as a storm-wind (Ex 15^a, Is 50¹⁹, Ps 135⁵) and as his wrath (Job 49 1530).

² Perhaps a Semitized Sumerian word *mumma*, 'form' (?).

and rites ascetic, indulgence and devotion, feast and penance; *qua* attitude it pairs off fear and love, dread and adoration, or it mingles them in the sense of awe; *qua* belief it ranges from myth to philosophy, from creed to science, from passion for ideas to respect for truth; and *qua* faculty it is said to be absent in some men. Nor can it be defined by its objects; for in the context of worship is included not only communion with deity, but also traffic with the devil, while it cannot be

³ Ps 33⁶.

separated from the intercourse of man with man. If we were to judge by phrase alone, its comprehensive complexity would be apparent: along with 'divine worship,' the 'house of worship,' etc., come 'ancestor-worship,' 'devil-worship,' 'idol-worship,' 'nature-worship,' 'snake-worship,' 'tree-worship,' and what not? The residual fact seems to be that the word is catholic of all activities—physical, psychical, social—to which the adjective 'religious' can be applied; while, by discourtesy, it passes on to every other kind of pursuit that may be regarded as governed by a sufficiently intense interest, as 'dollar-worship,' 'woman-worship.'

Probably no reader mode of suggesting the range of meaning embraced in the conception of worship is at hand than the presenting of a list of the principal articles in this Encyclopædia which portray its phases (and along with them should be taken the general art. RELIGION). They include ANOINTING, ASCETICISM, AUSTERITIES, BAPTISM, CELIBACY, CHASTITY, COMMUNION WITH THE DEAD, COMMUNION WITH DEITY, CONFESSION, CONSECRATION, DEIFICATION, DEVOTION AND DEVOTIONAL LITERATURE, EXPIATION AND ATONEMENT, FASTING, FEASTING, HUMAN SACRIFICE, HYMNS, IMAGES AND IDOLS, INITIATION, MYSTERIES, OATH, ORDEAL, PENANCE, PILGRIMAGE, PRAYER, PRIEST AND PRIESTHOOD, PROCESSIONS AND DANCES, PROPHECY, PROPITIATION, PURIFICATION, SACRAMENTS, SACRIFICE, SECRET SOCIETIES, TABU, TOTEMISM. All these refer to modes or ideals of worship which are nearly universal among the races of men, while a multitude of special titles indicate particulars of rite and cult developed from these major forms. Along with these designations of ritual forms, constituting the acts of worship, should be considered those having to do with its occasions: BIRTH, DEATH, MARRIAGE, PUBERTY, or, in a social mode, seed-time (cf. PHALLISM), HARVEST, SABBATH, WAR; and again those designating its objects: ANCESTOR-WORSHIP, DEMONS AND SPIRITS, GOD, RELICS, SAINTS; while, finally, the psychical states induced by rites or regarded as their foundation cannot be excluded from the meaning of the term: ANIMISM (which is really a state of mind, not a system of thought), HOLINESS, LOVE (in its theological sense), MYSTICISM, POSSESSION, REVERENCE, SANCTIFICATION are examples. The whole idea is complex beyond definition, and, although it is undoubtedly primarily a designation of the active side of religion, especially of cult and rite, yet the activities are of such a nature as to be beyond characterization except when taken in connexion with their objects, their occasions, and their psychical effects.

1. Cult and culture.—Worship, broadly defined, is the active phase of religion, as made manifest in rite and cult. What, then, is its 'primitive' character? The question has been often debated and is really important: Are we to identify as the primitive (1) modes of worship found among contemporary or recent savage peoples, or (2) the historically and biologically first evidences of religious cult, or (3) the logically prior factors—*i.e.* the psychologically significant and the philosophically essential elements of human nature displayed throughout the whole course of the religious development of mankind? The first of these three is without question the current usage, and the second is commonly aligned with it; *i.e.*, contemporaneous savage cults are regarded as typical of historically primitive ideas by a majority of writers. Nevertheless, there has been in the past, and there is still, a vigorous current of opinion which maintains that savagery shows quite as much degeneration as it does conservation of religion, in its primitive value; and this opinion derives explicit support from the observed facts, for

grossness and decadence in rite and cult belong not to the most utter savages, but frequently to peoples well advanced in material civilization, while an enormous amount of superstitious lumber is obvious survival from what was once significant custom or intelligible belief. In short, in the matter of religion, as in all other matters showing the form of evolution, the law of development seems to be that of the central and healthy type, following a true norm of nature, while over against it are all manner of fantastic outgrowths and by-plays, alike degenerative and destructive. Religious cult, formal worship, is, in fact, no direct variable of culture; it possesses a type and significance of its own which must be dissected out from the accompanying contexts of economic, political, æsthetic, and intellectual life, before it can be properly comprehended.

It is at this point that the third mode of consideration, the psychological and the philosophical, becomes important. Recent years have seen the rapid growth of a very considerable literature devoted to the psychology of religion, its effort being (1) to describe the particular states and processes of mind which lead to worship and define it, and (2) to explain their relationship to the whole context of human nature and the world which has created it. If there is a religious 'instinct,' the definition of its forms and occasions is the patent key to the interpretation of all religious phenomena, and from it the 'primitive' in religion must be traced to type. This is the task of the psychologist, while on the side of the philosopher there remain to be put the great problems of the truth and value of religion. The philosophic task, too, is receiving yearly more attention, with the 'philosophy of values' as the central controversy.

A broad observation of the whole range of facts connected with the relation of cult to culture fortifies the significance of the psychologico-philosophical view-point. Shamanism (*q.v.*), in one form or another, with its accompaniments of trance and ecstasy, is the most universal of the ritual forms known to the least cultured peoples; that it is primarily the development of a psychical aptitude is evident. In the higher societies by far the greater number of cults trace their foundation to an 'inspired' founder, be he ancestor or prophet. The great syncretistic religions hark directly back to the life of a master as their source and explanation. In every level of civilization the origin of religious forms and beliefs goes straight to the individual experiences of individual men for foundation and guidance; nowhere is there evidence of an original religious 'compact' (unless totemism may be regarded as such), although, of course, there are plenty of instances of the application of religious forms to social and state interests. On the whole, the type of cult development, in high civilization and low, is (1) the moral or mystical teacher; (2) the ritualization of the original ceremonies, songs, or prayers, accompanied by social recognition; (3) their corruption, partial or whole, through syncretism (*q.v.*); and (4) not infrequently an effort, through a subsequent prophet or reformer, to purify the cult and bring it back to norm. This is obviously the Hebrew development as represented by the OT; it may fairly be applied to Christianity, to Buddhism, to Brāhmanism; and it finds signal illustration in the more backward regions of the world; *e.g.*, the majority opinion of Americanists is that in the Aztec cults, with their horrible rites, we have a clear-cut case of degradation from what had once been a religion (probably Maya in origin) containing much that was clean and noble, while in Peru there is evidence of several successive purifications and degradations of worship; and in neither centre was the highest

religious development invariably concomitant with the greatest material power. Finally, in modern society, the Protestant tendency to identify 'personal' religion with 'primitive' Christianity is clearly a reaction towards a psychological valuation of worship; and, indeed, it is altogether pertinent to note that the three Christian virtues, faith, hope, and love, are essentially and exclusively personal and psychical: here the primitive in religion is clearly individual experience.

2. Ritualism.—However founded, worship inevitably passes over into ritual forms. Rites are variously classified, usually under a broad initial dichotomy, as magical and religious, positive and negative, attractive and avertive, participative and ascetic, etc., though nowhere are these divisions sharp and fast; there are always intermediate classes looking in both directions. Thus imitative magic passes insensibly into devotional prayer; propitiation and praise are directed to the same deity and in the same ceremony; asceticism terminates in its own ecstatic indulgence, hardly to be distinguished from vinal enthusiasm. Furthermore, even where the division is clear, such classifications over-simplify the facts. Similar magical rites may be employed to bind a lover or to destroy an enemy; sacrificial rites, indistinguishable in form, may be designed for propitiation of divine anger or the expression of gratitude for divine protection. Acts of worship no doubt all express desire, but the desires may vary *toto cælo* in the matter of conscious definition; they may be wholly specific or utterly vague, and their psychical backgrounds as complex as are human moods. The customary classifications afford convenient heads for the arrangement of the facts, but they become dangerous fictions when states of mind or theories of origin are inferred from them.

There are, of course, definable levels in the use of ritual expedients, and these correspond in a general way with cultural development. (1) At the simplest level of life the few rites employed are so nearly *instinctive* in character, and their occasions so spontaneous, that it is hardly necessary even to call upon tradition as an explanation of their presence. Perils which command propitiation, hours of plenty which invite feasting and song, the pains of disease calling for 'medicine' and vision-caught assuagement—all these have obvious, even if psychologically complex, human motives. It is but a step beyond this to the formation of tropaic and apotropaic rituals having to do with the changes which mark the normal lives of men and women: *rites de passage*, with birth, puberty, marriage, parentage, eldership, death, as their posts. Finally, just as there are seasons in the arc of a man's days, so there are the seasons of the natural year which men must observe: rites of seed-time and harvest are doubtless as ancient as is agriculture, while immemorably more ancient still are the simple reactions to the changes of the living world which all known men, at least, make articulate. The fetish, the burial, the primitive calendar, may be taken as symbols respectively of these three elemental directions of ritual life.

(2) Above this first level comes the cultural grade, wherein ritualism is modified to reflect and sustain *social* organization. Already with initiation and marriage rites, with sowing and harvest ceremonies, the social factor enters into the ritual occasion. As community life becomes complex, its enterprises are surrounded and emphasized by prohibitions and commands, tabus and sanctities, which serve as its bond and fixative. This is true not only of the internal life of a community, based on the instincts and the seasons, but also of its external relations: the making of war and the making of peace; and, as time passes, it becomes

true in a third dimension, the historical, for the momentous events of tribal and national life inevitably appear to acquire a sanction from nature itself, and their commemoration becomes as seasonal and cyclic. It is worth noting, too, that morality finds its most cogent support in ritual emphasis. The virtues are all in the nature of inhibitions set upon the more animal instincts; they are all in the nature of conscious habits, and are, therefore, subject to deliberate education. It is therefore quite in the order of reason that communal ritualism should become marked by the presence of a definite class of men—the priesthoods—whose special province is the preservation of traditional wisdom and the enforcement of the moral sanctions. Here society becomes specialized, and the religious, as a man apart, answers as it were for the conscience of the group. Worship is no longer governed by the 'inner light' of the elemental instincts, but is established as a moral law.

(3) Still more complex, although by no means rare even among savage peoples, is the level marked by motives which govern *proselytizing*. Cults pass readily from people to people, along with other customs, but there is an especial impulse fathoming the desire to convert which is certainly other than instinctive and more than moral. It may be accompanied by motives wholly sordid; it may be utilized by calculating leaders for entirely secular ends; but, whether its character be that of intolerance, of benevolence, or the two admixed, it comes finally to gather to itself the essential zeal of religion. Then it is that the State sheers off from a Church which outgrows it; then it is that religion and morality become divided in consciousness; and then it is, finally, that there arises a problem of reason *versus* faith, of intellectual as against spiritual interests.

(4) Doubtless, a last level should be added—that in which the secular life is felt to be lived in more or less separation from the religious, and in which the motives of the latter become matter of critical and sceptical interest. Conscious study of religion, conscious philosophizing about it, mark this finality; but it is to the point to observe that even here the essential experience maintains itself in the Protestant seclusion of the individual soul. The final rite, the ultimate worship, is retirement into the closet in the hour of spiritual need; and this, after all, is not radically different from the elemental act of instinctive worship, in propitiation or thanksgiving.

3. Objects of worship.—As the occasions of worship give only a partial key to its forms, so the forms afford but a partial clue to its objects. Not all ritual observances are regarded as worship; magical rites are usually placed in another class, and many rites having obvious social values—marriage rites, chief-making rites, the 'potlatch,' are examples—are connected with worship only incidentally, if at all. In order that the ritual form may be recognized as true worship, it must be accompanied by some evidence of a religious sanction; *i.e.*, it must in some sense be directed to powers superhuman, if not supernatural. This means recognition of deity. Ordinarily gods are defined as the objects of worship; the better mode would be to say that the act of worship is the definition of the god. Wherever the religious sanction is present, the conception of God is being created.

Such a reversal in the order of definition would clear the atmosphere of much controversial dust. Many a missionary has accused the heathen of atheism because of his failure to find belief in a Supreme Being with Christian attributes (not infrequently among people incapable of thinking either 'being' or 'attribute'), and many a field

anthropologist has described his savages as totally irreligious in one sentence and in the next has gone forward to describe rites which were obviously directed to superhuman powers. Nor need these be personified: personification is itself an act of some intellectual subtlety, and it appears to be the prime token of animism, as distinct from polytheism, just that the animist has failed of achieving this subtlety; but that animism is in the nature of religion, and its placations and reverences in the nature of true worship, few would care to deny. Again, magic: magical ends are usually clearly definable, but the means employed invariably rest upon an implied recognition of unseen or unfelt forces; and it is at least significant that, when gods come to be formulated in thought, their powers are of a piece with all magic potency: the Great Medicine is another name for the Great Mystery. Wherever men placate unseen foes or make offerings to hidden friends—and there are no human tribes so low in mind that these customs are not found among them—there worship is present and divinity recognized.

Above such formless minima the objects of worship build themselves up hierarchically. The definition of a 'thing' becomes the recognition of a 'power,' and the treatment of the power—if the thing be of any importance—becomes the symptom of a cult. Fetishes, 'medicine,' talismans, belong here; they are cherished, they are tended, they are regarded as vehicles of grace; there is no psychological gulf between the fetish and the idol, between the 'medicine' and the sacrament, between the talisman and the holy relic, or even the holy word. Worship is present even in gross superstition—perverted, no doubt, as to its object, but clear in the mode of its regard. As intelligence grows, the purification of human sentiments is accompanied by the elevation of the objects of regard; the near and trivial objects which attract the feeble animist or fetishist give place to the more inspiring or more august forces of nature, which become the spirits that move in wind and wave, that rise as luminous heavenly orbs, or circle through the year on the swift feet of the seasons. Nature-worship is, even to the last, the great fount of the imagery by which we represent to ourselves the augustness and sublimity of divinity, and if, in the end, we feast our imagination of things spiritual with celestial rather than terrestrial phenomena, this is surely but the natural projection of that recognition of the beneficence of light which makes us also liken our most intimate spiritual inward gift to an 'illumination'; the metaphor of light is equally inevitable when applied to wisdom and to grace.

There are, of course, other images which define the objects of adoration. Foremost among them are kinship terms, which, even among the least tutored of men, are the natural titles of gods. 'Father Heaven' and 'Mother Earth' have each a double title to reverence, for the kinship expressed adds to the sublimity and beauty of nature the whole context of humanity in its most winning character, while behind this is also that prophecy of life which parenthood and the whole mystery of procreation have made central in all religious veneration. Indeed, these two factors (natural sublimity and human kinship) are so powerful in appeal that the remaining imaginal mode, which utilizes the likenesses of human society to picture divinity, has never more than passingly and accessorially aided the picture: gods have been likened to warriors, judges, lords, kings, but in their supremacies the light of heaven and the love of the parent have always been their final attributes.

At the foundation, in the mind of the most beclouded savage, the object of worship is a power

in strength transcending his own. Whether in his rite-making he goes forward, timidly, to active adoration and a sense of comradeship with his divinity, or, panic-stricken, strives to exorcise the presence and escape its dooms, may well turn upon the colour of his personal fortunes: the Power will be good or evil according to its effects. But, if good, what more inevitable than that very address by a kinship term which is so often enjoined in mythic teachings and which so naturally adds to the sense of power that of benevolence? The third step is that natural association of wisdom with solicitude which is represented by the idea of Providence and imaged by the idea of illumination. Thus the gods, even of dark-minded men, are conceived as more or less strong and good and wise; and it is only a metaphysical theology which universalizes these attributes into omnipotence, omnibenevolence, omniscience. The presence of all three attributes is, of course, not necessary for the existence of worship, though all three are present where the deity is truly adored. But in many cases strength and knowledge are not known or thought to be accompanied by goodness, and out of the terror of evil appetites, immeasurable in power, have grown most of the cruelties and horrors of superstitious worship. If one may so put it, where there is deformity in cult, there will be found deformity in the conception of God.

4. *Psychical factors.*—Before the conception of worship can be fully developed, to its occasions and its objects must be added the consideration of the distinctive psychical values associated with rite and cult. Here again the problem of the primitive is not easily disengaged. More than any other objects of thought psychical values are dependent upon the associations of words for their designation; and consequently more than any other objects they are subject to the ambiguities and tricks of transference which verbal meanings further. Especially must this be true where the differences in linguistic level are great: words such as 'adoration,' 'communion,' 'reverence,' 'conscience' have no equivalents in untutored tongues, and it is difficult to make certain the presence of analogous experiences. The first problem, therefore, which presents itself to the psychologist is to endeavour to infer from the ritual forms and the imagery involved what modes of experience prompt them, and in particular to separate the symbolical from the literal interpretation.

For it should be borne in mind (and it is too often forgotten) that religious ideas are images or they are nothing. The great elementary psychical fact which makes ritualism ritual is that the act of worship is never realistic: it moves and lives in an atmosphere of double meaning; the feather, the pebble, the geometrical sign, the chanted word, the sacramental bread, and the sacrificial flesh are never what in the bald reality of the senses they appear to be; their sanctities are derived from supersensible modes of experience. That such modes of experience should for their expression resort to every type of the imagery of sensible experience is in the order of nature. That the most intimate of these images should be those most deeply founded in our own organic life, as physical human beings, and in our conscious relations, as social human beings, is equally intelligible. And it is not, therefore, unintelligible that religious meanings should be peculiarly easy to pervert; the very difficulties which make their communication to be symbolical call for a subtlety of response that frequently fails. Thus it is that many rites, conceived in spiritual purity, if their symbolism is lost, become gross because the images in which they are conveyed are bound to be gross.

In particular this is the peril of images of sex : the procreation of life is the most inevitable of human experiences, because of the social as well as the emotional significance, to stand as a religious emblem, and nearly all the noblest modes of religious expression rely upon it for their source (the fatherhood of God, divine love, eternal life); but in the course of religious change no imagery has given rise to more perversion.

Possibly this very fact of ready perversion—'spiritual blindness,' as it is called—may have something to do with the second great source of worship: the sense of a need of salvation. Literal fear and literal desire, sensible ends coupled with sensible means, are the emotions most dealt with as explanations of ritual acts. Bionomically, they are no explanations at all, for the phenomena of worship show little or nothing that can be interpreted as furthering a physical salvation; the irreligious is as healthy and safe as the religious. It is here once more that the images are full of deceit: paradise and hell are painted in the pigments of sensation, whereas the thing meant is supersensible. The fact that calls for a real accounting is just the fact that men (of high culture and of low) feel a need for a salvation which is as a matter of fact inexpressible, just as they feel reverence for a divinity which is indefinable. The quest of this salvation is bound up, on the emotional side, with the group of words ('awe,' 'adoration,' 'communion') whose contextual meaning harks back to the very roots of human life.

One may say, then, that, on the intellectual side, the great factor that is fundamental in the experience of worship is the sense of double-meaning, and therefore of the duality of nature. On the emotional side the key is the feeling of need for salvation (which might be negatively described as a conviction of sin). These two come as near to defining the religious 'instinct' as any broad partition is likely to come. In any case, they give the major forms under which the experiences defining worship are to be subsumed.

The psychology of worship, however, must advance a step beyond this, even to lay its foundations. The human mind, the human being, moves as a unit, as a person; and the act of worship is in some sense so complete an act that it characteristically creates the reciprocal figure in the worshipper of the image of his salvation. Religion in the long run tends to define man, not as an individual, but in his type and form. Animism, in ascribing souls to things, personifies them; personification is the first step towards anthropomorphism, which in itself is but the sensible rendering of a psycho-eidism that is both more elemental and more significant. It is more significant because it defines for us, inwardly, the traits which we regard as ideal, and therefore as divine; and it is thus that the whole psychic play of religious experience takes final form as the depiction of an ideal man, a pattern man, who becomes a saviour, if only through the fact of his recognition. Whether the pattern man be given an incarnation and a story as a human individual, or whether he be read as a man-like God, or whether, in the third place,¹ he be composed through the union of all active ideals, as an *anima mundi*, is accident of tradition. The psychical fundamental is that all forms of worship figure him forth, as in a true theophany.

5. Philosophical implications.—Portrayal and analysis of the facts of worship constitute the science of comparative religion. But, when all its

¹ A most interesting and enlightening example of this subtler form of anthropomorphic thinking, in a primitive community, is the account of 'The Symbolic Man of the Osage Tribe,' by Francis La Flesche, *Art and Archaeology*, vol. ix. no. 2 [Feb. 1920].

labours are completed, there still remains for consideration the thinker's most profound problem, viz., that of the truth upon which it rests, the demand of nature to which it responds. Modes of thinking are as correspondent with their cosmic context as are modes of perceiving; the eye of the mind is as truly adapted to its formative forces as is the physical eye; in the end, no beliefs come into being save in orientation to some truth, and superstition is assigned its character from some measuring rectitude. The facts of worship and the facts of faith spring up in response to some spontaneous impulse of human nature, and, like all other human impulses, this becomes a ground of philosophy. In its first form philosophy of religion is theology: the reason's apology for the man's traditional beliefs. But in its sophistications the philosophy of religion assumes at least the form of utter detachment and sits in judgment not upon the article but upon the fact of faith, as a mode of cosmic intuition.

What the philosophic solution must be, in type, can be answered only by appeal to the whole history of thought. Philosophy is reflexion upon the whole range of human experience; this experience grows in variety and in implication with the continuance of life; philosophies, therefore, form and reform with the changing generations of men. Nevertheless, even as there is a generic human nature which defines the kind through the course of time, so there is a generic form which shapes and limits philosophic thinking; its sources are, after all, as few as are our gifts and aptitudes. Occasionally an anthropologist, with a gesture of impatience, would clean the slate of old significances. Reinach proposes as a definition of religion, 'un ensemble de scrupules qui font obstacle au libre exercice de nos facultés';¹ but this is literature, not science or philosophy. The very question that is most profound is that of the reality to which those scruples correspond: What, in the nature of the world, is their foundation and bearing? If men have prayed and sacrificed for naught, how is this to be accounted for? If their rites have suffered perversion, whence is the evil? and what good does it violate? If the symbolism and *double entente* which pertain to all worship is wholly fictive, what power has written so strange a gloss into the constitution of man? If conviction of sin and yearning for salvation are prompted by no truth, whence is the lie to which they give life? In its pragmatic way the fact of worship is ever rehabilitating the ontological argument. There is something in the old Stoic inference: 'If altars, then gods'; and the philosophy of religion is the exposition of what man may perceive in his own deeply impulsive belief in divinity.

LITERATURE.—Landmarks in the comparative and sociological study of religious forms, indicating both the spirit of the investigation and the content of the science, are: David Hume, *The Natural History of Religion*, London, 1757; E. B. Tylor, *PC*, do. 1903; and Herbert Spencer, *Principles of Sociology*, 3 vols., do. 1876-96. J. G. Frazer, *The Golden Bough*, 2 vols., do. 1890, of which the third edition (1907-13) has been expanded into a veritable encyclopædia of religious rite, is doubtless the most important, as it is the most massive, collection of information. With it should be reckoned the numerous writings of Andrew Lang in this field, first in significance, *Myth, Ritual, and Religion*, London, 1899; Salomon Reinach, *Cultes, Mythes, et Religions*, 4 vols., Paris, 1905-13; Goblet d'Alviella, *Croyances, Rites, Institutions*, 3 vols., do. 1911; A. van Gennep, *Religions, Mœurs, et Légendes*, 5 vols., do. 1908-14; and *The Mythology of All Races*, ed. L. H. Gray (Boston, U.S.A., 1915 ff.), of which the following have been published: i. W. S. Fox, *Greek and Roman*; iii. J. A. MacCulloch, *Celtic*; J. Máchal, *Slavic*; vi. A. Berriedale Keith, *Indian*; A. J. Carnoy, *Iranian*; ix. R. P. Dixon, *Oceanic*; x. H. B. Alexander, *North American*; xi. H. B. Alexander, *Latin American*; xii. W. Max Müller, *Egyptian*; J. G. Scott, *Indo-Chinese*. Books of an earlier date of value and importance include: P. D. Chantepeie de la Saussaye, *Lehrbuch der Religionsgeschichte*, 2 vols., Tübingen, 1905; H. Bois, *La Valeur de*

¹ *Orpheus*, p. 4.

*l'expérience religieuse*², Paris, 1908; F. B. Jevons, *Introd. to the Hist. of Religion*⁴, London, 1905; Charles Letourneau, *L'Évolution religieuse dans les diverses races humaines*, Paris, 1892; Conrad von Orelli, *Allgemeine Religionsgeschichte*, Bonn, 1899; A. Réville, *Les Religions des peuples non civilisés*, Paris, 1889; Raoul de La Grasserie, *Des Religions comparées au point de vue sociologique*, do. 1899; C. P. Tiele, *Konpendium der Religionsgeschichte*³, Breslau, 1903. Among the more significant works of the past dozen years arc G. A. Barton, *The Religions of the World*, Chicago and London, 1917; Karl Beth, *Religion und Magie bei den Naturvölkern*, Leipzig, 1914; A. Bros, *La Religion des peuples non civilisés*, Paris, 1907; S. A. Cook, *The Study of Religions*, London, 1914; E. Doutté, *Magie et religion dans l'Afrique du Nord*, Paris, 1909; Emile Durkheim, *Les Formes élémentaires de la vie religieuse*, do. 1912 (doubtless the most important sociological interpretation since Spencer's *Principles of Sociology*); René Dussaud, *Introd. à l'hist. des religions*, do. 1914; R. Eisler, *Weltenmantel und Himmelszelt*, 2 vols., Munich, 1910; L. R. Farnell, *The Evolution of Religion*, London, 1905; G. B. Foster, *The Function of Religion in Man's Struggle for Existence*, Chicago and London, 1909; George Foucart, *Hist. des religions et méthode comparative*, Paris, 1912; Frederic Harrison, *The Positive Evolution of Religion*, London, 1913; E. S. Hartland, *Ritual and Belief*, do. 1914; Marcel Hébert, *La 'Forme idéaliste' du sentiment religieuse*, Paris, 1909; Irving King, *The Development of Religion*, New York and London, 1910; A. Le Roy, *La Religion des primitifs*, Paris, 1909; R. R. Marett, *The Threshold of Religion*², London, 1914; S. Reinach, *Orpheus*, Paris, 1909. Two recent American books, systematic in character, are G. Foot Moore, *Hist. of Religions*, 2 vols., New York and Edinburgh, 1914-20; C. H. Toy, *Introd. to the Hist. of Religions*, Boston and New York, 1913; while a book which undertakes a critical survey of methods of approach to religious phenomena is Frederick Schleiter, *Religion and Culture*, New York, 1919. For the psychology of religion the fountain-head is W. James, *Varieties of Religious Experience*, New York and London, 1902, which has already proved the inspiration of a large special literature.

H. B. ALEXANDER.

WORSHIP (Babylonian).—Form and content of Babylonian worship are almost entirely borrowed from the Sumerians. This is particularly true of the principles of formal worship or the gestures employed in religious devotion. As to the content of worship or the words spoken therein, the Babylonian public service or daily liturgies are without exception Sumerian. But the prayers of private devotion and all the intricate rituals of the magic cults are largely of Semitic Babylonian origin. The Assyrian religion and worship were thoroughly Babylonian, but here a distinct tendency to preserve the Semitic principle of gesture in private devotion is everywhere noticeable. The Assyrian religion likewise owed much to the Sumerians, and their liturgical offices were borrowed entirely from the old canonical Sumerian breviaries of the 23rd century.

I. GESTURE IN SUMERIAN PRAYER.—I. Pre-historic period.—Very early Sumerian seals which belong to the pre-historic period (c. 3500 B.C.) reveal three orthodox poses in private devotion, or in the gesture assumed by a Sumerian layman when he came before a seated deity to say his prayers.

(1) He is represented in the so-called processional scene, where his own protecting god¹ leads him by the hand and presents him to a seated deity. In the early pre-Sargonic period the posture of the adorant's free arm is not yet fixed. Occasionally the disengaged arm is employed to carry a lamb or kid as an offering. On one very early seal the unoccupied arm is folded across the waist.² It is remarkable that this idea is characteristic of both Sumerian and Egyptian religions and of these only—a fact which seems to reinforce much other evidence for an original pre-historic contact between Sumer and Egypt. Naturally the figure of a deity who conducts the worshipper is a pure fantasy. In reality a priest led the layman by the hand in this form of adoration, as we can see from a few scenes which depict the processional form of worship as it really was.³ (2) The worshipper stands with one hand raised parallel to the breast, palm inward and fingers touching the lips; the other arm is folded across the

waist. This is the very ancient salutation by throwing a kiss and is the most common gesture in the private devotions of Sumerians and Babylonians down to the Neo-Babylonian period.¹ (3) The worshipper stands with both hands folded at the waist; from statues in the round in all periods it can be seen that this gesture imposed a fixed custom of clasping the hands. The right hand is clasped by the left hand in an extraordinary manner so that the right thumb lies against the body and the fingers of the right hand lie almost horizontal. The position is physically impossible and only an exaggeration of the natural clasp seen in bas-reliefs of Assyria. The gesture seems to belong to the religion of pre-historic Sumer and is as ancient as the kissing hand gesture.

Such were the three positions assumed under various circumstances in private devotion by the Sumerians from pre-historic times down to the period of Agade, when the great Semitic dynasty of Sargon the Ancient seized the hegemony of all southern Mesopotamia for 197 years. Sargon may be dated about 2850.

2. Sargonic period.—The Semites of this period as well as those who had lived in close contact with and among the Sumerians in the pre-Sargonic age adopted the Sumerian principles of gesture. A seal dedicated to Naram-Sin, fifth king of the Sargonic dynasty, represents the worshipper in the kissing hand position. Although the Sumerians recognized this attitude as consisting in throwing a kiss to a deity by the pictograph for the word 'to pray,' yet they commonly designated it, at any rate in later stages, by the term 'lifting of the hand.' In subsequent discussion, when the expression 'lifting of the hand' is employed, the attitude of the kiss hand is always implied. Archaeological evidence for religious gesture in this period is meagre, but a few seals seem to indicate that the folded hands position was also common. The old processional scene with intercessory priest disappears entirely in this age.

3. Period of Gudea and Ur dynasty (2650-2358).—In the age of the great Sumerian revival which terminated in the powerful dynasty of Ur we have first of all a return to the old processional scene. But now the disengaged arm, henceforth always the right arm, is held in the attitude of saluting with a kiss. In the time of the Ur dynasty the folded hand gesture becomes extremely common. The present writer has assumed that this gesture was employed in the penitential psalms or prayers of contrition and sorrow, later known as *ersaghunga* prayers. The kiss hand gesture he takes to be the one adopted in prayers of the magic rituals whose principal motif is praise of the deities. The ancient independent kiss hand gesture, *i.e.* without an interceding figure who leads the suppliant by the hand, appears rarely in this period.² In other words, the prayers of the lifting of the hand in the last great age of Sumerian civilization always imply a processional scene and a priest.

4. Period of Isin, Larsa, and Babylonian (Ist) dynasty (2357-1926).—Archaeological evidence furnished by a great number of seals in this period leads to the inference that the processional scene with kiss hand gesture was abandoned for the independent attitude. The suppliant now stands with right hand raised and fingers touching the lips, the left arm folded at the waist. On the older seals of the period the priest still performs the act of intercession, but he stands before the seated deity in the folded hand pose.³ The inference from the evidence of seals alone that the ancient custom of approaching a deity through

¹ The Sumero-Babylonian doctrine concerning man's relation to his own god and goddess is discussed in *ERE* v. 637 f.; see esp. Langdon, 'Religious Interpretation of Babylonian Seals,' in *RAssy* xvi. (1919) 49-63.

² Langdon, 'Gesture in Sumerian and Babylonian Prayer,' *JRAS*, 1919, pp. 531-556, fig. 4.

³ Stone tablet of Nabuapaliddin (890-854) published in Rawlinson, *WAI* v. 60, a copy of tablet of the 1st dynasty. Engraved memorial deed of Melishipak (end of 13th cent.) (V. Scheil, *Textes élamites-sémitiques*, Paris, 1908, x. pl. 13).

¹ For pre-historic examples see the seals cited in Langdon, 'Gesture in Sumerian and Babylonian Prayer,' p. 533 f., from the publications of Delaporte and Ward.

² Cf. a seal dedicated to Dungi (J. Menant, *Recherches sur la glyptique orientale*, Paris, 1883, fig. 86).

³ See, e.g., L. Delaporte, *Catalogue du Musée Guimet, Cylindres orientaux*, Paris, 1909, no. 45; also *Catalogue des Cylindres orientaux de la Bibliothèque Nationale*, do. 1910, nos. 124-128.

the offices of a priest was abandoned after the Ur dynasty is clearly misleading; for two clear examples of this custom are illustrated on monuments of the Cassite period and on the stone tablet of Nabuapaliddin.¹ Moreover, in prayers of private devotion frequent reference is made to the priest who recites portions of the prayer.² But from this period onward until the rise of the Neo-Babylonian empire at the end of the 7th cent. the pose of the kiss hand with left arm folded at the waist is the ordinary gesture in Babylonia.

II. *GESTURE IN ASSYRIAN RELIGION.*—The Assyrians retained the old open hand Semitic pose in prayer, although the kiss hand was also adopted by them from the Sumerians. Since they also borrowed all the prayers and liturgies of the official cults from Sumer and Akkad, the retention of the Semitic gesture emphasizes the tenacity with which they adhered to racial customs. The open hand gesture, which was also the principal one used by the Hebrews, is made by extending both hands upward towards heaven, palms inward. In art the suppliant is always represented standing as in Sumer and Babylonia.³ But the pose in taking up the gesture of the kiss hand in Assyria was ordinarily modified in two respects. The right arm is now thrown forward and the hand turned outward, the index finger pointing at the god or sacred object. The thumb is closed over the three remaining fingers. This attitude is similar to one seen on Greek monuments and represents the adorant in the later stages of the act of throwing a kiss. But under influence of the Assyrians and Aramæans the old Semitic spirit reasserted itself in Babylonia; seals of the Neo-Babylonian, Persian, Seleucid, and Parthian periods almost invariably represent the worshipper in the open hand pose.

Kneeling and prostration do not appear to have been admitted in the orthodox forms of Sumerian religion, but there is evidence for their use among the Babylonians and the Assyrians. Prostration and kneeling were certainly acts of worship at certain points in the recitation of prayers and penitential psalms among the Semites, and on the whole it seems probable that they are of Semitic origin. In Sumerian literature almost no prayers of the private cults have been preserved. We possess extensive catalogues of the titles of such prayers, and the seals show that they approached their deities in private devotion from the very earliest period. But the spirit of their religion asserted itself rather in communal or public worship, and the liturgies of their various cults are extensive. In the Ur and Isin periods liturgies became canonical and extremely intricate. They were accompanied by music, and in fact the names of instruments were employed as technical terms to describe kinds of songs; e.g., the recessional or final song of a liturgy was sung to the double flute and called the flute song. The canonical liturgies of the Sumerians were borrowed by the Babylonians and the Assyrians and were always said in Sumerian. The greater portion of each liturgy was provided with an interlinear Semitic translation for laymen. No changes in the old Sumerian liturgies were ever permitted, and even in Assyria

the national god Ašur is excluded from the deities mentioned in the litanies because his cult arose after the canon of sacred prayer books was closed.

The Babylonians usually employed Semitic prayers in the private rituals of purification, and these were known as the 'prayers of the lifting of the hand.' They were of course modelled on the Sumerian prayers of the kiss hand ceremonies, and a very great number of prayers of this kind have survived in Semitic. They form almost invariably part of the magic ceremonies of purification.¹ A considerable number of the prayers said by the priests in these services of healing and atonement have been recovered, and these were written and recited in Sumerian, and were known by the rubric (*kišūb*). Prayers of penance which are pure religious prayers of great spiritual power and unconnected with magic rituals were not popular, and of these comparatively few have survived. They are all composed in Sumerian and probably represented the prayers said in the old Sumerian processional scene. Obviously they could not be employed by the ordinary layman, who knew no Sumerian. They represent the exclusive and aristocratic side of Sumerian and Babylonian religion. In them the priest takes a leading part, and they are usually provided with a Semitic translation.

LITERATURE.—On *gesture in worship*.—S. Langdon, 'Gesture in Sumerian and Babylonian Prayer,' *JRAS*, 1919, pp. 531-556; Friedrich Heiler, 'Die Körperhaltung beim Gebet,' *Orientalische Studien Fritz Hommel zum sechzigsten Geburtstag gewidmet*, Leipzig, 1918, ii. 163-177.

Liturgical worship.—S. Langdon, *Babylonian Liturgies*, Paris, 1913 (esp. the Introduction concerning the use of musical instruments, the origin and development of the breviaries and their theological content), *Sumerian Liturgical Texts from Nippur*, Philadelphia, 1917, and *Sumerian Liturgies and Psalms*, do. 1919 (Introduction has a résumé of most recent knowledge on liturgical worship), *Sumerian and Babylonian Psalms*, Paris, 1909. For the liturgies of the Tammuz cult, whose festival was probably celebrated at mid-summer, see H. Zimmern, *Der babylonische Gott Tamūz*, Leipzig, 1909, and *Sumerisch-babylonische Tamūzlieder*, do. 1907; S. Langdon, *Tammuz and Ishtar*, Oxford, 1914. Liturgical worship in the cults of deified kings of the late Sumerian period is discussed in 'Sumerian Liturgies and Psalms,' and in 'Notes on the Deification of Kings,' by T. G. Pinches, *PSBA*, 1915, pp. 87-95, 126-134, and in 'Three New Hymns in the Cults of Deified Kings,' by S. Langdon, *PSBA*, 1918, pp. 30-40, 45-56.

Prayers of the lifting of the hand and penitential psalms are discussed and full literature given under PRAYER (Babylonian). In addition to the literature there see Erich Ebeling, *Quellen zur Kenntnis der babylonischen Religion*, Leipzig, 1913-19. What is known concerning the great New Year festival at the spring equinox will be found in H. Zimmern, *Zum babylonischen Neujahrfest*, Leipzig, 1903, 21918; S. Langdon, *Exp. vii. viii.* [1909] 143-158. Benno Landsberger, *Der kultische Kalender der Babylonier und Assyrer*, Leipzig, 1915, has begun a series of monographs upon the Sumerian and Semitic monthly festivals.

S. LANGDON.

WORSHIP (Buddhist).²—I. Worship (*pūjā*, *vandana*, *māna*, etc.) is no part of the Path (*mārga*). Path is insight into and meditation on the four truths (the four *nirvedhabhāgiya*, *satyadarśana*, *satyabhāvanā*); but worship is an important part of what is styled *mokṣabhāgiya* ('acts connected with or leading to deliverance'). No man can in this life enter into the Path, if he has not, in a previous existence, 'planted' some 'root of merit' (*kuśalamūla*). Among the 'roots of merit' worship is the best.

2. Worship is the best *dāna*, or giving. A man gives material gifts (*āmiṣadāna*) or security (*abhaya-dāna*) to his fellow-men, to animals, to pretas, for their benefit and also for his own benefit. He shall give to the Buddha, to the

¹ See art. EXPIATION AND ATONEMENT (Babylonian), MAGIC (Babylonian), and PRAYER (Babylonian).

² Details concerning Buddhist worship are to be found in all books dealing with Buddhism. Some of the sources are indicated below. But the principles that command the Buddhist Hinayāna doctrine of worship have never been elucidated, and there is the justification of the present short note.

¹ See above, p. 757^a, note 3.

² So, e.g., in the *erśaḅhunga* prayer, iv. Rawlinson, no. 2 = Zimmern, *Babylonische Busspsalmen*, Leipzig, 1885, no. 6. And a number of prayers of the 'lifting of the hand' end with the phrase 'I will sing thy praise and I the priest of magic thy servant will sing thy praise' (see E. Ebeling, *Keilschrifttexte aus Assur*, Leipzig, 1919, no. 25, rev. iii. 10; C. D. Gray, *Shamash Religious Texts*, Chicago, 1901, K. 3394 rev. 14; L. W. King, *Babylonian Magic and Sorcery*, London, 1896, no. 12, 94).

³ See Langdon, 'Gesture in Sumerian and Babylonian Prayer,' figs. 16, 18-20, and p. 539.

Dharma, to the Church, for his own advantage, because they are 'fields of merit' (*puṇyakṣetra*) *par excellence*. The better the field, the better the fruit. Now the merit of giving is either *tyāgānvaya* or *paribhogānvaya*; i.e., a merit accrues to the giver either because he gives away (*tyāga*) something or because the recipient enjoys (*paribhoga*) the thing that has been given away. Buddha does not enjoy the flowers, etc., that are offered to *chaityas*. The merit is not weaker for that. The point is discussed in Pali and Sanskrit sources.

LITERATURE.—*Abhidharmakośa*, iv. 32 (on the *trīṣaṣṭaṅga-māna*), 112 (on the merit accruing to the future Śākyamuni on account of his worshipping Pūṣya), 121 (on the worship of *chaityas*; why actual acts of worship are useful), vii. 34 (paradises and *nirvāṇa* obtained owing to a single thought of faith in the qualities of a Buddha), iii. 99 (avoiding *antarakalpas* by giving to the Saṅgha); *Mūlāda* (SBE xxxv. [1890] 144-154, 246-248); *Kathāvatthū*, ed. A. C. Taylor (PTS), London, 1897, vii. 5f. (*Points of Controversy*, tr. C. A. F. Rhys Davids and S. Z. Aung [PTS], London, 1915, p. 200); *Sāntideva*, *Bodhicaryāvatāra*, ix. 39-40 (*Introduction à la pratique des futurs Bouddhas*, tr. and ed. L. de la Vallée Poussin, Paris, 1907, p. 119); *Madhyamakaṣṭṭi* (*Bibl. Buddh.* v. [Petrograd, 1909] xvii. 4f.); *Śikṣasamucchaya* (*ib.* 1902), *kārikā* 5f.; I-tsing, *A Record of the Buddhist Religion*, Eng. tr., Oxford, 1896, p. 115 and *passim*; R. Foucher, *The Beginnings of Buddhist Art*, Eng. tr., London, 1918, *L'Art gréco-bouddhique du Gandhāra*, 2 vols., Paris, 1905-17, *passim*.

L. DE LA VALLÉE POUSSIN.

WORSHIP (Chinese).—I. **INTRODUCTORY**.—It is not easy to find any Chinese word or phrase which conveys identically the same meaning as that which the word 'worship' conveys to one who has been brought up in a Christian environment. Probably the first word which would occur to most students of Chinese is *chi*. It consists of three parts—the symbols for 'spiritual beings,' 'flesh,' and 'the right hand,' giving the meaning, 'to hold a piece of flesh in the right hand and offer it to the spirits.' One of the pioneer Anglo-Chinese lexicographers, Morrison, gives as one of the meanings of the character *chi* 'to offer flesh in the rites of worship, to sacrifice with worship.' J. Legge criticizes this interpretation by pointing out that it is not countenanced by the compilers of the standard native dictionary, *K'ang Hsi*. He adds, 'The general idea symbolised by the character *chi* is—an offering whereby communication and communion with spiritual beings is effected.'¹ The importance of this criticism will be manifest when we remember that the symbol *chi* is the one which is commonly used to denote the religious side of the cult of ancestors. If *chi* does not mean 'worship,' a doubt at once suggests itself as to whether we are technically correct in describing that cult as the 'worship' of ancestors. This doubt is fully justified if to the word 'worship' in this phrase we attribute a meaning identical or nearly identical with that which it bears in Christianity. If we assume that 'worship' can only be offered to a god or gods (real or imagined), and we insist upon describing the Chinese ancestral cult as the 'worship' of ancestors, it follows that the ancestors so 'worshipped' are regarded as gods. And this is precisely the principal ground on which the cult in question has been attacked by Christian missionaries. Obviously the process of translation from one language into another can give rise to a great deal of misunderstanding and question-begging.

There are, of course, many other Chinese words and phrases which correspond, more or less roughly, to the word 'worship'; but no one of them can be regarded as strictly equivalent. *Pai* means merely 'to bow' or 'to salute'; when *ch'ung* is prefixed,

¹ SBE xxviii. [1855] 201.

the term acquires a religious meaning and may be translated 'to salute with reverence.' *Li-pai*, much used by Christian missionaries, does not necessarily mean more than to salute in accordance with the appropriate rites. *Ching-yang* means 'to respect and look up to.' There are several other terms which give the idea of ritual sacrifice. It may be urged that these and similar Chinese terms are, after all, just as satisfactory as the English term, which can hardly be said to contain within itself an adequate indication of what it has come to mean in Christian thought and ritual. If we are careful to remember that there are some not readily definable differences in spiritual content between the European and Chinese terms, not much harm will be done by regarding the two sets of terms as roughly equivalent.

In this article it is unnecessary to attempt to make any such subdivisions or differentiations as are used by the Church of Rome to distinguish the varieties of Christian worship. Such differences as those between *λατρεία*, *ὑπερδουλεία*, and *δουλεία* do not exist in China—simply because they have never been called into existence by the exigencies of religious controversy.

II. **CONFUCIANISM**.¹—I. **Introductory**.—The clearest expression of the Confucian notions of worship is found in that remarkable collection of religious treatises which goes under the name of the *Li Chi* (*Record of Rites*). 'More may be learned,' says Legge, 'about the religion of the ancient Chinese from this classic than from all the others together.'² And it should be added that, as the *Record of Rites* forms one of the Five Classics of the orthodox Confucian learning, it still remains³ what it has been for many centuries—the principal source of Chinese ideas regarding not only the ritual but also the inner significance of religious observances.

The reader must be warned, however, that, when we give the name of Confucianism to the religious beliefs and rites described in the *Li Chi* and other 'Confucian' classics, we are using the term in a somewhat vague sense as including all that Confucius and his school sanctioned, eulogized, or tacitly accepted. Confucius insisted that he was only 'a transmitter and not a maker,' and in any case he never posed as a religious prophet or as an inspired teacher of religious truth. Much that has come down to us as Confucianism is pre-Confucian in origin; and this we find to be specially true when we enter upon the sphere of religious thought. In the sections that follow it must be understood that 'Confucianism' is used in the looser sense here indicated.

2. **Nature of true worship as understood in Confucianism**.—(a) *Reverence*.—The *Record of Rites* opens with the striking words 'Always and in everything let there be reverence.'⁴ In many parts of this classic (which came from many different hands and belongs to many different dates) the supreme necessity of reverence is emphasized, especially in connexion with all ceremonies which regulate the intercourse between the seen and the unseen worlds. Commenting on one of its subdivisions, Legge remarks:

'Throughout the Book it is mostly religious rites that are spoken of; especially as culminating in the worship of God. And nothing is more fully brought out than that all rites are valueless without truth and reverence.'⁵

The *Record* quotes Confucius as saying that in the ceremonial rites of mourning the most important thing is reverence,⁶ and in another passage he is

¹ Cf. art. CONFUCIAN RELIGION, CONFUCIUS.

² SBE xxvii. [1855] 13.

³ Or rather remained up to 1911. The whole Confucian system has been more or less on the defensive since that date.

⁴ SBE xxvii. 61. Cf. Legge's comment on p. 12.

⁵ *ib.* p. 25.

⁶ *ib.* xxviii. 153.

credited with the following remarkable utterance: 'With the ancients in their practice of government the love of men was the great point; in their regulation of this love of men, the rules of ceremony was the great point; in their regulation of those rules, reverence was the great point.'¹ It is an oft-reiterated Confucian theory that reverence in the performance of the prescribed rites and good conduct in the ordinary relations of man with man were inseparable.

'When one has mastered (the principle of) ceremonies, and regulated his person accordingly, he becomes grave and reverential. Grave and reverential, he is regarded with awe. If the heart be for a moment without the feeling of harmony and joy, meanness and deceitfulness enter it. If the outward demeanour be for a moment without gravity and reverentialness, indifference and rudeness show themselves.'²

It is evident that Confucius thoroughly approved of the strong emphasis laid by the ancients on the necessity of reverence. 'Authority without mercy, ceremonial without reverence, mourning without sorrow—what have I to do with these?'³ The same lesson of reverence is inculcated in the Classics of Poetry and History.

'From of old, before our time, the former men set us the example:—How to be mild and humble from morning to night, and to be reverent in discharging the service.'⁴ In the *Shu Ching* (Classic of History) there is a description of how the emperor Shun (23rd cent. B.C.), when appointing a high-priest or director of religious ceremonies, addressed the newly-appointed officer thus: 'You must be the Arranger of the ancestral temple. Morning and night you must be respectful. Be upright, be pure.' The officer did obeisance and suggested that one worthier than he should be appointed; but the emperor adhered to his decision and said, 'Do you go and undertake the duties. Be reverential.'⁵ Similar exhortations are to be found in the *Tso Chuan*.⁶

Irreligion or irreverence is frequently declared to be the cause of the withdrawal of God's support from a reigning house.⁷

(b) *Sincerity*.—A fair acquaintance with Confucian thought shows that the true Confucianist is far from exaggerating the importance of ceremonies and ritual as such. He constantly insists that it is the spirit, not the letter, that really matters, and that rites in themselves are worthless without sincerity. A recent writer has said that the earlier types of 'commercialized' religion were displaced by 'faiths like those of Jesus and Mahomet which make God's favor depend on the heart of the worshipper rather than on his sacrifice.'⁸ But this was precisely the teaching of classical Confucianism several centuries B.C. In one of the books of the *Record of Rites* we are told that the 'superior man' is not only extremely reverential in all ceremonial matters but is also absolutely sincere.⁹

'Sacrifice [which in this passage is practically synonymous with religion] is not a thing coming to a man from without; it issues from within him, and has its birth in his heart. When the heart is deeply moved, expression is given to it by ceremonies; and hence, only men of ability and virtue can give complete exhibition to the idea of sacrifice. The sacrifices of such men have their own blessing;—not indeed what the world calls blessing. Blessing here means perfection;—it is the name given to the complete and natural discharge of all duties. When nothing is left incomplete or improperly discharged;—this is what we call perfection, implying the doing everything that should be done in one's internal self, and externally the performance of everything according to the proper method.'¹⁰

In the *Tso Chuan* we are told that, when 'intelligence and sincerity' are present, almost any offerings, however common and easily obtained, may be 'presented to the spirits and set before kings and dukes.'¹¹ An English writer has commented on this in the following words:

¹ *SBE* xxviii. 264.

⁹ *SBE* xxvii. 404.

¹⁰ *Id.* xxviii. 236.

¹¹ Legge, vol. v. pt. 1. p. 13.

'The idea that *intelligence* and *sincerity* are prerequisites to *sacrifice* indicates an advanced stage of religious culture on the part of the writer.'¹

The testimony of the other classical books is to the same effect.

'God has no partialities,' the *Shu Ching* tells us, 'only to those who are reverent does He show favour. The people are not constant in their affections, except to those (rulers) who have charity of heart. The spirits do not necessarily enjoy sacrifices; what they enjoy is the sincerity.'²

(c) *Simplicity and dignity*.—Next to reverence and sincerity in prayers and sacrifices nothing is more earnestly insisted upon than simplicity and dignified restraint—something very near to the Greek *σωφροσύνη*. Ostentation and a lavish display of costly temple furniture is strongly discouraged; plain water is better than wine, coarse cloth is to be preferred to gorgeous embroideries, expensive mats of fine rushes and bamboo are no better than mats of coarse reeds and straw. The soup which formed part of the sacrificial offerings should be unseasoned, to denote simplicity; the grand symbols of jade should be left plain instead of being carved. The king, when about to take part in sacrificial rites, should not ride in a carved and lacquered state-carriage but in a plain one. 'In all these things it is simply the idea of the simplicity that is the occasion of the preference and honour.'³ Sacrificial offerings should be chosen not from rare and expensive products, but from what is seasonable and abundant.⁴ Self-restraint—a moral quality which manifests itself outwardly in simplicity—is one of the principal Confucian virtues. Without self-restraint there is necessarily a lack of dignity; and without dignity the rites of worship cannot be properly performed. It was not only the actual sacrificial rites that had to be conducted with quiet dignity and solemnity; the temple-dances, too, 'displayed the gravity of the performers, but did not awaken the emotion of delight.'⁵ Similarly, 'the ancestral temple produced the impression of majesty, but did not dispose one to rest in it.'⁶ This is because 'the idea which leads to intercourse with spiritual Beings is not interchangeable with that which finds its realisation in rest and pleasure.'⁷

3. *Godward and manward aspects of Confucian worship*.—There is another feature of Chinese religion which is perhaps more characteristically Chinese than any of those yet mentioned—a moral attitude which may be briefly summed up in the formula 'Look after the human and the divine will look after itself.' This 'manwardness,' if it may be so termed, does not necessarily imply a neglect of or contempt for the 'Godward' side of religion. It is based on a reasoned conviction that whatever is good for man will satisfy God; that God does not desire and will not accept any offerings or sacrifices that will hamper or impoverish His worshippers in their necessary mundane activities or human relationships; and that in the last resort divine and human interests are identical. To quote the words of Mencius—

'He who brings all his intellect to bear on the subject, will come to understand his own nature; he who understands his own nature will understand God. To preserve one's intellect, and to nourish one's nature—that is how to serve God. To waste no thoughts upon length of life, but to cultivate rectitude—that is to do the will of God.'⁸

Doubtless this view, or something like it, is one to which all evolving religions tend to approximate; what is remarkable is the very early date at which it was reached by the Chinese and the consistency with which it has been maintained.

It may have hampered Chinese religion in its attempts to soar heavenward, but it has undoubtedly had the excellent result of enhancing the honour and prestige of moral values. Nor are these moral values confined to earth. Chinese religious speculation extends them to the spiritual world as well, and this is why we have no capricious or irresponsible despot in the Chinese pantheon, no acts or utterances ascribed to divine beings which are incompatible with the highest moral ideals known to Chinese humanity. In this we have a sufficient explanation of another remarkable fact that has often extorted the admiration of European students: the high moral tone of the whole body of the classical and sacred literature of China and the absence of all expressions suggestive of licentious thought.

A modern writer on Eastern religions remarks that in his opinion Confucius laid 'unnecessary emphasis upon social and political duties, and may not have been sufficiently interested in the honour to be paid to Shang-Ti or God. He practically ignored the Godward side of men's duties.'¹ More just are H. A. Giles's observations on Confucius's general attitude:

'In regard to the relative importance of serving God and serving man Confucius has often been blamed for setting man before God; but it should be remembered that his interpretation of true service to God was embodied in right and proper performance of duty to one's neighbour. The idea of personal service to God Himself, as understood by the Jewish patriarchs, is entirely foreign to the Chinese conception of a Supreme Being.'²

In one of the books of the Historical Classic we are told of the eight branches of administration which ought to engage the attention of good rulers. The first is agriculture—the most important of all, because it provides the people with the means of subsistence; the second, commerce, which regulates the distribution of commodities; the third, religious ceremonies. With the fourth, fifth, and sixth we need not concern ourselves; the eighth and last is preparation for war.³ It is characteristic of China that the rites of religious worship should occupy only the third place; for religion, the Chinese would say, has small practical importance for men who have nothing to eat; and spiritual beings, if they deserve human homage at all, are not likely to demand sacrificial offerings from men who cannot find the wherewithal to feed themselves. The doctrine which is implicit in this ancient passage from the *Shu Ching* reappears in an explicit form in the teachings of Mencius: 'The most important element in the State is the people; next come the altars of the gods; least in importance is the king';⁴ and is repeated in the utterances of the first emperor of the Ming dynasty:

'God puts the sovereign in charge of his people, and the sovereign who wishes to serve God properly must first show that he loves the people. To show love for the people—that is the way to serve God. . . . He who would be a true sovereign should regard Heaven as his father, Earth as his mother, and the people as his children, and must carry out his duties to each with the utmost devotion. He does not perform the sacrifice to Heaven and Earth in order to bring prosperity upon himself, he does it to promote the welfare of the whole realm.'⁵

4. The motives of worship.—What, then, is the principal motive of religious worship, according to Chinese theory? Confucius and the majority of thinking Chinese since his day would have assumed that the object of religious rites is a double one—to do honour to spiritual beings and to benefit living men. The benefits anticipated by the living are moral and spiritual as well as material. It

cannot be disputed that a great deal of the ceremonial connected with the cult of ancestors has direct reference to purely worldly considerations. It is assumed that the ancestors, if approached with the proper rites and offerings, will maintain the family in a state of prosperity and save it from disaster or extinction. Nevertheless this is not the reason why Confucian orthodoxy sanctions the cult of ancestors. The truly filial son, we are told, should offer his sacrifices 'without seeking for anything to be gained by them.'¹ Further, it should be remembered that there is, and long has been, a very large number of people in China who have been more or less sceptical on the question of the continued existence of human individuals after death, and who have nevertheless been among the most zealous supporters of the ancestral cult. Those who study the cult not merely in books (whether Chinese or foreign) but as it is actually practised by the people will soon realize that the practical if not the theoretical basis of the cult is social and moral rather than religious. As the present writer has said elsewhere, Confucianism has insisted on 'the importance of keeping up the cult of ancestors not so much for the sake of the dead as because it fostered among living men feelings of love, respect, reverence, and duty towards family and state. The souls of the dead might or might not be conscious of what was done for them, but it was in the interests of social harmony and political stability that the traditional religions and commemorative ceremonies should be jealously preserved and handed down to posterity, and that during the performance of such ceremonies the presence of the ancestral spirits should at least be tacitly assumed.'² Filial piety is, of course, the principal virtue which the ancestral cult is expected to strengthen and confirm; and it should be remembered that filial piety in China has a much wider and deeper signification than it has elsewhere. We are told that it is the root of all virtue, and the stem which produces all moral teaching; that it is an all-embracing rule of conduct, by the practice of which the people are brought to live in peace and harmony, and ill-will between superiors and inferiors is extinguished; that it commences with the service of parents, proceeds to the service of the king, and is completed by the consolidation of the character.³

A well-known Christian missionary in China, J. Edkins, drew attention to what he conceived to be a serious defect in the Chinese attitude towards religion when he said:

'An ethical test is the only one they know. When the evidence of a new religion is presented to them, they at once refer it to a moral standard, and give their approval with the utmost readiness if it passes the test. They do not ask whether it is divine, but whether it is good.'⁴

It is not strictly accurate to say that an ethical test is the only one they know, but it is certainly the test which they show the greatest readiness to apply. Probably the most religiously-minded Chinese would cheerfully admit the truth of Edkins's observation that when confronted with a new religion they 'do not ask whether it is divine but whether it is good,' not because they are contemptuous or oblivious of the divine, but because they feel or believe that the direct and exclusive search for the divine may lead them into swamps and wildernesses, whereas the search for the good is in itself a great good, even if only partially successful; and that, although few glimpses of the divine may be vouchsafed during the arduous ascent of the mountain of good, it will be found, when the summit is reached, if not

sooner, that the good and the divine are twin peaks joined by a level pathway over which men and gods may come and go at will, greeting one another as they pass with the friendly recognition of spiritual kinship.

III. *TAOISM*.¹—It is unnecessary to deal at length with Taoist notions of worship, because, regarded as a religion, Taoism is almost wholly imitative. Primitive Taoism was not a religion, and, though the mysterious *Tao* was regarded as ineffable, wonderful, omnipotent, immanent in all the universe, infinitely great and infinitesimally small, it cannot be said to have been an object of worship. After the introduction of Buddhism, Taoism found it necessary to go through a process of reinterpretation and reconstruction in order to maintain its position in an environment that was becoming increasingly Confucian on its ethical, increasingly Buddhist on its religious, side; it therefore adapted to its own uses some of the religious formulations and rituals of its Indian rival, borrowed moral teachings from both Confucianism and Buddhism, and turned itself into an institutional religion by adopting monasticism and establishing temples for the worship of the numerous and ever-multiplying deities who began to throng its pantheon. It apotheosized its legendary founder, Lao-tse, and made him one of a divine triad which would certainly never have come into existence had a model not existed in the San Pao, the 'Three Precious Ones,' of Buddhism. As time went on, it also drew into its own system some of the divine beings of the pre-Confucian state religion of China; and so the Shang-Ti, or Supreme God, became (in comparatively recent times) the Yü Huang Shang-Ti, the 'Jade Imperial God,' who is one of the most prominent objects of worship in the debased Taoism of to-day. In spite of all its bare-faced borrowings, its crudely-artificial methods of turning dead men and women and shadowy abstractions into gods and goddesses, and its haphazard deification of animals, real and mythical, there is no doubt that even in these degenerate days the deities of Taoism are capable of inspiring religious devotion and that some of them at least are objects of real worship.

IV. *BUDDHISM*.²—It is often said that Buddhism is atheistic and therefore offers the believer no object of worship. However true this may be of Buddhism as a metaphysical system, and of the Hinayāna (*q. v.*), in its primitive form, it is certainly not true of the Mahāyāna (*q. v.*), which claims the allegiance of practically all Chinese Buddhists. For all but a small minority of Buddhist scholars and mystics the Buddhas and *bodhisattvas* cannot be fitly described as other than objects of worship. The cult of these beings has reached its greatest development in one subdivision of the Mahāyāna, which is known to Chinese as the 'Pure Land' and to Western students as the Amidist school. For adherents of this school the figure of Amitābha has practically taken the place of Śākyamuni, the historical Buddha; and the worship of which he is the object can hardly be described as anything less than *λατρεία*. For ordinary believers he is the sublime deity who rules over Sukhāvati, the Western Paradise, and who, with the assistance of the great *bodhisattva* Avalokiteśvara (Kuan-yin) and Mahāsthama (Ta-shih-chih), brings to salvation all those who invoke his name with sincerity. That Amitābha evokes feelings of deep and sincere devotion is often doubted or thought impossible by those who cannot understand how the contemplation of a non-existing being (for Amitābha is entirely a product of the religious imagination) can give rise to a really devotional attitude. Yet

a close observation of the religious beliefs and practices of Amidists will certainly dispel any doubts. Perhaps no more conclusive testimony on this subject could be obtained than that of L. Wiegner, whose evidence is all the more important and valuable from the fact that, as a loyal Catholic missionary, he may be regarded as incapable of unduly emphasizing the spiritual fervour that a pagan cult is capable of inspiring.

'The Amidist temples in China and Japan are the only ones in which the people pray—pray truly and from the bottom of their hearts, where they repent and implore, with attitudes so natural and so touching that no suspicion of make-believe is admissible. As long as I live I shall never forget the feelings that I experienced when I saw a young Amidist mother making her devotions before the lighted and empty throne.¹ She began by closing her eyes and concentrating her thoughts, her lips murmuring the words of repentance and petition. Then she brought two little children before the throne. The second could scarcely walk, but both did exactly as their mother had done, correctly and most gravely. Finally she took from her breast a third child, newly-born, and pressing his head very delicately between her thumb and forefinger, made him bow towards the throne.'²

In recent years some rather crude attempts have been made by a small school of English writers to prove that the beliefs and rites of Amidism, or some of their most striking features, were borrowed from or inspired by Christianity. Wiegner, whose learning, conscientiousness, and comparative freedom from bias make him almost unique among Western missionaries who have studied Chinese religion, unreservedly rejects the theory. He believes, on the contrary, that all the characteristic features of the Mahāyāna—including the 'altruisme exubérant' and the 'fièvre salvifique' associated with the activities of the *bodhisattvas*—are a logical development of primitive Buddhist theory.³ He sees nothing mysterious in the gradual expansion of the so-called egoism of the Hinayāna into the altruism of the Mahāyāna; indeed he regards it as necessary and inevitable. He traces Mahāyānist origins to the centuries immediately succeeding the death of Gautama Buddha. The Mahāyāna 'serait donc antérieur de plusieurs siècles au Christianisme.'⁴ These views appear to the present writer to be entirely just. The worship of Buddha, or of Amitābha, or of Kuan-yin is, at its best, as true and sincere as the worship of God, of Christ, or of the Virgin in Christendom; and its roots are planted very deep in Buddhist soil.

LITERATURE.—This has been indicated in the footnotes.

R. F. JOHNSTON.

WORSHIP (Christian).—Religious worship being the expression of that sense of 'worth,' or title to honour, which man feels due to the Divine nature, its idea and forms will vary with the notion of God and man and of their mutual relations. Christian worship, moreover, as distinct from the other historic types, has a definite character due to the teaching and example of the Church's Founder Himself. This remains regulative for the whole history of Christian worship, deciding between true and false developments, and forming the standard by which reform or progress is to be judged.

The gospel of Christ itself emerged out of the religion of Israel, and accordingly its genius or distinctive nature defined itself largely in relation to Judaism, both as faith and as worship. In both Jesus claimed to 'fulfil' the religion of the Hebrew prophets, whose emphasis was on the heart or inward attitude, as determinative of real devotion to God and His will; 'obedience' of life was the truest 'sacrifice,' and moral relations, rather than

¹ That is, the canopied dais usually occupied by an image, but which is sometimes purposely left empty, to indicate that the real Buddha is not to be found in stone or clay but in the heart of man and of the universe (cf. R. F. Johnston, *Buddhist China*, London, 1913, pp. 111, 303).

² Cf. artt. *CHINA, CHINA (Buddhism in)*.

ritual or formal acts of worship, were the primary form and means of communion with God. Love to God as Father, and to all men as brethren in virtue of their relation to Him—this constitutes essential worship; to it all forms of specific worship are subordinate, and have value only as expressive of this and all it implies, according to Christ's idea of God's character. Where known moral relations are at fault, worship is unacceptable; the 'gift' of homage is to be left unoffered until it can be offered with a good conscience (Mt 5^{23f.}).

Spirituality, then, in this sense, is the touchstone of Christian worship; and those forms of worship are most entitled to the term 'Christian' which conform most to the simplicity and naturalness which marked Jesus' own devotional practice, or are most analogous to these. This does not fix beforehand how far other modes of expressing the same ideas and emotions, under other conditions of culture and particularly of art, may or may not be allowable. But it does fix where the emphasis which determines the spirit of worship must lie, if worship is to be true to 'the mind of Christ.'

Worship has two senses, a wider and a stricter. The wider, expressing a man's devoutness in all his living, is equivalent to piety; the narrower, denoting specific forms of devotion, personal or social, is nearly synonymous with cultus. It is with the latter that this article has chiefly to do. Yet, since the relation between the two senses of worship, the inward or inclusive and the external and particular, is so intimate in Christianity, it is needful constantly to bear in mind the context of 'holy' or devout life in which worship is set, in so far as it is Christian at all. This we shall find to be very manifest in primitive Christianity, when 'holy' was the epithet of the Church, and when participation in its worship, as pure and loving—with the Kiss of Peace as its seal—was conditioned by serious moral Church discipline.

1. The NT idea of worship.—(a) Religion, according to Jesus, consists in filial trust and love towards God, and loyalty to His will for His Kingdom 'on earth as it is in heaven.' Thus the Christian norm of worship is the Lord's Prayer. In keeping with this, the effect of Jesus' whole teaching, alike by its emphasis and by its silence, is to change the relative importance attaching to heart religion and to outward expression in worship. He never treated ritual or cultus as determinative of man's real relation to God, as did current Judaism—a fact revolutionary in the history of ancient religion. Nor did He, while creating a new religious bond between His disciples and constituting them a new Israel within Israel spiritually, make them a new community for purposes of worship or prescribe new forms of worship proper.¹ 'Pray without ceasing: in everything give thanks' (1 Th 5¹⁷; cf. Eph 6¹⁸), rightly became a watchword of the Christian life. Worship thus becomes relatively independent of any given forms of expression, so far as these are not bound up with normal human life, the fulfilment of all relations 'as unto God and not (merely) unto men.'

This comes out clearly in Paul's attitude to special seasons in Ro 14. 'One man esteemeth one day above another: another esteemeth every day alike' (v. 5). 'He that regardeth the day, regardeth it unto the Lord' (v. 6), and *vice versa*. Here we have a principle of all-embracing range, since it turns on the very nature of 'faith,' as Paul is using the term, viz. personal conviction before God. 'Whatever is not of faith is sin' to him who does or abstains. 'For the kingdom of God

is not eating or drinking (as religious observance), but righteousness and peace and joy in the Holy Spirit. For he that herein serveth Christ is well-pleasing to God.' There can, then, be no absolute rules or laws of worship in Christianity. This principle of relativity is implied too in the great maxim which sums up the distinctive advance of Christian worship—because of the Christian idea of God—upon that of all previous religion, including Judaism. 'The hour . . . now is, when the true worshippers shall worship the Father in spirit and truth [full reality]: for such doth the Father seek to be his worshippers. God is Spirit: and they that worship him must worship in spirit and truth' (Jn 4^{23f.}). As J. B. Lightfoot puts it,¹ 'The Kingdom of Christ . . . has no sacred days or seasons, no special sanctuaries, because every time and every place alike are holy. Above all it has no sacerdotal system. It interposes no sacrificial tribe or class between God and man, by whose intervention alone God is reconciled and man forgiven. Each individual member holds personal communion with the Divine Head.' The conception is indeed, as he adds, 'strictly an ideal,' which cannot be applied rigorously in the practical life either of individuals or of the Christian society, the Church. But it remains the regulative principle behind all Christian institutions of worship, as of organization generally, giving them only a conventional value, as expediencies tested by much experience, yet as such to be treated reverently, especially for the sake of others, *i.e.* in love as well as faith.

(b) *Forms of worship in the NT.*—Here the main fact is that Jesus' own example and teaching are associated with the synagogal type of worship rather than with the Temple, the seat of the sacrificial and priestly system of worship. For to Him the Temple was primarily 'a house of prayer,' and that private (Lk 18²⁰) rather than public prayer. Indeed the latter hardly seems to be alluded to by Jesus at all (not even in Mt 18²⁰). His teaching on worship is mainly on genuine prayer, as opposed to formal prayers, 'vain repetitions' (Mt 6⁵⁴; cf. Lk 18¹⁰⁻¹⁴); and even 'the Lord's Prayer' is given as an example of prayer of the right sort rather than as a form for regular repetition. Such a valuation of forms of worship, in proportion as they express simply and directly the spirit of worship, is not only continuous with that of the prophets, as of parts of the Psalter and the Jewish Apocrypha; it appears also in some Rabbinic utterances, such as that of R. Menahem of Galilee (about the Christian era):

'One day all sacrifices will cease, only the Thankoffering will not cease; all prayers will cease, only the Thanksgiving prayers will not cease.' Compare the spirit of Eccles 3⁵⁻⁷.

This Rabbinic saying seems relative to the Messianic era of perfected worship, when sacrifices for sin should no longer be needful; and that is just the position in which the first followers of Jesus felt themselves to be, as spiritually united to Messiah. Thus their relation to God was now conditioned solely by the representative self-oblation of Jesus. This was at first conceived on the lines of 'the Suffering Servant' of Is 53, but was later worked out, as in the Epistle to Hebrews, in terms of the Mosaic sacrificial system, regarded as 'the shadow' of the perfected spiritual reality of purely personal relations, those of the devoted will (He 10¹⁻¹⁸). Thus the Christ, as God's sinless Son, is the abiding objective basis of His people's holiness (2¹⁰, 10¹⁴). All Christians, then, are in fact made priests to God, as united in spirit with the 'Great Priest,' and as such have access for communion with God of the most intimately spiritual kind (10¹⁹⁻²²).

This conception conditions the whole of primitive Christian worship. Its normal character is thanksgiving, at once praise and prayer, which, as Menahem said, remains after other kinds of 'prayers' have ceased. Christians 'offer up' through Jesus 'sacrifice of praise to God continually, that is, the fruit of lips which make confession to His Name' (He 13¹⁵; cf. 1 P 2⁵, Rev 1⁶ 5⁸ 8²). As for outward sacrifices, only the thankoffering remains, viz. deeds of beneficence and fellowship, 'for with such sacrifices God is well pleased'² (He

¹ Mt 18¹⁷, the language of which is probably secondary, is no real exception, while our evidence is divided in the case of even the Lord's Supper (see art. EUCHARIST [to end of Middle Ages], I.). But in any case the words 'This do in remembrance of me' would mean only the investing of a Jewish form of worship, the 'breaking of bread' with blessing of God or thanksgiving, with specific Christian associations, in fulfilment of the domestic Paschal meal.

¹ *The Christian Ministry*, London, 1901, *ad init.*

² Probably echoing the most striking OT anticipation of this conception of worship, found in Eccles 3⁵⁻⁷; 'He that keepeth

13¹⁶). Here the word 'continually' shows that the abiding attitude of a worshipful spirit is what is chiefly in view, as in Paul's 'praying always,' and this on the part of Christians severally. And in fact the bulk of NT references to worship have this personal rather than corporate reference.

Such, e.g., is the nature of another passage which affords striking illustration of the new conception of spirituality of life as itself worship. 'Pure religion and undefiled before our God and Father is this, to visit the fatherless and widows in their affliction and to keep himself unspotted from the world' (Ja 1²⁷), where the word rendered 'religion' (*θρησκεία*) means 'devotion' expressed in devout acts.

Once we enter upon the history of Christian worship through the centuries, we shall have to confine ourselves in the main to the corporate or common worship of the Church, with only occasional glimpses at the forms of private devotion, though this all along exists in the background.¹ But here we may note that in the NT itself the relation between personal and corporate worship is peculiarly intimate, the former overflowing into the latter and constituting much of its contents, under the lead of individual members of the Spirit-filled Body of Christ's 'saints.' This meets us particularly in Paul's Gentile churches, e.g., in his advice to the Church at Corinth (1 Co 11-14). 'What is it, then, brethren? When ye come together, each one hath a psalm, hath a teaching, hath a revelation, hath a tongue, hath an interpretation. Let all things be done unto edifying' (14²⁶, also 15-17, where praying, singing, blessing of God or 'eucharist,' all 'by the Spirit' on the part of individuals in Church worship, are specified; cf. Col 3¹⁶, Eph 5¹⁸⁻²¹).

Evidently the forms of worship in the Apostolic Age were not fixed or uniform. The new Christian spirit brought a fresh element of spontaneity (2 Co 3¹⁷) into the forms of common worship, which otherwise followed in the main synagogal usage. To this the earliest converts, both Jews and proselytes, were accustomed; and it would naturally be adhered to, save for any feature distinctive of the new Messianic form of their faith, such as 'the breaking of bread' with thanksgiving to God for the Messianic redemption in Christ and in His Name. This note of *adoring gratitude* to God for His goodness in creation and redemption, which explains the term 'eucharist' as used for the central act of Christian worship, remains through all changes its abiding characteristic.

The blending here of old and new would be similar to the use of the Sabbath alongside the Lord's Day, as both special days of worship, though in different modes. But, as time went on and conditions changed, the need was felt (e.g., in 'Barnabas' and Ignatius) to distinguish sharply between the two, as relative to different 'economies' in God's relation to man; and for the most part the Sabbath ceased, especially in the West, to have positive religious significance for Christians.

2. **Worship, particularly eucharistic, in the ancient Church.**—(a) *Worship in the sub-Apostolic Church.*—The forms of Sunday worship were still determined mainly by those of the Synagogue, as modified by the 'prophetic' spirit in the primitive Church. Synagogal worship included recitation of psalms, set prayers, Scripture lessons, address, benediction. Our first glimpse of Christian worship, as reported by Pliny c. A.D. 112, shows us, at the Christian assembly before dawn on a stated day (Sunday), 'a hymn (*carmen*) to Christ as to a God' (cf. 1 Ti 3¹⁶, Eph 5¹⁴, 2 Ti 2²², for snatches of such hymns), sung responsively, and a pledging of each and all in solemn form (*sacramento*) against theft, adultery, and other prevalent social wrongs. With the former we may compare the *Odes of Solomon*, and with the latter 2 Ti 2¹⁹, for moral law (*ipso facto*) multiplith offerings . . . and he that giveth alms sacrificeth a thankoffering. To depart from wickedness is a thing pleasing to the Lord; and to depart from unrighteousness is a propitiation.²

¹ See Christian sections of artt. PRAYER, FASTING, FESTIVALS AND FASTS.

fealty as felt to be part of Christian religious allegiance, and as not only made explicit in baptismal vows—witness *Did.* vii. 1 and the *renuntiatio diaboli* found later—but perhaps also reaffirmed week by week in some solemn form during divine service. No doubt there were other less distinctive elements in the morning worship besides the two Pliny-names, e.g. prayer, Scripture lessons, address, and benediction, as in the synagogal worship familiar to the Romans.

The essential atmosphere of Christian worship, as we see most clearly from the Ignatian Letters, was loving unity.

'For if the prayer of one and another hath so great strength, how much more that of the bishop and of the whole church. Whosoever therefore cometh not to fellowship' [lit. 'together,' as in Ac 21. 44. 47] stands apart from 'the altar' or 'the sanctuary' (*θυσιαστήριον*), the holy place where the assemblage of God's people [which Methodius also later styles 'a bloodless altar'] offers up the sacrifice of prayer, and particularly that of the eucharist.¹

For a similar reason, viz. as specially devoted to the sacrifice of prayer, widows are called by Polycarp 'God's altar.'² The very boldness of these metaphorical uses of 'altar' for persons, in relation to their 'sacrifice' of prayer, shows how intense was the early Christians' sense of the sacredness of prayer as the supreme form of worship, and how spiritual and personal was their idea of the Christian sacrifice. Of this genus the eucharistic prayer of the whole Church corporately was the supreme species; and to this we must now turn.

It was perhaps the association of 'sacrifices' of 'beneficence,' for the service of God in His people (according to He 13¹⁶), with the offering in prayer of part of such oblations (or 'gifts') for the special purpose of Holy Communion in 'the breaking of bread,' that led in time to the elements so used being also called the Christian 'sacrifice.'³ But, before this occurred, the bread and the wine over which thanksgiving prayer (*eucharistia*, like the Jewish *Kiddush*, or 'hallowing') was uttered themselves came to be styled 'thanksgiving' (eucharist). In Ignatius 'eucharist' as a rule still denotes the communion service, the whole act of eucharistic worship associated with the memorial bread. This act seems also in *Did.* xiv. 4 to be called the Christians' 'pure sacrifice' of praise to God's Name (after Mal 1^{11, 14}); and its profoundly spiritual nature is shown by the warning that the Church's 'sacrifice' will not be 'pure' if unbrotherly feeling be present even between two of the worshippers. Beyond this, for the time, the use of 'sacrifice' in this connexion does not go.

So far, then, Christian worship is the fulfilment, general or special, of Paul's exhortation, 'Present your bodies a living sacrifice, holy, well-pleasing to God—your spiritual [lit. rational, as distinct from material] service.' It is the kind of worship which Justin sets over against the pagan type, as worship of 'the Creator of this Universe,' One 'in no need of blood-offerings and libations and incense,' who is worthily to be honoured only by praise, 'in word of prayer and thanksgiving over all our food.'⁴ Such worship, generally, does not differ in idea from that of the corporate Eucharist of the Church:⁵ each is a form of the 'unbloody sacrifice' which befits the God Christians worship, viz. 'the service of the mind' (*τὴν λογικὴν λατρείαν*; so Athenagoras, xiii. *fin.*; cf. Ro 12¹; so too Irenæus a little later).

Accordingly the prayer of 'eucharist' or thanksgiving was the heart of primitive Christian worship

(as of that of Judaism, which it modifies),¹ and this as co-extensive with life, in that 'it is very meet, right and our bounden duty, that we should at all times and in all places give thanks' unto God (ancient opening of the Eucharistic Prayer, adopted in the Anglican Prayer Book). But such worship attained special expression in all corporate meetings for Christian fellowship, of which 'the Eucharist' of the whole local Church was the climax. To these principles striking witness is afforded by that 'missing link,' the Agape (*q. v.*).

This was, even after its separation from the eucharist proper (c. A. D. 100 in some, though not all, churches), a corporate meeting of the church, of a more family and informal nature than the liturgical eucharist (now the climax of a Sunday morning service). Such the love-feast still appears not only in the N. Africa of Tertullian's day but in that of Cyprian's,² as also in the Ancient Church Order commonly known as Hippolytean, though in this part it may rather reflect Syrian usage c. 300. There 'at the Supper of the congregation,' at the 'bringing in of lamps,' the bishop 'gives the Salutation' usual before eucharistic prayer, ending, 'Let us thanks-give to the Lord.' The people reply, 'Right and just,' as before the Anaphora proper; but it is added, 'And he shall not³ say: Lift up your hearts' (the *susum corda* formula), because that shall be said at the Oblation alone. Otherwise the prayer of 'eucharist' which follows is obviously regarded as a solemn one, and the fragments from the bread thus consecrated by prayer are taken from the hand of the bishop as *eulogia* (i. e. blessed bread), though 'not eucharist, as the body of our Lord.'

As regards the Eucharist, what has just been said prepares us for changes due to its separation from the associations of a social meal, and its inclusion in a morning service of the synagogue type, as its central element. Thus it took on a more liturgical and ere long (under the influence of current sacramental ideas other than Jewish) a mysteriously realistic character, alien to the original Jewish notion of a meal of religious fellowship with blessing or eucharist of God. The former of these developments, the liturgical, was fostered by the ancient notion of worship outside prophetic Judaism, that some material offering was essential to worship. Hence the self-oblation of the loyal heart came in time to appear to most Gentile Christians to fall short of perfect worship; and this led to a new meaning being attached to the eucharistic prayer over the bread and wine used for the purposes of Communion (originally as a meal of Christian fellowship), viz. as offering the elements to God, in worship of homage, as a gift to the Giver of all (a sanction in Scripture being seen in Mal 1^{11, 14}). To this there was insensibly added, by a natural reaction of old associations as to such worship—particularly in connexion with the mysteries (the superficial likeness of which to the Christian Eucharist Justin feels and apologizes for)—the notion that God met the earthly gift with a divine gift in return, by filling it with a new and mysterious quality. The way in which this came about was probably in the first instance purely religious, arising out of the very intensity of the soul's experience of a special quickening in the act of corporate worship, while contemplating and partaking of the symbols of Christ's dying love. This is strongly suggested by the experimental atmosphere and language of the devotional utterances, including eucharistic prayers, in the earliest Apocryphal Acts, the basis of which, if semi-gnostic in type, yet probably reflects the general Christian devotional feeling at Holy Communion both before and after the middle of the 2nd century.

¹ See for full details F. E. Warren, *The Liturgy and Ritual of the Ante-Nicene Church*², London, 1912, ch. iv.

² In *Ep.* 62 (63) he says that at it 'we cannot convoke the people (the whole Church) to our banquet, so as to celebrate the truth of the sacrament (i. e. with 'the mingled cup' for which he is arguing) in the presence of all the brotherhood' (ch. 16).

³ This caution suggests that an older usage to the contrary was in view. If so, the parallel to full eucharistic worship becomes yet more complete.

In the *Acts of Thomas* we have what seems a sample of the more enthusiastic and prophetic type of eucharistic invocation. 'And the Apostle, standing by it ("the bread of blessing"), said: Jesus, who hast deemed us worthy to have communion of the Eucharist of Thy holy body and blood, lo, we make bold with the eucharist and invocation of Thy holy name. Come now and commune with us. And he began to say, Come perfect Compassion; come, Communion of the male (= Christ); come, that [feminine, like 'communion,' the substantive preceding] knowest the mysteries of the Chosen one; come, that hast communion in all the contests of the noble Athlete [against the powers of Evil]; . . . come, Hidden Mother; come, that is manifest in her activities and affords joy and rest to those united to her; come and have communion with us in this Eucharist which we perform in [on the basis of] Thy name and in the love wherein we are assembled in [on the basis of] Thy calling.'¹

Here what is specially noteworthy is the experimental nature of the grace of Christ's eucharistic presence thus invoked. Added to this, however, we find, first in Justin and then in Irenæus, the belief that the words of institution, cited in the Church's eucharistic prayer, were a formula of Divine power, producing in the elements themselves the presence of the *body and blood* of Christ, the Incarnate Logos; and therewith was laid the foundation of what came to be the specifically 'Catholic' doctrine of the Eucharist, and of the corresponding devotional attitude towards the elements themselves. In Justin and Irenæus it appears only as the belief that the worshippers' bodies are prepared for resurrection by participation in Christ's resurrection body and blood. That such presence of Christ's 'body and blood' was of benefit to the *soul* there is no suggestion. Such a realistic conception (present already in some sense² in Ignatius's mystical view of the Eucharist as 'medicine of immortality'³) fostered first the habit of taking portions home for private use (already in Tertullian), and then devotional anxiety as to what became of all parts of the consecrated elements. Adoration of Christ as present in the elements, and the notion that He in them was being offered as the Christian sacrifice—and that with propitiatory intent and effect—represent forms of devout thought and feeling of which we have no trace until after Cyprian's day, or indeed until the 4th century.

(b) *Justin Martyr's witness.*—At this point we must quote from the famous passages of Justin's *Apology*⁴ which afford our one connected picture of Christian corporate Sunday worship in the 2nd century.

On Sundays 'there is a gathering together' of the local church, 'and the memoirs of the Apostles or the writings of the Prophets are read, as long as time allows. Then the president gives by way of discourse admonition and exhortation to copy these noble lessons. Next we all rise together and send up prayers, 'making common prayers for ourselves . . . and for all others everywhere, earnestly that we may be deemed worthy . . . by our deeds also to be found good lives and keepers of the commandments, that so we may be saved with the eternal salvation. When we cease from the prayers, we salute each other with a kiss.' 'Next, bread is brought and wine and water, and the president, taking them, sends up (*ἀνατίθεται*) as best he can prayers in like manner and thanksgivings,' 'sends up praise and glory to the Father of the Universe through the Name of the Son and the Holy Spirit, and makes thanksgiving (eucharist) at length for our having been deemed worthy of these (blessings) at His hands' . . . and the people chimes in with the Amen. Then takes place the distribution to each, and the partaking from the elements for which thanks were given; and to the absent portions are sent by the hand of the deacons.'

One or two aspects of the eucharistic prayer of the Church, through the lips of its president, are made clearer by the more general language already cited from ch. xiii. in describing the reasonable nature of Christian worship. But the main point is that in both connexions its essence lay in 'sending (*πέμψειν*) by reasonable word,' 'to the Creator of this Universe,' 'processions of homage (*προσκύτας*) and hymns (as if on their way to the divine pres-

⁴ 63, 67.

ence), in acknowledgment of being and all the means of well-being; as well as in 'sending requests to be once more in incorruption, on the ground of faith in Him';¹ or, as expressed in the later passages, 'sending up (*ἀναπέμπειν*) prayers and thanksgivings.'

If we have not here the very origin² of the term 'mass' (*missa*=*missio*=Gr. *ἀναφορά*=*ἀναπομπή*, which was not used in a special religious sense) and its original meaning, namely 'the oblation' of worship to God on high (cf. the Liturgy of St. Mark, just before offering of incense and a prayer of oblation, *σοὶ τὴν δόξαν καὶ τὴν εὐχαριστίαν ἀναπέμπομεν*), at any rate this, and nothing else, was the primitive conception of the Christian sacrifice. It is one continuous with the later Jewish notion of prayer, in the Dispersion in particular, and is quite distinct from any notion of the body and blood of Christ as 'the sacrifice of the altar'—a notion which had not yet arisen, even where realistic theories existed of the relation of the Incarnate Logos to the elements, as the Christian bread of life or 'food of immortality.' Another and closely connected aspect of the same contrast is the fact that eucharistic worship in Justin, as in Irenæus and during the 3rd cent. for the most part, has no relation to sin in the worshippers. Christians as such are consecrated by union with Christ,³ and as such are 'counted worthy' of the high function of offering as priests their prayers

self-oblation, in thanksgiving and thankofferings 'in memory of' Christ's thanksgiving at the Last Supper and self-oblation on the Cross, to that of the body and blood of Christ (thought of as present in the elements), as the Church's own sacrifice, presented and pleaded anew as propitiation for sins of dead and living Christians. It was natural that to the eucharistic sacrifice so conceived should gravitate the prayers of intercession (now for the sins of dead and living) which originally came before the eucharistic oblation (*ἀναφορά*, *missa*), in order to give them more efficacy with God. In the Gallican and Alexandrian liturgies, indeed, we see that the sacrifice with which these intercessions are associated is still the Christian people's own oblations, prior to what later was called 'consecration' with the sacred words of institution¹ (without or with invocation of the Holy Spirit to change the elements into body and blood of Christ). In the Roman Mass, however, as it is known to us, the process of change is complete. It has dropped the *Pax* proper, the kiss of brotherly unity which seals the people's fitness to offer their 'sacrifice' as 'pure' (according to early Christian ideas) and acceptable to God; and has only a formal trace of it in the words, 'The Lord's Peace be ever with you,' between the Mass proper and the Communion. It has also gone further than the other liturgies cited in effacing the idea of the service in Justin,

Justin.	Gallican Liturgy.	Egyptian.	Syrian.	Roman.
1. Common intercessions.	1. 'Preces.' Offertory. Intercessions for dead and living.	1. Common intercessions.	1. Common intercessions. Offertory.	1. ('Oremus.') Offertory.
2. Kiss of peace or unity. The elements brought. (Offertory)	2. <i>Pax</i> .	2. <i>Pax</i> .	2. <i>Pax</i> .	2. 'Pax' (simply a formula of peace).
3. Eucharistic prayer(s).	3. Eucharistic prayers.	3. Intercession for dead and living in preface of the eucharist prayers before consecration.	3. Eucharistic prayers. Intercessions for dead and living.	3. Eucharistic prayers. Intercessions for dead and living.

and giving-of-thanks, as acceptable sacrifices to God.⁴ Thus far, then, the Eucharist has no propitiatory aspect even for the living, let alone the dead, although on the anniversary of martyrs, from Polycarp (about the same date as Justin's *Apology*) onwards, eucharist was offered in their name also (as having *par excellence* 'offered their bodies as a living sacrifice'), 'the communion of saints' being conceived to include also the Church triumphant.

(c) *Justin and later 'Catholic' worship.*—The full significance of Justin's witness to the simple spirituality of Christian worship in his day becomes most apparent when we compare it, especially as to order, with extant liturgies from the latter part of the 3rd cent. onwards.⁵ To the variations and changes of order in these he gives us the true key, as showing that they reflect a change in religious ideas and emphasis at different stages. The above table of the chief known types will exhibit this.

The changes of order here visible, a progressive series from Justin to the Roman Mass, receive their one adequate explanation in change in the idea of the eucharistic 'sacrifice,' from the people's

by suppressing intercessions (without specific reference to sins) for Christians and all men before the eucharistic worship, retaining only the empty injunction, 'Let us pray.'

(d) *Irenæus on the Christian sacrifice.*—We are now prepared to appreciate to the full Irenæus's emphatic witness to the older idea of the Christian sacrifice, before passing on to refer to some intermediate stages in the change just indicated, as witnessed from the 3rd cent. onwards.

According to Irenæus, 'Our Lord gave counsel to His own disciples to offer firstfruits to God from His creatures, not as to one who stands in need, but so that they themselves may be neither unfruitful nor unthankful.' And so 'the Church offers to God, to Him who affords us food, firstfruits of His own gifts,' as Malachi prefigured.² This oblation 'is with God reckoned a pure sacrifice and one accepted of Him, . . . because he who offers is himself glorified in the offering, if his gift be accepted.' 'Accordingly sacrifices do not sanctify a man, for God needs not a sacrifice, but the conscience of him who offers sanctifies the sacrifice, if it be already pure, and causes God to accept it as from a friend.' It is already pure, because the Church offers with singleheartedness (*simplicitas*) that 'her gift is rightly accounted with God a pure sacrifice,' like the gift of the Philippians sent to Paul through Epaphroditus.³ For we ought to make oblation to God, and in all things to be found thankful to God the Creator, offering in a pure mind and faith without pretence, in firm hope and fervent love, firstfruits of those creatures which are His. And this oblation the Church alone offers in purity, offering to Him with thanksgiving from his creation.' The purpose of this is that we may

¹ All liturgies of every type agree in bearing witness to the fact that the original form of consecration was a thanksgiving' (W. C. Bishop, *CQR* lxxi. 388).

² iv. xvii. 4 f.

¹ Ch. 13.

² Most authorities favour another, connected with the 'dismissal' of the worshippers (see Rietschel, *Liturgik*, i. 3471.).

³ *Dial.* 41.

⁴ *Ib.* 116 *fn.*, 117.

⁵ See artt. EUCHARIST and PRAYER (Christian, Liturgical) for details.

thereby be fruitful, and so God 'may render to us the recompense of His benefits,' on the principle of Mt. 25³⁴⁻³⁶. As 'the Word enjoined on the People (of the OT) the making of oblations, . . . that it might learn to do service to God; so and for that reason He wills us also to offer a gift at the altar often, without intermission. There is, then, an altar in heaven, for thither our prayers and oblations are directed; and a temple, as John in the Apocalypse says, And the temple of God was opened.'

(e) *Irenæus and certain 'Catholic' developments.*

—Here we have several ideas characteristic of the Christian 'sacrifice' in worship towards the end of the 2nd century. Some are wholly primitive and rooted in the NT; e.g., 'sacrifices do not sanctify a man,' but the worshipper's pure conscience the sacrifice; God's acceptance of a sacrificial gift 'as from a friend' honours the giver;¹ the real, i.e. the spiritual, gift is the thanksgiving of the heart, and is offered at the heavenly altar, to which 'prayers and oblations are directed.'² The last is implied in the call 'Hearts on high' (*sursum corda*), which prefaces ancient eucharistic prayers generally. But in time the idea lost its pure spirituality, as the notion arose that the material gifts themselves were received by God on His altar on high by the hands of His angels. This notion occurs already in the eucharistic prayer of the 4th cent. North Italian *de Sacramentis*, in several Eastern liturgies, and in the traditional Roman Canon of the Mass. The earlier of these, however, preserve in the main Irenæus's notion of an oblation of bread and wine which Christians were privileged to offer—with clear reference to Ro 12¹—as expressing their self-oblation, in sacramental commemoration of the self-oblation of their Lord. But the Roman Canon, by substituting for 'since it is *figura* of the body and blood of our Lord' 'that it may become to us the body and blood of . . . our Lord,' and by a good deal else in the context, brings in another train of thought altogether, that of Christ's body being present on the Church's 'altar' on earth and partaken of by the communicants. This is the full realistic form assumed by the secondary and non-primitive element in Irenæus's principles set forth above, viz. that God gives in *this way*, in recompense for the Church's thanksgiving, a certain unique benefit in return. This, in extant liturgies generally, is conceived as communicated first to the consecrated elements themselves and through them to the communicants. In some early Eastern liturgies the Word or Spirit is thought to become present in the elements, so making them, in a metaphorical sense, His sacramental 'body and blood'; but in Irenæus's discussion of this aspect of the Eucharist, as in the Roman Canon and some later Eastern Anaphoras, the above realistic conception appears of Christ's human body as present in the elements. And with this added notion a fresh phase of worship begins to enter into the eucharistic service, viz. the adoration of the Incarnate Saviour in the elements of the oblation, conceived now as effecting afresh, in some sense (that of *re presentare*, 'really presenting'), the offering of His body, once for all offered on the Cross but perpetually presented in heaven with atoning efficacy.

(f) *Cyprian transitional.*—Cyprian is here, as generally, transitional between the second century and the fourth. His eucharistic theory is in the main Tertullian's, as regards the sacramental rather than the proper body of Christ' being present in the elements after consecration. But

¹ So Justin, *Dial.* 28. The idea lies at the root of the gift-theory of sacrifice in much Greek religion, the gift being to an Iamblichus's mind, as to Irenæus, 'a symbol of friendship between the mortal and the deity'; see art. SACRIFICE (Greek).

² The fullest and still the truest discussion of 'the Christian sacrifice' in the ancient Church is in Bunsen's *Hippolytus and his Age*, 4 vols., London, 1852, iii. 253 ff., iv. 135 ff., where also much bearing on worship at large is well said.

as regards the prior offering of the elements in eucharistic worship, Cyprian insists that 'the priest' 'performs his office in Christ's place' (i.e. with His authority for the sacramental efficacy of his act) when he 'imitates that which Christ did.'¹ And, though he has in mind what Christ did at the Last Supper,² not on the Cross, yet his broad language elsewhere gave a footing for another and less experimental³ sense being read into his words. So he says, 'The Lord's passion is the sacrifice which we offer,' sacramentally or commemoratively, as 'we make mention' of it in our 'sacrifices' of bread and wine, and speaks of 'offering the blood of Christ' in 'the sacrifice of the Lord,' as commemoratively observed by use of the sacred words of institution in the prayer of consecration.⁴ 'Thus in time "the blood of Christ" and His body were thought of as actually present and offered in the wine and bread, and that not only as the prototype of His people's self-oblation, but as a propitiatory sacrifice "for the sins of living and dead."⁵

(g) *'Catholic' eucharistic worship and survivals*

in it.—From Cyprian's day the whole nature of eucharistic worship insensibly underwent profound alteration in the Church's thought and in the growingly elaborate ritual which expressed it, until in the course of the 4th cent. it attained in most localities that form which is known as 'Catholic.'⁶ Yet down to the 5th cent. there remained clear traces of the older order in certain phrases not really of a piece with the conceptions then prevalent. Thus, in addition to those already alluded to, in the Anaphora of Serapion in Egypt, c. 350, before the words of institution we read:

'Full is heaven, full also is earth of thy excellent glory, Lord of Powers: fill also this sacrifice (*θυσίαν*) with thy power and participation: for to Thee have we offered this "living sacrifice" (*θυσίαν*, Ro 12¹), this bloodless oblation (cf. Eph 5²): to thee we have offered this bread, the likeness (*ὁμοιωμα*) of the body of the Only-begotten.' Then comes the reference to Christ's example in the institution, followed by: 'Wherefore we also, making the likeness of His death, have offered the bread, and beseech Thee through *this sacrifice*, be reconciled to all of us and be propitious, O God of Truth.' Only after this do we get the invocation which is conceived to make the bread 'body of the Word' and the cup 'blood of the Truth,' and so 'medicine of life' for body and soul to those partaking.

Here there seems to be a blending of primitive and later elements.

(h) *Retrospect of eucharistic worship to the end*

of the 4th century.—In idea it at first corresponded simply to its name, 'thanksgiving' to God for His benefits in nature and grace, as rooted in His adorable being or Name. As *1 Clem.* xxxviii. 4 puts it, 'Seeing, then, that we have all these things from Him, we ought in all things to render thanks [Eucharist] to Him, to whom be the glory for ever and ever, Amen.' Of such a life of thanksgiving the solemn corporate worship in full Church gathering is the climax, being the earthly imitation of the worship in heaven,⁷ where (as pictured in Dn 7¹⁰) 'the whole company of His angels standing near Him do sacred service (*λειτουργία*) to Him,' the adoration attributed to the Seraphim in Is 6³, 'Holy, holy, holy is the Lord of hosts: the whole earth is full of His glory.' As visible, concrete expression of this homage of thanksgiving, the Church's 'offerings' or 'gifts' in kind from the Creator's own gifts were presented in sacred service or *liturgy*, in the prayer

¹ *Epist.* 63. 14.

² *Ib.* 4.

³ For his real meaning cf. ch. 11, where he dwells on wine as by natural and scriptural symbolism, or sacramental value, able to 'express (*exprimere*) the blood of Christ' as water could not, and so to produce the sense of newness and joy suggested by the blood or passion of Christ, which the wine 'shows forth' (*ostendit* [ch. 4]).

⁴ *Ib.* 9. 14. 17.

⁷ *1 Clem.* xxxiv.

of uplifting (*ἀναφορά*), directed to God's spiritual altar on high (cf. the imagery of the Apocalypse), where Christ the High-priest presents the Church 'sacrifice' of praise—if pure from defilement by sin, such as enmity between any of its members.¹ This prayer was led up to by 'common prayers' of intercession, as Justin says, 'for ourselves . . . and for all other men everywhere,' in urgent petition (*εὐρόνως*) 'that we may be counted worthy, after having learned the Truth, by our deeds also to be found, finally, good in conduct and keepers of the commandments, that we may be saved with the eternal salvation.' After these intercessions the kiss of peace sealed the spirit of unity which was specially asked for, and was the condition of the 'purity' and acceptableness of the coming eucharistic prayer, the Church's 'sacrifice' of praise to God's Name² or revealed nature. Of such intercessions as offered in Rome c. A.D. 95 we probably have the substance, and largely the very words, in the Epistle of Clement (lix.-lxi.); and we find them strikingly continuous with those of the OT and of contemporary Jewish public worship (cf. 'The Eighteen' Petitions)—a feature also common in the earliest extant Christian hymns. The changes which passed over Christian worship, especially the eucharistic part, show a steady decrease in this Biblical or Hebraic spirit (as distinct from Biblical quotations adapted to new uses), and a corresponding infusion of a non-Biblical or Hellenistic element of thought in the interpretation of the Eucharist as worship and means of grace, together with a transposition of traditional elements in the service generally, in keeping with the new ideas (e.g., the place of the intercessions). This is the most momentous fact in the development of ancient Catholic worship out of primitive Christian forms, and has its parallels in other aspects of Catholic Christianity.³ The change is associated, too, with a growing sense of sin in 'the saints' or 'the holy Church,' especially from the 4th cent., when Christian wholeheartedness on the average rapidly declined, owing largely to the new relations of State and Church tempting worldly people to join the latter. The eucharistic 'sacrifice' is more and more conceived in a propitiatory sense, which had its roots in the newer view of the elements, as literally made by consecration 'the body and blood' of Christ's passion, though as existing now in resurrection glory. Along with such changes of thought went those of form. The eucharistic prayer became more stereotyped, not only as the habitual usage of a given bishop but also as the fixed tradition from bishop to bishop; and what had once been a single prayer was broken up into specialized moments or phases, marking stages in the sacred drama of the Liturgy. This gave the service a 'hieratic' or formally sacred⁴ effect, alien to the genius of primitive Christian worship, but quite congenial to the non-Christian cults around it. To these innovations was now added yet another characteristic of later Catholic worship generally, viz. the notion that the intercession of saints is a factor in the divine pardon provided in the Head Himself.

(i) *Persons to whom worship is addressed.*—The practice of direct invocation of saints as distinct from the earlier veneration, especially on a martyr's 'birthday,' itself appears in Catholic piety about the latter half of the 4th cent.;⁵ but there is no invocation of this sort in eucharistic prayers, where Saints are 'commemorated,' 'that by their

prayers and mediations God may receive our petition.¹ The Church's prayers are addressed only to God the Father, in keeping with the strict theory of Christian prayer, as expounded by Origen.² According to this, the Father was the ultimate, the Son or Word the proximate, object of prayer, as of adoration and thanksgiving. Thus the Divine Word is 'to be petitioned as High-priest to offer up our prayer, that has first reached Him, unto His God and our God.' In practice, however, at least in individual devotions, Christ was directly addressed, all along, in prayer of invocation and petition in particular. In solemn doxologies, on the other hand, a gradual change is visible, both in eucharistic and in other connexions. There Christ, as God's historic Son (originally 'Child' or 'Servant,' *παῖς*, as in Acts), appears originally as the medium through whom glory is offered to the Father; and only from the latter part of the 3rd cent. (as it seems) becomes gradually associated, as the Logos-son, with the Father as also the object of such worship. Similarly the Holy Spirit, which earlier had been thought of as the element 'in' which worship was rendered to God,³ came to be associated with the Father and the Son as co-equal object of praise. In many MSS the modification of the older form by later feeling gave rise to an awkward blend, like that in the 'Hippolytean' Church Order as current c. 350-400, viz. 'through Thy Child Jesus Christ, through (or with) whom to Thee (be) glory, dominion, honour—Father and Son, with Holy Spirit' (or 'with Holy Spirit,' only). Basil⁴ says that 'with' is most fitting in relation to the Son in doxology, 'through' in thanksgiving; but this, while true enough, does not apply to the history of the matter.

3. *Special forms of Catholic cultus.*—(a) *The cult of 'saints.'*—It is needless here⁵ to go into this subject further than to notice that both in its ritual forms, like so much other fresh ritual (in which the Gnostics often led the way) from the middle of the 2nd cent. onwards,⁶ and in its origins this cultus owed much to the funeral and commemorative customs of pagan society, in which Christians lived and from which many of them passed into the Church. 'Prayers and appeals to the dead' were familiar ideas in the one sphere before they appeared in the other—in the case of 'saints,' from Basil's day († 379) onwards.⁷ Hence it seems probable that the prevalent atmosphere of paganism exercised some vague influence upon Christian feeling, especially in the case of the ruder populace. The strongly marked desire to be buried near the martyrs is no doubt to be attributed to a similar hope of protection. It was a matter not so much of logic as of a deep and primitive instinct—the same which in pagan times had led to the development of hero-worship.⁸ These frank words of a modern Roman Catholic⁷ deserve attention as pointing to a principle of wide possibilities of application in the history of 'Christian' worship, especially in view of his later statement that 'the ceremonial of Christianity and that of paganism include many identical elements—e.g., the use of ablutions, lights, incense, prostrations, unctions, linen vestures, *ex votos*, etc.'⁸ Few can doubt that they represent a kind of development which the NT writers, particularly St. Paul—not to name Paul's Master—would have found foreign, to say the least, to the genius of 'the Gospel,' as

'worship in spirit.' And, when one reads the words of St. Melania, in 438, at a shrine of the martyrs, 'O ye, who have always free speech with God that loves mankind, be my ambassadors (*πρεσβεύσατε*) with Him that He may receive my soul in peace'—along with the comment, 'It is just this *πρῆξις*, or free speech, attributed to the martyrs, that is put forward again and again in patristic writers as the motive for having recourse to their help'—one cannot but feel the distance, not so much of time but of spirit, between such worship and that of the NT.¹ For there the same 'free speech,' as of child with parent, is claimed as the glory of all sons of God in Jesus Christ, and particularly right of entry in this spirit into the Holy Place in heaven, as of priests in union with the 'Great Priest over the family of God' (He 10¹⁹). As by a lightning-flash, such a comparison reveals the enormous change of attitude which has come about, by insensible stages, in the worship of Christians.

The cult of the relics of saints, as aids to devotion, especially in connexion with the celebration of the anniversary of martyrdom or spiritual birthday (*natalicia*), goes back in its simplest form to a relatively early date, as witness the contemporary *Acts of Polycarp* (c. 155). But its developments, both in the Catacombs, where martyrs' remains abounded, and elsewhere, later assumed extravagant and superstitious forms, especially in the 4th cent. and onwards, calling forth the scorn of Julian and many other cultured pagans.²

(b) *Artistic aids to devotion.*—The place of art in the expression of Christian thought and feeling, and the function of images (*eikons*) or representations of sacred persons to the eye, usually in paint or mosaic work, are dealt with in special articles.³ There was at first great shyness of such things, on account both of the Jewish and other feeling against all that could be construed as idolatry and of the tainted nature of so much pagan art. Hence the earliest use of art (e.g., in the Catacombs) was symbolic in character; and it was only in the 4th cent., when so many changes, especially in the way of coming to terms with pagan culture, first came about, that such restraint was largely thrown aside. One of the earliest forms in which art was used to assist devotion was in the form of Church buildings, which even from the end of the 3rd cent. begin to be more specially designed to suit the developing ritual of the worship carried on within them.⁴ The veneration of 'images' of sacred persons, as manifestations of the divine in creaturely form, was probably stimulated in part by the pre-occupation of Christian thought in the 4th and 5th centuries with the idea of the Incarnation.⁵

(c) *The Christian Year.*⁶—As the central service of Church worship, the offering of the eucharistic sacrifice came to represent dramatically, or in a series of sacred acts and words, the Christian redemption wrought by the Incarnate Son of God, so the Gospel story of the Incarnate Saviour was set forth ever more fully in the yearly festivals and holy seasons commemorative of the same. Naturally the week first felt the touch of Christ. The Lord's Day, the Christian's day of resurrection joy, took the place of the Sabbath, the Jewish day of grateful gladness. To this were soon added⁷ Wednesday and Friday, as fast days, in remembrance of the sin that occasioned the Saving Cross. But what the Lord's Day was to the week,

that the anniversary of the central act of redemption was to the year. Thus Easter, with its associated Friday, became the first season in the Christian devotional year; how early we cannot say. Then followed Pentecost, and gradually the other great 'moments' of the Redeemer's life, until each year became a time-sacrament of the divine drama of human salvation. The fact that the birthday of the Saviour came relatively late into the calendar points to the practical rather than theoretic nature of the Church's apprehension of its own salvation, in which the Cross, the final act of Redemption, is more central for Christian experience than His birth.¹ Into the calendar of the Christian salvation, in terms of Christ's history and its sequel in the gift of His Spirit, the Church's birthday, were fitted the 'birthdays' of martyrs into the heavenly realm of life eternal. Such, then, was the Christian Year in idea and as an aid to worship. The festivals in honour of the Virgin Mother of Jesus appeared only late in the calendar.

(d) *Devotional 'hours,' in private and corporate worship.*—From the Church Year we turn to the day as a unit of devotion.² 'Hours' of worship, other than the Sunday worship centring in the eucharist, came to be of two chief types: (a) those for special classes within the Church, particularly ascetics ('virgins' of both sexes), later known as monks and nuns; (b) Church services proper. The former type grew out of an earlier kind, namely individual devotions continuous with the three hours of prayer in later Judaism (Ps 55¹⁷, Dn 6^{10f.}), which from apostolic precedents in Acts (3¹ 10³; cf. *Did.* viii.) came to be called 'the apostolic hours.'³ Clement of Alexandria refers to Christians who set apart certain hours, viz. the third, sixth, and ninth.⁴ Already in Cyprian's day⁵ piety had found mystical reasons for the use of the apostolic hours, connecting them generally with the Trinity, and severally with two stages of Christ's Passion and the descent of the Spirit at Pentecost (the third hour). So far, however, such day-time hours were purely private devotions. The earliest Church service other than the Sunday one was the 'vigil,' a night service suggested by the NT calls for vigilance. But it was never of daily occurrence, only on the eve of a holy day—first Easter, then the Lord's Day, the weekly fasts (*stationes*) of Wednesday and Friday, and the yearly festivals of local martyrs.

The night hours proper were, like the day hours, the outcome of private devotions, to judge from Cyprian,⁶ who writes:

'Besides the hours observed from ancient times [the 'apostolic' day hours], both seasons and mystical reasons for prayer have now grown upon us. At morn, to celebrate the Lord's Resurrection . . . At sunset, when day ceases, prayer must needs again be offered, alike for the return of the light and for the advent of Christ, the true sun and true day, with the grace of eternal light. 'Let us, however, who are ever in Christ, i.e. in the light, not cease from prayer even in the hours of night,' any more than Anna in the temple.

Here we find an hour of early morning prayer on rising, before the first of the 'apostolic hours,' ere putting hand to work, and also a vesper hour. These five hours mostly reappear in the East in the 'Hippolytean' Church Order—the last part of which reflects some circle of piety in Syria about A.D. 300—each with its mystical reference, though a different one from Cyprian's;⁷ but there is no vesper hour in the old Eastern Order, possibly

because it was already set apart for more social worship. On the other hand, there are not in Cyprian any night hours, only prayer in the night seasons (*notibus*). Thus our earliest witness for night hours proper is Syrian, viz. this 'Hippolytean' Church Order.

There, after passing reference to prayer before lying down, solemn prayer (with hand-washing) at midnight is enjoined, 'inasmuch as the fathers have handed down that at that hour all creation pauses for a moment to praise God, and all the angelic host does Him service (*αετροπυγία*)—along with the souls of the righteous, hymning God (almighty) at that hour.' Prayer, too, at this hour fulfils the Lord's words, 'At midnight a cry arose . . . Therefore watch, for ye know not at what hour he (the Bridegroom) cometh.' 'Cock-crowing' is the last of its series of hours, the second of the night hours, when the believer rises to pray in memory of Christ's resurrection and 'in hope of eternal Light in the resurrection of the dead.' About a century later, namely in *de Virg.* 20, the midnight hour seems to last on till 'towards dawn' when come Ps 62, the *Benedicite opera omnia*, and *Gloria in excelsis*.

Here we see how the regular hours of those under vows, 'virgins' or 'religious' (in later Latin parlance), grew out of the more informal devotions of earnest Christians living in society or 'the world,' by increasing severity of requirement, which demanded first a midnight hour (a daily, rather than occasional, vigil) and then an hour when the cock heralded the approach of a new day. Such ascetic vigilance of worship was as a rule possible, physically as well as otherwise, only to those who were at leisure (from daily labours) to cultivate a professional and more individualistic life of piety. There is, however, no sign of distinct night hours (even for ascetics) before A.D. 300. Even in Egypt, where asceticism appeared earliest, as late as the end of the 4th cent. there were only two corporate daily seasons of worship, evening and morning. At Antioch we hear that c. 350 Bishop Leontius 'brought the congregations collected by the ascetics Flavian and Diodorus in the cemetery chapels, into the city churches,' and so introduced antiphonal singing, by two opposite choirs, into wider use. Here we seem to have a clear case of the transition from the daily corporate worship of ascetics, as a special class, to that of the Church under its clergy, of which Etheria, the female pilgrim to Eastern centres of devotion c. 385, affords us evidence at a rather later stage. Describing the public services in Jerusalem, she mentions matin hymns at dawn (=hour of rising, in the foregoing), the sixth (*sext*), and ninth (*none*) hours, vespers ('lighting-up' hour); to which the third (*terce*) was added in Lent. There was also an early vigil from cock-crow to dawn kept by 'all monks and virgins,' and by some lay-folk also. Of course the devotions at the central holy place of Christendom were more generally attended than elsewhere and more elaborate in form, including already four daily services at least. But the account gives us clear insight into the way in which worship became more specialized and developed. And by a good deal of evidence from the last quarter of the century we can 'fix the period A.D. 350-375 as that of the introduction of daily public evening and morning prayers into the Eastern Church, followed a few years later by that of Milan.'¹

As regards forms of devotion dating from the 4th cent., neither the morning hymn (*Gloria in excelsis*) nor the evening one,² for instance, seems then to belong to public service. The former appears in varied contexts (e.g., after the Biblical Canticles or 'Odes' in the *Codex Alex.*); and in the Eastern Church it is part of the Daily Office (Lauds), while in the Western it is in the Mass—whither most prized forms tended to gravitate. Once, however, both perhaps were part of the worship of an ascetic community. The evening

hymn, like another vesper hymn, 'Hail, gladdening light' (*φῶς λαμπρὸν*), referred to by St. Basil¹ as already ancient, may originally have been a thanksgiving 'at the lighting of the lamps' either in the home or at an Agape,² passing later into use among ascetics, like the table-prayers of the *Didache* into *de Virg.* xiii. In this last the *Gloria* is part of the virgin's praise 'towards dawn.'³ Closely connected in feeling and ideas with the *Gloria*, and perhaps with its fellow vesper hymn (*Te decet laus*), is the best known Latin hymn, the *Te Deum*, now traced to Nicetas of Remesiana, who as living on the road between the East and West would naturally feel the influence of Greek models. Nicetas in his works 'On Vigils' and 'On the good of Psalmody' illustrates further the similarity of ideals of private and corporate devotional hours in East and West c. A.D. 400;⁴ and he was one of the pioneers of the newer feeling which allowed hymns other than those in Scripture, the Psalter above all, to form part of corporate Christian worship, though the prejudice against this died hard.⁵ The authority of St. Ambrose, who himself wrote hymns for public worship, had no doubt great influence. The musical difficulty to their more general use was a real one. It was in monastic circles, then, that hymns proper took real root, and from their daily offices passed in the later Middle Ages into the Breviary of the ordinary clergy. The early Celtic monks in particular were active in the use and production of hymns; and from the 12th cent. onwards we can trace the periods of fresh revival in monastic religion by this spontaneous form of devotional expression—e.g., in 'Jesus, the very thought of Thee,' *Dies Ira* (by the Franciscan, Thomas of Celano), and the eucharistic hymns of St. Thomas Aquinas.⁶ The Church of Rome did not adopt daily services so early as the N. Italian and Gallican Churches, under the influence of Eastern monastic practice, carried thither by a number of pilgrims and others from those regions, such as Hilary in the middle of the 4th cent. and Cassian of South Gaul towards its end. Rome was always conservative in usages, as appears most clearly in its manner of reciting the Psalms, which were the staple of worship other than prayer. The Eastern form was antiphonal singing between two choirs, a method which took definite shape at Antioch about 350, and spread westwards rapidly—through Cappadocia, Constantinople, Milan. In Rome, as also in Africa, the old 'plain song'—with its simpler style of music—continued longer to prevail, probably seeming to the Roman mind, as to Augustine, to be 'better adapted to the sober gravity of Divine worship.'⁷ Yet the practical advantages of the new system, especially as 'winning weaker brethren to devotion by the delight which it ministered to the ear,' were manifest; and ere Augustine's death in 430 the change in Rome had begun to act, though it took effect only gradually.⁸ Similarly as regards daily church services 'the recitation of the Cockerow and Matins office does not appear to have been binding on the clergy, as distinct from monks and nuns, till the sixth century (perhaps under Pope Hormisdas, 514-523); and Vespers was made an obligation still later.'⁹ In Gaul and Spain matins and vespers had taken general root rather earlier; while a civil law of Justinian also decreed that all clergy attached to

a church should sing Vespers, Matins, and Lauds themselves, and not leave the duty to others. Almost contemporary with it was the issue of the famous Rule of St. Benedict (c. A. D. 529), which prescribed the use of 'the complete circle of eight "hours" for monks which is the foundation of the Breviary.' These hours were much the same as the six of Syrian ascetics in the 4th cent., completed at its close in Jerome's Bethlehem monastery by a supplemental matins, between lauds at dawn and the third hour (to which prime in the West came to correspond), together with compline (*completorium*) before retiring to rest. The last was added by Benedict himself, who dropped the midnight hour, so as to give his monks a longer period of unbroken sleep, and placed matins about 2 a.m.¹

4. Mediæval worship.—In the main mediæval worship, alike as piety and as cultus, shows simply the working out and adaptation of the traditional cultus to new conditions, created by the break-up of the Roman Empire and its civilization. This meant the flooding of the Church with crude fresh types of humanity, each with its religious bias and customs, largely superstitious, and so fostered those elements in the Church of the Empire which were farthest from primitive piety and cultus, as fundamentally Hebraic. Hence it is the element which Catholic worship owed to other sources than the Biblical—as already described or alluded to—that increasingly distinguishes its mediæval phase, both in the East and in the West.

In the East the hieratic and mystic tendencies, the latter parallel to and influenced by the rise and spread of Neo-Platonism, as a religion as well as a philosophy, are most marked. Particularly was this so in what we may call 'Byzantine' piety, as distinct from various national types of Oriental Christianity, comparatively unaffected by Greek influence. But in all the eucharistic service was essentially a divine drama or 'mystery,' appealing to the emotions through the senses, with the idea of the mystic sacrifice at its heart. The notion of the parallelism between the worship of heaven and of earth, of the celestial hierarchy and the terrestrial, was worked out elaborately and with surprising literalism. It finds its typical expression in the pseudo-Dionysius, through whom it also exercised a deep influence on the more practical and ethical genius of Western, particularly Latin, worship. In both, too, worship, so far as expressed in cultus, becomes more vicarious and sacerdotal, less congregational, in character. The connexion between priest and people, especially in the East—where the cultus went on in the sanctuary or altar-area, largely out of the people's sight—becomes a more formal one; worship is less corporate, less an active participation of all, with mind and voice, in common acts of spiritual and moral communion with the Christ of the Gospels, and through Him with the God unto whom and with whom all life is to be lived in harmony of will.

A special note of mediæval worship, inherited from this later patristic age, was the sense of sins calling for the constant 'propitiation' of God. This was to be achieved partly through special good works (such as alms of all sorts, and various mortifying exercises of penance), often prescribed by the priest through whom absolution was looked for, and partly by private eucharistic oblations or 'votive masses' offered in the donor's name in special services. Parallel with this went a development of purely clerical masses, without lay participants, which in the 7th cent. produced that contradiction in terms, according to primitive ideas

of eucharistic worship, 'private masses.' In these the priest administered communion to himself alone. No doubt this unsocial type of cultus was condoned as being ideally corporate in spirit, the priest acting in intention as a member of the whole Church, in its name and as pleading for its welfare. But one result at least of such purely vicarious masses, together with the celebration of several masses by the same priest on the same day (10th cent. onwards), was natural; viz. a concomitant decrease in lay participation. The Church had to be content with two or three communions a year on the part of ordinary Christians; and many communicated once only in the year.¹

As regards 'hours' services, the new impulse given by Benedict led to 'the erection of monastic communities in connexion with the parishes (*tituli*) of Rome,' which 'supplied the parish churches with clergy at liberty to conduct the daily offices, and qualified by their training in music to do so.'² Thus, soon, terce, sext, and none were sung in the Roman churches, and before 800 prime and vespers also. These early Roman offices became, through the abbot Augustine and others, the basis of English mediæval breviaries. Attempts were made, too, as time went on, to extend the 'hours' services to parish churches and get the laity to attend (witness the English names of such services). But for the most part the 'hours' proper remained a monastic or at least clerical form of service throughout the Middle Ages; and in England, owing to historical conditions which effaced the older type of non-Roman Christianity, they were virtually Roman 'offices' or dutiful acts of divine worship. Yet they contained some Gallican elements, especially before the Norman Conquest; and after it these survived in the distinct Uses of the great dioceses, of which that of Salisbury (Sarum) was the chief. Through its influence, in particular, there set in also in the latter part of the Middle Ages a tendency towards a uniform English Use.

Rise of the 'Breviary.'—Ever since the 'hours' services had been adopted, the mass of fixed forms of devotion—psalms, prayer, lessons (not only Biblical, but also *Legenda* from patristic sermons and expositions and from the Acts of the Saints)—had grown to ever greater dimensions. The process of its simplification and unification in one service-book, instead of several, first appears in England about the 11th cent., in the Breviary (*Brev. sive Ordo Officiorum*) or *Portiforium*, i.e. the book 'carried' by the priest when he went 'abroad,' the latter being a smaller and more portable form of the former. It was the Breviary, then, that formed the basis of the first efforts of those who early in the Protestant reformation of worship, as of Christian religion generally, tried to bring back its public forms to primitive and purer models. But an experiment in the way of a reformed Breviary on Catholic lines was also made in 1535 by Cardinal Quignon, general of the Franciscan Order in Spain. Much was omitted as superfluous, and a simplification all round, amounting to a revolution in effect, was carried out. It and its preface greatly influenced Cranmer's first Book of Common Prayer. But Cranmer's purpose was far more radical, viz. 'to produce not merely a good manual of devotion for the clergy, but a Book of Common Prayer'³ for all Christians, learned and unlearned, if only they could read their mother tongue.

Transition to the new order.—The old service-books were for the use of the clergy and 'the religious': the layman had only the 'little Office,'

¹ For the Benedictine Rule, as for types of monastic piety generally, see art. MONASTICISM.

¹ Funk, *Manual of Church History*, i. 315.

² Swete, p. 43.

³ *Ib.* p. 69.

whether the Latin *Horæ*¹ or the English *Primer* based on it in the late Middle Ages. But the English Prayer Book became the layman's manual, as well as the clergy's, alike in church and in private use. Cramer compiled it on the basis of the Sarum Breviary in particular, but in the light of principles of religion and worship drawn direct from the NT itself, with the aid of patristic precedent. Thus 'Whitsunday, June 9, 1549, witnessed the beginning of a new era in the public worship of the English Church,'² an era already inaugurated in most of the other countries which had gained a new sense of what the Christian 'gospel' was, and what sort of worship best befitted its nature.

In all of these the vital change took place that forms of worship were in a language 'understanded of the people.' This meant an enormous gain in spiritual reality, especially as their Biblical language and allusions could now be interpreted by and fitted into the regular reading of Scripture. The poverty of Scriptural background, and indeed the scarcity of 'the Word' of God in piety and worship, even in the later Middle Ages, when a certain amount of preaching existed in parts of the Church, is hard for us to realize to-day.

Cultus rites and ceremonies, as such, so predominated over the inward element or meaning, or 'faith' in the NT sense (esp. Ro 14^{22c}), that average mediæval worship was psychologically legal rather than filial in type. It was in fact such as Christ criticized in current Judaism, and Paul censured as persisting among Christians at Colosse (Col 2^{16 33}). Religion was statutory in nature and spirit, a being 'subject to ordinances' in daily life and in church, 'after the precepts and instructions of men.' Men were 'judged in meat or drink, or in respect of a feast day'—or a fast day or a saint's day—'which are a shadow of things to come.' Of course the mass alike of clergy and laity were not fit, as things were, for a NT type of worship, because those 'ages of Faith' had not the type of faith to which that belonged. This fact had historic causes, some of which have been indicated. But none the less such cultus, and such spiritually passive and unenlightened worship, represented no normal advance, save in the education of æsthetic and emotional sensibility to the divine, as majestic and mysterious in its nature and ways, with which it affected certain souls. Nor on these lines, from which the official Church through the papacy refused to depart, was there any promise of return to truer continuity with principles and methods of spiritual worship at the first.

It was small wonder, then, if, worshipping with but little direct aid from the NT and its distinctive spirit, mediæval piety was full of 'the spirit of bondage again unto fear,' and sadly devoid of 'the spirit of adoption whereby we cry Abba, Father.' This appears most vividly from many examples of the religious art which was used as an aid to worship.³ But it was implied also in the elaborate system of mediators, both on earth and in the invisible world—patron saints and the saints at large, with the Mother of Jesus at their head—whose aid was felt needful to supplement the too exalted or remote help, or even to placate the too severe judgment, not only of God the Father but also of Jesus, the 'One mediator of God and man, himself man.' Nor was the element of fear—the fear of mystified minds, as well as of consciences not fully appeased by the Church's rites of penance and absolution that were a large part of the mediæval sacramental system—absent from the sense of mystery with which the central sacrament of worship, Christ's very Body and Blood, present in an inconceivably real sense⁴ in the transub-

¹ Besides the canonical hours the mediæval Church observed hours in honour of the Blessed Virgin Mary, known as the "little office." Originally "a monastic devotion," in 1095 it was made binding on the secular clergy, and eventually became popular with the laity. "Other devotional matter gathered round the Hours of the Virgin," and the Sarum *Horæ B.V.M.* had its calendar of saints, its penitential psalms, litany, and especially vigils of the dead. "In this fuller form the *Horæ* became the prayer-book of the educated laity" (Swete, p. 212 f.).

stantiated bread offered to God anew as 'the Host,' and eaten for the benefit of body and soul, was regarded by all mediæval Christians.

Finally, participation in the Church's cultus was largely viewed as of value *per se*, like sacraments on the *opus operatum* theory, and as a meritorious work before God, rather than a specially direct and effective mode of attaining spiritual fellowship with God, as the soul's supreme good. A radical revival of the original Christian spirit of faith was vitally needful to a new birth of worship, on lines which could lead to the development of a cultus more suited to the growing spiritual maturity of humanity at large. This needed a system of worship which could first stimulate and educate it in certain directions, and then by gradual modification of the traditional forms make available (for the adherents both of the old and of the new types of Christian piety) the elements of positive value latent in the historical forms of continuous Catholicism.

5. Protestant worship.—(i.) IN GENERAL.—The intimate connexion between the kind of religious faith and the worship which expresses it is nowhere clearer than in the change which passed over cultus as a result of the Protestant Reformation. The new experience of saving faith, with its correlative doctrine of grace (*g.v.*), summed up in the twin ideas, justification by faith and the priesthood of all believers, made itself manifest in the sphere of religious feeling to which worship belongs. The sense of assured access to God on the part of Christians, as children reconciled and accepted in His beloved Son, Jesus Christ, brought into worship a fresh note of glad thanksgiving. This ran through all, at first even the confession of sins (as of children in a family, rather than of debtors or law-breakers before a judge—the prevalent mediæval conception), and particularly the Communion of the Lord's Supper. This was now viewed primarily as a memorial but efficacious pledge, both on God's part and on man's, of the abiding covenant relation of forgiveness and grace brought about by Christ crucified, which it 'sealed' anew by a sacramental or sensibly expressed act, and at the same time strengthened. There was generally no thought of this most sacred act of worship being a 'bare sign' of the spiritual relations which its forms suggested, those of vital communion with God in Christ, and with fellow-members of His mystical Body, the Church. But there was a definite setting aside of the notions specially marking the 'old religion' (as mediæval Catholicism was often called). These were (1) that consecration effected change in the elements themselves (transubstantiation); and (2) that the changed elements were 'offered' as a 'propitiatory sacrifice for living and dead' by the action of the celebrant, viewed as having a supernatural power as 'priest' in virtue of the sacrament of 'orders.' Thus the ritual of the Mass was generally felt by Protestants of all types to involve non-Scriptural, and therefore un-evangelic, ideas of the nature and means of the Christian salvation.

Accordingly, after attempts to retain some of the forms and formulas still dear to many by use and sentiment, both in Lutheranism and in Anglicanism (here the contrast between the First and Second Prayer Books of Edward VI. is most significant), the ritual effects of the new conscience about making NT teaching and precedent sovereign at any cost were accepted in all Protestant communions. The Holy Communion of the Lord's Table replaced the Mass and its distinctive worship.

The retention of old forms for the expression of the new type of faith was pushed to the furthest point of compromise in the Elizabethan Prayer Book, particularly in its juxtaposition of the formulas of administration characteristic of each of the two

Edwardine editions. But the Articles of Religion, which define the distinctive beliefs of the Anglican Communion, as the Augsburg and other Confessions do those of other Protestant types, make plain the official sense in which these and other formulas were to be taken. See Article xxii. in particular.

Here the experimental cast of the new Anglican formula of administration, framed in 1552, is noteworthy, as well as the declaratory form of the words of absolution. Further the preaching of the Word now held a central place, if not the central one, in the whole service among Protestants. This brings us to the chief difference between Catholic and Protestant worship, viz. their respective emphasis on Word and Sacrament. For Catholicism, with its notion of grace as secretly infused participation in the divine nature, particularly as embodied in Christ's flesh and blood, emphasis falls on the sacrament of the Mass. For Protestantism, which conceives grace as the working of the Holy Spirit mediated primarily through the Word or uttered mind and will of God—the proper object of faith—it falls rather on preaching (*q.v.*); it is the means of grace which conditions the efficacy of all others, and prompts the worship that faith is helped by them to render to God. Even as regards the sacrament of the Lord's Supper, its Protestant form places the rite in a setting of the Word, partly by appropriate Scripture reading, partly by the communion address usual in non-Episcopal communions. Through the latter it is brought in idea within the scope of the 'prophetic' ministry of the Word, to which belongs also the prayer of thanksgiving where there is no fixed liturgy but it is left, as at the beginning, to the prophet 'to give thanks as much as he will.'¹ The Holy Communion being in fact, like other sacraments, 'a visible word' (to use Augustine's phrase), it speaks to the heart by the inward working of the Holy Spirit—the real agent in all grace, and especially in that faith of which other forms of grace are modes—whether mystically, by direct personal appeal through its symbolism, or by reflective unfolding of its meaning by ministry of the Word.

Protestantism, besides its emphasis on Word rather than Sacrament as means of communion with God, and in keeping with its idea of salvation by faith and not by deeds of 'merit' (rendered possible by sacramental grace), regards worship not as a meritorious action or 'service' (*νεουργία*) to God, but rather in the light of realized fellowship with God through Christ, as of children with a father.

In worship God's perfections, especially His goodness, are simply answered by the homage of the heart's adoring and grateful recognition, and increasing conformity of man's will and personality to the divine character is sought after. The genius of Protestant religion, then, being to emphasize the filial consciousness, as making 'all things new' in man's outlook on life, all life becomes in idea a prolonged act of worship, because of filial trust and loyalty. Hence the line between such general worship 'in spirit and in truth,' and special acts of worship or cultus, whether private or corporate, is less marked than on the Catholic view—in virtue largely of the latter's sacerdotal and sacramental conception of the Church and its authoritative rites. Docile performance of the divinely appointed forms of cultus, in implicit reliance on Church authority, apart from personal consciousness of their effects in edification, is on the latter view 'meritorious' and will have its reward in divine blessing.

Another feature characteristic of the Protestant form of worship,² one expressive of its concern for

the active participation of the whole congregation, with a faith fully conscious of its proper objects of adoration, is vernacular singing, whether of psalms or of other forms of devotion. Here a mode of worship which in mediæval Catholicism had been confined to the few, particularly those separated by vows to a specialized 'religious' life, was made part of common worship for all.¹ In this Luther and Lutheranism² took the lead, using every form of singing, and all available musical aids, while the Calvinistic branch of reformed religion for long held strictly to Scriptural models, the Psalter in particular. This leads to the consideration of the several species within the common Protestant or Evangelical genus of worship.

(ii.) SPECIFIC TYPES.—The difference, especially in emphasis, between Catholic and Protestant worship is great, as was fully realized by the early Protestants, who had themselves lived first under the one and then under the other. But the degree to which the forms of cultus developed under the one were set aside as alien to the genius of the other, which took as its model the type reflected in the NT, varied with different species of Protestantism (*q.v.*). Among Protestant types Lutheranism and Anglicanism were the most retentive of traditional forms, each in its own way.

(a) *Lutheranism*.—Lutheranism (*q.v.*), in keeping with Luther's personal genius,³ was conservative of the old forms rather than of their informing spirit (which had failed him religiously), save as regards the Holy Communion, where his doctrine of consubstantiation shows much the same mode of conceiving the Real Presence as the traditional Catholic one. Naturally, however, as time went on, the spirit of Lutheran worship prevailed over its forms (even as Melancthon's sacramental doctrine approximated to Calvin's), save in certain local varieties of High Lutheranism. This inherent tendency is reflected in various ways throughout its history, particularly in the eras of Pietism and the Enlightenment (*Aufklärung*), and under the influence of Schleiermacher's recoil from the latter in the direction of giving feeling its proper place in religion. The most concrete instance of this emphasis on the Evangelical core of Lutheran worship was the union between the Lutheran and 'Reformed' (Calvinistic) communions in the Prussian State Church in 1822, with a revised order of worship (the *Agenda*). It is true that the Romantic movement as a whole led to a certain reaction towards older traditional forms (*e.g.*, a revision of the Church Order of 1650 was adopted by Mecklenburg-Schwerin in 1867), but this meant a break with the mind and feeling of the people at large; and more recently Schleiermacher's ideas of cultus as a corporate representation and expression of the religious life of communion with God in Christ, its exact forms being only of relative moment, have gained ground in thoughtful circles.

¹ See art. HYMNS (Modern Christian).

² F. C. Burkitt, in an address on 'The Growth of Christian Hymns' (*Proceedings of the Oxford Soc. of Hist. Theology*, 1907-08), points out that Luther's own part in this matter was less than is commonly supposed. German mediæval Christianity was specially rich in vernacular hymns (both original and from the Latin), and 'all he had to do was to select, to revise, and here and there to recast.' Even his own *Ein feste Burg* is a paraphrase of Ps 46. 'It was the great merit of Luther to recognize the religious value' of vernacular hymnody and to give an impulse to its use and imitation. Conditions were different outside Germany.

³ For Luther's varying attitudes on varying occasions towards cultus in Christian worship 'in spirit and in truth,' and his steady rejection of the statutory notion of cultus, see P. Drews' art. 'Gottesdienst,' in *RGG*, on which also is based what follows on the development of Lutheran worship. For the Lutheran order of Sunday worship see Bersier's art. 'Culte,' in Lichtenberger's *Encyclopédie des Sciences religieuses*, iii.; and, for extracts from Luther himself on cultus, Daniel, *Codex Liturgicus*.

¹ Cf. *Didache*, x. *fin*.

² The hymn-singing of the 'Lollards' was personal rather than in public worship, but illustrates the tendency of fresh personal religion to break into song.

(b) *'Reformed' or Calvinist worship.*—The germ of this type is seen already in Zwingli (*q.v.*), who made the Protestant emphasis on the Word of the gospel rather than its Sacraments determine the order and forms of public worship: such worship, too, was to him only a special mode of the worship of the whole Christian life, and here 'obedience is better than sacrifice' or any formal act of worship. Simplicity, then, in cultus was his practical rule, in the interests of worship 'in spirit and in truth.' Zwingli's influence, however, was soon withdrawn, and was confined to Switzerland save in so far as it was taken up into that of others. Of these Bucer of Strassburg¹ was the chief link in the development between him and Calvin, in whom the 'Reformed,' as distinct from the 'Lutheran,' type of worship took classic shape. Calvin shared his predecessor's suspicion of 'Catholic' cultus as too sensuous in form, leaving the worshippers too purely the subjects of passive impressions and transient emotions, for lack of the interpretative message of the Word, whether of Scripture read in their own tongue or of Scriptural preaching, conceived as a 'prophetic' and expository ministry for adapting and applying, through personal appeal to the conscience and reason, the gospel in all its range to the worshipping people. The traditional cultus, then, failed at the point of spiritual reality, which was the test of true religion for Calvin. Yet there was a true place for the symbolism of cultus and its action on man's complex nature, but one defined and limited by divine gospel ordinance and precedent in Scripture. This alone was binding; what went beyond it could only be justified by strict analogy, and related to minor details such as 'did not matter' in principle (*ἀδιάφορα*), but were only seemly or convenient in changing times and places.

In keeping with these principles, Calvin insisted on the value of congregational singing, as helping the soul to rise into the atmosphere of worship; but he limited the contents of sacred song to the inspired Scriptural models, the Psalter in particular, adapted only verbally to musical melody. Prayer, by the same canons, in order to be as real and close to personal life as possible, both for the minister and for the people, should include prophetic or unprescribed prayer (analogous to the preaching of the Word), as in the primitive Church, as well as forms familiar to all—the people expressing their co-operation in both by the Amen. The preaching of the Word became a central part of public worship on the Lord's Day, while once a month (not oftener, lest it should lose something of its sacredness and preparation of soul by self-examination [1 Co 11²⁶]) the sacrament of the Lord's Supper was added. Before it a confession of faith was made, in the Apostles' Creed, at first sung by the people (in 1545 ed. of *La Forme des prières*, etc.), later as recited by the minister. The simplicity and ceremonial bareness of Calvin's order of worship, deliberately based as it was on Scripture, with its Hebraic forms, was at first made up for by the new realism of the vernacular as used in worship and the new warmth of congregational singing.

In the sphere of private devotion—which dispensed in the main with fixed forms of prayer (save over food)—fasting, for chastening of soul but not as a 'meritorious' work, was practised both on appointed fast days (not the traditional ones of unreformed religion) and at times chosen for personal reasons. The Church Year was set aside, as lacking Scriptural warrant and as having superstitious associations (here Luther's different attitude determined the more conservative practice of Lutheranism as to Church festivals, also as to

¹ See P. Drews, as above.

the crucifix, images, and pictures as devotional aids). The Calvinistic type, with minor variations, came to prevail not only in Switzerland and France but also in parts of Germany, in Holland, in Scotland, and in England among the chief Non-conformist bodies, both Presbyterian and Congregational (including Baptists), while it contributed not a little to the ethos and forms of the Church of England as established by law. Before, however, dealing further with English Christianity, as specially rich in varieties of Church life and worship, reference must be made to the non-established or minority type of worship as represented on the Continent.

(c) *Independent or 'Anabaptist' worship.*—From the nature of the case, the worship of these prescribed groups of radical reformers is hard to describe save in general terms.¹ As based on Scripture, read with strong emphasis on the illumination of the individual believer, it was very simple in form and spontaneous in method, having affinity with and aiming at reproducing the Spirit-prompted fervour and freedom reflected in parts of the Pauline Epistles, at which official religion everywhere looked askance. Free prayer, personal witnessing to God's working in religious experience, 'prophetic' exposition of Scripture in the light of this—in fact the features which marked the early 'Quakers' in England—were its chief characteristics. But, unlike the Quakers, the Continental Anabaptists practised both sacraments, in their own simple way and sense, and (so far as persecution allowed) the singing of praise to God in hymns expressive of their new-found and often deep religious feeling. Among them Luther's principle of 'the freedom of the Christian man,' along with love of the brethren, led to a thoroughgoing exercise of 'the priesthood of all believers,' on the lines of the autonomy of the local group or church—to the great scandal of all legally regulated types of State Church in the various lands—much as was the case later with the 'Separatists' under Elizabeth's system of uniformity in worship in England.²

(d) *Anglicanism.*—While the Elizabethan settlement, no less than Lutheranism, banished mediæval forms savouring of Roman doctrine, especially as to the Mass (not only transubstantiation but also consubstantiation was set aside), there was not the same check upon the return of the older associations of the ritual retained by the conservative and comprehensive policy of the Crown and its advisers that there was in Luther's own influence in Lutheranism. There was besides the extra influence in the same direction of the retention in the one case, and not in the other, of the Catholic order of the episcopate, and that in its mediæval form. Accordingly, although the type and forms of worship in the Elizabethan Prayer Book³ were fundamentally Protestant rather than Catholic (in the opinion of a 'central' Churchman like Jewell, as of Calvin and other 'Reformed' rather than Lutheran Protestants), yet there were in it, as in Luther's Church order of worship, features proper to the standpoint and tone of 'Catholic' rather than 'Evangelical' religion, which were dropped by the types of Protestantism most careful to conform everything to the NT model and ethos.

Among such features was the litany, which, though it marks a great advance on the mediæval examples, and in its form 'is perhaps Cranmer's greatest liturgical triumph,' yet falls decidedly below the filial type of consciousness. This was partly due to its origin. It was not compiled by Cranmer for the Prayer Book at all, but in 1544 for use in a special season of

¹ See art. ANABAPTISM.

² See below, and cf. C. Burrage, *The Early English Dissenters*, 2 vols., Cambridge, 1912.

³ As also in that of 1662; see art. PRAYER, BOOK OF COMMON.

public calamities (like the earliest Western litanies),¹ yet 'was printed also in the Prymer of 1545,' which, like those of the 15th cent., was a book of devotion for lay-people. Thence it passed into the Prayer Book of 1549, with omission of the invocation of the saints. It is natural, then, that its tone is not the normal one for ordinary Christian prayers. It is significant that Luther's litany of 1520, the revision of a mediæval one, and itself a source of Cranmer's, was never part of normal Lutheran worship, but was used only on special occasions; and that the litany was one of the parts of the English rite which the Puritans most objected to as unfitting.

On the whole, then, the amount of traditional language retained in the Prayer Book—particularly its special offices of Baptism, Orders, Visitation of the Sick, etc.—gives no little warrant to those who in later times have gone on a view of its intention not in fact consonant with the Articles, which are of a piece with common Protestant doctrine, e.g., on justification by faith, and with the experiential, rather than *ex opere operato* or Catholic, conception of sacramental grace which went with it. The result of the divergent readings of the Anglican cultus has been a diversity in ritual practice peculiar to Anglicanism among Protestant communions.²

(e) *The Puritans.*—Divergences began with those who, starting from the belief, probably a correct one, that the doctrinal affinities of the Elizabethan settlement of religion were with the Calvinistic type of Protestantism rather than the Lutheran, pressed for greater conformity to its form of worship as more Scriptural. Aiming at making the cultus yet more 'pure' from 'papal' or traditional Catholic ideas, usages, and especially vestments, the English 'Puritans' (*q.v.*) went further even than their foreign friends, who themselves lived under the Presbyterian system, thought necessary. When repressed by the Crown, using the bishops as its agents, many 'Puritans,' like Cartwright and Travers, worked for a Presbyterian Church polity, and issued in 1572 an 'Admonition to Parliament' to this effect.³ Their objections to the rigid and exclusive use of fixed forms of prayer in public worship, their emphasis on 'preaching' of the Word, as distinct from mere fixed Scripture lections (with or without printed homilies), and their rejection of the traditional fasts and festivals of the Church Year, called forth from Richard Hooker (*q.v.*), a 'central' Anglican of the end of Elizabeth's reign, as Jewell had been in its earlier half, a classic defence of the worship of the Prayer Book as then understood. He writes, however, on the basis of essential agreement between the Reformed Churches, including the Anglican, as 'Sacramentarian,' not papal or Lutheran, in their view of the Lord's Supper.⁴ In this he stands in contrast to those who in the next century went to the other extreme from the Puritan tendency in their views of Prayer Book worship, Laud and the High Church or Catholicizing divines often styled 'Caroline.'

(f) *Congregationalism.*—But, while the Puritans as a body remained inside the National Church, until after the Act of Uniformity in 1662, a minority among them gave up, under Elizabeth's coercive policy of ritual uniformity, all hope of further reform and began perforce to worship in semi-private church meetings or congregations. Their ideal of worship appears in R. Browne's *Booke which sheweth the Life and Manners of all True Christians* (1582), in a form which keeps remarkably close in spirit as well as idea to the NT picture of church fellowship in worship. This consists in (1) 'communion of the graces and offices in the Head of the Church, which is Christ,' (2) 'communion of the graces and offices in the Body, which is the Church of Christ,' and (3) 'using the Sacrament of the Lord's Supper, as a seal of this

communion.' In such worship on a definitely Congregational basis,¹ whether their baptismal practice was that of Protestantism at large or that of Anabaptism (*q.v.*), two highly primitive features were recovered, namely, the intimate union in idea of Christian worship and Christian walk, and the place assigned to personal graces of the Spirit in fitting each particular church for corporate fellowship in both spheres of its life of union with God in Christ. These were connected with the Separatists' idea of church membership proper, as conditional on a personal act of 'covenant' with God and His people, whereas in national Churches it was determined merely by infant baptism and catechizing,² supplemented in Calvinism and English Puritanism by 'a godly discipline' meant to ensure a reasonable loyalty in life and worship. When Congregational ideals and forms of worship had lost something of their original reality, they were more than revived in the Society of Friends (*q.v.*), with its characteristic emphasis on 'the inner light' and its reliance on the promptings of the Spirit of God, alike in life and in corporate worship. Here new traits were fellowship in silent adoration and meditation, waiting for the 'moving of the Spirit,' and complete spontaneity of utterance for mutual edification, whether in the reading or quoting of Scripture, exhortation based on it, or in the form of a more direct message of the Spirit or 'inner light.' Negatively Quakerism dispensed with sacraments and even singing in worship. But the latter received an important extension among Nonconformists at large (with whom adherence to the psalms in one form or another had been stricter than among Anglicans) early in the next century, through the hymns of Isaac Watts, written specially for public worship.

(g) *The Evangelical Revival.*—Thereafter in connexion with the Evangelical Revival, both Wesleyan and Calvinist, a greater outburst of hymns and hymn-singing in worship marked the fresh spirit of praise to God which filled men's newly inspired experience of His grace and goodness in Christ. And the like has been true of all revivals of religion, including the Tractarian, down to the revivalism of the latter half of the 19th century.

6. *The present situation.*—In the Evangelical Revival and the succeeding Romantic movement, within both Romanism and Protestantism, religious feeling came again to its rights after the chilling era of rationalism. In Evangelical circles, both in Germany and in England, it appeared mainly in the forms of hymnody and enhanced spontaneity in prayer and preaching; in Catholic and Catholicizing circles it infused fresh earnestness and reality into the ritual and ceremonial aspects of cultus. In Anglicanism in particular it created a zeal for the restoration of 'historic' and 'Catholic' forms, both those allowed by the Prayer Book but fallen into disuse, and others disallowed by it. During the last half-century, moreover, the taste for a 'richer' and more æsthetically suggestive cultus has spread to almost all religious circles in England, and even Scotland, as also in all English-speaking lands. But it remains unassociated for the most part with the specific Catholic and sacerdotal ideas for which ritual was chiefly valued by the leaders of the Oxford Movement and their followers. The fact is that the strong

¹ See art. BROWNISM, CONGREGATIONALISM.

² In the Prayer Book by confirmation also, though it fell into wide disuse (Hooker, *Ecl. Pol.* v. lxxvi. 8) for a time. No reformed Church treated this 'rite or ceremony' (Hooker) as a sacrament, since it lacked Christ's own authority, and Calvinism disallowed it even as a 'profitable ceremony.' Lutheranism, after a period of disuse, like that in England, restored it in a simpler form as a result of Pietism (see art. SACRAMENTS (Lutheran)).

¹ See art. LITANY, §§ 5, 8.

² Cf. art. PROTESTANTISM.

³ See art. PURITANISM, 2 (b).

⁴ *Id.*

recoil from those ideas, especially in their extreme forms, at the eve of the Protestant Reformation led to an undue suspicion of not a few natural forms of symbolism, fitted to express the poetry of the feelings and give appropriate vent and exercise to the mystical side of religious faith, where the reflective expression of the same faith through the spoken word cannot equally secure this, especially for certain temperaments and even for certain moods of most men and women. That recoil has now spent itself, and to-day many are feeling after the proper redressing of the balance of worship long disturbed by historical causes, and are seeking a synthesis of the Protestant or Evangelical emphasis and ethos, on the one hand, and of the Catholic or sacramental, on the other.

The ruling tendency, then, in present-day worship is towards a harmony of the various historic types. These in the past have existed too much as rivals or at least in one-sided self-sufficiency, each as if alone legitimate. Now they are being felt to be all of them but partial embodiments of the possibilities of Christian worship, complementary rather than hostile to one another. They are seen to be methods of meeting the instinctive needs of different types of our manifold human nature, while yet each of us requires, for perfected communion with God and his fellows, a fulfilling on all sides of that nature; and to this end each needs also the help of modes of worship which do not at first come natural to him, but are suited to educate undeveloped capacity. Thus there is abroad a movement towards unity in and through diversity, not only in Church fellowship generally as needful to full Christian unity (cf. the Lambeth Appeal of 1920), but also in the sphere of worship. It is strongest in the younger generation, especially among University and College students, largely through the co-operative, 'interdenominational' spirit of the Student Christian Movement. In the 'give and take' of student life, where personal relationships at close quarters and on the same mental level favour the observation of the similarity of the Christian character fostered by varying modes of cultus, inherited bias least hinders the frank recognition of the strength as well as the limitations of each of these distinct types. Persons are not, as so often in the past, seen through their forms of worship, but these through the persons who practise them. Hence a new and more hopeful, indeed a more reverent, attitude to all such expressions of Christian life.

The result is an ideal of Catholicity in worship that is due, not to lack of personal conviction or preference, but to faith in God and love to all His sincere worshippers. Men conceive of a Catholic worship, within a reunited Church communion, that shall be inclusive of the genius and the more essential methods of 'Catholicism' and 'Evangelicalism,' whether in Orthodox, Roman, or Protestant circles. Historic approximations to a synthesis of such tendencies exist already in Anglican, Old Catholic, Catholic Apostolic (Irvingite) worship, while recently a League of Free Catholics has been formed to work out experiments in this direction. No doubt sure progress will also be gradual. Meantime for all who seek this ideal the master-thought must be, 'Pure worship under the Gospel stands neither in forms nor in the formal misuse of forms,'¹ but in spiritual reality of devotion, evidenced by the fruits of the Spirit in life and character.

WORSHIP (Egyptian).—I. THE DAILY

TEMPLE LITURGY.—I. Its Heliopolitan origin.—

A striking feature of Egyptian temple worship is the fact that the same daily liturgy was celebrated on behalf of every god and goddess throughout the length and breadth of the land.¹ The reason for this uniformity, which seems to have prevailed as far back as the Old Kingdom, is as follows. The daily temple liturgy, as we know it, seems to be derived from that celebrated on behalf of the sun-god at Heliopolis, which city exercised in early times a very far-reaching religious and political influence. To enhance their prestige, therefore, a number of local gods were identified by their priests with the sun-god, of whom the king was regarded as the son. The king was thus also regarded as the son of the gods identified with the sun-god. As pointed out in the art. PRIEST, PRIESTHOOD (Egyptian), II. 2, this idea of sonship would have soon affected the relationship of the king with all divinities, whether male or female. The king was likewise high-priest of the sun-god, and he became high-priest of all the local divinities of Egypt by the same process as that by which he came to be regarded as their son. The local high-

¹ A. Erman, *A Handbook of Egyptian Religion*, Eng. tr., p. 47 f.

¹ Printed Epistle of the Society of Friends in 1835.

priesthoods also, of course, devolved upon the Pharaoh as representative of the centralized government of Egypt, all political and religious functions, which once belonged to the local chiefs, being united in him. Accordingly, as their son and high-priest, the Pharaoh, or his priestly deputy, celebrated the same liturgy on behalf of the local divinities as on behalf of the Heliopolitan sun-god.¹

Heliopolitan influence on Egyptian worship is to be recognized not only in the uniform cult of all divinities, but also in numerous cult-accessories and in the very constitution of the priesthood; furthermore, in the temple structures themselves and the views which the Egyptians entertained about them.

(a) Egyptian temples, certainly in early times² and often later, looked east, so that the rising sun might light up their dark interiors.³ Thus in an inscription on the shrine found by Griffith at El-'Arish we read that 'the face of this temple (*i.e.* of the god Shu) is towards the east wherein Re' rises.'⁴ The Egyptians, indeed, pictured to themselves the sun-god, before all other divinities, as dwelling in every temple, which they accordingly regarded as a miniature heaven.⁵ In texts of the Ptolemaic age, though the idea is probably far older, the two pylon-towers are equated with the two sisters Isis and Nephthys, who, according to one conception, lifted up the sun-god into the sky every morning.⁶ The sanctuary or naos, in which the cultus-image was kept, was not infrequently designated 'heaven' or 'the horizon,'⁷ and a title often borne by the high-priests of Amun of Thebes was 'Opener of the doors of heaven in Elect-of-Places (Karnak).'⁸

(b) Every temple in historic times seems, like the Heliopolitan sun-temple, to have possessed its House of the Morning (*pr-dwt*), in which the Pharaoh underwent lustration before celebrating the daily liturgy.⁹

(c) The sacred pool for purification, a feature of all temples, was associated not with the presiding deity of the temple but with the sun-god.¹⁰

(d) The obelisk which generally stood in front of the pylon was closely associated with the sun-cult.¹¹

(e) The boat-shrine was also probably in the first instance a feature of the sun-cult.¹²

(f) The practice of offering to a divinity the figure of Me'et, righteousness personified, in the daily temple liturgy¹³ must have grown up at Heliopolis;¹⁴ the formula recited at the presentation of the figure is clearly of solar origin.¹⁵

(g) The historic priesthood also displays marks of Heliopolitan influence. The four watches (*shw*), or phyla, of priests bear the names of the four quarters of a ship, which names were also assigned to the four watches into which the crew of the sun-god's heavenly ship were divided.¹⁶ It was evidently the sun-god's priests who were first divided into four watches bearing these names, the sun-god being supposed to traverse the sky in a ship and his priests being therefore regarded as his crew. Even the general term for a priest, *w'eb*, may be Heliopolitan, for *w'eb* means 'pure person,' and purity is a very marked feature of the sun-cult.¹⁷

(h) In many temples the high-priestess was identified with Hathor, the wife of the Heliopolitan sun-god, and in this capacity figured as the wife of the god to whom the temple in which she was high-priestess was dedicated.¹⁸

(i) The sistrum-shaking musician-priestesses,¹⁹ who were attached to every Egyptian temple, and the human concubines, who were assigned to several divinities,²⁰ seem also originally to have been Heliopolitan institutions.²¹

2. Its Osirianization.—As pointed out in the art. PRIEST, PRIESTHOOD (Egyptian), II. 2, the relationship of the king with any god or goddess was, owing to the influence of the Osiris myth, conceived of as that of Horus with Osiris. Accordingly for cult-purposes every divinity came to be regarded as an Osiris, while the king, or his deputy the priest, played the part of Horus. The formulae, therefore, pronounced during the celebration of the originally solar temple liturgy constantly attempt to equate the various episodes composing it with events connected both with the death and resuscitation of Osiris and with the successful conflict of Horus with Seth.¹ But, despite this Osirianization of the rite, many of the formulae still retain clear traces of its solar origin.² Indeed, the Egyptian priests with their characteristic disregard for logic often employed both earlier solar and later Osirian formulae side by side.³ The Osirianization of the daily temple liturgy did not affect its outward form, which remained unchanged and in its main features is clearly solar.⁴

3. The chief officiants.—(1) *Pharaoh*.—With comparatively few exceptions the temple reliefs represent the Pharaoh not only in the capacity of high-priest in the temple services but as sole officiant. In historic times he could seldom have officiated in person, his place of course being taken by one of the priests who were his deputies.⁵

On the occasions when the Pharaoh actually did exercise his high-priestly functions he was conducted to the temple in procession.⁶ At the head of the procession walked the 'pillar of his mother' (*hm-mwt-f*),⁷ burning incense. Immediately in front of the Pharaoh were carried a number of sacred standards, which are said to 'clear the way'⁸ to the temple or to 'drive away what is evil.'⁹ A chief lector might also walk in the procession, 'adoring the god,' *i.e.* reciting hymns in his honour, and thereby 'warding off those hostile to the king.'¹⁰ On reaching the temple precincts the Pharaoh straightway proceeded to the House of the Morning (*i.e.* the temple vestry). Reliefs at Edfu¹¹ and Abydos¹² represent him as being welcomed by the souls of Buto and Nekhen¹³ (the dead predynastic kings of Lower and Upper Egypt), who conduct him into the House of the Morning for the performance of his ceremonial toilet. Here he underwent lustration,¹⁴ and then he was robed, anointed, decked with ornaments, crowned, and invested with royal insignia, and possibly also presented with a repast. He was then ready to enter the temple to officiate.¹⁵

(2) *Priest*.—The ordinary chief officiant at the daily temple liturgy was a prophet¹⁶ (*hm-ntr*), *i.e.* a member of the higher class of the priesthood,¹⁷ or else a great *w'eb*-priest¹⁸ (*w'b*?). All priests and priestesses had to purify themselves before entering upon their course, and while serving had to adopt various precautions in order to avoid ceremonial impurity. They had also, like the

Pharaoh, to undergo purification before entering the temple to officiate.¹

4. The resemblance of the daily temple liturgy to the Pharaoh's ceremonial toilet.—A large part of the daily temple liturgy consists of a series of toilet episodes and closely resembles the ceremonial toilet of the Pharaoh in the House of the Morning. This resemblance is due to the fact that both are based upon the same performance, the supposed daily matutinal lustration of the sun-god—the cultus-image of the sun-god undergoing lustration every day at dawn in the Heliopolitan sun-temple, as the god himself was conceived of as doing in the horizon. That the other toilet episodes of the rite of the House of the Morning, viz. robing, anointing, crowning, etc., had their equivalents in the daily temple liturgy is due to the sun-god being regarded as a king.²

5. The three divisions of the daily temple liturgy.—There are three main divisions of the daily temple liturgy; (1) a series of episodes preliminary to the performance of the divinity's toilet, (2) the actual toilet, and (3) the presentation of food- and drink-offerings.

We know of two editions of the first two divisions of the liturgy. The one, an illustrated edition, is carved on the walls of the chapels of Horsiese, Isis, Osiris-Onnophris, Amun, Atum, and Ptah, in the temple of Sêthos I. at Abydos. It consists of a series of reliefs representing the liturgy being performed, each relief being accompanied by the formula pronounced by the priest while the particular episode depicted was being enacted. The other edition, written for the temple of Amunre' of Karnak,³ is preserved on papyrus no. 3055 of the Berlin Museum and dates from the XXIInd dynasty.

The Abydos and Karnak liturgies are merely different editions of the same portions of the service-book. The formulæ for the toilet episodes are practically identical in both cases, and, when the pre-toilet episodes of the one correspond to those of the other edition, the accompanying formulæ are often either the same or have points in common.⁴

Both these editions are incomplete, but combined they no doubt supply us with a very adequate representation of the pre-toilet and toilet episodes of the daily liturgy in an Egyptian temple (originally the sun-temple), when the ceremonial was fully carried out.⁵

The third division of the liturgy can be fairly satisfactorily reconstructed from numerous representations and formulæ occurring among the reliefs which decorate the walls of the various temples.

There are numerous indications that the temple service-book assumed the form in which we possess it at a very early date, probably not later than the Old Kingdom.⁶

(1) *The pre-toilet episodes.*—Having undergone purification in the water of the sacred pool or tank, the priest entered the temple, reciting a formula as he did so. His first act after entering the temple was to kindle a fire, a bow-drill being used for that purpose, or perhaps only a spindle and 'hearth.'⁷ The priest then picked up the principal part of the censer, which was of metal, usually bronze, and in the form of an outstretched arm with the hand open palm upwards.⁸ Taking hold of the rest of the censer, the little brazier in which the incense was burned, he fixed it in its place, namely in the open hand at the end of the arm. Having filled the brazier with burning charcoal from the fire he had previously kindled, he set incense thereon, and, holding the smoking censer in one hand, proceeded to the sanctuary, the double doors of which were bolted and the bolts secured with a clay seal. The bolts seem often to have been tied with a strip of papyrus to which the clay seal was affixed. The priest broke the seal, drew

back the bolts, and opened the doors of the sanctuary, whereupon the sacred boat was disclosed with the cultus-image enshrined therein.¹

After the unfastening of the seal, and presumably the opening of the doors, the priest sometimes burned incense in honour of the uræus goddess. On beholding the image, the priest made a profound obeisance, 'kissing the ground prone,' as it was said, or 'placing himself upon the belly stretched out flat.' Then, standing or kneeling, he chanted first a hymn in honour of the divinity—lifting up both his hands as he did so in the attitude of worship, or else burning incense—and after that a second hymn in honour of *R'yt*, the female counterpart of the sun-god and identified with *Hathor*. The priest next offered the image scented honey, or a figure of the goddess *M'et*, and then burned more incense. Having swept the floor of the sanctuary with a cloth, he was now ready to 'lay his hands upon the god,' i.e. take the image out of the boat or naos in order to perform its toilet.

(2) *The toilet.*—The priest's first act after 'laying hands upon the god' was apparently to divest the image of the clothing and ornaments in which it had been arrayed the previous day and to remove the pat of scented grease that had been placed on its forehead.² Then, placing the image on a little heap of sand, which he had previously poured out for that purpose, and having fumigated it with incense, he proceeded to sprinkle it with water, first from four *nmst*- and then from four *dšrt*-vessels, or else with water from one so-called '-vessel. He then censured the image again, cleansed its mouth with different kinds of natron, and yet again censured it. Having thus purified the image, he began to dress it, putting on it the white head-cloth and arraying it in white, green, red, and dark red cloths in succession. After decking it with ornaments, he anointed it with unguents and then painted its eyelids with green and black cosmetic. Either immediately before or immediately after this application of unguent and cosmetics the priest invested the image with royal insignia—a diadem, *wš*-sceptre, crook, and whip. The toilet episodes were probably brought to a close with a final burning of incense.³

(3) *The presentation of food- and drink-offerings.*—The procedure observed at the presentation of food- and drink-offerings in the temple liturgy seems to have been practically identical with that observed at the corresponding part of the funerary liturgy. This is indicated among other things by the fact that in the temple reliefs depicting a divinity being fed there is sometimes inserted above the altar or offering-table, and between the divinity and the chief officiant, a so-called list of offerings identical to all intents and purposes with the lists occurring in the tomb reliefs and paintings.⁴ This is only to be expected, since every divinity was regarded for cult-purposes as an Osiris.

Before the offerings could be laid upon it, the table or altar had to be purified.⁵ The act of placing the offerings on the altar or table, or else on mats spread upon the ground, was variously

¹ See H. Schäfer, *Urkunden des ägypt. Altertums*, iii. [Leipzig, 1908] 39. When a stone naos took the place of a boat-shrine, the ceremonies of breaking the seal and withdrawing the bolts would have been performed in connexion with the opening of its doors and not of those of the sanctuary.

⁶ See also Erman, *Handbook*, p. 46.

⁷ See W. S. Blackman, 'The Magical and Ceremonial Uses of Fire,' in *PL* xxvii. [1916] 355-358.

⁸ For a picture of a censer see Erman, *Handbook*, p. 46.

termed 'setting out the repast upon the altar,' 'setting down the divine offering,' 'setting down the repast.'¹ While thus engaged the officiant either stood or knelt.²

The god's meal having been laid before him, two closely connected ceremonies were performed, apparently in immediate succession, the one being variously designated 'presenting the repast,' 'presenting the divine offering,' 'performing the presentation of [or 'causing to be produced'] the divine offering,' and 'performing the presentation to, causing to be produced a great oblation for, NN,'³ and the other being termed 'bringing the god to his repast.'⁴

At the former ceremony the officiant extended his right arm and bent the hand upwards in the prescribed manner⁵ and pronounced the formula beginning with the words 'an offering which the king gives.'⁶ When the king is depicted performing this ceremony, he is often shown holding a mace and staff in his left hand.⁷ The recitation of the formula 'An offering which the king gives, etc.,' was closely associated with, and, on the analogy of the funerary liturgy, was doubtless preceded by, the burning of incense and the pouring out of a libation of water.⁸ At the ceremony of bringing the god to his repast the officiant recited a formula calling (*dw*)⁹ upon the god to come to his bread, beer, roast flesh, etc.¹⁰

Various attitudes might be adopted by the officiant, whether king or priest, while he pronounced the summons. He might stand with right arm and hand extended in the prescribed manner and with left hand hanging at his side, or he might kneel with both hands, palms downwards, held above or beside the knees. Again he might kneel with left hand held in the attitude just mentioned or holding a censer, while with his right hand and arm he made the ritual gesture.¹¹

The act of consecration, by which each item of food and drink was finally¹² made over to the god, was termed 'stretching out the arm four times.' According to the temple reliefs, it was performed in the following manner. The king, standing before what was to be offered, stretched out over or towards it four times the so-called *hry*-baton, which he grasped in his right hand; in his left hand he held staff and mace, or else this hand hung at his side holding the symbol of life.¹³

In the series of temple reliefs depicting the god being fed is one representing the king in the act of 'elevating' (*f*!) a tray of offerings 'before the face' of the divinity.¹⁴ Does this scene represent one special episode in this part of the liturgy; *i.e.*, after the pronouncement of 'An offering which the king gives, etc.' was a specimen of the offering elevated in the presence of the cultus-image? More probably the scene is a summarization of a series of elevations; for doubtless, as in the

¹ *E.g.*, Mariette, *Abydos*, i. pls. 33c, 40c, 50; Lepsius, iii. 67a; Naville, i. pl. xxi.

² *Locc. cit.*

⁴ *E.g.*, Mariette, *Abydos*, i. pls. 37b, 40a.

⁵ Sethe, *Urkunden*, iv. 28, line 17.

⁶ That this suggestion is correct is indicated by the scene at Luxor described below, 6 (4), and also by the fact that the formula is closely associated with the ritual stretching out of the arm and the bending upwards of the hand (see Sethe, *loc. cit.*).

¹⁴ *E.g.*, Mariette, *Abydos*, i. pl. 47a, *Denderah*, l. pl. 65b, ii. pl. 13a.

funerary liturgy, each particular item of food mentioned in the list of food- and drink-offerings was elevated at its presentation to the accompaniment of a special formula. In the funerary liturgy, according to Utterances 108-171 of the *Pyramid Texts*,¹ each item was elevated four times.

In addition to the meal laid out before the image of the principal divinity in the sanctuary and before the images of the co-templar divinities in the adjacent chambers, offerings were also laid, of course, upon the great altar in the forecourt. If the procedure in the temple of the Aton at El-Amarna prevailed also in other Egyptian temples,² it was upon this altar that the Pharaoh mostly laid his oblations.

(4) *The removal of the footprints.*—The final act of the chief officiant before leaving the sanctuary, shutting the doors, and affixing the clay seal to the bolts, was to obliterate all traces of his own and his assistant's footprints. This he did by sweeping the floor with a cloth or with a besom made of twigs of the *kîdm*-plant.³ In the sanctuary of the temple of Derr, on either side of the door, is a representation of Ramesses II. holding a cloth for sweeping the floor in one hand and a vase (for sprinkling it?) in the other.⁴

6. The functions of the assistant officiants.—The ordinary schematic representations of the various episodes convey the impression that only one officiant, the king, or a priest acting as his deputy, took part in the celebration of the daily temple liturgy. Inscriptions and a few quite exceptionally detailed reliefs, however, show that in addition to the celebrant a number of other officiants participated in all these ceremonies. The ritual was no doubt particularly elaborate when the Pharaoh himself was celebrant.

(1) A scene in the temple of Luxor depicts in some detail the presentation of the cloths used for Amunré's ceremonial toilet. After the burning of incense, the episode immediately preceding the arraying of the image in the royal head-cloth (*nms*), there enters the sanctuary a long procession of priests bearing chests containing the cloths in question, with members of the higher class of the priesthood, the fathers of the god, walking at their head. Some of the latter carry smoking censers and libation- or lustration-vessels, while others clap their hands and sing, one of them rattling a sistrum. Bringing up the rear of the procession is the king, with 'the god's adorer, the god's hand' (the high-priestess of Amunré)⁵ walking in front of him. The king holds out the *hry*-baton and is said to be 'extending the arm four times,' *i.e.* consecrating the offering. But he also forms part of the procession, for between him and the high-priestess are the words 'bringing clothing.' We have here, pictorially combined in one, what were really two distinct actions, namely the procession of priests, accompanied by the king and high-priestess, conveying the clothing into the sanctuary, and the consecration of that clothing by the king assisted by the high-priestess, who either sang a hymn or chanted some formula.⁶

(2) A number of jars of unguent, which another Luxor⁷ relief represents the king as consecrating, have been solemnly brought in procession by ten priests.

(3) Another relief in the same temple⁸ shows a procession of twenty-eight priests bearing a number of ewers of water, to be used for such purposes as the washing of the altar, the pouring out of the libation before the bringing of the food-offering,⁹ and for various drink-offerings.¹⁰ At the end of the procession walks the king. The theory of the ritual demanded that the king should draw the water himself, come running¹¹ with it into the sanctuary, as he is depicted doing in the adjacent

relief,¹ and then pour it out as a libation.² The two vessels which ancient custom prescribed the king should bear did not, of course, contain sufficient water for the elaborate rites of the historic periods. Accordingly the king's running with the water was in practice merely a symbolic act whereby he secured to himself the rôle of sole offerer of the water, whereas nearly the whole of the water actually used was brought in by the priests in a large number of vessels.³

(4) Yet another relief at Luxor,⁴ depicting the presentation of food-offerings to Amün and the co-temple divinities, gives one a good idea of the important rôles played by priests even when the king was celebrant. The king appears merely to be presiding during a considerable part of the performance. He stands holding a staff in his left and a mace in his right hand and is said to be 'viewing the presentation' of offerings. Facing the king and at some distance from him are four officiants, one of whom holds some indefinable object (perhaps a libation-vessel?). The other three with right arm extended and hand bent upwards are 'making the offering which the king gives.' Immediately in front of and facing the same way as the king stands another priest—a *sem*, or 'pillar of his mother'—accompanied by the high-priestess of Amün, 'the god's adorer and god's hand.' This priest, whose right arm and hand are held out like those of the three above-mentioned officiants, is engaged in summoning the divinities to their repast: 'Come ye to this your bread, to your roast meat of the evening meal, which your son Amenophis . . . has given you.' The high-priestess's hand is raised in adoration, palm outwards, and she is doubtless repeating simultaneously with her companion the formula of summoning the gods. In an adjacent relief⁵ the king is seen with uplifted baton consecrating—'extending his arm four times' towards—the repast to which the gods had just been bidden.

7. Music.—Musician priestesses were attached to every temple, and male musicians and dancers also took part in the temple services.⁶ The temple musicians of both sexes played a particularly important rôle in festival services and in the processions which were a special feature of these celebrations.⁷ There is some reason for supposing that at Thebes and elsewhere, on the occasion of the annual festival of Hathor, that goddess's priestesses, when the temple service and the subsequent procession were ended, paraded the streets and, in company with the *ihwey*-priests, stopped at one house after another in order to bestow Hathor's blessing upon the inmates. This they did by dancing and singing and holding out to their audience—perhaps that they might touch them—the emblems of their goddess, the sistra and *mnit*-necklaces.⁸

It should be pointed out here that the rattling of the sistrum was supposed to keep at a distance what was evil or inimical to the gods.⁹

8. The object of official worship.—The whole object of official worship, as represented in the temple reliefs, was to obtain the favour of the divinities for the Pharaoh. In return for the offerings which he presents to them they promise him victory, gladness, life, stability, health, good fortune, abundance, millions of years, the duration of Rē, an eternity of jubilees, etc. The very temples of the gods were erected by the king that he might receive in return the 'duration of heaven,'¹⁰ 'hundreds of thousands of years,'¹¹ and that he might 'be granted eternity as king.'¹² Thus the designation of every ritual act, 'giving [var. doing] this or that to [for] his father [var. mother] NN,' is followed by the words 'in order that he may make an 'Endowed-with-life''¹³ like Rē forever,' the 'Endowed-with-life' being of course the king himself.

II. PRIVATE WORSHIP.—We know very little about private worship. The individual citizen, we are told, refrained from what his local god hated,¹ avoided his wrath by joining in the celebration of his festivals,² and cared for the local sacred animals.³ In some houses, if Mariette's account of excavations at Abydos is to be trusted, the innermost room served as a private chapel, in which was kept the image of a divinity, offering being made to it on a stone offering-table placed before it. Here, Erman supposes, the householder made his daily adoration.⁴ A man would erect a shrine to Ernütet, the harvest-goddess, in the yard of his granary,⁵ or near his wine-press,⁶ or he might, it would seem, set aside for his god a portion of his meal, placing it on an offering-stand prepared for that purpose.⁷ To prosper his work the scribe, before he began to write, poured out from his water-bowl a libation to Imhotpe, the patron-divinity of scribes.⁸ The ordinary citizen might be seen praying outside the great pylon of a temple, after having, perhaps, placed a gift for the god on an offering-table set up there to receive the contributions of humble folk.⁹ The middle Kingdom citizens of Asyüt offered the first-fruits of the harvest to their local god Upwawet.¹⁰ Theban landowners, or officials responsible for the harvest on temple- or crown-property, and no doubt the ordinary peasants as well, made offering to Amün and the harvest-goddess Ernütet on the twenty-seventh day of the fourth month of Pröyet, *i.e.* the first day of the harvest festival. Also on the last day of that festival, the first day of the first month of Shömu, the day the corn was winnowed, offering was made to Ernütet.¹¹ On the last-named day the winnowers, ere they began their work, set up on the edge of the threshing-floor a rude figure of a harvest-divinity, apparently made out of a bundle of corn furnished with mud hands which grasp ears of corn. Before it they laid an offering consisting of dishes of food and a pot of water or beer.¹² On the analogy of harvest practices in other lands, may we not suppose that this 'divinity' is the first or last sheaf, the embodiment of the corn-spirit?¹³

III. UNUSUAL POPULAR CONCEPTIONS OF WORSHIP.—Remarkable ideas about worship and man's relation to the gods were current among the middle and lower classes during the latter part of the New Kingdom—ideas which do not seem to have existed hitherto among the Egyptians and are not met with again till Christian times.

'To the sanctuary of God,' we are told, 'clamour is abhorrent. Pray to him with a loving heart whose words are all hidden; so will he grant thy request, hear what thou sayest, and accept thine offering.'¹⁴ Similarly a hymn to Thöth of this date likens that god to a well in the desert which is 'closed for those who

speak there and open for those who keep silence there. When the silent man cometh he findeth the spring.¹

IV. *THE ATON-CULT OF KING AMENOPHIS IV. ('OKHNATŌN).*—The liturgy celebrated in the temple or temples² erected by the heretic king 'Okhnatōn at El-Amarna differs in so many ways from the temple liturgy of the preceding and succeeding periods that it must receive separate treatment. For the beliefs responsible for these differences see Erman, *Handbook*, p. 62 ff.; Breasted, *Development of Religion and Thought*, pp. 319-345.

1. *The daily liturgy in the temple of the Aton.*—There was no cultus-image of the Aton, and so all the toilet and pre-toilet ceremonies of the old temple liturgy were done away with. The worship of the Aton consisted mainly in the singing of hymns and presentation of food- and drink-offerings, of perfumes and flowers. The ritual acts, however, accompanying the presentation of these offerings were those of the old worship, the only difference visible in the representations of the various ceremonies being that the queen is shown acting in exactly the same capacity as the king.

As in the case of the old temple liturgy, the presentation of food- and drink-offerings was closely associated with the burning of incense and the pouring out of libation,³ and the offerings were consecrated by the stretching out of the *hrrp*-baton.⁴ The practice of elevating trays of offerings was also continued.⁵ As there was no cultus-image to anoint, unguent was held up to the Aton in alabaster jars and then placed on the altar.⁶ The offering of unguent was evidently preceded by the burning of incense.⁷

It is possible that the offering of flowers was a more important feature in the Aton-cult than in the worship of the old Egyptian divinities, though they are constantly depicted as receiving a bouquet from the Pharaoh,⁸ while their heaped-up food-offerings were regularly surmounted by a bunch of flowers.⁹

The El-Amarna reliefs permit us to reconstruct to some extent the sequence of episodes in the liturgy celebrated in the larger or outer temple.

(i.) When the king and queen came to this temple, their first act, according to a scene in the tomb-chapel of the high-priest Merirē,¹⁰ was to make each an oblation at offering-stands set up in front of the pylon. After the burning of incense and the pouring out of a libation—the attendant high-priest is depicted bowing low and holding the censer and vase that have just been used for that purpose—the king and queen consecrated their gifts by extending over them the *hrrp*-baton. During this performance the royal daughters rattled their sistra, and the attendant courtiers stood at a respectful distance bowing low with hands on knees.

(ii.) Having passed through the pylon, the king and queen, as we learn from a relief in the tomb-chapel of Panehesi,¹¹ proceeded to mount the steps to the high altar in the first court. On this altar a great oblation of joints of meat, poultry, vegetables, and bouquets of flowers was laid, and there was set on top of all three open pans of burning

incense. The relief in question depicts the royal officiants in the act of scattering incense into these pans. One of their daughters stands near and holds out two bowls of incense to her parents, and the other two daughters rattle sistra. In front of the altar, facing the king and making profound obeisance, are the high-priest and the 'chief servitor of Aton.' The former, and probably the latter also, holds a bouquet of flowers—perhaps for the king to present after he has burned incense. Behind these two priests are four other priests in the same respectful attitude, each holding a round vessel containing liquid of some kind. Beside these again are four chanters, also bowing low and accompanying their singing with hand-clapping. The rest of the royal retinue remains in the entrance or outer court, or else altogether outside the temple precincts.

(iii.) While the king and queen were thus officiating at the high altar, priests placed offerings upon the altars in the outer court.¹ A relief in the tomb-chapel of Aḥmōse² also shows priests attending to the offering-tables, in this case in the outer court of the smaller temple, just before the arrival of the royal party.

(iv.) A visit of 'Okhnatōn to the temple was the occasion for the sacrifice of numerous oxen. The victims, beplumed and garlanded, were led straight to the slaughter-house,³ or else to meet the royal cortège as it drew up at the temple-entrance.⁴

2. *The functions of musicians in the Aton-cult.*—(a) *Sistrum-players.*—While the king and queen burned incense, poured out libation, presented unguent, flowers, food- and drink-offerings, raised their hands in adoration before the altar, or performed the ceremony of consecration with outstretched *hrrp*-baton, the royal daughters rattled their sistra.⁵

(b) *Temple choir.*—A body of blind vocalists accompanied by a blind harpist and sometimes by a lute-player, also blind, performed in the outer court or enclosure of the smaller temple.⁶ An inscription in the tomb-chapel of Merirē speaks of 'the singers and musicians . . . in the court of the House of the Benben . . . in Ikhtaton.'⁷ The choir evidently sang and played off and on during the whole day, for they are depicted thus engaged both during and outside of the performance of the liturgy.⁸

(c) *Male chanters.*—Four chanters also figured in the Aton-worship. They are twice depicted singing and clapping their hands while the king and queen burn incense in the pans placed on the top of the food-offerings, in the one case in the great court of the larger temple,⁹ and in the other apparently in the outer court of the smaller temple, where they are seen in close proximity to the blind vocalists and harpist who simultaneously make music.¹⁰ They also ran in front of the royal procession to the temple,¹¹ thus, perhaps, performing the same functions as the lector of the old religion, who walked in front of the Pharaoh, when he went to the temple, and dispelled inimical powers by his recitations.¹²

(d) *Female musicians.*—According to the relief in the tomb-chapel of Panehesi discussed above, among those of the royal retinue who remained outside the entrance to the enclosure or outer court of the larger temple, while the king and queen officiated at the high altar, were a number

of female musicians. These are depicted singing to the accompaniment of hand-clapping, waving of palm-branches, and the beating of tambourines, or else lifting their hands in worship.¹ These female musicians likewise greeted the king on his arrival at the temple.² It was apparently also the same women who participated in the rejoicings at the decoration of courtiers.³ It is to be noted that the female musicians are never shown performing inside the temple precincts.

3. Private worshippers in the temple of the Aton.—It seems to have been customary for a subject, after he had been decorated by 'Okhnaton, to make a food- and drink-offering outside the pylon of the larger temple and to pray at the same time for the king's life, prosperity, and health, and that the Aton would 'vouchsafe him for ever.'⁴

In the top register of a scene in Merire's tomb-chapel depicting 'Okhnaton's visit to the temple⁵ two men wearing wigs, and carrying each a bouquet, lead along a beplumed and garlanded cow and a calf. Accompanying them, and also carrying bouquets, is a man with a shaven head, *i.e.* a priest. Possibly the two laymen are offering these victims themselves on the occasion of a royal visit, the presence of the priest being required in order that he might superintend the slaughter of the victims and make certain that they were pure.⁶ In the same scene, bottom register, lay-folk are carrying bouquets and duck, while four priests follow, two leading oxen and two carrying bouquets. Both victims and duck are quite possibly private offerings. Davies⁷ suggests, indeed, that the offerings placed on the altars in the outer or enclosing court of either temple were those of private people. This would account for priests serving these altars before the arrival of the king,⁸ or while the royal party and chief priests were officiating at the high altar.⁹

LITERATURE.—See the works cited in the text and footnotes.

A. M. BLACKMAN.

WORSHIP (Greek).—I. DEFINITION, ETC.—Worship, in the widest sense, may be defined as the acknowledgment by man of his dependence on a power or powers beyond himself. And these powers, in whatever form they may be conceived, are believed by the worshipper to be more potent than himself; and, in whatever visible semblance or sign they are worshipped, they are imagined to be normally invisible.

At the outset of our study of Greek worship we are met by a consideration which it is important to realize. The central meaning of worship as we conceive it is the endeavour after a higher and better life. Whether as individuals or on stated occasions with our fellow-men we perform an act of worship, while we do indeed render thanks for blessings received and pray for blessings to come, yet the paramount intention of our worship is that we may be reminded, amid the clash and din of things temporal and fleeting, of the things which are unseen and eternal, to attune our hearts and minds to higher ideals of life. And, while we consider it right and seemly to bring to God offerings of a temporal kind, to beautify His sanctuary, to lay before Him tithes and firstfruits, and in His name to give our goods to feed the poor, yet we count it a better thing to bring the sacrifice of a contrite heart, which He will not despise.

Now, if we leave out of account some rare and sporadic utterances of the more advanced and

⁸ *Ib.* iii. pl. xxx.

⁹ *Ib.* ii. pl. xvii.

enlightened thinkers and confine ourselves to the typical Greek conception of worship, we find that the motive and intention is of a wholly different kind. Man worships his god or gods not because he has any lively feeling of gratitude for blessings experienced, still less because he desires to live a better life, but because he has an overwhelming conviction of his dependence on his god or gods for all temporal blessings. H. Usener¹ perhaps rather overstates this point of view, but in general it is true.

'Pray now, O stranger, to the Lord Poseidon: for his feast it is on which you have happened in coming here. And when thou hast made libation and hast prayed, as is right (*θέμις*), then give to this man also a cup of honey-sweet wine to make libation, since I deem that he too prays to the immortals. All men have need of Zeus.'² 'From the gods come all means of mortal excellence—from the gods are men wise and mighty of hand and eloquent of tongue.'³ 'Always we all have need of Zeus.'⁴

If our definition of worship is open to the objection that it would include magic, the defence must be that it is impossible to frame a definition of worship which would be at once sufficiently wide and yet exclude magic. The acts of worship and the acts of magic are in origin at least inseparable. If we so define worship as to distinguish it from magic, it will be by a definition applicable only to the higher kinds of worship. It is no more possible to distinguish worship and magic by absolute and generally valid *criteria* than it is to distinguish religion from superstition.

Essentially magic is the performance of an act accompanied by verbal incantations which invoke objects of worship not known or not recognized by ordinary society. And just so far the modern view may be justified which makes the prime distinction between religion and magic to be that religion is social and promotes the good of the community, while magic is anti-social and tends to exalt the individual to the detriment of the community.

II. THE RELATION OF RITUAL TO RELIGION.—

It used to be the fashion to regard the practices of ritual as later than the religious ideas of which they were the expression. The religious theory was regarded as primitive and essential; the religious ritual was regarded as the reasoned form in which the theory found expression. But modern investigation suggests that the reverse is the case. A festival which in historical times is definitely religious in character and is accompanied by a theory which professes to account for the various practices of the ritual may easily have been in its origin of an entirely secular character. The wide-spread practice of seasonal festivals, particularly those of mid-winter and of spring, can hardly be accounted for on any supposition that they were originally religious in character. Their origin is much more reasonably explained and their universality is much more easily understood if we regard them as having been at first purely secular, the natural reaction to the character of the season. The tribe meet at mid-winter and in spring to hold their festival with song and story. The character of the season will naturally influence the character of the festival. But, save in so far as mere ecstasy is religious in character, there is nothing religious in the celebration until a theory is evolved. When at mid-winter all nature is asleep—*ἐνιάρως*⁵ can hardly mean anything else than the sleeping season—the tribal festival may be explained as intended to celebrate the passing of a god who is asleep or is slain. When in spring all nature awakes to life, the festival may be explained as the awakening or the resurrection of

¹ ARW [1904].

² Hom. *Od.* iii. 45.

³ Pind. *Pyth.* i. 41 f.

⁴ Aratus, *Phæn.* 4.

⁵ The old derivation from *ἐνὶ τῷ ἀνθρώπῳ* ('Here we are again!'), though revived in recent times, is of course absurd.

the god. But the ritual in its main outlines precedes the theory. Indeed it is only with the utmost difficulty that the theory will produce any innovation in the ritual. Many of the ritual usages are probably in their origin purely accidental. When on a memorable occasion something happens to be done in a particular way, the tendency will be to do it in the same way again. The usage becomes stereotyped, and the theory will try to account for it: thenceforth it is held to be the only way that is valid and effective. Even if no convincing explanation is found in theory, ancestral custom will be sufficient to perpetuate it. This ancestral custom is what the Greeks call ὁ πατριος νόμος.¹ This νόμος (or νόμοι) is believed to be of immemorial antiquity, with all the superior sanction that attaches to the unwritten as opposed to the written law, and is held to regulate all the fundamental sanctities of life. The point of view is beautifully expressed in the words of Antigone: οὐδὲ σθένειν ποσοῦτον ἰδόμεν τὰ σὰ | κηρύγμαθ' ὥστ' ἀγραπτα κάσφαλῆ θεῶν | νόμιμα δύνασθαι θνητὸν ἐνθ' ὑπερδραμεῖν. | οὐ γάρ τι νῦν γε κάχθεις, ἀλλ' αἰε ποτε | ζῆ ταῦτα, κούδεις οἶδεν ἐξ ἔθου φάνη.²

Hence in the *Politicus*, 290 E, we find custom almost equated with sanctity: τὰ σεμνότερα καὶ μάλιστα πατρία τῶν ἀρχαίων θυσίων. So the solemn supplication of Himilicus is carried out κατὰ τὸ πατρίων ἔθος.³

III. OBJECTS OF WORSHIP.—We may conveniently divide the objects of worship into primitive or non-anthropomorphic and later or anthropomorphic.

A. NON-ANTHROPOMORPHIC.⁴—The evidence for non-anthropomorphic worship cannot occupy much space in a brief sketch like the present, and there is the less need to discuss it in detail because in general the lower strata of Greek religious ideas resemble those found in the earlier stages of development of other peoples or among primitive peoples of the present day. As among these, so among the Greeks we find traces of the worship of inanimate things and of animals. But before we glance at the evidence it is desirable that we should represent clearly to ourselves what exactly such worship means.

The ultimate root of religion is to be found in the instinctive sense of the mysterious, the uncanny. This sense is not equally strong in all men any more than all men are equally religious, and the things by which it is excited vary indefinitely, from the uttermost of beauty to the uttermost of loathing. In the street and under the garish sun all experience is immediate and commonplace. But if, for instance, one make his way to some lonely glen high among the hills—'per loca pastorum deserta atque otia dia'—where only the moorfowl call and only the whaups are crying, then even the most commonplace feels an instinctive awe, a sense of mystery which he cannot express even to himself. This is what the Romans call 'religio loci.' The origin of the word *religio* is a matter of dispute to-day as it was among the Roman antiquaries themselves. But even through the perplexities of the Roman discussions⁵ there shines some perception of what we believe to be the right idea of the word, which corresponds very closely to 'reflexion,' ἀναλογισμός, the 'sense of something far more deeply interfused,' the 'misgiving of a creature moving about in worlds not realized'—in a word, the sense of the

uncanny. This sense may be awakened merely by the loathly, as, e.g., the toad, to which the rustic mind ascribes all manner of strange powers,¹ or by the merely curious—a stone or tree of fantastic shape. Objects which in whatever form have power to excite such emotions are regarded with awe. They must be approached with circumspection. They are looked upon as things apart: they are *λεπτά*. When then we find it said that a certain Greek tribe worship a particular animal or a particular object, often no more is meant than this. Their worship is predominantly fear.

But there are higher mysteries than these: the mystery of death and birth, of growth and adolescence, of the regular recurrence of the seasons, of mother-love and self-sacrifice, of instincts which 'aspire to immortality and seem to promise it.' It is by way of such mysteries that the religion of fear becomes transformed and transfigured into something higher: if not into a religion of love, which is essentially a Christian idea, at least into a religion in which reverence is more prominent than fear, in which the gods are no longer imagined as the jealous enemies of mankind but as their protectors. Swift to punish transgression, yet they do not will that any should perish. They are givers of good things,² if they are also givers of evil. Even if they 'deal to men two evils for one good,' only the foolish murmur. Good men loyally accept the conditions of mortality, turning the bright side out.³

1. Holy places.—Among non-anthropomorphic things to which sanctity, in the sense we have described, attaches we have first of all holy places. The Mucklestane Moor was felt by Hobbie Elliot to be 'an unco bogilly bit.'⁴ The same sort of feeling was perfectly familiar to the Greeks. A bush-clad hill in Arcadia was fabled to be the place where Rhea gave birth to Zeus:

'In Parrhasia (Arcadia) it was that Rhea bare thee, where was a hill sheltered with thickest brush. Thence is the place holy and no four-footed thing that hath need of Eleithylla nor any woman approacheth thereto, but the Apidians call it the primeval childbed of Rhea.'⁵

As a typical case we have the cave sanctuaries all over Crete, particularly those on Mount Ida and Mount Dictæum associated with the worship of the Cretan Zeus.

2. Holy animals.—The same kind of sanctity attached to various animals in different localities: storks and ants in Thessaly; weasels in Thebes; especially the snake—e.g., in connexion with Asklepios, Sopolis, Cychreus. Best known of all is the *οικουρὸς ὄφις* on the acropolis at Athens which every month received honey-cakes.⁶ Other familiar cases are the mice in the temple of Apollo Smintheus, the owl of Athene, etc.

3. Holy trees.—Among proofs of the cult of living trees we have the familiar idea of the tree-nymphs under their various names—Dryads, Hamadryads, Meliæ, etc.—who live in the life and die with the death of the holy tree. Where myth gives an ætiological legend to explain just why a tree is sacred, we may quite confidently neglect the legend and infer that the holiness attached to the tree before myth gave the alleged reason.

Thus the Delian palm was sacred. Myth gave as the reason that this was the palm which supported Leto at the birth of Apollo. So the laurel in the vale of Tempe, from which crowns were made for the victor at the Pythian games, derived its sanctity, according to myth, from the purification of Apollo at Tempe after he had slain the Python. Similarly the stump of the wild strawberry-tree at Tanagra was held sacred for the alleged reason that Hermes had been reared under it.⁷

⁴ Scott, *The Black Dwarf*, ch. ii.

⁵ Callim. *Hymn.* i. 10 ff.

⁶ Herod. viii. 41.

⁷ Paus. ix. 22. 2.

In these and in numberless other cases we must recognize now that the holiness is a much earlier thing than the myth—which merely attempts to explain an existent fact.

4. Holy stones.—Stones to which a special sanctity attaches form one of the most common features of early legend everywhere. Greece is no exception.

Thus Phemios, king of the Ainianes, fought a duel with Hyperochos, king of the Inachians, for their land and guilefully slew him by hurling a stone, which was thenceforward regarded by the Ainianes as holy.¹

There are a number of references in Pausanias to 'undressed stones,' λίθοι ἀργοί, which were the object of veneration.

Thus in vii. 22. 3 he tells us that at Pharai in Achaia certain square stones (τετράγωνοι λίθοι), about thirty in number, were worshipped by the people of Pharai, who applied to each of them the name of a god; and he adds an important remark: τὰ δὲ ἐτι παλαιότερα καὶ τοῖς πᾶσι Ἑλλήσι, τινὰς θεῶν ἀντὶ ἀγαλμάτων εἶχον ἀργοὶ λίθοι. In ix. 24. 3 Pausanias mentions at Hyettos in Boeotia a shrine of Herakles where the image was 'not artistic but an undressed stone in the ancient fashion.' On the acropolis at Athens Pausanias, i. 28. 5, mentions two λίθοι ἀργοί: τοὺς δὲ ἀργούς λίθους, ἐφ' ὧν ἐστάσαν ὅσοι δίκας ὑπέχοντο καὶ οἱ δῖωκοντες, τὸν μὲν Ἰχθῆρος, τὸν δὲ Ἀναδείας αὐτῶν ὀνομάζουσι.

The typical case of the holy stone is the βαλτυλος, which legend explained to be the stone which Rhea gave to Cronus in place of the infant Zeus.² Pausanias, x. 24. 5, speaking of Delphi, says:

ἐπαναβάντι δὲ ἀπὸ τοῦ μνήματος (of Neoptolemus), λίθος ἐστὶν οὐ μέγας· τοῦτον καὶ ἔλαιον ὀσμῆρα καταχέουσι, καὶ κατὰ ἑορτὴν ἐκάστην ἑρία ἐπιτίθεισι τὰ ἀργά· ἐστὶ δὲ καὶ δοῦρα ἐς αὐτόν, δοθῆναι Κρόνῳ τὸν λίθον ἀντὶ τοῦ παιδός, καὶ ὡς αὐδὺς ἤμεσαν αὐτόν ὁ Κρόνος.

This brings us to the question of the place in Greek worship of the holy pillar. Every one is familiar with the passage in Gn 28^{18a}, which tells how 'Jacob rose up early in the morning and took the stone that he had put under his head and set it up for a pillar (בַּרְזֵל), and poured oil upon the top of it [as the Delphians did with the βαλτυλος in Pausanias, *loc. cit.*]. And he called the name of that place Bethel [House of God], . . . and Jacob vowed a vow,' etc. It is an old suggestion that βαλτυλος is nothing else than a Greek translation of the Hebrew בֵּית־אֱלֹהִים. But, in any case, the important thing to realize is that there are two kinds of sanctity attaching to such things as we have been discussing: natural sanctity and derivative sanctity. There is what may be called the natural sanctity which everywhere attaches to the uncanny. To this class belongs the λίθος καπνώτας which is mentioned by Pausanias, iii. 22. 1:

Γυθείου δὲ τρεῖς μάλιστα ἀπέχει σταδίου ἀργός λίθος· Ὁρέστην λέγουσι καθεσθέντα ἐπ' αὐτοῦ παύσασθαι τῆς μανίας διὰ τοῦτο ὁ λίθος ὀνομάσθη Ζεὺς Καπνώτας κατὰ γλώσσαν τὴν Δωριδα.

That is to say, there was something which seemed uncanny about this stone, and so an aetiological legend arose to explain it. But in the case of Jacob there is no hint that the stone which he selected for his pillow possessed in itself any unusual virtue, and, familiar as we are with the potency of, say, a bit of wedding-cake as a provoker of auspicious dreams, we seem to have no right to read any such meaning into Jacob's use of the stone. Indeed in Gn 28²² it is rather emphasized that its particular meaning derives from the voluntary act of Jacob and not from any natural quality.

We hold, then, that the holy pillar in worship is originally purely symbolical. That this is the case and that we have here to do with no original sanctity is already obvious when we consider that the pillar is rather an artificial than a natural form. It seems to be generally assumed that the ἀργός λίθος of Pausanias is merely an 'undressed

¹ Plut. *Qu. Gr.* 13.

² Cf. Hesych. *s.v.* βαλτυλος· οὕτως ἐκαλεῖτο ὁ δοθεὶς λίθος τῷ Κρόνῳ ἀντὶ Διός.

stone,' of no particular shape. We think there is better reason to suppose that it was a stone dressed to a quadrangular shape but not carved into a definite anthropomorphic type. The quadrangular block seems quite well established as a half-way stage to the fully developed image. There is a very significant passage in Pausanias, viii. 48. 6, where, speaking of Tegea in Arcadia, the natural home of 'pre-lunar' customs, he says:

'There is also erected an altar of Zeus Teleios and a square image (ἀγάλμα τετράγωνον): for this is a type in which, it seems to me, the Arcadians particularly delight.'

The two most familiar Greek forms of this type are the pillars of Hermes and the pillars of Apollo Agyieus. For the shape of the Hermai we have the very definite testimony of Thucydides, vi. 27:

ὅσοι Ἑρμαὶ ἦσαν λίθινοι ἐν τῇ πόλει τῇ Ἀθηναίων· εἰσὶ δὲ κατὰ τὸ ἐπιχώριον ἢ τετράγωνος ἑρμασία,

where, with Sir Richard Jebb (against Hude), we regard the last three words as thoroughly genuine. The shape of the Apollo pillars is perhaps not quite so clearly established by the ancient authorities. But it is quite clear that they had an artificial shape, and therefore an artificial, and not a natural, sanctity.¹

But it is to be clearly understood that this is a question of origins only. Derivative sanctity may be quite as valid and quite as potent as natural sanctity. The landmark of my neighbour or the coffin in which he obtains his last landtenure may be made of common wood, but just because the timber is employed for this solemn purpose it acquires extraordinary virtues. And in the same way the symbolic pillar may easily acquire unnatural virtues, and may indeed, as seems well attested, be regarded as the abode, at least temporarily of the godhead. And the pillar may, of course, survive as a symbol even in a fully developed anthropomorphic worship—*e.g.*, the obelisk as the βαυτίλιον of Apollo Agyieus on coins of Ambracia.²

B. ANTHROPOMORPHIC CULTS.—It is characteristic of the objects of anthropomorphic cult that they are all, in greater or less degree, worshipped in the higher sense: that is to say, they are invoked with prayer and offerings. A rigid classification is difficult, because there is a continual transference of the members of one class into another, from higher to lower, no less than from lower to higher. But the classes of cults may be conveniently arranged as follows.

1. The dead.—We find in Homer that the funeral of a great prince is accompanied by funeral games. Thus in *Il.* xxiii. we have the ἄθλα ἐπὶ Πατρόκλῳ, in Hesiod, *Works and Days*, 654, the ἄθλα Ἀμφίδαμαντος. In the case of a private individual doubtless the ceremonies were less elaborate, consisting of the offerings at the grave and the funeral feast,³ with which we used to be familiar in Scotland, and which might be of decent proportions or might rise to the extravagance of Lord Ravenswood's funeral, when, according to Caleb Balderstone, 'there was as much wine drunk in this house as would have floated a pinnace.'⁴ But in any case the funeral feast did not terminate the dues of the dead (γέρα θανόντων). In historical

² B. V. Head, *Hist. Numorum*, Oxford, 1887, p. 319 f. Into the details of pillar cult we cannot here enter. For a somewhat extreme view the reader should consult the important paper by Arthur J. Evans in *JHS* xxi. [1901] 99-204, on 'Mycenaean Tree and Pillar Cult and its Mediterranean Relations,' and in the same volume, p. 268 ff., the reply by W. H. D. Rouse, and for a *via media* L. Ziehen, in *Bursian's Jahresbericht*, 1908, who thinks that both Evans and Rouse have rushed to extremes which the evidence does not justify.

³ *περίδειπνον* (*Dem.* xviii. 288).

⁴ Scott, *The Bride of Lammermoor*, ch. vii.

times we hear of a further celebration on the third, ninth, and thirtieth days after the funeral.¹ The character of these celebrations, attended by the friends and relatives of the dead, is sufficiently attested.² The ceremonial on the thirtieth day, which apparently marked the end of the normal period of mourning,³ was noteworthy for the fact that the company who met to banquet together in honour of the deceased (ἐπι τῷ ἀποθανόντι) did not recline but sat, in accordance with ancient custom; hence the ceremonial was called καθέδρα.⁴ Still further there was the annual festival called γενέσια. It is disputed whether this celebration was held on the anniversary of the birthday of the deceased or on the anniversary of the day of his death.⁵

The generic term for offerings to the dead is ἐναγίσματα,⁶ which is precisely the Latin sacra and implies that the offerings were 'consecrated' to the dead: that the living did not partake of them. The corresponding verb is ἐναγίζειν. These offerings (called also χοαί, because normally they were 'poured' into the grave) consisted of milk, honey, water, wine, oil.⁷ The schol. on Eur. *Hec.* 527 adds ἄλευρον (wheaten-flour).⁸ Eustath. *Hom. Od.* 519, says the μελκρᾶτον, as the offering was called, was honey and milk in Homeric times, but honey and water in historical times. Stengel holds that milk was always an ingredient.

The libation was poured upon the grave and was accompanied by prayer.⁹ The tomb was sometimes so constructed that the liquid could easily reach to the bones or ashes below.

Besides the libation there were other offerings constituting the δειπνον of the dead.¹⁰ Naturally the constitution of this would be fairly constant, but would vary to some extent with individual taste or with the locality of the offerer.

The meal presented to the dead was not one which the living could share and was therefore wholly burnt.¹¹ The lexicographers define ἐναγισμοί as ὀλοκαντώματα.¹² In other words, they belong to that class of sacrifices which were called θυσίαι ἀγευστοί.¹³ It is sometimes said that these offerings to the dead were made at night, but there is no evidence of this; and, since funerals took place by day, there seems no reason why offerings to the dead should not also take place by day. In classical times they certainly did so.¹⁴ *Hom. Il.* xxiii. 217 ff. certainly does not prove the contrary for Homeric times.

¹ Cf. Poll. viii. 146: τρίται, ἕνατα, τριακάδες; Aristoph. *Lys.* 611 ff.; Isaus, ii. 36, viii. 39.

² Eschin. iii. 225: τελευτήσαντας δὲ ἔλθον εἰς τὰ ἕνατα διεξίαι πρὸς τοὺς οἰκίους; Dem. xviii. 243: ἐπειδὴ δὲ τελευτήσῃ τις καὶ τὰ νομιζόμενα αὐτῷ φέροισι, ἀκολουθῶν ἐπὶ τὸ μῆμα διεξίαι.

³ *Lysias*, i. 14: ἔδοξέ μοι, ὦ ἄνδρες, τὸ πρόσπων ἐψιμυθιώσασθαι, τοῦ ἀδελφοῦ τεθνεώτος οὕτω τριάκονθ' ἡμέρας.

⁴ Cf. Phot.: ἐκαλέτο δὲ καθέδρα ὅτι καθεζόμενοι ἰδεῖνον καὶ τὰ νομιζόμενα ἐπιήρουν.

⁵ This question is fully discussed by W. Schmidt, *Geburtstag im Altertum*, Giessen, 1908, p. 37 ff. who reaches the conclusion that, while γενέσια denotes the celebration of the birthday of the living, γενέσια is the anniversary celebration of the death-day of the dead: cf. Herod. ii. 26. The γενέσια thus correspond precisely to the Roman *parentalia*.

Mourning dress was worn.¹ No garlands apparently were worn; the music (it is sometimes said there was none), if any, was provided not by the cithara but by the flute or pipe.² The usual statement that there were no δααί³ is highly disputable.

To sum up, the essential features of the ritual of the dead are: (1) the ritual is restricted to the tomb; (2) liquids are poured into the tomb; (3) foods are burnt entirely and are not partaken of by the offerer; (4) prayer is, or at any rate may be, made to the dead, at least by members of their family.

2. The heroes.—Greece, like other countries, was full of legends of an earlier race of men upon the earth, who were mightier than their degenerate successors.⁴ It was natural to imagine those heroes as the offspring of gods and human beings. It is precisely the idea of Gn 6¹: 'There were giants in the earth in those days; and also after that, when the sons of God came in unto the daughters of men, and they bare children to them, the same became mighty men which were of old, men of renown.' Hence ἥρωσ was identified with ἡμυθεος. The idea was perfectly familiar to Homer. Every one admits that Hesiod equated ἥρωσ with ἡμυθεος. But equally in Hesiod and in Homer this express identification is confined to a single passage: *Hom. Il.* xii. 23; Hesiod, *Works and Days*, 160; cf. *Hom. Hymn.* xxxi. 19, xxxii. 19.

From these imagined heroes the great families of Greece traced their descent. It is easy enough to understand that this canonization or 'heroization' was extended to contemporaries: thus Brasidas, the famous Spartan who fell at Amphipolis in 422 B.C., received heroic honours.

The terms used in heroic worship are closely akin to those which are used in the worship of the dead.

ἐναγίζειν, ἐναγίσματα. Herod. ii. 441: δοκόνουσι δὲ μοι οὐτοὶ ὀρθότατα Ἑλλήνων ποιεῖν, οἱ διὰ Ἡράκλεια ἰδρυθέντες ἔκρηται, καὶ τὰ μὲν ὡς ἀθανάτων Ὀλυμπῶν δὲ ἐπωνυμίην θύουσιν, τῷ δ' ἑτέρῳ ὡς ἥρωι ἐναγίζουσι; i. 167: καὶ γὰρ ἐναγίζουσι (sc. the people of Agylia) σφί (sc. the Phocæans whom they had stoned to death) μεγάλως καὶ ἀγῶνα γυμνικὸν καὶ ἵππεδον ἐπιστάσι.

The offerings, or χοαί, in the case of heroes consisted of blood, and the more strict term for those was αἰμακουρία.⁵ It was the custom to kill the victims⁶ over an ἐσχάρα (hearth) or over a trench (βόθρος), so that the blood flowed into the earth.⁷ But other things than blood were offered. Thuc. iii. 58 speaks of firstfruits of the crops: ὅσα ἡ γῆ ἡμῶν ἀνείδιδον ὄρατα, πάντων ἀπαχῶς ἐπιφέρουτες. This refers to the annual offerings made to those who fell at Plataea (479 B.C.). They received also ἐσθήματα καὶ τὰ ἄλλα νόμιμα.⁸ There is here no mention of blood-offerings. But Plutarch⁹ very clearly recognizes blood-offerings.¹⁰

The testimony is uniformly that hero-worship was performed by night.¹¹

In the case of the hero the place of the tomb was taken by the Heroum ('Hρῶν).

A very important feature was the solemn procession.¹²

The essential features of heroic worship are thus: (1) the offerings belong to the class of θυσίαι ἀγευστοί: they are ὀλοκαντώματα, wholly burnt, and the offerer does not partake; (2) the place of offering is a trench (βόθρος) or at any rate an ἐσχάρα (hearth);¹³ (3) normally these offerings are performed at night (this statement can be taken only

as a very general assertion); (4) it is usually, and very naturally, said that there were no *δαί* in the worship of the heroes. But this statement, resting apparently on a non-fundamental hypothesis, is doubtful. In *Heliod. Aeth.* iii. 2 there are certainly *καῖ*, which should normally imply *δαί*.

3. The chthonian gods.—The term 'chthonian' as used in Greek is ambiguous. A god may be associated with earth as Mother of all and be in this sense chthonian. Or a god may be associated with this or that land and be *χθόνιος* in that sense.¹ Lastly, a god may be associated with the under world, *i.e.* chthonian in the strictest sense. But here again a god may be chthonian in one aspect who is in all others Olympian. Hence 'chthonian' really denotes rather an aspect of this or that god than a permanent attribute. Perhaps the only purely chthonian deity is Hades—and that only if we neglect his non-chthonian representative. Hecate also would seem to be a purely chthonian deity; but we are immediately confronted by her confusion or amalgamation with Artemis. The fact is that any god may assume a chthonian character. When, then, we speak here of 'chthonian' gods, we mean either specifically chthonian gods, if there be such, or gods in their chthonian character.

The ritual is, naturally, precisely parallel to that of the dead and the heroes. The offerings are *θυσία ἀγευστοί*; they are made, or are supposed to be made, at night; and so on.

But, as we shall see, this is only when the 'chthonians' as such preserve their full authority. In numerous cases, where the ultimate sanction lies with the chthonians, the sacrifices take place in name of the Olympians, and so take place by day.

4. The Olympian or Ouranian gods.—We come now to the highest rank of gods, who are most usually denoted as Olympian, sometimes as Ouranian. The two terms are to all intents identical since even in Homer *Olympos*, the abode of the gods, sometimes loses its geographical meaning of a mountain in Thessaly and is really identified with Heaven (*οὐρανός*)—*e.g.*, *Il.* viii. 25, where Zeus threatens to suspend earth and sea by a chain attached to a 'peak of Olympus.' They are conceived as dwelling somewhere 'on high'; and so the Homeric worshipper when he prays 'looks unto the wide Heaven.'² They are gods of mercy rather than of anger, of blessing rather than of bane.³ They keep the cities of men, and hence their worship comes first.⁴

We propose now to sketch the main features of Olympian worship. It will be easily understood that there must have been innumerable divergences in detail, according to date, place, and circumstance, which cannot be noticed here. All that we can endeavour to do is to give a reasonably complete and intelligible account of the fundamental principles.

(i.) *The apparatus of worship.*—(a) *The image*

¹ So the *χθόνιοι νόμοι* (*Ap. Rh.* ii. 504, iv. 1322).

² *Il.* iii. 364, vii. 178, 201, xix. 257, xxi. 272.

³ Cf. *Isocr. Philipp.* 116 f.: 'Do not be surprised if throughout my speech I urge you to render benefits to the Greeks—urge you to mildness and to loving-kindness. For I observe that severity is painful both to the severe and to those that have dealings with them, whereas mildness not merely in the case of men and all other animals is in good repute, but also in the case of the gods those who are the authors of our good things are called Olympian, while those whose function is to bring affliction and punishment receive harsher titles; and to the former temples and altars are established both by individuals and by cities, while the latter are honoured neither in prayers nor in sacrifices; on the contrary we perform rites to avert (*ἀποποιήσασθαι*) their anger.'

⁴ Cf. *Plato, Laws*, 717 A: 'In the first place, we say that next after the Olympian gods and those who keep the city, honour should be given to the chthonians,' etc.

(*ἄγαλμα*) of the god.—The image is a characteristic feature of Greek worship, and Herodotus, i. 131, notes it as a remarkable fact that the Persians have neither image nor temple nor altar, which he attributes to their non-anthropomorphic conception of the gods. It is, of course, to be remembered that the absence of images characterizes both the lowest and the highest stages of religion. But in historical times at least the absence of an image was so exceptional as to call for special remark.¹ That the image, and that too in a fully anthropomorphic form, was known to Homer is clear on any reasonable interpretation of *Il.* vi. 92=273=303, where the Trojans lay a robe (*πέπλος*) 'on the knees of fair-tressed Athene,' *i.e.* on the knees of the image in her temple on the acropolis of Ilios.

The motive of the *ἄγαλμα* is well put by Dio Prus. *Or.* xii. 60-61:

'Nor would one say that it were better that no statue or image of the gods had been shown among men, it being meet that one should look only to the heavenly things. For all those things the wise man worships, believing in blessed gods whom he beholds afar. But through their yearning for the supernatural (*τὸ δαιμόνιον*) all men are possessed by a strong passion to honour and worship the divine at close quarters, drawing nigh to them and touching them convincingly, sacrificing to them and crowning them with garlands. It is with men just as with little children, who, being separated from father or mother, out of their great desire and longing stretch out their arms many a time in their dreams to their absent parents. Even so men, loving the gods as is their duty both because of their benefits and by reason of their kinship, yearn every way to be with them and to walk with them. Hence also many of the barbarians, through poverty and through lack of art, give the name of gods to mountains and to unwhewn trees (*δένδρα ἀργά*) and undressed stones (*λίθους ἀσπίμους*).'

Historically the image is probably a development from the symbolic pillar, and it is more likely that its sanctity was acquired than that the sanctity was original and the image developed from a fetish object. Had the latter been the case, we should have expected a greater diversity of form than there seems actually to have been. The best example and the most familiar of the gradual transition from pillar to a more or less anthropomorphic form is afforded by the Hermai busts to which we have already referred. Even in historical times the images in many temples seem to have been mere uncarved 'boards,' *βρέτη* or *ξόανα*.² It is a matter of dispute whether *ξόανον* necessarily means a wooden image or whether it might not include metal or other material. In later times it is true that the word is applied to other than wooden images.³ Yet on the whole it seems likely that the word primarily denoted a wooden board, planed (*λείον*) but not carved. The making of these old *ξόανα* was frequently attributed to Daidalos.⁴

(b) *The altar* (*βωμός*).—The usual term for altar is *βωμός* (cognate with *βῆμα*, 'platform'), whether used (like the Hebrew *לְבַנְיָה* [Ex 38¹]) for burnt offerings or for the burning of incense (like the Hebrew *מִזְבֵּחַ קָטָר* [Ex 30¹]). In the strict sense the *βωμός* is a 'high place,' an erection on which offerings are made to the Olympians, as opposed to the low *ἐσχάρα*, or hearth, on which offerings are made to the chthonians, the heroes, and the dead.

The altar was of course an essential part of the equipment of a temple. The chief altar stood

¹ Paus. ix. 25. 4 mentions a temple of the Molrai at Thebes in which there was no image (*ταῖς Μοίραις δὲ οὐκ ἔστιν ἄγαλμα*); cf. x. 33. 11.

² Cf. *Callim. frag.* 3 Mair=105 Schneid.: *οὐ πῶ Σκέλιμον ἔργον εἶδον ἄλλ' ἐπὶ τεθμῷ | δηναῖο γλυφίδων ἄερος ἦθα σάνις | ὡς γὰρ ἱδρίσαντο θεοῦ τότε· καὶ γὰρ Ἀθήνης | ἐν Λίνῳ Δαναοῦ λείον ἔθηκεν ἕδος.*

³ *E.g.*, Eurip. *Tr.* 1074: *χρυσέον τε ξόανον τύποι*: Xen. *Anab.* v. 2. 12: *καὶ τὸ ξόανον εὐκυν ὡς κυπαρίσσειον χρυσοῦ ὄντι τῷ ἐν Ἐφέσῳ*; cf. *Ammon*, p. 97.

⁴ Cf. Paus. viii. 35. 2, ix. 30. 8, and x. 40. 2 f., where he describes among other works of Daidalos a ξόανον of Aphrodite at Delos which *κάτεται ἀντι ποδῶν ἐς τετραγώνου σχήμα*—a good parallel to the Hermai at Athens (*ἡ τετραγώνος ἔργασία*, *Thuc.* vi. 27).

inside the temple proper.¹ But outside the temple there stood in the περίβολος, or temple-court, other altars—βωμοί πρόναοι.² To the number of these there seems to have been no limit, the dedication of an altar being much like any other offering and corresponding very much to our custom of putting a stained-glass window in a church.³ Stengel is of opinion that usually the altars inside the temple were used only for unburnt offerings, though he admits there were exceptions to this.⁴ He maintains, however, even in the face of Paus. ii. 35. 5, that animals were never slaughtered at these inner altars. We think it impossible to reconcile Stengel's view with Pausanias.⁵

As for altars unconnected with a temple, these were to be found anywhere and everywhere, in town and country, in street and in market-place, in the house and in public places, in the workshop and in the gymnasium.

The size, shape, and material varied indefinitely. Some of the most curious were the κεράτων⁶ or βωμὸς κεράτινος⁷ of Apollo at Delos which was made entirely of horns,⁸ and was reckoned among the Seven Wonders of the World; altars at Olympia, Pergamos, and Samos made from the ashes of victims;⁹ and an altar at Miletus made from the blood of victims.¹⁰

Where no altar was at hand it could be improvised.¹¹ It was customary to garland the altar with leaves¹² or flowers.¹³

(c) *The temple.*—The earliest 'holy place,' as we have seen above, is simply a place which in one way or another suggested the presence of something more than human. Such a place was felt to be ἱερός, sacer, something with which man must deal circumspectly: it was a 'God's acre,' to be set apart from secular use. Now, when in Homer, *Il.* vi. 194, the Lycians gave Bellerophon a 'choice portion' of land, the phrase is τέμενος τάμον ἐξοχον ἄλλων. Precisely the same word τέμενος is used of the portion of ground set apart for a god. The Latin cognate *templum* (from which we get 'temple') had the same original meaning of a marked-out space. That old sense is still familiar in the *caeli caerulea templa* of Ennius¹⁴ and the *caeli lucida templa* of Lucretius, i. 1014. The extent of this τέμενος might vary indefinitely. Thus Hom. *Il.* ii. 696 speaks of Πύραρος as Δήμητρος τέμενος, and Pindar, *Pyth.* ii. 2, of Syracuse as the τέμενος Ἀρεος. These are, of course, poetical expressions. More strictly the τέμενος includes only the immediate environs of the temple proper, and normally it was marked off by a fence (περίβολος). If we may take a modern analogue and suppose that a country church, the churchyard and other ground round the church, the manse and the manse garden, the stabling accommodation for worshippers from a distance, are all enclosed within a fence, which might even include the glebe, we have a good parallel to the Greek τέμενος.

It is natural to suppose that many of the places to which sanctity was felt to attach would be groves of trees. Again, even when trees were cut down elsewhere to enable the land to be made arable,

the trees of the holy τέμενος would be spared. Hence ἄλιος, or grove, is in Greek almost a synonym of τέμενος. At the present day in an otherwise rather treeless landscape you may pick out the church by its clump of trees. When Herakles consecrated a τέμενος to Zeus at Olympia, Pindar tells us that suddenly Herakles was struck by the absence of trees and bethought him of the wild olives which he had once seen by the shadowy springs of the Ister (Danube), and so he went and brought the wild olive to Olympia to be at once a prize for the victor and a hospitable shade for the visitor.¹

Within this τέμενος is the temple proper denoted by ναός (Attic νεός) or by τὸ ἱερόν. When a distinction is made between these two words, ναός is rather the inner sanctuary, while τὸ ἱερόν is wider. Again ναός may have practically the same sense as ἄδυτον, the Holy of Holies,² or may mean the temple generally.

Historically the temple is doubtless later than the τέμενος and the βωμός. Thus Homer, *Il.* viii. 48,³ mentions τέμενος and βωμός, but does not refer to any temple. Pindar, *Pyth.* iv. 204 ff., tells how the Argonauts came to the Axéine (Euxine), ἐνθ' ἄγκυρην Ἰσοειδάωμος ἔσσαντ' εἰναλίον τέμενος, φόνισσα δὲ Θρηϊκίων ἀγέλα ταύρων ὑπάρχεν καὶ νεκκτιστον λίθων βωμοῖο θέναρ. What the motive of the temple (ναός) was is not easy to determine. It is suggested that it was meant to protect the image of the god and the dedicated offerings. Whether this be so or not, a motive which must have come quite early into force was the feeling that the god must have his house even as men: only it must be more splendid and more beautiful. But perhaps the most potent motive of all was to create a definite centre for the worship of the god.

The sanctity attaching to the temple proper was extended, though doubtless in less degree, to the whole space enclosed by the περίβολος. Ritual purity—the details are infinitely various—was demanded of all who came within it, and περιφραντήρια, or vessels of holy water, were provided for purposes of lustration. We may quote as a single example of the sort of prohibition practised an inscription from the temple at Jerusalem: μηθένα ἀλλογενῆ εἰσπορεύεσθαι ἐντός τοῦ περι τὸ ἱερόν τρυφάκτου (= δρυφάκτου) καὶ περιβόλου· ὅς δ' ἂν ληφθῆ, εἰαυτὸ ἀτιος ἔσται διὰ τὸ ἐξακολουθεῖν θάνατον.⁴

(d) *The priest.*—See art. PRIEST, PRIESTHOOD (Greek).

(ii.) *The ritual of worship.*—The two most essential elements of ritual are prayer and sacrifice. We frequently of course find prayer without sacrifice; but sacrifice without prayer occurs only when an offering is made by way of expiation. Perhaps it is hardly worthy of the name of sacrifice, but, when the soilure of purification is cast into the sea or into running water, or when the filth (καθάρματα) of the house is deposited at the No Man's Land of the cross ways, no words are spoken: ἢ σίγῃ ἀπλως, . . . τὰδ' ἐκέλευσα, γάμποτον χύσω, | στείχω καθάρμαθ' ὡς τις ἐκπέψας πάλιν, δικούσα τεύχος ἀστροφόσιν δμμασιν.⁵

(a) *Prayer.*—There is no more characteristic expression of man's dependence on a higher power than prayer. The self-sufficient man—ὁ ἀθάδης—is ιδεῖνός τοῖς θεοῖς μὴ ἐπεύχουσαι.⁶ For the special characteristics of Greek prayer the reader is referred to the art. PRAYER (Greek).

¹ Pind. *Ol.* iii. 13 ff.

² Ἅγια Ἅγιον (116 93; cf. Ex 30^b 40^s, which, however, seem to imply that the θυματήριον stood not in the Holy of Holies but in front of the curtain [מִזְבֵּחַ הַעֹלֹת] which shut off the Holy of Holies).

A. W. MAIR.

WORSHIP (Hebrew).—I. Introductory.—(a) *Terms and underlying conceptions*.—The fundamental idea of worship, as conceived by the Hebrews, was expressed by the term 'service' (*ʿabdāh*), the corresponding Greek term being *λειτουργία* ('servitus religionis quam *λατρεῖαν* Graeci vocant').¹ 'To perform the service of God (or the Lord)' means, in the Pentateuch, to carry out the worship of God in accordance with the requirements of the Levitical Law (Nu 8¹¹, Ex 12²⁵). While such 'service' is, on its external side, elaborated in a series of ceremonial and liturgical acts, its inward and spiritual side is also emphasized; it is essentially a 'service' of heart and soul (Dt 10¹³): 'And it shall come to pass, if ye shall hearken diligently unto my commandments which I command you this day, to love the Lord your God, and to serve him with all your heart and with all your soul,' etc.).

From the time when worship at one central shrine was established (i.e. the 18th year of Josiah, 621 B.C.) down to the destruction of the Jerusalem Temple in A.D. 70 the worship of God was regarded as finding its only complete and adequate expression in the Temple service, with its elaborate cultus of priesthood and sacrifice (cf. Jn 4²⁰).

The immense and manifold religious activities that concentrated themselves in the temple worship, can only be adequately realized when it is remembered how unique was the position occupied (for nearly seven centuries) by Judaism's central shrine. It was absolutely the one and only sanctuary where the highest expressions of the religious life of a whole people could be offered. Judaism possessed but one sanctuary, and that was in Jerusalem.²

Jerusalem was for a long period visited by pilgrims from all over the ancient world, who appeared in the Holy City laden with gifts for the Temple. They came to Jerusalem 'for to worship' (Ac 8²⁷; cf. 24¹¹), and it was a pious duty for every faithful Jew to visit in this way the sanctuary at least once in a lifetime. This happened more particularly at the great feasts.³

The term *ʿabdāh*, while it primarily had reference to the worship of the Temple, and more particularly to the ministry of the officiating priesthood therein, received further an extended application, and is used in the sense of divine worship generally, and especially prayer. A famous dictum ascribed to the high-priest Simon the Just (c. 200 B.C.) runs: 'On three things the world stands: On the Torah, on the *ʿAbdāh* (i.e. the Temple-service), and on acts of love.'⁴ It was after the destruction of the Temple that the term was applied specifically to prayer; cf. *Taʿarūkh*, 2a (with ref. to Dt 11¹³): 'What is meant by the "service of the heart"? Prayer'; and (with ref. to Dt 28¹⁷ and Nu 44⁷) *ʿArak*, 11a: 'What is meant by service (worship) in joy and cheerfulness of the heart? It is song. . . . What service is that which accompanies sacrificial service (worship)? It is song.' This spiritualizing of the idea of sacri-

ficial worship had already made progress within Judaism (cf. e.g., Ps 51¹⁷), and is strongly emphasized in the NT. St. Paul speaks of 'your reasonable service' (*τὴν λογικὴν λατρείαν ὑμῶν*, Ro 12¹), which means 'a service to God such as befits the reason' (*λόγος*), i.e. a spiritual sacrifice and not the offering of an irrational animal; cf. 1 Pet. ii. 5.

The other general term for 'worship' is in Hebrew *hishṭavah* (חִשְׁתַּוּהוּ), the Greek *προσκυβεῖν*. This means 'prostrate oneself,' the most characteristic form of which action was among Orientals to fall upon the knees and touch the ground with the forehead as a mark of supreme reverence (the 'salaam'). This was one of the attitudes of prayer—prostration for prayer—which is defined in the Talmud² as 'spreading out the hands and feet.' It is related in the Rabbinical sources that, when the Temple was thronged with pilgrims, assembled to worship at the great feasts, though the congregation was wedged together so tightly as to be unable to move freely, when the moment arrived for prostration, in some unexplained and miraculous manner every member was able to prostrate himself.³ The term (חִשְׁתַּוּהוּ) is often employed in Scripture in the sense of 'worship,' though it is not confined to acts of worship directed to God. Thus it is used to express supplication or reverence towards men.⁴ But it is applied to acts of public worship in the Temple, especially in the Psalms and Chronicles. Such characteristic phrases occur as 'O worship the Lord in the beauty of holiness' (i.e. in festal attire); Ps 29² 9⁶⁹ (cf. 1 Ch 16²⁹, 2 Ch 20²¹). Perhaps the idea of worship is most fully expressed in Psalms 93 and 95-100, especially in such verses as the following:

'O come, let us worship and bow down:
Let us kneel before the Lord our Maker' (95⁶).

The other great element in the fully developed worship was that of praise, or thanksgiving. One of the keystones of the Psalms is 'give thanks' (*hādā*)—cf., e.g., Pss 118, 105-107—or 'praise' (*Hallel*); cf. Pss 111-113, etc. 'Praise ye the Lord' (*Hallelu-jah*).

A good illustration of the acts of worship which were typical of Jewish piety is contained in the following passages:

'Sing unto the Lord, all the earth;
Shew forth his salvation from day to day.

Give unto the Lord the glory due unto his name:
Bring an offering, and come before him:

Worship the Lord in the beauty of holiness' (1 Ch 16²³, 29).
'And Ezra opened the book in the sight of all the people; . . . and when he opened it, all the people stood up: and Ezra blessed the Lord, the great God. And all the people answered, Amen, Amen, with the lifting up of their hands: and they bowed their heads, and worshipped the Lord with their faces to the ground' (Neh 8⁵).

(b) *The ancient cultus*.—Before the centralization of the cultus in the Jerusalem Temple, worship was carried out at various local shrines or altars, which were numerous throughout the land. Probably every city or village had its *bāmāh*, or 'high place' (cf. 2 K 17² 23³, Ezk 6⁶), and in some cases the seat of the local worship was of more than local importance. There were famous shrines at Dan, Bethel, Gilgal, Beersheba, Shechem, Gibeon, and Samaria, some (but by no means all) of which figure in the patriarchal history (cf., e.g., for Bethel Gn 28¹⁹, Am 5⁶, etc., and for Beersheba Gn 26²³⁻²⁵, Am 5⁶).

That Jahweh could be worshipped at the local *bāmāh* in a perfectly legitimate way is clear from 1 S 9, 10, where Samuel the seer is represented as going up to the *bāmāh* to worship, and where his arrival to bless the sacrifice is awaited by the people. To this a room or hall (Heb. *ishkāl*) is attached, where the sacrificial meal is eaten by the assembled guests. In the time of David, and during the early years of Solomon, Gibeon was the great 'high place,' to which the king himself resorted for sacrifice (1 K 3⁴, 2 Ch 13¹³). In the earlier period (of the Judges) a special importance seems to have been attached to the place where the ark was located, and during the period of its existence Shiloh was regarded as the principal sanctuary. Here a special building (a 'temple,' *hekal*) was erected for the greater safety of the sacred symbol; a local priesthood, the house of Eli, was attached to it; and its annual festival was much frequented (cf. Jg 21¹⁹, 1 S 13²¹). This sanctuary, which R. H. Kennett regards as a genuinely Israelitish sanctuary, not taken over from the Canaanites, and possibly the original sanctuary of the Levites, was probably destroyed by the Philistines after the battle of Ebenezer (1 S 41), a catastrophe to which Jeremiah, apparently, alludes (Jer 7¹²). Subsequently the family of Eli was established at Nob, which thus became a sacred shrine.

⁴ Cf. 1 S 25²⁴, 2 K 4³⁷, Est 8³, Mt 13²⁹, Lk 8⁴¹, Ac 10²³.

What became, however, the most important of all the Israelite sanctuaries was that of Jerusalem, which was held by the Jebusites till the time of David (cf. Jg 12¹ 19^{11f}, 2 S 56⁹). Here the sacred rock and cave, which have played so conspicuous a part in Hebrew, Christian, and Muhammadan worship, may already have been the seat of an earlier Jebusite shrine. When Solomon built on this site his splendid Temple and royal palace, the former (as in the case of Shiloh) was sanctified by the presence of the ark.

An interesting survival of the earlier Israelite shrines is probably to be seen in the institution of Levitical cities. This is a feature of the late priestly legislation, and is probably to be accounted for by the fact that the Levites, who in the post-Exilic period occupied a position subordinate to the priesthood proper, were the descendants of the old local priestly families, which ministered at the local sanctuaries or 'high places.' The Levites possessed large estates at such places as Shechem, Gezer, Hebron, Beth-shemesh, Kedesh, Taanach Ashtaroth, Ramoth-Gilead, Bezer, Gibeon (cf. Jos 21-42). These priestly estates existed in the various localities where there had been a 'high place.' 'Could the complete history of these Levitical cities be written it seems probable that in each case it would be found that each had been the centre of an independent shrine in the days before Josiah's reform.'¹

Recent excavation in Palestine has brought to light many remains of ancient 'high places' and altars.² It was around these shrines that the worship of the ancient Hebrews was concentrated. To these spots they flocked as the annual festivals came round, and at the recurring new moons and sabbaths, to offer their tithes, their firstfruits, and their sacrifices (cf. 2 K 4²³, Am 8³, etc.). The character of this worship was essentially joyous, music, dancing, and revelry being marked features (cf. Am 6^{5f}). Unfortunately it is impossible for us to reconstruct fully and adequately the ceremonies that accompanied the ancient worship. All we can say with certainty is that its centre was the local altar—in some cases the local shrine being of more than local importance (Shiloh, later Dan, Bethel, and Jerusalem). The altar had as its practically indispensable adjuncts the sacred pillar (*massēbāh*) and *āshērāh*, or sacred pole, which was the symbol, apparently, of a goddess.³ Another adjunct was the sacrificial hall or room (Heb. *lishkāh*) where the sacrificial feast was held.

The local sanctuaries were served by a local priesthood, though it is improbable that, as a rule, more than one family exercised the priestly office at any smaller particular locality. The story of Micah given in the appendix to the book of Judges (ch. 17f.) shows how a shrine could be set up by the head of a household, who could appoint one of his sons (an Ephraimite) to act as his priest. It is only later that a wandering Levite is appointed in his place, who subsequently was carried off by the Danites and became the founder of the long line of priests who ministered at the famous sanctuary of Dan in the far north. Similarly David made his sons priests (2 S 8¹⁸), although the principal priest at the time was Abiathar, a descendant of Eli. It was natural that the priests who were attached to the more important shrines should themselves increase in importance and wealth, in course of time. 'The wealth thus acquired was in many instances invested in land in the vicinity of the city in which the priests officiated. In course of time, therefore, there were large priestly estates in and about the cities where temples or high places were situated.'⁴ According to Ezk 44⁷, in the pre-Exilic period the manual labour connected with the shrines and sacrifices had (doubtless only after wealth had increased) been performed by foreign slaves, who were kept by the more wealthy priests.

The character of the old simple worship of Jahweh was fundamentally transformed when the Israelites passed from the nomadic stage and became a settled agricultural community. Jahweh, who had at first been regarded as essentially a war-god, who led His chosen people to victory against enemies—though this was not the only aspect of His character—now became the God (Baal) of the land, and as such the God of agricultural law. The body of agricultural laws which gradually grew up under these conditions came to be looked upon as an essential part of the original covenant by which Jahweh became the God of the Hebrews (Ex 21-23). Another result

was that the great festivals were placed upon an agricultural basis.

'To the simple Passover feast, which commemorated the yeasting time of domestic animals, an agricultural offering of first fruits in the form of unleavened bread was added. This occurred because the first ripe grain was gathered at the very season in which the old nomadic feast fell. Seven weeks later a new agricultural festival, commemorative of the completion of the harvest, was added, while the old autumn festival of the date harvest became the festival of the grape-gathering.'¹

The local sanctuaries were the centres at which this worship was carried out, and it was at these shrines that for several centuries Jahweh was worshipped with the full sanction of the religious leaders (cf. 1 S 7¹⁷, 1 K 3⁴ 18³⁰, etc.). 'Such local worship is alone contemplated in the oldest Hebrew legislation ("in every place where I record my name I will come unto thee and I will bless thee" [Ex 20²⁴]).'² But by this very fact it was exposed to serious dangers. The admixture of heathen Canaanitish elements threatened seriously to imperil the purity of the old simple tribal religion, and it was against this, the mixed cultus, that the 8th cent. prophets, especially Hosea, raised their powerful opposition. The great prophetic movement marked the conflict of Israel in strife with its own paganism. It is clear from the language of the prophets that in the 8th cent. B.C. during the prosperous reigns of Jeroboam II. and Uzziah public worship, both in the Northern and in the Southern Kingdom, was carried out, especially at the great central shrines (Bethel, Jerusalem), with great zeal, elaboration, and pomp. The ceremonial was splendid, wealth was lavished on the sanctuaries, and these were thronged with zealous worshippers. And all this, it must be remembered, was ostensibly worship of Jahweh. What Amos inveighs against is not open disloyalty to the national God, but a wrong conception of the kind of service acceptable to Him. The worship is Jahweh-worship, but inspired by heathenish ideas.³ Doubtless this worship was, on the whole, purer in Judah than in N. Israel. But in Judah heathen tendencies, though submerged, were powerful, and asserted themselves in violent reactions, such as occurred, in the 7th cent., in the reign of Manasseh.

Perhaps the general character of the old worship at the local shrines, or *bāmōth*, may be illustrated from similar festivals that take place in Syria and the neighbouring lands to-day. S. I. Curtiss has illustrated this aspect of the matter in his *Primitive Semitic Religion To-day*,⁴ where the results of considerable and extensive research are gathered together. He shows that many sacred spots, probably in some cases the very sites of ancient 'high places,' are still venerated and resorted to by the peasantry. At many of these time-honoured spots 'there is virtually a priesthood in existence. . . . They do not have the designation of priests; they are known rather as sheiks of certain shrines, or as servants of certain saints. But their duties and emoluments correspond in some degree to those about which we read in the Old Testament.' Usually one priest or priestly family is connected with such a shrine, though cases occur where several priestly families live together at one shrine, as at Nebi Daud (outside the wall of Jerusalem). Sacrifices are still, apparently, offered at some of these shrines, especially in connexion with vows, and dues in the shape of the hide of the animal, and one of the quarters, are paid to the minister of the shrine, who in ordinary life is an orthodox Muslim.⁵

Vows at such spots play a considerable part in modern popular religion in Syria. 'During the year, at a popular *makam* [sacred spot or shrine], many sheep and goats, and sometimes larger animals, are killed in payment of vows. Besides there are vows of grain, which are promised on condition of good harvests. These vows are collected by a servant of a shrine.' According to a native authority,⁶ 'if the sheik, that is, the minister of the shrine, is present, he kills the victim, otherwise any one who can read the first sura of the Koran. He uses the formula, "This is from thee and for thee." The *dahhiyeh* sacrifice is slaughtered by the one who brings it. If, however, it is brought by a woman, she puts her hand on that of the man who kills it.' The minister of the shrine is not

only its guardian, but also the repository of the legends connected with its origin and the life of the saint whose name and deeds are commemorated. Not all the modern shrines have annual festivals. Where such a festival occurs it is in some cases attended by thousands of people.

The festivals referred to by Amos (521-23) must have borne a strong general resemblance to these present-day celebrations, which are probably their lineal descendants. Reference may also be made in this connexion to the annual feast of Jahveh at Shiloh (Jg 21^{19, 21}), where dancing by the maidens of the locality was a feature (cf. also Ex 325. 6-19).

For the use of images by the early Hebrews, and the prevalence of idolatrous tendencies among them, see art. IMAGES AND IDOLS (Hebrew and Canaanite), vol. vii. pp. 138-142. It was by the 8th cent. prophets Hosea (846 131f.; cf. 34) and Isaiah (28. 20) that the first effective protest was made, apparently, against the use of idolatrous emblems in Jahveh-worship. It was probably at Isaiah's instigation that Hezekiah was moved to destroy the brazen serpent (*nehushitan*) which had long been an object of worship (2 K 184). Such serpent-worship was widespread in antiquity, and appears to have prevailed, as a popular superstitious practice, among the Hebrews, if we may judge from the results of the Gezer excavations.¹

(c) *The effects of Josiah's reformation.*—The remarkable and far-reaching movement of reform which expressed itself in the Deuteronomic legislation and was inaugurated in practice by the drastic action of King Josiah in 621 B.C. was the outcome of an alliance between the prophetic party and the priesthood. We have already noted that the possibilities of such an alliance had always been greater in Judah than in the Northern Kingdom. It now became an accomplished fact, and the results were momentous. The two great elements in the religious life of the community now united in a sustained and sincere effort to translate the lessons of the teaching of the great 8th cent. prophets into practice, by fundamental reforms in the religious institutions of the nation. The aim was to make public worship a more fitting and adequate instrument for expressing the prophetic religion. It was essential that the rites of worship should be purified, and divorced from the heathen accompaniments and associations in which they were involved. To effect this end the reformers insisted on two things, the nationalization of the worship and its centralization in Jerusalem. The old time-honoured, local sacrifices of clan and family were to be suppressed, and all the worship (including the private sacrifices) was to be concentrated in one central sanctuary in Jerusalem.

It was only by such a drastic reform that the necessary break with age-long traditions and associations could be effected. We are expressly told that the Passover celebrated as a result of the reform movement was unprecedented (2 K 23²¹⁴). This was because it was kept, on this occasion, not as in the past by the people in their own homes, but by the united nation in Jerusalem.

The suppression of the local shrines and the centralization of the worship mark a revolution. With the publication and national acceptance of the Deuteronomic code the beginnings of the Canon were formed which was to grow into the Hebrew Bible; and with the centralization of the worship the first stone of the edifice was laid which was later to develop into the post-Exilic Jewish Church. The foundations of Judaism were laid.

The aim of the reformers was to gather up the local sacrificial rites into a truly national worship.

Deuteronomy 'cuts at the roots of the family and tribal sacrifices when it forbids the offering of sacrifice elsewhere than at the central sanctuary (1213-18. 27). But it does more than merely forbid. It provides the great festivals, which had their close association with the spring sowing and the harvest, and which, being common to all men, brought the people into contact with their heathen neighbours, with motives taken from the history of Jahveh's dealings with His people. The people, when they come together to worship their God, are to come to a shrine which has associations with their national life and with that alone; and they are to worship through forms which continually impress upon them the unity of their historic life as a people. Even when the private man comes to offer his personal recognition of Jahveh's bounty to him, he does it through a

ritual in which he recounts how he belongs to a nation with a past which is great because it is full of God's grace (xxvi. 1-11).¹

This national impress upon the character of the worship was never lost. The old agricultural feasts, though their primitive features were not eliminated, acquired a new significance. The Passover became the festival of national redemption; Pentecost (the 'feast of weeks') was transformed into a commemoration of the giving of the Law—the festival of Revelation; and Tabernacles was invested with the associations of the wilderness life. The old unity of the nation, which had expressed itself in the nomadic period by the gathering of the clans at a central shrine, was recovered, and henceforth remains a permanent feature of the cultus.

Another momentous result was the disestablishment of the local priesthood. The legislation of Deuteronomy provides no complete law of the priesthood. It merely deals with the practical consequences of the centralization of the worship as these affected the old order of priests. The members of this order, who are referred to as 'Levites,' are still priests *de jure*. They are all 'levitical priests,' and are so styled in the Code ('the priests the Levites' [Dt 18¹ etc.]). But in consequence of the new legislation the exercise of priestly functions can only be carried out legitimately in the central sanctuary. The rural priest ('the Levite within thy gates') can only secure the name and rights of a priest when he removes to Jerusalem (Dt 18⁶⁵).

It was only in the later legislation of P that the distinction between priests and Levites grew up. The Levites, who were the descendants of the old local order of priests, were then degraded to an inferior rank, and the priesthood proper was confined to the family of Aaron.

The immediate results of the Deuteronomic reform seem to have proved disappointing. So drastic a break with age-long tradition could not at once be absolutely successful. In the dark days that preceded the final extinction of the Southern Kingdom there were lapses to older practices, and even to idolatry. But a real step forward had been taken and the way had been prepared for the later reconstruction of the Jewish community who survived the Exile as a Church-nation with one holy sanctuary served by an official priesthood which is set apart for the performance of holy functions. The central idea of Ezekiel and his successors is that of a holy God, worshipped in the holy land in one holy sanctuary by a holy people whose sacrifices are offered by a sacred order of ministers, who constitute a holy priesthood.

2. *The worship of the second Temple.*—The erection of the second Temple was not improbably the work of the remnant of the old Israelites who had been left behind in the land; but the leaders seem to have been Babylonian Jews. It was from the exiles in Babylonia that the enthusiasm and energy were drawn which impelled the somewhat weary and sluggish Palestinians to move forward. But it was, at first, a 'day of small things.' The new structure appeared mean and despicable in the eyes of those who remembered 'this house in its former glory' (Hag 2³). But Haggai's bold prophecy of future glory (2⁷) was destined ultimately to be fulfilled.

It is important to realize that the worship of the restored Temple, though influenced to some extent by Ezekiel's ideas, did not at first conform to the elaborate prescriptions of P. It was based upon the Deuteronomic law, which was still the only written form of the Tōrah of Moses. Even in Malachi (? c. 450 B.C.) the conception of the

¹ A. C. Welch, *The Religion of Israel under the Kingdom*, London, 1912, p. 209.

¹ See R. A. S. Macalister, *The Excavation of Gezer*, ii. 399.

priesthood is still essentially that of Deuteronomy; it belongs to the House of Levi (Mal 2⁴). It is true that the distinction between priests and Levites had been recognized already at the time of the Return, if we may judge by the list of those who came up with Zerubbabel (Neh 7). But the relatively small number of Levites there given may be explained, perhaps, by supposing that most of those tabulated as priests were originally Levites whose claim to the priesthood had been recognized. Ezekiel's influence was obviously at work. A clear indication of this appears in Zec 3⁷, where one of the principal functions of the high-priest is to keep God's courts.

'Here we have an unmistakable indication,' says Robertson Smith, 'that Ezekiel's conception of holiness, and his jealousy of profane contact with holy things, had been taken up by the spiritual leaders of the new Jerusalem. There is, therefore, a strong presumption that from the first the arrangements and ritual of the second Temple were more closely conformed to the principle of concentric circles of holiness than those of the first Temple had been.'¹

The ideas of Ezekiel were potent—in particular the conception of the service offered as a stated and regular ceremonial; but the ceremonial had not yet attained the elaborateness of the Priestly Code. That was only realized later, when Ezra promulgated his edition of the Tōrah.

The date for this event usually given (444 B.C.) is by no means certain. Ezra's mission may plausibly be assigned to the reign of the second Artaxerxes, in which case some date between 400 and 390 B.C. is more probable.

²That the stated services of the first ninety years of the new Jerusalem were much less elaborate and costly than the Priestly Code prescribes seems to follow from Ezr 9⁵, where we learn that [at the time when Ezra arrived in Jerusalem] the evening oblation was still only a *minḥa* or cereal offering. The same thing follows still more clearly from Neh 10³², where we see that a new voluntary tax became necessary when the full Pentateuchal ritual was introduced. Before that time the stated service appears to have been maintained, with much grumbling and in an imperfect way, at the expense of the priests (Mal 16-19).²

With the promulgation and public acceptance of the full priestly law in Jerusalem by Ezra the services in the Temple became more elaborate and the priesthood more fully organized. This process, perhaps, did not begin till after 400 B.C. Unfortunately the history of the period 400-200 B.C. is very obscure. That Ezra encountered much opposition from the old conservative party in Jerusalem is clear; and this ultimately culminated in the Samaritan schism and the erection of a rival Temple on Mount Gerizim (probably about 330 B.C.). After this event the strict hierarchical party within the Jewish community held undisputed sway. The elaboration of the Temple worship proceeded, it would seem, without a check; and its effects are visible in the work of the chronicler (c. 300-250 B.C.). The elaborate organization of the Levitical arrangements in the Temple described in 1 Ch 23 ff. no doubt reflects the realities of the writer's own time. Here the duties of priests and Levites (now two completely distinct orders), with those of the subordinate classes of doorkeepers and singers, are fully set forth. The *teaching* of the Law to the people had now, apparently, become a recognized part of the functions of the priestly class. The priest was also a teacher (2 Ch 15³). Possibly a system of schools for such teaching had been established (cf. 2 Ch 17⁷⁻⁹). The priestly class was also in control of the courts of justice (2 Ch 19⁴⁻¹¹), and this function descended from them later to the Rabbinical doctors of the Law (scribes). The care for public worship and its elaborate organization which the chronicler ascribes to such kings as David, Solomon, Hezekiah, and Josiah illuminate the actual state of affairs as he knew them.

In these acts praise, supplication, and thanksgiving are a prominent feature. The old abuses of worship denounced by Isaiah and Jeremiah have passed away. We are confronted with a pious community that finds in the great services of the Temple its highest satisfaction and constant care. The ancient ritual of animal sacrifice was celebrated with pomp and impressive ceremonial. But it was no mere empty formality, devoid of spiritual significance and appeal. It was hallowed by true spiritual fervour, by the sense of sin forgiven and by unstinting recognition of the goodness of the Giver of all good things. Especially significant in this connexion is the large place given to prayer. 'It is hardly possible to read the prayers of the great kings in Chronicles and not feel that they echo a liturgy of prayer—for the individual and for the nation.'¹ It is indeed highly probable that some of the older liturgical prayers, embodied in the Prayer Book of the synagogue, were already, in an earlier form, in existence at the time of the chronicler. The service of music and praise was especially rich, and is dwelt upon with loving minuteness by the chronicler, who was himself, perhaps, a member of one of the Levitical choirs (cf., e.g., 2 Ch 5¹²). The Psalter was the book of praise (cf. 1 Ch 16^{8ff.}).

That the service of prayer and praise was liturgical in character is clear from the fact that the people were expected to respond: 'And all the people said, Amen, and praised the Lord' (1 Ch 16³⁶). It is probable also that the Law was read in public worship. At any rate, the recital of the *Shema* ('Hear, O Israel') is almost certainly as old as this period, as can be shown by the antiquity of the present (synagogue) Benedictions that accompany it.

As Elmslie remarks: 'Even if it be thought that this picture represents rather the ideals of the Levites than the actual attainments of the community, it is still important that such a standard of worship was conceived by the priests and set before the people. One recalls the words of the great prophet of exile or post-exilic times who wrote: "for mine house shall be called an house of prayer for all peoples" (Is 56⁷). His was a vision of the Temple as the centre of the whole world's worship. To the Chronicler it had at least become a true "house of prayer" for Israel.'²

How deep and real the devotional spirit could be that underlay the imposing ceremonial of the Temple worship can be seen from the Psalter, which may be regarded as the hymn-book (and also, to some extent, as the prayer-book) of the second Temple.

Here the worshipful spirit, which lingers so lovingly on the services and devotions of the House of God (cf. Ps 84, 274 422 1004, 122, 15), which finds in that House the focus of its devotion (Ps 57 135² 99⁵ 9 132⁷), which delights to celebrate the pomp ('the beauty of holiness' = holy adornment or vestments: Ps 29² 96³; cf. 1 Ch 16²⁹), and the stately processions (Ps 68²³⁻²⁹ 243⁶ 7-10) of the Temple, has yet no narrow conception of worship. To the Psalmists the God of Israel is also the God of nature, and is celebrated as such in the splendid nature-psalms (S, 192⁸, 29, 104, 107, 139, 147, 148); and the transition from one aspect to the other is easy (Ps 29^{2ff.}). Thus in the composite Ps 19 the psalmist passes from extolling the wonders of nature (the light of nature) to praise of the Law (the light of revelation). But in truth the range of the Psalter is as wide as the outlook and experience of man; the Psalmists touch the height and depth of the human spirit; and the universality of their appeal reveals how an intense and particularistic religion can expand and deepen when it is founded upon a genuine and profound spiritual experience.

The feeling excited in the breast of a pious Jew by the splendid ceremonial of the Temple worship as it could be witnessed at the end of the century (about 200 B.C.) during which the Chronicler flourished, is fervently expressed by Ben Sira in his striking tribute to the high-priest Simon (II), surnamed 'the Just.' He is pictured as he appeared in the Temple on the Day of Atonement, where 'clothed in his glorious robes' and surrounded by 'all the sons of Aaron in their glory' he 'went up to the altar of majesty and made glorious the court of the sanctuary.' The crowded court and

the worship of the people who receive the high-priestly blessing are vividly described:

'Then the sons of Aaron sounded
With the trumpets of beaten wood;
Yea, they sounded and caused a mighty blast to be heard
For a remembrance before the Most High.
(Then) all flesh hastened together
And fell upon their faces to the earth,
To worship before the Most High,
Before the Holy One of Israel,' etc.¹

The upheaval produced by the attempted suppression of Judaism at the hands of Antiochus Epiphanes, and the consequent Maccabean revolt, was fruitful in momentous consequences. Judaism was rooted more firmly than ever in the hearts of true believers by the persecution. Affection for the Law was deepened, and the study and knowledge of its ordinances was more widely diffused and more actively pursued among laymen. When the fury of the storm had spent itself, Judaism emerged profoundly modified in many important ways. New parties—the Pharisees and Sadducees—came into existence; a new literature, which found its classical example in the book of Daniel, emerged. A new native dynasty ruled, and communal life was re-organized. A new Temple-feast, commemorating the re-dedication of the sanctuary (164 B.C.) after its defilement by the Syrian tyrant, was added to the sacred calendar. This is known as the Feast of Dedication (cf. Jn 10²²), or *Chanukkah*, and is celebrated in the winter for eight days. It was inaugurated in the circumstances described in 1 Mac 4^{36ff.}: 'After the Temple had been purified, a new altar of burnt-offering built, and new holy vessels made, the fire was kindled on the altar, the lamps of the candlestick lit, and the re-dedication of the altar celebrated for eight days.'² According to Josephus, its popular name was the 'Festival of lights.'³ But during the period that followed the establishment of the new Jewish state a profound change in the whole character of Jewish piety manifested itself in the rise of the Pharisaic party and wide extension of the synagogue as a religious institution. The monopoly of religious leadership, which had hitherto been enjoyed by the priests, was now, perforce, shared by the popular party of the Pharisees, who represented the pious laymen, the old priestly party, which was still all-powerful in the Temple, being represented by the Sadducees.⁴ The synagogues were under the control of the Pharisees.

The origin of the synagogue as a religious institution is enveloped in obscurity. The Jewish scholar Moriz Friedländer⁵ regards it as a product of the Diaspora, which came in to Judæa from outside. If the synagogue had already become an institution in Judæa at the time of the Maccabean revolt, the silence of the books of Maccabees regarding it would be inexplicable. On the other hand, the existence of synagogues in Egypt during the second half of the 3rd cent. B.C. (during the reign of Ptolemy Euergetes, 247-222 B.C.) seems to be demonstrable;⁶ while a famous synagogue was certainly in existence at Antioch in the reign of Antiochus Epiphanes. The circumstances of the Diaspora would naturally promote the growth of such an institution.

Friedländer insists that the synagogues of the Diaspora were pervaded by a much freer atmosphere than those of Palestine, which were under Pharisaic influence. The former, he thinks, were in reality places of teaching and instruction (*Lehrhäuser*). They were thus far more than houses of prayer; while the Pharisaic synagogues, which arose later, were more of the latter character. Though sections from Scripture were read, and edifying discourses were given in them, prayer still remained the principal element, and had many points of contact and relation with the sacrificial cultus, as the existing prayers of the synagogue liturgy, which originated from the time both before and after the Roman destruction of the Temple, testify. The

Sabbath worship of the Diaspora was, according to Friedländer, of a different character; it consisted not merely of lessons from Moses and the Prophets, and of prayer, but principally in the exposition of Holy Scripture, which was allegorical in character, which saw 'in the words [of the text] symbols of a secret nature revealed in allegories,' and deduced from them the loftiest philosophical ideas. The Diaspora synagogue also, according to Friedländer, had as a distinguishing feature that it did not derive its instruction from the authoritative oral teaching of the priest, but that whoever possessed knowledge in the Scriptures was here at liberty to come forward in order to expound God's word. This was still the case in the Diaspora synagogues in the times of the Apostles (Ac 13¹⁵).

Friedländer in these contentions seems to exaggerate the difference between the orthodox synagogues of Palestine and those of the Diaspora. In both the element of instruction—the reading and exposition of the Law and the Prophets—was the main element. In both, also, prayer occupied an important place. Indeed, the most frequent designation of 'synagogue' in Philo is *προσευχή*—a term which also occurs in Josephus.¹ One principal difference there was: in the synagogues of the Diaspora the Scriptures, and probably the prayers, were recited in Greek. The allegorical method of expounding the Scriptures was more freely employed in the Dispersion—though it was by no means absent from the ancient homiletic discourses given in the synagogues of Palestine. Pharisaic restrictions only became marked after the close of the 1st century A.D. Up to that time a greater freedom prevailed, probably, in the synagogues of Palestine as well as in those of the Diaspora. A trace of the survival of such a spirit in certain Hellenistic synagogues may be seen in the fact that in the time of Origen the book of Baruch was still publicly read (in Greek).²

3. The later Temple service.—It has already been pointed out that the system of worship which was developed by the Jewish community in Palestine found its most elaborate expression in the services of the Temple of Herod. How elaborate the organization of these services was can be seen from the details that have been preserved regarding the priestly arrangements,³ which need not be repeated here. Reference may also be made to such Rabbinical evidence as is contained in the Mishnah Tractates *Middôth* and *Yômâ*—to cite only the most obvious sources. In the former minute details are given regarding the Temple structure and arrangements; while in the latter a full account is set forth of the elaborate Temple services and ceremonial on the Day of Atonement.⁴

It should be remembered that for the purposes of the national worship the land of Palestine was divided up into 24 districts (corresponding to the 24 'courses'), and one 'course' from each district (consisting of priests, Levites, and lay Israelites) was on duty in the Temple for a week at a time. Not all the priests belonging to a particular course could do duty at the same time at the sacrifice; the 'course' was therefore divided into 'father's houses.' In the same way not all the laymen belonging to a particular 'course' could be present during the whole week when its course was on duty in the Temple. It was consequently represented by a deputation at the sanctuary; the others, who had been left behind, assembled in the local synagogues (at the time when the sacrifice was actually being offered in the Temple) and engaged in prayer and the reading of Scripture.⁵ To illustrate the character of the worship which was focused in the later Temple, it will suffice here (1) to describe the ceremonies associated with one of the more popular occasions for such service, outside the three great national festivals of Passover, Pentecost, and Tabernacles; and (2) to summarize briefly the ceremonial of the daily service.

(1) The presentation of the firstfruits (*bikkurim*) was one of the occasions which gave opportunity for pompous pilgrimage to the Holy City outside the cycle of the great festivals. It was concerned with the fulfilment of the command: 'The first

⁵ Cf. Mishnah, *Ta'anith*, iv. 2.

of the firstfruits of thy ground thou shalt bring into the house of the Lord thy God' (Ex 23¹⁹ 34²⁰). These gifts formed part of the revenue of the priesthood, and were destined to be stored in the Temple. Great importance was attached to this offering, which alone among the offerings that were given to the priests by the people had to be brought by them directly to the Temple. It was of great antiquity and naturally lapsed with the destruction of the sanctuary. The description of the scene by Franz Delitzsch¹ is well known and need not be repeated.

(2) The daily routine of the Temple-worship, including the weekly Sabbath celebrations, was interrupted only by the great festivals, the most important of which were kept with special ceremonial, for several days. The characteristic features of the worship, however, are well illustrated by the ceremonial of the morning and evening sacrifice (*Tāmīd*). Delitzsch as before gives a good reconstruction.²

In the Temple itself the opening of the sanctuary gates was the signal for the actual slaughter of the sacrifice, the sprinkling of its blood upon the altar, and the flaying of the victim. The pieces into which the sacrifice was divided were carried by the six allotted priests (each taking one piece) to the altar, while a seventh carried the offering of flour, an eighth the baked meal-offering (of the high-priest), and a ninth the wine of the drink-offering. These were all laid at the foot of the altar-ascent and salted: and then all the priests assembled once more in the Hall of Polished Stones, there to celebrate, first of all, a service of prayer. It is highly significant that the sacrificial service should have been interrupted at this point and temporarily suspended. This can only have grown up as a concession to the overwhelming popular feeling in favour of the recital of the prescribed sections of the Law, with the appropriate accompaniment of prayer. The priests retired for this purpose to the Hall of Polished Stones, which was sufficiently near the court to allow of their quick withdrawal to it and rapid return to the sanctuary. It will be remembered that they had already assembled at early dawn in this chamber to cast the first lots for determining the distribution of certain priestly duties. The passage in the Mishnah³ which speaks of this meeting and its purpose runs as follows:

(1) And they descended and entered the Hall of Polished Stones to read the *Shema*.

(2) The president said to them: 'Give one blessing'; and they blessed,

(3) And recited the Ten Commandments and the *Shema* (in its three sections)

(4) And they blessed the people with three blessings; viz. (the blessing) 'True and firm' (אמת ויציב), that of 'service' (עבודה), and 'the blessing of the priests' (ברכה כהנים).

This brief account is extraordinarily interesting, but not free from difficulty. The purpose for which the priests gathered is described as 'to read (or recite) the *Shema*.' This is a summary way of describing the reading of certain portions of Scripture the most important of which was the *Shema* (Dt 6⁴⁻⁹), and certain accompanying liturgical Blessings. The leader or 'president' is to be regarded, not as the minister who recites the prayers on behalf of the congregation, but as the leader who leads in the recitation, the assembled priests all joining in. Possibly 'Bless' here means merely 'Begin the liturgical service.'

It is explicitly stated in line three that the Decalogue was recited in close connexion with the

¹ *Jewish Artisan Life*, London, 1902, ch. iv. ('A June Day in ancient Jerusalem during last Decade before Christ'). The firstfruits had to be presented annually between Pentecost and the Feast of Dedication.

² *Ib.* Cf. also the art. 'Temple-Service' in *EBi* (by the present writer), esp. cols. 4951-4956.

³ *Tāmīd*, v. 1.

Shema. This was the ancient practice, later discontinued because the *Minim* were wont to allege that the moral law, summed up in the Decalogue, was more important than all the rest.¹ Possibly the first two sections only of the *Shema* were recited in the ancient liturgy, and the addition of the third may be due to a gloss, reflecting the later practice. The recital of the *Shema* was preceded by a Benediction; but the Mishnah here gives no clue as to what it was, though, according to the Babylonian Talmud,² the question was early disputed by the Rabbinical schools. Probably the form used was that known as *Ahabah rabbah* ('with abounding love'), which is still chanted in the synagogue service.³

In the fourth line of the Mishnah passage the present text runs: 'And they blessed the people with three blessings.' As I. Elbogen has pointed out,⁴ the words *the people* are probably an incorrect gloss. The priests were engaged in a service of prayer within a semi-private room, outside the Temple proper. There could be no question of blessing the people, which would naturally form part of the public service within the sanctuary. The three blessings that followed coincide partly with well-known liturgical forms: 'true and firm' is the name still given to the Blessing recited after the *Shema*—as used in the Temple its form was doubtless much shorter than the recension now current in the Prayer Books. 'Service' (עבודה) was probably an earlier form of the 17th paragraph of the *Shemōnēh 'Esrēh*,⁵ and expressed gratitude for the splendid Temple-worship. The last 'Blessing of the Priests' was probably a petition uttered for the priests.

This liturgical service of prayer for the priests is noteworthy. It shows how high a place prayer had come to assume, even in the sacrificial worship. The high place accorded to the liturgical recitation of the Scriptures is also a remarkable feature, and serves, perhaps, to show how far-reaching the influence of Pharisaic and synagogal piety really was.

After the conclusion of this priestly liturgy the assembled priests again drew lots—the third and fourth—to determine who should offer the incense in the sanctuary, and who should lay the various parts of the victim upon the altar. Those on whom no lot had fallen were now free to go away, after divesting themselves of the priestly dress. Then followed the sacrifice proper—the offering of incense and of sacrifice, accompanied by prayer. At the solemn moment when the chief officiating priest, alone within the sanctuary, offered the incense, which became visible in clouds of smoke, the people withdrew from the inner court and prostrated themselves, spreading out their hands in silent prayer (cf. Rev 8^{13t}). The incensing priest, after prostrating himself for worship, also withdrew from the sanctuary. A period of silent prayer followed, and the people were then blessed by the priests, the five priests who had been engaged in the offering of the incense standing on the steps in front of the Temple proper, and, led by the principal officiant, pronouncing the blessing on the people with uplifted hands.

The offering of the burnt-offering now went forward, together with the appropriate accompaniments (meal-offerings and drink-offering), and then followed the musical part of the service. The Levitical choir, to the accompaniment of instrumental music, sang the psalm of the day. The psalm was sung in three sections, the end of each

⁴ *Studies in Jewish Literature*, Berlin, 1913, p. 80f. There is some evidence that the text was read without the suspected words in earlier times.

⁵ Cf. Singer, *The Authorised Daily Prayer Book (Hebrew and English)*, p. 50 f.

being marked by three blasts on silver trumpets (blown by a body of priests), at the sound of which the people once more prostrated themselves for worship. This terminated the morning service, and private sacrifices were then proceeded with. The evening service (about 3 o'clock in the afternoon) was practically a repetition of the morning, the same priests officiating—except in the case of the incensing priest, for whom a fresh lot was taken. On the Sabbaths and great festivals the essential features of the services were the same. There was more elaboration, and a larger number of sacrifices were offered, but the character of the worship was substantially identical.

There are, of course, to be noted special ceremonies in connexion with particular occasions. The most remarkable of these, perhaps, was the Water-Feast held in connexion with the Feast of Tabernacles. It began at nightfall on Tishri 15 (first day of Tabernacles) and lasted till the following morning; and was repeated on other nights of the festival (except Friday). This was the only celebration in the Temple that took place by night. The place was the court of the women, which was specially illuminated for the occasion, the women looking on from their galleries. A torchlight procession, dances, and singing followed. Towards morning a more solemn note was introduced by the chanting of the fifteen 'songs of Degrees' (Pss 120-134) led by the Levitical choir to the accompaniment of various musical instruments. During the day the great feature was the procession which accompanied the priest who had been allotted the duty of drawing water for the libation from the pool of Siloam.¹ A relic of these processions still survives in the worship of the synagogue.

4. The synagogue worship.—For the transition, which had been gradually prepared for, between the sacrificial cultus and the form of worship which found expression in the synagogue, as well as for the rivalry between synagogue and Temple, the momentous consequences of the destruction of the Temple, and the character of the synagogue prayers, reference may be made to the article PRAYER (Jewish).² Here it must suffice to make a few general observations on the characteristic features of the synagogue worship. (1) In harmony with its origin the synagogue worship is essentially of a popular and democratic type. It has no organic connexion with the priesthood; its ministers are essentially laymen—at first it had no professional ministers at all, the Rabbis whom it singled out for special honour being simply learned laymen; its services, though liturgical in character, and provided with (in many cases) interesting and dignified ceremonial, are essentially simple in character; their tendency is to emphasize the element of instruction and edification (the reading and exposition of Scripture), with which is combined the service of praise and prayer.

(2) As has already been pointed out, the synagogue, as a religious institution, had already come into existence long before the destruction of the Temple and the consequent cessation of the sacrificial worship. It met a widespread religious need, owing to the centralization of the sacrificial worship in Jerusalem. While only a limited number of Jews could be present at any one time in the central sanctuary, and assist in the offering of the sacrifice, no such disability would apply to the services of the synagogue. To a certain, though limited, extent the synagogue was affiliated to the Temple worship.³ It will be remembered that, for purposes of the daily sacrificial worship, not only the priests and Levites, but also the lay Israelites generally were divided into twenty-four courses of service, each of which had to take its turn in coming before God (in the Temple) every day for a whole week by way of representing the whole body of the people, while the daily sacrifice was being offered to Jahweh. But it appears that

¹ See W. O. E. Oesterley and G. H. Box, *The Religion and Worship of the Synagogue*, p. 401.

² I. 3 ff.

³ During the latter years of the Temple's existence there was, apparently, a synagogue within the Temple precincts.

not the whole division of Israelites on duty but only a deputation from it was actually present at any given time in the Temple; the others, who had been left behind, assembled in the local synagogues (at the time when the sacrifice was actually offered in the Temple) and engaged in prayer and the reading of Scripture.¹ But in spite of this affiliation the synagogue was entirely free from the limitations applying to a centralized worship and a sacerdotal system. 'Hence, when the latter disappeared in the great catastrophe of 70 A.D., the synagogue was the one institution exactly fitted to be the instrument for the reconstruction of Judaism.'²

(3) At the same time it is important to remember that the Temple-worship has profoundly influenced not only the structure of the synagogue liturgy, but also the form and substance of its prayers.

The disappearance of the old sacrificial cultus was felt by pious Jews at the time as a real catastrophe. But the way had already been prepared by Rabbinical teaching (not to speak of that of the great prophets and some of the psalmists) for a spiritualizing of the sacrificial idea; and this tendency received a strong impulse from the exigencies of the situation which left the synagogue as the sole religious institution in which the Jewish religious consciousness could express itself. A real satisfaction of the instincts and cravings which had been, to some extent, met by the splendid Temple-worship was provided by the traditional liturgy of the synagogue, which could be regarded as a sort of parabolic and metaphorical fulfilment of sacrifice in the following ways:

(a) It furnished forms of prayer for daily worship which corresponded to the original daily sacrifice. In accordance with this principle those days for which additional sacrifices had been appointed (Sabbaths, new moons and Festivals) were provided with additional forms of prayer, called *musaf* (= 'additional').

(b) In the synagogue Liturgy special sections from the Law and the Mishnah, which contain the original enactments about the daily and Sabbath offerings, occupy a place at the beginning of the service;³ and on high days and festivals it is the rule to supplement the Pentateuch lesson by the paragraph from the Law which prescribes the sacrifices appropriate to the day. For instance, during the Feast of Tabernacles the paragraph Nu 29¹²⁻³⁹ is read in addition from a second scroll.

The principle underlying all this is stated in a haggadic passage in the Talmud. Abraham is represented to have anxiously asked God 'how the sins of Israel would be forgiven when their Temple was destroyed, and they should have nowhere to bring their sacrifices, and he was told that to read the duty of these sacrifices from the *Torah* would be accepted as a full equivalent.'⁴

(c) Further, various petitions have been introduced into the prayers for the restoration of the Temple services and sacrifices. In some cases an older prayer has been amplified in this sense.

In these various ways the sacrificial idea has been largely spiritualized. 'The daily offering of prayer, praise, and thanksgiving morning and afternoon in the Synagogue is a spiritual counterpart and fulfilment of the old daily sacrifice in the Temple. In this way the words of the prophet Hosea are in spirit fulfilled: *We shall render as bullocks (the offering of) our lips* (Hos 14²).'⁴

(4) The language employed in the synagogue liturgy is Hebrew, with a slight admixture of Aramaic. As has already been pointed out, the older elements in the prayers go back to a considerable antiquity (long before the Christian era)—possibly, in some cases, to the late Persian period. In such cases the prayers very probably

¹ *Ta'anith*, iv. 2; Oesterley and Box, *The Religion and Worship of the Synagogue*, p. 360.

² Oesterley and Box, *loc. cit.*

³ Cf. Singer, *The Authorised Daily Prayer Book (Hebrew and English)*, p. 9 ff.

⁴ Oesterley and Box, *The Religion and Worship of the Synagogue*, p. 362. It may be added that in the Talmudic period the synagogue building seems to have been modelled, to some extent, on the Temple. The entrance was from the east, and the ark, containing the scrolls of the Law, was in the west. In the modern synagogue the position is exactly reversed, the ark being placed in the east end, and the reader, while on the *bema*, facing east.

grew up in connexion with the Temple liturgy and were afterwards transferred to the liturgy of the synagogue.

The language in the fixed parts of the liturgy is not only Hebrew, but largely Biblical Hebrew—in fact a Scriptural character is deeply impressed upon the prayers generally. Whole passages (Psalms and other sections) are taken from the Bible, and Biblical language is interwoven into the texture of the prayers.

Outside Palestine among the Jews of the Dispersion in Greek-speaking countries the case was different. There Greek was largely, if not exclusively, used. It seems that not only the Scriptures, but also the most important parts (if not all) of the Liturgy—such as the *Shema* and *Shemōneh 'Esrēh*—were regularly recited in the Hellenistic synagogues in Greek, and not in Hebrew at all.¹ In the vast synagogue at Alexandria, where the Jews who attended the services were ranged according to their trades, this was the case. We are told that the signal for the vast audience to join in the Amen response was given by the reader waving a cloth from the *bema*.² Even in the Mishnah sanction is given to the use of any language whatever in repeating the *Shema*, the *Shemōneh 'Esrēh* ('Eighteen Blessings'), and the grace at meals.³ In later practice, however, Hebrew has been the only language recognized as legitimate for prayer and worship in the orthodox synagogue.

(5) In studying the synagogue liturgy it is all-important to realize the central position of the Law. The recitation of the *Shema* (which may be regarded as a summary of the Law) is invested with great solemnity, and is preceded and followed by special Benedictions, as we have seen. But the Sabbath morning service—which is the principal one—culminates in the chanting of the lesson from the Law. The reading of the sections is the occasion of much ceremony—the carrying of the scrolls to and from the 'ark' is invested with great solemnity, not to speak of the scrolls themselves, which are prepared with the most elaborate care, according to minute rules, and are treasured in gorgeous and valuable vestments. The Law itself, i.e. the Pentateuch, is regarded as the supreme and final revelation of God. It stands at the head of the canonical books, and by the side of it the other two divisions of the Hebrew Scriptures, the Prophets and the 'writings' (Hagiographa), occupy quite a subordinate place. They but serve to illustrate and enforce its precepts, and are interpreted accordingly. All this is but the expression of a profound conviction that God has chosen to make a supreme revelation of Himself and His requirements in the divine Law; and that man is sanctified by the divine Law, which is the very principle of his perfection.⁴

Jewish piety thus exhausts and expresses itself in the minute and punctilious performance of the divine Law as elaborately codified and defined by the Rabbis. The performance of these duties is regarded as exercising a sanctifying influence on the worshipper; he feels that he is, by so doing, obeying the divine voice; and in this utter obedience he finds a real spiritual satisfaction; the practice of it evokes in the breast of a pious Jew a genuine devotional spirit which finds expression in constant and regular acts of praise and thanksgiving. A characteristic feature deeply impressed upon the liturgy is the regular recurrence of formulas of blessing or benediction (Heb. *berākāh*); something like a hundred are extant in Rabbinical literature. As a Jewish writer well says: 'Every manifestation of divine protection and help became an opportunity for the pious Israelite to offer up thanksgiving in the usual form of a benediction.'⁵ In the liturgy proper the set Benediction plays an important part. One of the most famous of its constituent elements—the so-called 'Eighteen

Blessings' (*Shemōneh 'Esrēh* = 'Eighteen')—consists of a number of Benedictions constructed in regular form, which are strung together, and invariably end with the formula: 'Blessed art Thou, O Lord our God, King of the Universe, Who,' etc. Here remarkably the element of petition is mingled with that of blessing. The *Shemōneh 'Esrēh*¹ is one of the central parts of the Prayer Book of the synagogue; it recurs in various forms in all the services, and, moreover, is recited in double form, first silently and then audibly, by the congregation. It is the Prayer (*Tephillah*) par excellence (*Tephillah* is one of its designations), and is recited by the congregation standing (*Amidah* = 'standing' is another designation), the most solemn attitude for worship recognized in the synagogue service.

Special benedictions are also recited before and after the recitation of the Law, being introduced by the formula 'Bless ye.' This is in accordance with Biblical precedent (Neh 8⁶). The element of praise is also, of course, represented by the recitation of certain psalms, especially the Hallel (Pss 113–118). Another element of great importance is represented by various forms of confession of sin (Heb. *widduy*). The two great forms of this are the *Abinū malkēnū*, 'Our Father, our King,'² and the 'Al Het, 'for the sin.'³ The latter is appended to the *Amidah* prayer for each service of the Day of Atonement.⁴

LITERATURE.—For the ancient cultus: much new light has been thrown on this department of knowledge by excavation and discovery. For a good summary of these results see S. R. Driver, *Modern Research as illustrating the Bible* (*Schweich Lectures*), London, 1909; cf. also, H. Vincent, *Canaan d'après l'exploration récente*, Paris, 1907. For the discoveries at Gezer and elsewhere, the *PEFSI* of recent years, and R. A. S. Macalister's full summary in his *Excavation of Gezer*, 2 vols., London, 1912. All-important, too, are such studies as those of W. Robertson Smith, *Religion of the Semites*², London, 1894; W. W. Baudissin, *Studien zur semitischen Religionsgeschichte*, Leipzig, 1876–78; and the researches of S. Ives Curtiss, *Primitive Semitic Religion To-day*, London, 1902. See also the Hebrew, Jewish, and Semitic sections of artt. ALTAR, HIGH PLACE, IMAGES AND IDOLS, PRAYER, PRIEST, PROPITIATION, SACRIFICE (with the literature cited), and the corresponding artt. in the Bible Dictionaries; and the artt. 'Kultus (Gottesdienst)' in *Hamburger*, ii. 658 ff.

For the later Temple-service, *Hamburger* as just cited; and the elder Lightfoot (J. Lightfoot), *The Temple-Service* (*Works*, ix.), London, 1823; A. Edersheim, *The Temple: its Ministry and Services*, do., n.d. (still useful); artt. 'Temple-Service' in *EBI*, cols. 4948–4956; A. Büchler, *Die Priester und der Cultus*, Vienna, 1895; J. Hochman, *Jerusalem Temple Festivities*, London, 1908 (important for sources). See also G. H. Box, *Virgin Birth of Jesus*, do. 1916, where various ceremonial usages of the later Temple are described. For the synagogue worship see the artt. 'Gottesdienst, synagogen', by G. Dalman, in *Herzog-Hauck* (with the literature cited). The various works of L. Zunz are important in this connexion; also I. Elbogen, *Der jüdische Gottesdienst in seiner geschichtlichen Entwicklung*, Leipzig, 1913 (indispensable); I. Abrahams, *Annotated Edition of the Authorised Daily Prayer Book*, London, 1914, *Festival Studies*, do. 1906; cf. also W. O. E. Oesterley and G. H. Box, *A Short Survey of the Literature of Rabbinical and Mediaeval Judaism*, London, 1920, pt. iii., *The Jewish Liturgy*; cf. also Lewis N. Dembitz, *Jewish Services in Synagogue and Home*, Philadelphia, 1898; and W. Rosenau, *Jewish Ceremonial*, Baltimore, 1905.

The following works of a general character deal with the worship both of the Temple and of the synagogue: Schürer, *GJV*³, § 24; W. Bonsset, *Die Religion des Judentums im neutestamentlichen Zeitalter*², Berlin, 1906; W. O. E. Oesterley and G. H. Box, *The Religion and Worship of the Synagogue*², London, 1911. Other works have been cited in the body of the article.

G. H. Box.

WORSHIP (Hindu).—Worship springs from the inward feeling of dependence upon other powers, from the awe caused in man's mind by the perception of supernatural agents which influence his or others' welfare. The desire to gain their favour or propitiate them, to call forth their sympathy, to appease or inflame their wrath, has led men to invent that instrument of rite and spell which is thought to ensure and even to enforce

their assistance. Rite and spell form the centre of primitive belief and of institutions of religious or social character in ancient times. The hypothesis advanced by R. Karsten 'that strange and dangerous objects and phenomena as well as fatal events of every kind have suggested to primitive man the existence of invisible spiritual powers in the universe,' 'that at first only the cruel and destructive aspect attracted man's attention, whereas the fruitful and beneficial one almost entirely escaped him,'¹ is, though well founded otherwise, not in accordance with the facts to be gathered from Sanskrit texts and needs reconsideration in that respect, or the Indian sacrifice must be assumed to have already passed this supposed stage of primitive belief.

Hindu writers divide the various kinds of sacrifice into two principal classes: *nitya* ('regular') and *naimittika* ('accidental') *karmāni*, one following the course of the year or the duties imposed upon man during life, the other comprising incidental offerings occasioned by special wishes of the sacrificer. This is, of course, a distinction more of practice than of principle, but it seems better than the modern distinction into thanksgiving, suppliant, and expiatory sacrifices, which to the student of Indian rituals will not appear sufficient; e.g., the series of regular periodical offerings cannot be subsumed under any of these three classes. On the other hand, some scholars (e.g., Wundt)² seem to overestimate the importance of expiatory ceremonies. The *prāyāścitta*, though often mentioned, is more an accessory than a constructive element and mostly intended to rectify blunders committed against the ritual. We do meet with expiatory rites in Indian ritual,³ but on the whole the idea of expiation, as far as sin is concerned, plays no prominent part; it is more a juridical than a ritual subject and is elaborately discussed in the lawbooks. We do not hear of thanksgiving sacrifice; even the term 'suppliant sacrifice' we cannot accept without restriction. Gods are invoked to come and take their share in offering, but there is no deep emotion, no uplifting of the heart or stirring of the soul; there always lingers the old idea that the god is ensnared by sacrifice and bound to render his assistance.

India thus testifies to the results arrived at by ethnographical writers 'that primitive worship, being prompted merely by the instinct of self-preservation or by interested motives, has no ethical character.'⁴ It must, however, be added that in the *puruṣamedha* and the *sarvamedha* we find examples of the 'self-denying sacrifice'; for they enjoin abandonment of all property and renunciation of the world;⁵ but it is to be remembered that the general tendency of these sacrifices has grown on Indian soil and seems to be somehow connected with the later idea of the *parivrājaka*, or 'religious mendicant.' Of the three purposes of sacrifice distinguished by La Grasserie⁶ only the first can, in fact, be said to hold true of the Vedic sacrifice.

Every sacrifice forms an intrinsic unity, the special character of which throughout is dictated by the particular wishes for the fulfilment of which the sacrificer sets in motion the ritualistic apparatus. If the sacrificer aims at the life of an adversary, the priests offering the *śyena*-sacrifice must wear a red frontlet, sacrificial butter is made

from the milk of a sick cow, and the skin necessary for *soma*-pressing is taken from a cow used as *anustaraṇi* during the burial ceremonies. Subjects who wish to prosper their king offer the *gosava*-sacrifice, in which he is anointed on a levelled piece of ground (*sthaṇḍila*) and addressed as '*sthaapati*.'⁷ Of still more interest are the *vrātyastomas*² and the *mahāvratā*, or solstice-sacrifice, where drums are beaten in order to dispel the demons and assist the sun, and obscene rites symbolize the desired fertility. *Similia similibus* is the principle which permeates the whole cult.

The sacrifices of the domestic ritual, which are described in the *gṛhyasūtras*, are very simple; they are as a rule performed by the householder and his wife, but they often call in a *brāhmaṇa* or *pūjāri* to function in their stead or to assist. Persons of high rank, especially kings, had their spiritual adviser, the *purohita*; for the gods, it is said, do not eat the food of a king who has no *purohita*.³ The sacrifices of the *śrauta* ritual, the complicated system of which is taught with the utmost care, all need priestly help, and the number of Brāhmanical functionaries increases up to sixteen in the *soma*-sacrifice, with its intricate ceremonial, its many hymns and chants.⁴ Nearly all functions are left to this band of scholarly priests, with whom rests the power even to destroy the life of him who has entrusted them with their office. The *yajamāna* had to select the priests from the families of the Brāhmanical caste, and particular care had to be taken that they should be without bodily defects and well instructed; for any blunder in the strict observation of rules, in the proper wording or pronunciation of the sacred *mantras*, might annihilate the result of the sacrifice and even endanger the health and life of priests and *yajamāna*. It is comparatively little that the sacrificer and his wife can do themselves. Their part gradually became restricted to personal preparation or points of minor consequence.⁵ An exception is found only in great *sattras*, or sacrificial sessions, where none but Brāhmins are admitted and the priestly duties devolve on the partakers. In India, therefore, more than elsewhere sacrifice has lost its social aspect, and, except in a few cases like the *rājasūya*, the *āsvamedha*, the aforesaid *sattras*, and a few traces of *sacra publica* in the *Rigveda*,⁶ it can be regarded only as a private institution.

Particular care was bestowed on selecting the day fit for sacrifices and the place where the *tantra*, the sacrificial 'tissue,' was to be woven; there were no temples as in later times, but the special character of the sacrifice and priestly knowledge determined the spot where the holy grass had to be strewn as carpet for the gods and the fires had to be made. All *śrauta* sacrifices require three fires: the *āhavanīya*, the *dakṣiṇa*, and the *gārhapatya* fire, corresponding to heaven, antariksa, and earth, and dedicated to the world of gods, ancestors, and men.⁷ No doubt, this way of selecting and preparing the sacred ground had its origin in the custom of pastoral tribes⁸ pitching their tents anywhere, and had been retained by the conservative mechanism of sacrificial rules. Between the three fires (of which the *dakṣiṇa* serves also for conjuring purposes and is probably the successor of the old magic fire) the *vedi* is traced, a place of special sanctity, where the gods

are supposed to sit down and take their meal, and every precaution is taken by word and action to ward off the demons and destroy their evil influences.

In the objects of sacrifice there is little variety. Different kinds of milk, cakes made of rice or barley, flour, etc., form the materials for the oblations of the new and full moon sacrifice and its almost endless modifications; the cakes are offered on potsherds or tablets, the number of which depends upon the character of the god to whom they are given. The ordinary *paśubandha*, or animal-sacrifice, requires goats, rams, bulls, which are offered almost indiscriminately to all gods, the difference generally being expressed by the shape, colour, and other bodily characteristics of the animal.¹ Horse-sacrifices (*āsvamedha* [q.v.]), which are regarded as an act of state and are of great importance, are of course an exception. There were in ancient India even human sacrifices, celebrated with the same pomp and following nearly the same ritual as the horse-sacrifice, till they were gradually replaced by the milder practice of an ordinary *paśubandha*.² Of other materials we find in a few cases *surā*, an intoxicating drink, sometimes in the *Rigveda* honey; the liquor the gods like best is the juice of the *soma*-plant, pressed and offered in the *agniṣṭoma* (a spring festival), and its numerous varieties. More than other sacrifices the *soma*-sacrifice is an imitation and representation of heavenly proceedings. As *Soma*, the moon, contains the heavenly ambrosia, so the yellow shoot of an unknown (and probably often changed) plant is supposed to yield that costly drink enjoyed by *devas* and *pitaras*. If an analogy to the 'sacrifice of the God,' so well treated by J. G. Frazer, ever existed in India, it cannot be looked for anywhere else than in the sacrifice of the plant representing a ray of the lunar god.

The norm of all sacrifices belonging to the *śrauta* ritual is given by the *darśa-pūrnāmāsaiṣṭi* (the new and full moon sacrifice), the *paśubandha* (animal-sacrifice), and the *agniṣṭoma* (the *soma*-offering); all other sacrifices follow these, with variations required by the special case. The whole series of ceremonies forms a *tantra*, 'tissue,' the framework, into which the *āvāpa* is inserted. The *tantra* remains the same for almost every sacrifice; the *āvāpa* consists of the chief offerings and invocations (verses, etc.) and varies according to circumstances. All ceremonies, unctions, libations, spells, etc., converge to the one point, to bring about that religious potency, 'the magical soul of the sacrifice,' as it may be called, which forms the spiritual instrument that ensures success. Hubert and Mauss³ have well illustrated the metamorphosis which takes place in the persons as well as in the implements needed for sacrifice. All that concerns gods must be of divine character; the *yajamāna* must be prepared by certain rites in order to be worthy to approach the precincts of the supernatural. This is done by various penances, by shaving, bathing, abstaining from food and sexual intercourse, etc. Different substances are used to impart their mystic power, are poured over him, inhaled by him, etc. The implements are consecrated with *mantras* or *yajus*; e.g., the rice is thrown into the winnowing basket with the words, 'I take you at the impulse of God Savitr, with the arms of the *Aśvins*,' etc. If they bring an animal-sacrifice, the sacrificial post erected on the *vedi* is sanctified by unctions and *mantras* and looked upon as a thing of superior holiness. The oblations are consecrated by various ceremonies,

¹ Oldenberg², p. 256; Hillebrandt, *Tiere und Götter im ved. Ritual*, Breslau, 1905.

² Cf. artt. HUMAN SACRIFICE (Indian), SUICIDE (Hindu).

³ 'Essai sur la nature et la fonction du sacrifice,' *ASoc* ii. [1897-98] 43, 51, 56 ff.

among which the *paryagnikaraṇa* deserves special mention.

The priest takes a firebrand and carries it three times round the oblation or the animal, describing thus a magic circle in order to keep off the demons and make the victim appropriate to the gods. Several libations precede the main offering. In an animal-sacrifice the divine essence, which permeates the animal when it is on the point of being immolated and sent along the path of gods, communicates itself to the *yajamāna*, who touches it on its way to the slaughtering place by means of the *vapāśrapaṇi*, the two spits upon which the *vapa* (the omentum) is later to be roasted. After the recitation of expiatory *mantras*, apologizing for the crime to be committed, the animal is 'quieted' by strangulation. Those performers who are not immediately concerned in this act step back and sit down, turning their face towards the *dhavanīya* fire in order to avoid being eye-witnesses of the act. The religious drama has then reached its climax. Among the parts of the animal assigned to the gods the omentum is most conspicuous; the blood is poured out for the demons, who later receive also the husks of the grain. Special parts of the principal oblations form the *idā*, which is the portion of the priests and the sacrificer and is regarded as a mystic deity who is invoked with great solemnity to come together with other mystic powers of the universe and bestow prosperity on the *yajamāna*. The ceremony then gradually relaxes; the 'tissue' has been woven, it must be dissolved again. As the drama after the peripetia, so the sacrifice must descend from the summit which it has reached and dismiss the performer from its magic circle to his worldly atmosphere. Various libations follow the *pradhānas*. The butter or fat that is left over is thrown into the fire; so are some of the implements, while others, especially those penetrated by some magic substance imparted to them by the purpose which they served, are concealed in the ground. The sacrificer finishes his vow by repeating the same *mantras* which he said at the beginning, of course with the modifications required by the different situation: he 'loosens' the sacrifice (*vinūchati*). A bath in some cases concludes the sacrifice.

A good many accessory practices serve to enforce the general purpose of the sacrifice: the heads of certain animals, immured in the *agniciti*, give the altar strength and solidity; an *avakā* plant laid in the holes dug for the pillars or posts of the house prevents the house from breaking into a blaze. These accretions are like small rivulets which feed the main stream of sacrificial effectiveness. But secondary designs may also be fulfilled.

He who stands in need of rain has to fasten the rope by means of which the animal is tied to the sacrificial post, round the bottom; if the priest's intentions are friendly towards the sacrificer, he holds himself straight while offering; if his intentions are inimical, he stoops; if he wants somebody to be his friend, he turns the press-stones one towards the other. It is possible to foretell the future from single occurrences, to expiate certain blunders or faults, etc.—practices accompanying the sacrifice which crept into the ritual from an older stratum, from times when the ritual was less developed and mere symbolic actions sufficed to work man's will. But the difference is only one of degree. It is usual to draw a sharp line between magic and sacrifice (or, rather, religion; for sacrifice formed part of ancient religion). But the present writer fails to discover the line in the face of facts. Magic is the lowest stratum in the development of religion. The limits between magic and sacrifice are constantly shifting, in consequence not of change of system, of inward dissimilarity, but of intellectual progress and growing enlightenment.

'To the operator the magical act,' say R. R. Marett, 'is generally a projection of imperative will, and specifically one that moves on a supernormal plane.'¹

That will has become less imperative, a little more subdued by the feeling of being subjected to supernatural powers independent of itself, magical art has changed into religion. As the genius of Greek art lies concealed under the awkward attempts of antecedent times and awaits its release by the progress of intellect, so the genius of religion in order to be freed from the entangling net of magical superstition awaits the progress of civilization. If to a symbolic action the performer prefers a sacrifice, the instrument becomes some-

¹ 'From Spell to Prayer,' *FL* xv. 148.

what loftier, more refined by the invocation of higher powers, but remains altogether akin to the lower art of the magician. The god receives his share in order that he may grant the request; but he stands in need of the oblation as much as the sacrificer stands in need of his assistance. In the Indian sacrifice the mutuality begins to give way to the conception of the god's grace, but is not yet vanished. The mind of the ancient poets and ritualists is perfectly aware of the mystic power of sacrifice; we see it personified in the Vedic hymns and considered as a magical element by means of which the gods produced the world¹ and the ancestors achieved their wonderful deeds; to the ancient ritualists who invented countless legends in order to account for its origin, its disappearance and its single practices and variations,² it is still more; to them it appears as creator and creation, as centre of life and universe, even as a living being that is created and killed and reborn again in innumerable alternations. The present writer therefore agrees with Haug,³ who was the first to define Indian sacrifice as 'a kind of witchcraft,' with Wundt,⁴ who defines sacrifice as 'an outgrowth of magic art,' with Marett, who, though conceding that from one point of view magic and religion must be held apart in thought, yet thinks that from another point of view they may legitimately be brought together.⁵ Sylvain Lévi is also of the same opinion:

'Le sacrifice qui règle les rapports de l'homme avec les divinités est une opération mécanique qui agit par son énergie intime; caché au sein de la nature, il ne s'en dégage que sous l'action magique du prêtre. Les dieux inquiets et malveillants se voient obligés de capituler, vaincus et soumis par la force même qui leur a donné la grandeur. . . . Le sacrifice a donc tous les caractères d'une opération magique.'⁶

The Indian sacrifice has, it is true, partly passed beyond this first stage and ascended a higher step; the very word *yajna*, equal to Iranian *yasna*, already betrays a loftier conception, and with still more reason this may be said of a great part of the Vedic hymns; but the ceremonial itself leaves no doubt that it is deeply rooted in magical art.

Inseparable from the sacrifice is the word.⁷ With a few exceptions, which are met in ancestor-worship and offerings to malign deities and are easily accounted for,⁸ the word, be it prose or verse, is the constant companion of ritual action, a kind of spiritual agent directing it to its goal.

'The spell or uttered "must,"' Marett says, 'will tend, I conceive, to embody the very life and soul of the affair. Nothing initiates an imperative more cleanly, cutting it away from the formative matrix of thought and launching it on its free career, than the spoken word. . . . It is the very type of a spiritual projectile.'⁹

The mystery of human speech has led to many speculations in India as well as elsewhere;¹⁰ but it becomes, even according to Indian notions, especially important by association with sacrifice: 'vāg devebhyo yajñam vahati' ('speech leads the sacrifice to the gods'), says *Śat. Brāhm.* i. 4.4.2. Corresponding with the tendency to make everything subordinate to the general character of the sacri-

fice, the ritual tries not only by different modulations (low, loud, mezzo, very frequent stoppings) to accommodate speech to the different situations, but also to distinguish from the formulas and prayers of the ordinary sacrifice the imprecations aiming at the destruction of the foe and his prosperity. The person who utters the malediction has to use 'rudenesses of speech,' i.e. words distinguished by hard consonants or otherwise expressive of its inward tendency.¹ A hymn having this imprecatory character, which may have once accompanied an act of sorcery, is met with in the collection of the *Rigveda*.² It is worth mentioning that also in other cases verses or formulas try to indicate, by choosing adequate expressions, the action they are intended to accomplish; a conciliatory spell, e.g., repeats the preposition *sam* ('together' or 'with'), the plant *arundhatī*, healing broken limbs, is addressed in a *mantra* that often makes use of derivations from the root *ruh*, 'to grow.' The magical art often presses verses or formulas of the higher descent into its low service; prayers addressed to Artemis, Helios, or Christian saints sometimes appear auxiliary to witchcraft practices. The question has as yet not been answered—and probably remains unanswerable—whether this abuse is not comparatively modern and the texts may not have replaced older wordings more in keeping with the stratum to which the practices they are alluding to belong. It is a long way from spell to prayer, as long as from magic to sacrifice. The word ceases to be spell and turns into prayer as soon as it is felt to be depending in its effect, not upon the imperative will of the speaker, but upon the good will or the grace of a superhuman power. The modern notion of prayer, fashioned under the influence of Jewish and Christian creed, as lifting the heart to God and abiding in His will and law has not yet sprung up in Indian sacrifice. Even the prayer which we find at the end of the new and full moon sacrifice³ seems more a conclusive recapitulation of the principal wishes than a prayer in our sense. The only exception in the ritual seems to occur in the sacrificial atmosphere of Varuna, where devotion of heart and forgiveness of sin form a characteristic feature. But it must be owned that there are prayers, at least in the Vedic collections of hymns and also in India, that testify to the universal existence of prayer in primitive times.⁴ The 'salvum fac regem' of India⁵ is by no means inferior to national anthems of modern nations, and there are other hymns of still higher type in the *Rigveda*. It seems probable that they represent, though earlier in time, a higher state of civilization than the sacrificial practices, which, though later recorded, nevertheless were inherited from remote antiquity.

A. F. ALFRED HILLEBRANDT.

WORSHIP (Jain). — I. Śvetāmbara.¹ — (a)

Morning worship.—The hour of the morning and more elaborate worship in a Śvetāmbara temple is 7.30. Leaving their shoes at the gateway that guards the temple courtyard, the worshippers come to a room where the more devout and more leisured exchange their secular dress for the two freshly-washed cloths² (a loin-cloth and a shoulder-scarf) in which alone they may enter the inner shrine. They also leave in this room any money they have brought and desire to keep, for the *tīrthāṅkara* must have everything on which his eye 'lights,' and those two cloths admit of no pockets for concealment. The worshippers now ascend the steps to the temple proper, at the doorway of which are two carved beasts supporting the threshold.³ These are said to represent Yakṣa and Yakṣaṇī, the servants of the *tīrthāṅkara* to whom the temple is dedicated. It is left to the temple-servants to worship these beasts, the ordinary devotees having, so they say, no time to spend on them. The ritual acts of the lay-worshipper are our best guide in investigating this worship, for the temple-officiant, usually a Brāhman, or even a gardener by caste, can give no reliable instruction.⁴

In the open porch (*mandapa*) outside the temple-door the devotee marks his own forehead with the auspicious saffron-mark (or *chandana*), using, of course, his third finger to make the mark, and then circumambulates the temple outside three times in the auspicious way, *i.e.* with his right hand nearest to the building. Still standing outside the temple, the worshipper joins his hands together in the attitude of prayer immortalized in Dürer's 'Praying Hands,' and says for the first time 'Nissahī.' An instructed devout worshipper uses this expression not once (as is the common wont), but three times:⁵ (1) he says it outside, in the temple-porch, asking that he may be cut off and freed from all worldly cares; (2) crossing the threshold and standing just inside, he again says it, asking that he may be cut off and freed from all thought of the temple-servants or his fellow-worshippers; (3) when he comes to the great spiritual point of his worship, he repeats the word once more, asking that he may be cut off from all thought of the worship he himself has offered, and enabled to concentrate all his thoughts on the qualities of the *tīrthāṅkara*.

As the worshipper crosses the raised threshold, it is interesting to see that he does not hesitate to put his foot on the plain boss of it—a thing no Brāhman would do, believing it to be the seat of Gaṇeśa.⁶ The worshipper is now in the Hall of

¹ The worship of the non-idolatrous Śthānakavāsī sect has already been described in art. PRAYER (Jain).

² These two cloths the worshipper keeps in this room and pays the temple-servant to wash for him after every act of worship.

³ These strange animals are also seen in every Hindu temple-threshold; for other explanations of them see the present writer's *Rites of the Twice-Born*, Oxford, 1920, p. 372.

⁴ Śvetāmbara Jains can never in a Śvetāmbara temple receive money for worshipping; indeed they cannot even act as head clerk to the temple, so that those responsible for temple worship necessarily belong to an alien faith; hence the difficulty of gaining accurate knowledge of Śvetāmbara worship. Many Jains have private shrines in their own houses (there are said to be 360 in Ahmadābād alone); if they have, they worship there first in private before coming on to public temple worship.

⁵ So far the writer has found no trace of this custom in a Hindu temple.

⁶ See the present writer's *Rites of the Twice-Born*, p. 273.

Assembly, or *sabhā mandapa*, a hall supported by a circle of pillars and at the present day generally disfigured by the crudest colourings, terrible blues and reds and yellows mingled together on a plaster background; but in the older temples on Mount Abu (Rajputānā) or Śatruñjaya Hill (State of Palitānā) the delicate tracery in stone or marble of the struts between the pillars in this hall and the carved work surrounding the doorway leading to the inner shrine make the whole resemble a veritable ivory palace in fragility and delicacy. The worshipper proceeds at once to cross the threshold and enter the inner shrine (*gabhāro*). Visitors, however, must advance only up to the doorway; but, standing there, they can gain a view not only of the big image of the principal *tīrthāṅkara* (*mūla nāyaka*) of that particular shrine,¹ perhaps Mahāvīra, to whom the whole temple is dedicated, and the two servants (Yakṣa and Yakṣaṇī) that flank the big image, but also of the rows of twenty-four smaller *tīrthāṅkara* that, arranged on a long altar-shelf, stretch on either side of the main image for the whole length of the inner shrine. There are very often two smaller doors leading from the Hall of Assembly to this inner shrine, and opposite each of these on the altar-shelf are arranged large images of some other *tīrthāṅkara*, perhaps Adinātha and Rīṣabhadeva respectively. All the *tīrthāṅkara* in a Śvetāmbara temple are represented with staring glass eyes, and with carved stone loin-cloths. They are nearly always, too, seated figures, the larger images being adorned with jewels and flowers. Below the big central statue of Mahāvīra (let us say) may be seen a gleaming image of some *tīrthāṅkara* (perhaps Pārśvanātha) fashioned out of five metals.

On a lower altar-shelf there may or may not be a folding brass lotus-flower with some *tīrthāṅkara* in the centre and twenty-three smaller images of *tīrthāṅkara* in bas-relief on the petals; or a little tray with the eight good omens that always precede a *tīrthāṅkara*; or a copper plate (the *mantra* of Vijaya) covered with mystic symbols; or twenty-four two-inch brass plates, each bearing outline pictures of the *tīrthāṅkara*. All of these may or may not be present, but there must be at least one *Siddha chakra*, for no temple is complete unless it contains this crystallized creed of Jainism. The *Siddha chakra* resembles a little tray; in the centre is a raised figure of an Arihanta, and around it the figures of Śādhu, Upādhyāya, Achārya, and Siddha, and between the encircling figures are written the names of the Three Jewels of the Jain faith: Right Knowledge, Right Faith, and Right Conduct, and *tapa* (austerity), the key-word to the Jain system.²

In a Śvetāmbara temple the worshipper bids for the right to win merit by performing the worship under the form of 'auctioning the *ghī*.' Any number of worshippers may purchase the right for sums varying from five annas to one rupee or more, and each successful bidder starts the morning worship again from the very beginning as soon as his predecessor has finished. The first worshipper enters the inner shrine and, removing the jewels and old flowers, performs *jala pūjā*, *i.e.* washes the idol with water and milk and the five nectars, drying it afterwards most carefully with different cloths (*aṅgaluñchchanā pūjā*). As soon as the idol is dry, the worshipper rubs a little *barāsa*³ all over it with his second and third fingers, and then marks it with liquid saffron (*chandana pūjā*) in fourteen different places in the following order:

¹ Recognizable at once by the differing symbols at the base of the idols.

² See the present writer's *Heart of Jainism*, p. 262.

³ This *barāsa* is so expensive that it can only be applied to the chief image. A very rich worshipper might also ease the image all over with gold- or silver-leaf.

right toe, left toe, right knee, left knee, right wrist, left wrist, right shoulder, left shoulder, top of skull, forehead, throat, heart, navel, and centre of right palm; and, as he marks it, he sings ten separate verses in its praise.

If the worshipper is a very rich man, he may now offer fifty rupees, in return for which he or (if he be indolent as well as rich) the temple-officiant will put on the idol its very best jewellery¹—crown, necklace, ear-rings, bracelets, armlets, girdle, sandals, all of gold—and give it a gold or silver coco-nut to hold in its hands. (The best jewellery may also include ropes of pearls.) If the worshipper cannot afford more than twenty-five rupees, the second-best jewellery only will be brought out. Except when a wealthy client is present or on great festivals, the ordinary worshipper proceeds at once to decorate the statue with flowers and garlands (*puspa pūjā*). He then steps outside² the inner shrine to perform the remaining ritual acts; he waves a stick of incense (*dhūpa pūjā*) and a lamp (*dīpa pūjā*) at the threshold of the shrine, and places on the table in the Hall of Assembly before the doorway of the inner shrine rice (*akṣata pūjā*), the only grain which (unlike Hindu ritual) can ever be offered in a Jain temple, sugar (*naivedya pūjā*), and fruit (*phala pūjā*), such as coco-nut, plantains, mangoes, or almonds.³ It is important to notice how the last three offerings are made.

The worshipper arranges the rice in the following form :

On the centre of (a), if a rich man, he places a coin of varying value, and beside it or on it he places the sugar and the fruit. This *swastika* sign (a) symbolizes the *gatī* in which a man may be born according to his accumulated hoards of past *karma*, either as a dweller in heaven or in hell, as a man or a beast. The three little heaps (b) represent the Three Jewels of the Jain faith which lead a man to *mokṣa* (c), symbolized by the sign of one dot in the segment of a circle.

In studying the worship in a Jain or a Hindu temple special attention must always be paid to four points :

(1) Who is allowed to go into the inner shrine. It was surprising to be told that in a Śvetāmbara temple any devout Jain lady of position who had bathed and came wearing clean clothes might enter the inner shrine and indeed perform every ritual act that a layman is allowed to do.⁴

(2) What change the offering undergoes by being offered to a god. In a Jain temple the deeply interesting change from *naivedya* to *prasāda*⁵ is unknown, and the word *prasāda* is never used, but in a Śvetāmbara or Digambara temple, once food has been offered to the *tīrthaṅkara*,

¹ Note that, unlike a Vaiṣṇava idol, the images of the male *tīrthaṅkara* are never draped in actual clothes.

² A worshipper in ordinary dress can perform the remaining acts, as they are done outside the inner shrine.

³ If a child, e.g., comes into a temple accidentally bringing with it a plantain, or some sugar, or a copper coin in its open hand, these must be added to the offering, for 'the eye of the god has lighted on them.'

⁴ The present writer, however, has never actually seen a woman enter the inner shrine.

⁵ For the change the offering undergoes in a Hindu temple see the present writer's *Rites of the Twice-Born*, p. 385.

it is called *deva dravya*, or, very often by the ignorant, *nirmalya*.¹

(3) What may and may not be offered. In a Digambara temple no fresh fruit may be offered, and in a Śvetāmbara temple no over-ripe fruit may be given.

(4) Perhaps most illuminating of all, who eats the offering. In a temple of Viṣṇu all can take communion with their god and eat the food, which is known as *prasāda*; in a temple of Śiva only a fallen and despised set of *pūjārīs* known as *atīta*² can eat the food, which, once it has been offered, is called *nirmalya*; but in some Śvetāmbara temples, as a mark of special honour, Bhāṭas are given the fruit and the sugar, the rice being sold to 'menial people' in open market, for no Jain of position would knowingly buy and eat *deva dravya*.

To account for the honour paid to the Bhāṭas, the legend is told of how, when Muḥammad Ghazni was in power, two Bhāṭas laid their living bodies on the burning pyre at Pālitāṇā day after day and were burnt to death, to ransom the images on the sacred Hill of Śatruṅjaya from desecration. In commemoration of their heroism, the whole offering (fruit, sugar, and rice) is given to Bhāṭas in the State of Pālitāṇā; elsewhere they are sometimes given the fruit and sugar only.

If there be no Bhāṭa, the head-clerk of the temple distributes the fruit and sugar among the temple-servants and their children.

As a rule, cooked food is not offered in a Śvetāmbara temple, but on the occasion of a marriage in his family some wealthy client might send down a specially dainty dish. This would be put on the open table in the Hall of Assembly, and not offered behind a curtain, as in a temple of Viṣṇu,³ and would afterwards be eaten by a Bhāṭa or, failing him, by a temple-servant.

When these offerings have been duly made and arranged, all is ready for the great act of spiritual worship. 'As bread is flavourless without salt,' runs the proverb, 'so worship is without savour and useless, unless *bhāva pūjā* be performed.' The worshipper first prostrates himself three times (*chaityavandana pūjā*) before the main idol (the *mūla nāyaka*), which gazes out from its shelf in the inner shrine into the Hall of Assembly, and then says the third *Nissahi*, asking to be cut off from all remembrance of his own acts of worship and offerings. He proceeds to perform *bhāva pūjā*; but neither then nor at any other time does he offer petitions for any spiritual or material boon; rather he encourages himself by remembering the virtues of the *tīrthaṅkara*, 'like a soldier before the tomb of Napoleon,' and devotes himself to singing the saint's praises. Finally he walks backwards, as though in the presence of royalty, to the main door, towards which the chief image is looking ('only a "fool-man" walks out by a side door'), and, arrived at the threshold, repeats the word *Avissahi*, thereby asking to be allowed to follow his necessary avocations every day. As he says it, he bows with joined hands to the idol. A devout Jain will say this word again as he leaves the porch of the temple, and a third time before he passes out into the street from the gateway of the temple courtyard; but the uninstructed generally content themselves with saying it once.

'It is "compulsory" on us to do part of this worship in the early morning, and part of it at noon,' said a leading Jain official to the writer, 'but, as we are in Government offices at mid-day, we do it all together in the morning.'

On the great festivals, and at places of pilgrimage like Śatruṅjaya, Abu, and Gīrnār, the writer has witnessed more elaborate worship. Sometimes royal worship is offered, when a brush of Tibetan cow's hair (*chamarī pūjā*) is waved in front of the main image, and three silver umbrellas are placed

¹ This word properly belongs to food offered to Śiva.

² See *Rites of the Twice-Born*, p. 320.

³ *Ib.* p. 402.

over it. At other times a silver image of some *tirthankara* is placed on a silver throne in the Hall of Assembly. The men all sit on one side and the women on the other and offer *snātra pūjā*, by singing songs in its honour. Or a pilgrim may purchase the privilege of sitting in a silver chariot, holding a little silver image in his lap, and being thus dragged three times round outside the temple—a sort of circumambulation *de luxe*. On Śatruñjaya Hill a special pilgrimage is performed, known as 'the Ninety-nine,' when daily for over three months the pilgrim must toil up the stone stairway to the top of the hill, circumambulate the most famous temple, and tramp down again in honour of the ninety-nine thousand times that a *tirthankara* visited Śatruñjaya. 'But, as life is short, we only do it ninety-nine times, and leave out the thousands!' On the last day of the ninety-nine the pilgrim offers the eightfold worship with more than the usual 'harmony-harmony,'¹ as an English-speaking Jain once called it.

In a big Śvetāmbara temple there is often a map of Mount Abu, a plan of Sameta Sikhara (in Bengal), or a model of the great temple of Śatruñjaya. On the special days when merit is gained by going to these pilgrim resorts a man who is too poor or too busy to undertake the journey may yet gain merit by offering to the map or plan or model the fourfold *pūjā* of lamp, incense, rice, and fruit. In the same way, if a man is too ill to get out of bed and come to the temple, he may offer worship to a picture of the twenty-four *tirthankara* at home,² for the Indian proverb runs prettily: 'If you cannot offer a flower, offer a petal.'

All through the day worshippers can come and do *bhāva pūjā*, for the god is never put down for a siesta as among the Hindus in a temple of Viṣṇu, though the wired doors of the inner shrine are often locked to keep off thieves.

(b) *Evening worship*.—In the evening, as a rule, only the paid temple-officiant enters the inner shrine, for no layman wants the trouble of bathing and donning the special dress so late in the day. At sunset the hanging lamps in the Hall of Assembly are lighted, as are also two or more lamps of clarified butter in the inner shrine; and, before beginning the evening service, the officiant lights some incense and places it in front of the chief idol of the temple. Then the right to perform the evening worship is auctioned (it can be sold to five successive worshippers), and the officiant from inside the shrine hands to the highest bidder the little *ārati* lamp. This consists of two tiers of lamps; in the upper tier is only one lamp, and in the lower there are five; in each of these six lamps a little wick is floating in clarified butter.³ Five times the worshipper waves this from left to right, singing, as he does so, the special *ārati* hymn, whilst all the other worshippers bang gongs, beat drums, and make as much noise as possible. Each successful bidder follows suit. When the *ārati pūjā* is complete, the waving of the *maṅgala-dīpaka* is performed. A *maṅgala* lamp consists of a lamp in a saucer; it burns camphor in the saucer and *ghī* in the lamp itself; it has only one wick and can be auctioned to only one worshipper. As the worshipper waves it from left to right three times, he sings the *maṅgala-dīpaka* hymn, and again all the instruments, musical and unmusical, are played. The object of the *ārati*-waving is said to be to protect the worshippers themselves from all molestation by

evil powers of darkness during the night. The *maṅgala-dīpaka* is waved for the welfare of the whole world. The incense is allowed to burn itself out, which it does by about 8.30 p.m., when all the shrine doors are locked by the officiant and (since the jewels are left on the idol all night) inspected by the temple watchman before the final shutting up of the temple about 9 o'clock. It is noticeable that (unlike the evening ritual in a temple of Viṣṇu), there is no stretching out of the hands by the worshippers to either *ārati* or *maṅgala-dīpaka*.

2. *Digambara*.—(a) *Morning worship*.—It is easier to obtain information in a Digambara temple, since the officiant there is himself a Jain. The main lines of the worship are the same as in the Śvetāmbara temple (washing, drying, offering rice, dry fruit, incense, and lamp); but between the worship in a Digambara temple which belongs to the Terāpanthī and that in one belonging to the Visapanthī there are many minor differences. In any Digambara temple the idols on the long shelf in the inner shrine have no eyes, no carved loin-cloths, and wear no jewels or flowers. Fresh fruit cannot be offered to them, and no woman on any consideration is allowed to enter the inner shrine (for with the Digambara no woman as such can obtain salvation). The privilege of performing worship is not put up to auction, and the *jala pūjā* can be performed only at one time, not at intervals of thirty minutes or an hour, as in a Śvetāmbara temple. The idol is washed with plain water (not water mixed with milk or nectars), and it has seemed to the writer, as she watched, that even greater care is shown by Digambara that not one drop of water should fall to the ground. Among the Visapanthī the idol is marked with *chandana* on both toes; but the Terāpanthī do not mark the idol itself when performing *chandana pūjā*, but mix the saffron with the rice on the table.

One main difference that strikes every visitor is that, whereas in a Śvetāmbara temple the whole Hall of Assembly is dotted with worshippers, who (having done at any time they chose as many of the ritual acts of washing, drying, marking, and offering as they had leisure for) are now seated each before a separate little stool, arranging the rice in the mystic way and offering coin and fruit, then telling their beads, and doing their *bhāva pūjā*, in a Digambara temple there is one united act of worship.¹ The rice and dried fruit are all arranged in separate little heaps on one tray on one table, and are removed by the priests from that tray to form a large mound on another tray. In front of the main idol on a table in the Hall of Assembly the officiant arranges a tall vase like an upturned chalice, two brass tumblers of water, a full tray containing rice, almonds, and sugar arranged in separate heaps, and an empty tray marked with a *svastika*. He then stands behind the table on a little stool and to the accompaniment of elaborate genuflexions and intonings transfers the contents of the full tray to the empty one² and the upturned chalice. The food thus ceremonially transferred in the presence of the idol changes from *naivedya* to *deva dravya*. But here again the most important part of the worship is the mental *bhāva pūjā*, when the officiant stands silent, then bows, and finally kneels, touching the floor with his head, mentally repeating *mantras* all the time. So essential do they count this that an officiant in a Digambara temple said to the writer: 'If any one spent a lakh of rupees on performing the eight-fold worship, it would all be worthless without *bhāva pūjā*.'

¹ At least in the writer's part of India.

² For full details of the transference see *Notes on Modern Jainism*, p. 91.

¹ See *Heart of Jainism*, p. 254.

² In this case, instead of marking it with freshly ground and moistened saffron, he scatters over the picture dried saffron (*vaskepa*) brought from the temple.

³ No lamp may be burnt in the inner shrine, unless it contains *ghī* or camphor. Oil is never allowed there.

(b) *Evening worship*.—All sects of the Śvetāmbara that the writer has met perform *ārati*; but, though among the Digambara it is performed by the Visapanthī, the Terāpanthī perform neither *ārati* nor *maṅgala-dāpaka*, contenting themselves with lighting a lamp, carefully protected by glass, in the inner shrine and burning incense there. But, though Terāpanthī have no lamps, they sing songs and read some of their scriptures aloud in the temples at their evening worship.

It is interesting to notice that (unlike the ritual in a Viṣṇu temple) neither among the Śvetāmbara nor among any sect of the Digambara is food ever offered to the gods at night.

*We account it a sin to eat after the lamps are lit, for inadvertently we might eat some insect; how could we then offer food in the temples after sunset and so force our *tirthaṅkara* to sin?'

LITERATURE.—The writer has confined herself to temple worship, as other forms of worship have been dealt with under PRAYER (Jain), FESTIVALS AND FASTS (Jain). The researcher should notice local differences; e.g., temple worship on Mt. Abu is described in the present writer's *Notes on Modern Jainism*, Oxford, 1910, while for temple worship in Rājkot and Pāliāṅ reference may be made to *The Heart of Jainism*, Oxford, 1915. In addition to these, new material for the present article has been derived mainly from the worship in the temples at Junāgadh at the foot of Girnār, the famous Jain pilgrim resort.

MARGARET STEVENSON.

WORSHIP (Japanese).—I. *SHINTŌ CULT DESCRIBED IN THE ECLIPSE-MYTH*.—The various component parts of Shintō worship have already been treated in separate articles. The best way to gather them into a complete whole, and to picture the actual worship, will be to give the old account of the eclipse-myth, and by simple references connect with it the details already examined. For this story is not only the nucleus of Japanese mythology, but also the most primitive and most authentic description of Shintō worship, since it was written expressly for the purpose of giving the legendary origin of the chief ceremonies of this worship, as officially practised at the court of the mikado in the most ancient times, and of explaining the ascendancy of the great priestly families who officiated in them. We therefore have in this text, which is more than 1200 years old, a brief account of all that is essential in the rites of Shintō worship and its priests.¹

First of all, let us recall how, by reason of certain offences committed by the terrible god Susa-no-wo,² the sun-goddess, Amaterasu, shut herself up in the rocky cavern of Heaven, and left the world in darkness (*toko-yo*, 'eternal night'); how the eight hundred myriad gods in dismay then assembled in the dried-up bed of the Tranquil River of Heaven (the Milky Way), to take counsel as to how they might induce the goddess to come forth from her retreat; and how for this purpose their usual counsellor, the god of artifice, Ōmohikane, conceived a plan, which was nothing else than the transference to the sky of the terrestrial rites of Shintō, but which, naturally, is given us as having been, on the contrary, their prototype. The plan was as follows:

*Assembling the long-singing birds of eternal night and making them sing; taking the hard rocks of heaven from the river-bed of the Tranquil River of Heaven, and taking the iron from the heavenly Metal-Mountains; calling in the smith Amatsu-mara; charging His Augustness Ishi-kori-dome to make a mirror, and charging His Augustness Tama-no-ya to make an augustly complete string of curved jewels eight feet long, of five hundred jewels; and summoning His Augustness Ame-no-Koyane and His Augustness Futo-dama, and causing them to

pull out with a complete pulling the shoulder of a true stag from the heavenly Mount Kagu, and take heavenly *haha-ka*³ from the heavenly Mount Kagu, and perform divination; and pulling up by pulling its roots a true *sukaki* with five hundred branches from the heavenly Mount Kagu; and taking and putting upon its upper branches the augustly complete string of curved jewels eight feet long, of five hundred jewels, and taking and tying to the middle branches the mirror eight feet long, and taking and hanging upon its lower branches the white soft offerings and the blue soft offerings; His Augustness Futo-dama taking these divers things and holding them together with the grand august offerings; and His Augustness Ame-no-Koyane prayerfully reciting a grand ritual; and the deity Ame-no-Tajikara-wo standing hidden beside the door; and Her Augustness Ame-no-Uzume hanging round her the heavenly *hikage* of the heavenly Mount Kagu as a sash, and making the heavenly *masaki-no-kazura* her head-dress, and binding the leaves of the *sasa* of the heavenly Mount Kagu in a posy for her hands, and laying a sounding-board before the door of the heavenly Rock-Dwelling, and stamping till she made it resound, and doing divine possession, and pulling out the nipples of her breasts, and pushing down her skirt-string *usque ad privatas partes*.⁴

Thereupon, as the *Kojiki* says, 'the Plain of High Heaven shook and the eight hundred myriad Deities laughed together.' Amazed at this Homeric laughter, the sun-goddess slightly opens the door of the heavenly cavern. To entice her further, the artful Uzume explains to her that the gods are rejoicing 'because there is a Deity more illustrious than Thine Augustness,' and at the same time Ame-no-Koyane and Futo-dama push the mirror towards her, which induces her to come out still farther from the door. At this moment Ame-no-Tajikara-wo seizes her by the hand and drags her out, while Futo-dama immediately stretches behind her a *shiri-kune-naha* ('bottom-tied-rope,' i.e. a rope made of straw drawn up by the roots, which stick out from the end of the rope), saying to her, 'Thou must not go back farther in than this.'⁵ From this moment the universe is illuminated anew, to the great joy of gods and men.

II. *ANALYSIS OF THE VARIOUS ELEMENTS OF CULT EMBODIED IN THIS MYTH*.—In this famous episode we observe certain rites which are more especially connected with the special object of the story, i.e. with the magical means to be employed to cause light to reappear when, for some reason or other (eclipse, typhoon, heavy clouds), the sun hides for such a long time that primitive man becomes afraid. These means are the 'long-singing birds of eternal night,'⁶ i.e. cocks, which were made to utter their long cry in front of the cavern, and which are found symbolically represented in the old temple of the sun-goddess at Ise by dancers called *tona-ko* ('bird-cry'); with the roosts of those sacred birds (kept for the ordinary purpose of heralding the dawn, but also, when need arises, for evoking daylight by magical means) native philologists connect the origin of *tori-i*,⁷ the well-known gateway of Shintō temples, although it seems rather to be a continental importation.⁸ It is in the same spirit that, in another version of this myth,⁹ it is stated that the goddess Uzume, in the midst of her dance, 'kindled a fire,' the aim of which was likewise to evoke the solar light by imitative magic, and which represents the legendary prototype of the *nihabi* ('courtyard fire'), practised in certain ceremonies of Shintō worship, especially in the nocturnal rite of the *nihiname* ('new tasting'). But, besides those rites which belong more specially to eclipse-ceremonial, this episode also describes rites of a more general character.

I. *The solar mirror, central point of the national worship*.—First of all, we see the celestial gods

¹ The original text in Chinese characters, with reading in *kana* and transcription, is published in M. Revon, *Le Shintōisme*, pt. i., Paris, 1907, pp. 414-428. An English tr. will be found in B. H. Chamberlain, *Kojiki*² (*TASJ*, vol. x., suppl.), Tōkyō, 1906, p. 63 ff., and a French tr. in M. Revon, *Anthologie de la littérature japonaise*⁴, Paris, 1919, p. 46 ff.

² See the enumeration of those *ama-tsu-tsumi* ('heavenly sins') in art. *SIN* (Japanese), § 2.

taking rocks from the River of Heaven and iron from the Metal Mountains, *i.e.* the iron mines of primitive Japan, for the purpose of manufacturing a mirror under the superintendence of the gods Ama-tsu-mara (the Cyclops of Japanese mythology, also with a single eye, whose name, meaning *caelestis penis*, is evidently connected with the old phallic cult)¹ and Ishi-kori-dome (the mythical ancestor of the manufacturers of mirrors, whose obscure name may mean 'stone-cutter,' and consequently call up the idea of stone moulds in which certain metal objects were cast). This 'mirror of eight feet' (*ya-ta-kugami*) is still a magical means of recalling the star whose form and brilliance it imitates, in the same way as other 'mirrors of the sun' (*hi-kugami*) which are discussed elsewhere.² But, besides the special function which it is called upon to perform in this episode, the solar mirror fills a much larger rôle in Shintô worship in general, in which, in the temple of Ise, it represents the sun-goddess herself, and therefore forms the very centre of the national worship.

The fact that the present mirror at Ise is, in the imagination of the Japanese, the same as was forged at the time of the eclipse is due both to the *Kojiki*³ and to the *Nihongi*.⁴ The latter says that the mirror of the eclipse 'is the great deity who is worshipped at Ise'; and, as this sacred object shows a slight flaw, it is explained quite naturally by the hypothesis of a blow which it received against the door of the cavern.⁵ It is therefore a case of a primitive talisman which afterwards became the greatest national fetish. For before long the sun-goddess herself bestows it upon her grandson, Ninigi-no-mikoto, in terms which clearly show that her soul is united with it, by the application of a conception, wide-spread among primitive races, of the mysterious relations that may exist between a mirror and a soul.

'Regard it,' she said, 'as my august spirit, and worship it as if thou wert worshipping in my presence.'⁶ And again: 'Let it be with thee in thy home, on thy mat; let it be sacred to thee!'⁷ And, when she deposes two other gods to accompany her grandson on the earth, viz. Ame-no-Koyane and Futo-dama, who are precisely the ancestors of the great national sorcerers, 'Watch over me,' she commands them; 'take care, both of you, of this mirror and guard it well.'⁸

From that time the solar mirror becomes the most important and most precious of the three regalia (mirror, sword, and jewel) of the sovereign house. Later, however, a timid emperor, worried with his responsibilities in a time of public disorders, was uncomfortable at the thought that he was living with such a formidable deity; he broke the tradition which had been observed up to this time and entrusted the mirror to an imperial priestess, who kept it in a neighbouring village; she, in her turn, transferred it to the princess of Yamato, the famous vestal who, after various religious travels, stopped finally at Ise according to the instructions of the goddess.⁹ There, in the bosom of the 'inner temple' (*maiku*), the mirror will henceforward rest, invisible in its precious tabernacle.

This supreme object of Shintô worship is, as a matter of fact, enclosed in a brocade bag, which is never opened; when the old material shows signs of giving way, the whole is put into a new bag: so that to-day the mirror is enfolded in several layers of silk. Thus protected, it is in addition enclosed in a box of *hi-no-ki*,¹⁰ provided with eight handles, placed on a slightly raised stand, and covered with a piece of white silk. Lastly, above all this there

is a sort of cage of white wood, with ornaments of pure gold, itself enveloped in a rough silk curtain, which reaches to the ground on every side. These coverings of the box are all that the people are allowed to see on the festivals on which the sanctuary is opened.

Viscount Mori, the Minister of Public Instruction, who dared to raise a corner of an outer curtain of the sanctuary at Ise, was soon after, on the very day on which the new constitution of Japan was proclaimed in 1889, assassinated by a fanatic Shintôist, whose tomb became a place of pilgrimage.

Although the sun-goddess was the only one in the mythology who assumed the particular form of a mirror, other deities are represented by the same object; *e.g.*, it is said that in the other great temple of Ise, the 'outer temple' (*geku*), the *mi-tama-shiro* (substitute for the august spirit) of the goddess of food is likewise a mirror, as well as the fetishes of the *ahi-dono no kami* (deities of a joint shrine), which are also worshipped in those two great temples. This is simply a natural generalization of the material side of the cult. The mirror of the sun has gradually become multiplied, and, under Buddhist influence, it has ended in being exhibited in all the temples, though the sacred fetish of Ise remained hidden from human eyes.

2. The sacred jewel.—The eclipse-myth relates further that the god Tama-no-ya ('jewel-ancestor'), from whom the hereditary corporation of jewellers claims to be descended, makes a necklace of numerous jewels. The name of this necklace is very difficult to interpret,¹ and its history throughout the centuries is no less uncertain.² The imperial jewel, at first identified with the necklace of the eclipse,³ was gradually reduced to the single sacred stone, two or three inches in diameter, which is carefully preserved to this day in the palace of Tôkyô. But, in spite of the religious character of the mikados, this jewel is evidently of little cult importance compared with the sacred mirror.

3. Priests.—Later in the text there appear two gods who are important from the point of view of worship—Ame-no-Koyane (etymology uncertain), the ancestor of the *nakatomi*, the high priests, 'mediators' between the gods and the mikado, who recited the ritual in name of the latter, and Futo-dama (perhaps 'great jewel,' but more probably 'great gift'), the ancestor of the *imibe*, those 'abstaining' priests who were specially charged with preparing the offerings.⁴

4. Divination.—Those two gods pull out the shoulder of a stag from Mount Kagu (mountain of heaven, which quite naturally has its homonym in Yamato), and take from the same mountain the bark of a certain tree (*haha-ka* [cherry? or birch?]) in order to light a fire to roast the shoulder-blade, the cracks in which they will then examine for divinatory signs. The ancient Japanese, as a matter of fact, always practised divination when they found themselves in presence of any unusual phenomenon, and their gods naturally did the same, for they were by no means conceived as omniscient.⁵ Omoplatoscopy was the favourite form of divination—the official 'greater divination.'⁶

5. Sacred tree of Shintô.—The gods then uproot a *sakaki*⁷ with five hundred (*i.e.* countless) branches. This tree, which is evergreen, is the sacred tree of Shintô, and is usually found planted in the precincts of the temples; it furnishes wands

of Simon remains none the less characteristic of Jewish theology, which lays more stress on 'abhōdah (works) than on 'emūnāh (faith).¹

With the destruction of the Temple, worship naturally concentrated on the synagogues.² Had the altar system been the exclusive means of divine access available to the Israelite, the cessation of sacrifices would have marked a much greater liturgical disturbance than actually took place. As a fact, continuity was preserved; the keynote of the transition was Hos 14³ (Heb. = 14², RV), 'Let our prayers make up for the bullocks of our sacrifices.'³ Even to-day the services, in particular those relating to atonement, re-echo this sentiment,⁴ and, in almost every rite, the portion from the Pentateuch which ordains the morning, afternoon, or additional sacrifice is recited, at the appropriate occasion. This is done to show the correspondence between the particular service and the sacrifice instead of which it is offered. Nor must this feature be regarded as, *eo ipso*, a prayer for the restoration of sacrifices in their old form. It has often been shown that a belief in the restoration of the Temple, as a Messianic event, to be a centre of universal worship, may not necessarily be linked with the re-institution of the altar, and it cannot be demonstrated beyond doubt that this re-institution is an axiom of Jewish belief, for it has been repudiated by some orthodox Jewish authorities (as well as upheld by others; thus it is not included in the Thirteen Articles of Creed and Maimonides).⁵

In the synagogue worship subsequent to the Destruction the service developed on three lines: (1) prayers of repentance and penitence; (2) thanksgiving and praise; (3) petitions. Study and the recital of didactic passages of post-Biblical literature were a later institution.⁶

In (1), *i.e.* penitential worship, asceticism and fasting naturally find a place. But the limits of this asceticism were strictly defined. Fasting (*'ānāh*, which really means 'affliction') was, generally speaking, restricted to prescribed occasions and rites. This element should be studied in connexion with FEASTING (Hebrew and Jewish). Indiscriminate and exaggerated asceticism was rather the mark of sects, such as the Essenes, Zadokites, or certain Qabbālists; it was not general. Confession, expiation, and atonement constituted acts of worship in connexion with penitence.⁷

(2) Thanksgiving in worship centred in the festivals, with the ceremonial appropriate to each, Levy's *Lezicon*, *s.v.*). In the daily 'Amidah the term is applied to the 16-17th benediction of the *š'w*, in which the restoration of the 'abhōdah is the subject of prayer (see Singer, p. 50, par. 2). In the *Musaf* service for the Day of Atonement, the 'Abhōdah is the recital of the expiation ritual of the high priest in the Temple on that day, in the Holy of Holies (see M. Gaster, *Book of Prayer*, London, 1904, iii. 167 f., or H. M. Adler and H. Davis, *Service of the Synagogue Festivals*, etc., 'Atonement,' pt. ii. p. 159 f., London, 1904-08). Finally, see also the opening words of the concluding blessing after the reading of the prophetic lessons (Singer, p. 149, last line).

¹ See *JE* ii. 143b.
² See art. JUDAISM, vol. vii. p. 586^b foot; see, however, art. PRAYER (Jewish), vol. x. p. 192^b foot, for another view.

³ See *JE* viii. 132a, x. 166b, 622a, 625a.

⁴ See, *e.g.*, Adler and Davis, p. 169.

⁵ Singer, p. 89; see art. SACRIFICE (Jewish), but see also *JE* x. 625b.

⁶ After such passages a special *Qiddish* was pronounced (see Singer, p. 86). Such passages may be found in Singer, p. 167 f. Yemite Jews more frequently do not read a set passage, but insert in their daily service a portion of the book they happen to be studying. The Mesopotamian rite assigns a greater place to study as an act of worship than do others. Not only are the first night of Pentecost and the night of *Hosha'ana Rabba* kept as vigils and devoted to study, as in Europe, but the custom called *š'wā'ah* ('Sealing') on account of *Hosha'ana Rabba* associations prevails at other times.

⁷ See art. ASCETICISM (Jewish), FASTING, FEASTING (Hebrew and Jewish), CONFESSION (Hebrew), EXPIATION AND ATONEMENT (Jewish).

such as the palm branch,¹ tabernacle,² the *Hallel*³ Psalms, the *Qiddush*,⁴ etc. There is a special benediction of thanksgiving for joyous occasions and anniversaries, 'Blessed art Thou, O Lord our God, King of the universe, who hast kept us in life, and hast preserved us, and hast enabled us to reach this season.'⁵

(3) Petitions, the outpourings of the heart in supplication for the private needs of the individual, have their proper place in the Jewish system of prayer.⁶ Some of these needs are specifically mentioned, when they are objects for which every individual will necessarily pray, such as health, in the 'Amidah,⁷ or sustenance, in the grace after meals.⁸ But in most cases these petitions are formulated in the plural number; cf. 'Give us this day our daily bread' (*š'hem hūqqēnū*). There are opportunities accorded for the individual to offer his own special prayers. But the service represents rather a corporate act of worship on the part of the community. Hence in the confessions the plural number is always used.⁹ On the other hand, 'ancient formulæ, written for individual prayer, were often adapted to public worship.'¹⁰ The needs of the individual might come under the heading of תחנונים, though this word is used in *Mishnah Berākḥōth*, iv. 4,¹¹ in the sense of prayer in a proper spirit. For the necessity of devotion, and of praying when in a fitting mood, is over and over again prescribed in the *Mishnah*. Early saints, we are told, used to spend a preliminary hour in attuning their minds,¹² and, when under the stress of strong emotion, such as deep sorrow or supreme joy,¹³ or when in situations of difficulty,¹⁴ the regular prayers were postponed or abrogated.

It is an axiom of worship that praise and thanksgiving should precede petition, as being more disinterested in quality.¹⁵ For this reason the morning service opens with *Pesuge de Zimra*, psalms and versicles of this description. After the recital of the sacrificial descriptions¹⁶ the 'blessing of praise' (ברוך שאמר) introduces the thanksgiving of 1 Ch 16³⁻³⁶, Pss 100, 145-150, and the following doxologies: 1 Ch 29¹⁰⁻¹³, Neh 9⁶⁻¹¹, and the Song of Moses (Ex 14^{30-15¹³}). These passages are brought to an end by the formula of praise ישׁתבח,¹⁷ and the first portion of the service is concluded. Then follows the שׁטח¹⁸ (with its blessings) or, as this section is termed, 'the assumption of the yoke of the kingdom of heaven,'¹⁹ and then, in the תפלה ('Amidah), opportunity is given for private devotions. This order shows the Jewish scheme of worship. For this reason it was considered proper to 'join Redemption to the Prayer' (מסוכנין נאלה לתפלה),²⁰ *i.e.* to proceed without interruption from the daily

¹¹ העושה תפלתו קבע אין תפלתו תחנונים. The meaning of קבע is disputed; here, according to Bartimoro and others, it means 'that his prayer is burdensome, as much as to say that he has a fixed, distasteful task, which has to be accomplished.' See *Gemara*, t. 29b, p. 194 of Cohen's tr. But עשה קבע is found in a good sense, *i.e.* regularity; cf. the *fixing* (קביעה) of the calendar, or עשה תפלה קבע אין לו קבע (Ber. iv. 1), or עשה תורתך קבע (Abhōth, i. 16; see Taylor).

thanksgiving for the deliverance from Egypt to the recital of the *'Amidah'*.¹

Practically every item of Jewish ritual, synagogal or domestic, is an act of worship, for in Judaism the secular sphere has very little independent existence, and thus many acts, not in themselves religious, are associated with blessings and become acts of ceremonial. In order that these blessings should not be forgotten, or to give opportunity to an individual who might have omitted to say them, or to enable the congregation to respond 'Amen,' some of these blessings have been incorporated in the liturgy itself.² Others that have not been thus incorporated, because they were not likely to be needed every day, may be seen in Singer, p. 287 f. The ideal of the pious Jew was to pronounce a blessing on the name of God one hundred times a day;³ 'in all thy ways know Him.'

'For every enjoyment and in every enjoyment he is to render thanks to God the Giver. He is to smell the rose, and to rejoice in its perfume. And he is to say and to feel: "Blessed art Thou, O Lord, who createst fragrant plants."⁴

The Sabbath, with all its domestic ceremonies, has become practically a day of acts of worship; the three meals are preceded by sanctification and followed by hymns and carols. But such a day, far from being a burden to an orthodox Jew, is to him a day of spiritual happiness, for the highest bliss in the world to come is poetically described as a period 'wholly a Sabbath,' which 'will bring rest in life everlasting.'⁵

The term 'worship,' therefore, logically includes many more operations, besides prayer, by which the Jew seeks to serve God, in addition to numerous acts of his daily life and his private and public devotions. A specific act of charity may become an adjunct of worship, if not worship itself. Thus, in the East, Jews sometimes make use of *tsedaqah* (charity) boxes containing eighteen apertures, each devoted to a different philanthropic institution. As each of the eighteen blessings of the *'Amidah'* is recited, a coin is placed in one of the slots.⁶

The scheme of synagogal worship may thus be analyzed.⁷ The normal daily services, associated with the statutory Temple offerings,⁸ and also ascribed by tradition to patriarchal institution,⁹ are three—morning, afternoon, and evening. On Sabbaths, festivals, and new moons, and on the Day of Atonement, but not on the other fasts, there is an 'additional service,' called *Musaf*.¹⁰ There is no *Musaf* on Hanuca (the Maccabean Feast of Dedication, Encænia), or on Purim, the Feast of Esther, because the ordinances for these days are post-Biblical and no special offering was brought. Every service includes an *'Amidah'*¹¹ as its essential element, other features being thanksgiving Psalms, *Shema'*, *Hallel*, reading of the Law and Prophets. Propitiatory prayers, hymns (*piyyûtim*),¹² study, and sermons are not original statutory components, though antiquity and popularity have often endowed them with an importance which their origin does not altogether warrant. The recital of the Ten Commandments in public worship was discontinued,¹³ and the doxology was altered,¹⁴ on account of the Minim, but the private reading both of the Decalogue

and of the Maimonidean Creeds is regarded as desirable after the morning service.¹ The essential features of Jewish worship may thus be summarized:

At every morning service throughout the year.—(1) *Pesuke de Zimra*, or introductory Psalms and versicles of thanksgiving; (2) *Shema'* and blessings; (3) *'Amidah'*; (4) the *Hallel* Psalms on new moon, festivals, and Hanuca; (5) reading of the Law on Mondays and Thursdays, Sabbaths, fasts, festivals, New Year, Day of Atonement, new moon, Hanuca, Purim; (6) reading from the Prophets on Sabbaths, festivals, New Year, and Atonement, ninth of Ab; (7) *Musaf*, or 'additional' service, on Sabbaths, festivals, new moon, New Year, and Atonement; additional items where appropriate, such as *Selihoth*, blowing of *Shofar*, prayer for rain, *Hosha' anoth*, etc.

At every afternoon service throughout the year.—Passages reminiscent of sacrifices and incense, Ps 145, *'Amidah'*; reading of the Law on Sabbaths and Day of Atonement and on certain fasts; *haftarah* on Atonement and certain fasts; Canticles, Ruth, Ecclesiastes on the Three Festivals.

At every evening service throughout the year.—*Shema'* with blessings, *'Amidah'*, introductory Psalms on Friday night; special Psalms or poems for festivals in some rites; Lamentations on ninth of Ab, Esther on Purim, etc.

The two main divisions into which the present liturgy may be divided are the Ashkenazic and Sefardic rites. These correspond, to some extent, with the early Palestinian and Babylonian uses,² but there are other uses—e.g., Italian, N. African, Turkish, Mesopotamian and Indian, Cochini, Persian, etc.—being modifications of the main Sefardic use, and certain Hassidic, Qabbalistic, and other rites in Russia and E. Europe, which are Ashkenazic variants. Among extinct rites may be mentioned the *Seder Amram* (use of Amram Gaon, 870 C. E.), *Maḥzor Vitry*, Maimonides, Isaac Lurya, and C. Vital, Castile, etc. Little is known of the ritual of the Falshas or of that current among the Chinese Jews. Qaraites and Samaritans have their own worship, which has been printed.³ Modern Reform rites, generally speaking, contain vernacular translations and sometimes additions, and modify certain references to the restoration of sacrifices. The *piyyûtim*, or hymns, are of two main types, Kalirian and Spanish;⁴ they do not form a statutory constituent and are often shortened or omitted. The divergencies of rites are due to the circumstance that the liturgy was originally not stereotyped. 'Those who write down blessings' were considered as reprehensible.⁵ The reader was told the subjects to be mentioned by him and their order; hence the variety of prayers arose. The whole of the tractate *B'rakhôth* is an indication of this method. The reader was 'free.'⁶

The underlying theory of the Jewish conception of worship can best be studied in chs. I. and li. of pt. iii. of the *Guide* of Maimonides.⁷ Maimonides calls worship 'the highest aim man can attain.' He insists that worship must be based on the intellect, if it is to have real value. 'The intellect which emanates from God unto us is the link that joins us to Him.' The chapters should be carefully studied.

Pilgrimage as an act of worship occurs only sporadically in Judaism.

HERBERT LOEWE.

WORSHIP (Parsi). — I. **Pre-Zarathushtrian period.**—That the attitude of the early Iranians towards those whom they conceived as the Supreme Powers was one of adoration and worship is practically certain.¹ In what precise outward forms that attitude expressed itself during the earlier period is a question which can be only partially answered. We may safely assume, however, that Herodotus's description² of Persian habits and modes of worship was, in its essential features, applicable to the Iranians generally centuries before his own time, and probably more generally and truly applicable to the Persians of that period than it was to those who were his contemporaries. In the Greek historian's account of Persian worship the whole ceremony centres in an act of animal sacrifice.³ It was accompanied by prayer on the part of the offerer and the intoning of some form of liturgy on the part of the priest. When this 'theogony' ceased to be a mere form of incantation or magic formula, which originally and for a long period it undoubtedly was, we have no means of determining. The sacrifice was individual in its presentation—there is no hint of a united offering—but the sacrificer was expected to be imbued with a sense of solidarity; for, in its main character and content, his prayer must needs be intercessory—embracing the welfare of the king and the whole Persian people. It is to do violence to the text of Herodotus, however, to make him say that the bringer of the sacrifice could ask nothing for himself. The natural inference from Herodotus's narrative is that, so far as the outward and visible forms of Persian worship were concerned, they consisted of merely an occasional act of animal sacrifice performed on a mountain top or beside a stream of water. We can scarcely imagine that all their religious impulses and beliefs found their full and only expression in such forms. Still, the small value the Persians placed upon architectural aids to outward worship prepares us to find among them a very simple ritual and perhaps a not very multifarious mode of religious expression. Regard must also be had for the early period that we are treating—perhaps more than a millennium before our era.

2. **Zarathushtra's time.**—Like the founder of Christianity, Zarathushtra, so far as the records enable us to judge, made no provision whatever for ceremonial or outward forms of worship. The *Gāthas*, which are the truest reflexion of his teaching and spirit, contain not the remotest hint⁴ of such matters. There we have an intensely earnest soul seeking to learn the truth and to get into the right inward relationship to its God. The outward expression and symbolization of that relationship receives no consideration at all. Spirit and conduct are the all-absorbing subjects of the *Gāthas*. *Vohumano*, best thought; *Asha*, right; and *Aramaiti*, piety, are the ever-recurring objects of the prophet's desire. It is hardly too much to say that Zarathushtra's ideal of worship is best expressed in Christ's great and final saying that 'they that worship him must worship in spirit and truth.' How far this high ideal was appreciated

and accepted by his contemporaries, and to what extent his influence availed to ensure its persistence after his death cannot be ascertained. Certainly some of the divinities invoked and praised in the *Yasna heptenhaiti*, which, on linguistic grounds, cannot be assigned to a very much later date than the *Gāthas*, clearly indicate that at that early time there was a distinct descent from Zarathushtra's high spiritual conception of worship.

3. **Late Avestan period.**—By the time of the Later Avesta Mazdaism had developed an elaborate system of ceremonial worship. Animal sacrifices on the largest scale prevailed. *Haoma* had regained more than its pristine veneration in the new order; and henceforth the preparation of its juice (*parahaoma*) becomes the central point of the Mazdaean ritual¹—a position from which, to this day, it has never receded.² The return of the old Iranian gods as angels (*yazatas*, beings meet to be worshipped) in the new pantheon increased enormously the ritual of Mazdaism and the acts of worship devolving upon the followers of the faith. Every day of every month was devoted to some special divinity, who was specially invoked, praised, and sacrificed to in addition to the regular worship of that day. Thus the 1st, 8th, 15th, and 23rd of each month were consecrated to Ahuramazda; the 3rd and 5th to the *ameshaspentas*; and in a similar manner the remaining days to other genii.³ Over and above these were the special feasts, such as New Year in honour of Mazda. Prayers, hymns, and liturgies befitting all these occasions were utilized.⁴ Each day was divided into five parts, and at each division a special prayer, one of the so-called *Gāhs*, was uttered. For the elaborate ritual associated with the rites of initiation and the disposal of the dead see under those headings. What worship gained in extent and elaborateness during this period it seems to have largely lost in inwardness and spirituality. The value of the prayers came to be regarded as consisting mainly in the words and their correct utterance. We get the impression that they came to be employed as mere charms and magic formulæ.⁵

4. **Present time.**—If animal sacrifices are excepted, Parsi worship is to-day, outwardly, practically what it has been from late Avestan days. Before the sacred fire of their temples the same Avestan liturgy is recited, accompanied by the priestly performance of the same ceremonies. The same divinities are invoked and praised by the orthodox Parsi to-day in the same prayers and hymns as were used two millennia earlier. But it should be noted that a strong reform movement has set in among many educated Parsis, the tendency of which seems to be not so much to work radical changes in the outward form of their worship as to change the whole emphasis from outward forms to the moral and spiritual ideas symbolized in the ceremonies. In one or two instances lately, it is true, the priest has gone to the length of introducing a sermon or address into the service. But this is exceptional.

5. **Collective and individual worship.**—Although devout Parsis often frequent the fire-temples, as we gather from *Visparad*, iii., their ancestors also did, especially on sacred days, such as those consecrated to Atar (3rd, 9th, 17th, and 20th) of the Parsi does not consider attendance at the temple

¹ Cf. Skr. *yaj*, 'worship,' 'dedicate,' 'offer'; Av. *yaz*, Gr. *ἄζωμαι*; indicating that, before the separation, the habit of worship obtained among the Indo-Europeans.

² l. 131 l.

³ See art. SACRIFICE (Iranian).

⁴ The occurrence of the word *zōatar*, 'priest,' in one passage in the *Gāthas* (Ys. xxxiii. 6) cannot be held to require the modification of the above statement. See J. H. Moulton, *Early Zoroastrianism*, London, 1913, p. 116.

¹ For a detailed account of that ceremony and of the successive steps by which ritual and liturgy alternate in the preparation of the *haoma* juice see M. Haug, *Essays on the Sacred Language, Writings, and Religion of the Parsis*, ed. E. W. West, London, 1907, p. 393 ff.; and art. HAOMA.

² See art. SACRIFICE (Iranian).

⁴ See art. FESTIVALS AND FASTS (Parsi).

⁵ See art. PRAYER (Iranian).

indispensable to worship, and places far less store upon it than the faithful Christian does upon church-going.¹ One reason for that fact is that much of the priestly worship at the temple is without special reference to any laity that may be present—the long *Yasna* ceremony is a conspicuous example. But, even when assembled in large numbers at the temples, their worship seems to be almost if not quite entirely individual and separate, not collective and united. These two facts are surely very significant. We noted them in Herodotus's description of early Persian worship—slight regard for religious edifices as aids to worship, and absence of united action in public worship. But they are in perfect keeping with the highly individual and independent character with which Zarathushtrianism imbues its adherents. Moreover, the private and individual devotions of a faithful Parsi are as numerous as those of the devotees of most religions. We give the following quotation to substantiate this fact:

'For the modern Parsees the precise forms of prayer are strictly laid down; a brief survey of them will be sufficient. On rising, washing, and dressing, especially on tying the sacred string, a series of prayers are to be repeated. Next follows the special morning-prayer. Before and after each meal, likewise, prayers are said; and in the evening, before the Parsee goes to sleep, he has, further, to reflect upon and examine what he has done in the course of the day, and then only, after reciting certain prayers, he retires to rest. To the prayers which form part of the order of the day are added a number of others which must be said on certain occurrences, viz. after sneezing, after conjugal intercourse, after satisfying natural purposes, after pollutions during sleep, after the cutting of nails and hair, as well as after the lighting of candles.'²

LITERATURE.—In addition to the works already referred to see Anquetil du Perron, *Zend-Avesta, Ouvrage de Zoroastre*, 2 vols., Paris, 1771, 'Usages civils et religieux des Parsees,' pp. 527-591, and 'Système théologique cérémonial et moral,' pp. 592-618; Dosabhai Framji Karaka, *Hist. of the Parsis*, London, 1884; Maneckji Nusservanji Dhalla, *Zoroastrian Theology*, New York, 1914; J. H. Moulton, *The Treasure of the Magi*, Oxford, 1917. The reader will find much relevant material in the two last-mentioned works.

E. EDWARDS.

WORSHIP (Roman).—I. General principles.—The term 'worship' may be treated as comprising all modes of giving expression to the various feelings entertained towards the divine powers—feelings of awe, reverence, obligation, deprecation, gratitude, hope, and others. The forms given to the expression varied, first, according to the conceptions entertained about the nature and functions of the beings who swayed the destinies of men and women, next, with the development of civilization among the people. The limitations of certain kinds of worship to certain classes of people, public and private, also fall to be considered.

2. Worship as related to conceptions of divinity.—In the earliest known forms of Roman religion men's conceptions were vague, and the divine influences were not supposed to pertain to definite personal gods, being described by the shadowy phrase *numina*. Observances of worship were therefore naturally far more simple than they afterwards became. The early Roman did indeed regard divine power as perceptible in every portion of the world, and in every department of life. In a sense he may be said to have entertained the opinion of the Greek philosopher, Heraclitus, who said that 'all things are full of gods' (πάντα πλήρη θεῶν). Every stage in human life was passed in contact with superhuman powers. The Roman nursery was haunted by a host of divinities, whom the fathers of the early Church were given to ridicule. The earliest religious observances reflect the life, mainly, of an agricultural commun-

ity, and aimed at securing the safety of men and animals, and of the boundaries of the farm. In many cases the actual implements used in life, or accessory to it, were regarded as in some way the seats of the superhuman influences. Thus each *terminus*, or boundary-stone, was regarded as the seat of a *numen*, and this idea seems to be anterior to that of a god Terminus protecting all boundary-stones.¹ Another primitive notion which influenced the forms of worship was that each community had its own protecting divinities, who belonged to it and no other. Gods were generally supposed to confine their interest to particular tribes, clans, or civic organizations or to groups of persons within them. There were therefore in Italy infinite diversities of local religious usage, many of which, when Rome became the governing power, affected and complicated the religious practice of the dominant city.

Political and religious obligation were never held asunder in the ancient world. It was in theory the duty of every citizen to maintain intact the religious observances which had been handed down to him from his ancestors. But no such theory has ever prevented change. At most it has restrained changes not sanctioned by political authority. The literary Romans regarded all the institutions of religion as owing their existence to a single lawgiver, King Numa. Later rulers were only imitating him when they adapted religious practice to the changed needs of their times.

3. Rigorousness of ancient forms.—At all times the Roman was deeply impressed by the importance of ascertaining precisely the forms of the words, actions, and offerings which he should use in doing honour to divine personages. First, the proper divine title must be ascertained if possible. To the latest times expressions were introduced into formulæ which might obviate the evil effects of a slip. Thus, if there was a doubt as to the sex of the divinity, the words 'sive tu deus, sive dea es,' were added. Precise accuracy in the words of which the petition or salutation consisted was of the highest consequence. This rigorousness applied also to the secular formulæ of the law, to which, indeed, in early days, a certain sacredness attached. This strict formalism led to the publication by the priestly authorities of a religious document which bore the name of *Indigitamenta*, and preserved for later times names of divinities and lists of usages which would otherwise have died out of memory.² Down to the latest times the simple offerings which had satisfied the old *numina* were preserved side by side with the more elaborate dedications. At the family shrine the *far pium* and *saliens mica* of Horace continued to be presented, and the *mola salsa*, prepared according to a very primitive method, was placed before Vesta three times a year by her priestesses, the Vestals, who performed for the great State-family at the State altar the functions which belonged to the unmarried daughters of the private family. Similar offerings, prominent in the worship of different divinities, were bean-meal, lard, milk, wine, and honey.

As to animal sacrifices, their oldest form of which record is preserved was the peculiar ceremonial offering called *suovetaurilia*, in which a bull, a sheep, and a pig were led three times in procession round the farm, and then the victims were sacrificed, and a prayer couched in Latin of ancient form was pronounced, which is preserved by Cato.³

4. Changes in worship due to external influences.—The Roman pantheon and Roman worship had doubtless gone through a number of changes before the earliest time which has left traces in historical practice of religion. Many attempts have been made by modern scholars to pierce the dense pre-historic darkness in which the state of early Italy is enveloped. The material, however, which has come down to us from ancient days is so completely untrustworthy that the efforts of scholars have chiefly testified to their power of imagination. This material indeed, if it deserves the name, was produced mainly by the unbridled imagination of poets, genealogists, annalists, grammarians, and antiquaries of the late Republic and early Empire. To correlate even the results of modern archaeological research with this heterogeneous mass of statements, so as to produce any solid results, is a hopeless task. The earliest safe source of information about Roman cults is to be found in the inscriptions which have preserved the remains of the ancient Roman calendar. When ancient Roman scholars, like Varro and Verrius Flaccus, drew from the actual records of the cults illustrations of the ceremonies mentioned in the earliest calendar, they preserved actual religious history. And religious usage was so tenacious in Rome that the light thus obtained carries us back a long way.

Conservative as the early Roman State was with regard to religion, the recurring desire for novelties in cults was from a very early time satisfied in a remarkable way. When the demand became clamorous, in times marked by great public disasters, such as severe defeats at the hands of enemies or sore famines or pestilences, the Senate would order the mysterious *Sibylline Books* to be consulted, so that the proper mode of meeting the religious emergency might be discovered. It was felt that conjunctures occurred when the aid to be drawn from the gods who ordinarily protected the country was insufficient. It dawned upon the consciousness of the citizens that perhaps divinities who presided over foreign communities might be able to come to the rescue. At a very early time the Greeks were recognized as masters of divine lore, and the *Sibylline Books* were believed to enshrine precious results of their experience. An inquiry therefore into the proper mode of expiating disasters, which were naturally supposed to indicate divine wrath, almost invariably resulted in an injunction to adopt into the ceremonial of the State religion some rite derived from Greece. The *Sibylline Books* therefore constituted a sort of open door through which entered such a mass of new religious usage that the Roman religion was extensively Hellenized. Sometimes the new usage was connected with a divinity not previously worshipped by Romans, at other times the new practice was grafted on the cult of an old Roman divinity. For one great feature of the movement was the identification of Roman divinities with Greek, the divine beings concerned being supposed to differ only in names.

This process of Hellenization began very early, and the legend which attributed the introduction of these books to the period of the monarchy enshrined a particle of historic truth. But the religious revolution was much accelerated by the advance of Rome to world power, when important crises, giving rise oftentimes to superstitious fears, were multiplied. Some of the most archaic forms of Roman ritual survived in the late Republican time as popular festivals with disorderly accompaniments. Such were the Saturnalia and the *Festum geniale* of Anna Perenna,¹ the Floralia in April,² the festival of Fors Fortuna in June,³ the

¹ Ovid, *Fasti*, v. 523 ff.

² *Ib.* v. 331 ff.

³ *Ib.* vi. 775 ff.

Ancillarum feriae in July (mentioned in late literature), and others. Many, however, of the most venerable survivals in Roman religious practice of the later time were maintained by the appointed administrators merely from a conservative sense, and were forms that excited little interest except among scholars and antiquarians. Such ceremonies were, e.g., the driving of the nail into the wall of the temple of Fortuna, the *Fordicidia*,¹ and many others. The influence of Augustus led to an archaic religious revival, which re-established many primitive rites that were all but forgotten, and prevented many others from sinking into complete oblivion, under the weight of indifference induced by many influences, especially the sceptical tendencies stimulated by the Hellenization of culture, and the manifold new impressions produced by contact with various peoples during the process of world conquest.

The Oriental religions came more and more to attract the Italic and Western populations after the establishment of the Empire. During the Republican age, the government had opposed barriers to the advancing tide of Orientalism in religion. The first Eastern cult to find a place in the official framework of Roman religion was that of the Magna Mater, adopted in 204 B.C. It is not easy to explain the official acceptance of a form of worship of such a frenzied character at so early a date, even when one takes into account the enormous strengthening of superstition by the tremendous experiences of the Hannibalic war: the old feeling reasserted itself in 186 B.C. when the so-called 'Bacchic conspiracy' was ruthlessly suppressed by the Senate, with whom rested the final authority in such matters. In the later days of the Republic many private attempts to establish at Rome Egyptian forms of worship, especially those of Isis and Serapis, were frustrated. These cults naturally tended to find a refuge in the seaports to which fleets from Egypt came, especially the Campanian maritime towns. At Puteoli, for instance, there was a temple of Serapis as early as 105 B.C., and near the coast, at Pompeii, a shrine of Isis existed even before the Roman conquest of the town. Three times in the ten years between 58 and 48 B.C. shrines of Isis were destroyed in Rome. Under Augustus the pressure produced by the popularity among the masses of Egyptian rites became very great, but naturally the ruler could not favour divinities who had allied themselves with his enemy Mark Antony. In 19 B.C. Tiberius, in consequence of a gross scandal, destroyed a shrine of Isis, and caused her image to be cast into the Tiber. Nevertheless private dedications of temples continued to be increasingly common. The government did attempt to prevent them from being erected within the *pomerium*, but in vain; for in A.D. 69, when the army of Vitellius beset the city, Domitian assumed the garb of a devotee of Isis and sought safety among the servants of her temple.² The full tolerance of this divinity at Rome took place before the death of Lucan in A.D. 65, as we see from a scornful reference in his poem.³ The actual formal inclusion of Egyptian deities in the Roman pantheon, whereby they were thoroughly naturalized and no longer restricted by authority to the space outside the *pomerium*, came in the time of Caracalla. This emperor built a sumptuous temple of Serapis on the Quirinal. The attraction of the public to the ritual of the Egyptian deities was largely due to the mysteries which were connected with them. Brotherhoods and initiations, whereby these 'saviour' gods (*σωτήρες*) rescued the

¹ Ovid, *Fasti*, iv. 631 ff.

² Suet. *Domit. l.*

³ viii. 831 ff.

devotee from evil, exercised a powerful fascination. The Roman soldiers who had served in the East brought with them on their return, from the time of Sulla onwards, many Oriental cults, which tended to flourish greatly in the time of the Severi, whose origin was in the East. Some of these divinities assumed Roman names, such as Jupiter Dolichenus, Invictus Sol Elagabal (from whom the emperor Elagabalus took his name). The worship of Mithras reached its height in the West in the 3rd and 4th centuries A.D.

The divinization of the Roman emperors changed in many respects the whole face of Roman religion. Their cult became the strongest bond of union between the different populations of the Empire, and it became, from another point of view, an important element in the scheme of provincial government.

5. Important public rituals. — The different rituals under which the gods were officially venerated may be distinguished. At Rome the State priests came to bring together under the title of *ius sacrum* all the principles and practices of Roman religion, just as the secular law was comprised under the *ius publicum*. The severance between sacred and secular law was indeed not completed until a comparatively late date. Survivals in late Rome indicate that in early days a kind of religious sanctity attached to the formulæ of the civil law, and the great exponents of the two systems were often the same. The *pontifices maximi* were in primitive times generally distinguished lawyers also. And Roman religion was at all times under the final control of secular authorities, the magistrates and the Senate. When a colony was founded, the fundamental charter always required the first magistrates to consult their Senate, as to the divinities whom the colonists were to serve, and the modes of their service. These divinities were naturally, as a rule, taken from the Roman pantheon, because, according to a common saying, a Roman colony was 'quasi effigies parva simulacrumque populi Romani';¹ but, like the parent city, the new community had full autonomy in the arrangement of its public worships.

Whenever the State undertook a new duty towards the divine power, it was expressed in the form first of a *uotum*. The conditions which constituted the validity of the *uotum* of the magistrate were well understood; but in important cases the magistrate would be careful to obtain a preliminary understanding with the Senate. The recorded cases in which a question was raised whether the *uotum* was binding on the community are few in number. The contents of the *uotum* might be of many descriptions, as its objects might vary from the perfectly general *uota pro rei publicæ salute* which the principal magistrates pronounced each New Year's Day to some specific thing. Sometimes the *uota pro salute* mentioned a particular number of years; the *decennalia uota* of the emperors asked for the safety of the empire during a period of ten years. There were also *quindecennalia* and *vicennalia*. The fulfilment of the *uota* was carried out by the secular magistrates, though the precise forms which had to be employed (concerning which usage was extremely conservative) were prescribed and supervised by the experts in the *ius sacrum*, the *pontifices*.

The fulfilment of the *uota* would generally issue in the dedication to sacred uses of some material thing—often a *templum*. This thing became technically *res sacra*, and was protected against secular encroachments by the *ius sacrum*. On the whole, the Roman government watched rather

jealously the transference of rights in property from the secular to the sacred sphere, but when the transference was accomplished, it was rigidly maintained by law.

In the case of the *uota* the community, through its magistrates, approaches the divinity and practically enters into a legal compact with the god. Not only the community, but the god also is bound, and the procedure had a distinctly legal aspect.

There were other ways in which the community might be bound. Certain occurrences showed that in some way the gods were offended, and it was the duty of the public officers to find a way of averting the divine wrath. Thus *prodigia*, portents which seemed to interrupt the order of nature, called for *piacula*, offerings or services intended to secure appeasement of the offended deity. Thus Livy says: 'C. Servilius pontifex maximus *piacula irae Deum conquirere iussus*.' In times of stress and public peril, *prodigia* (or *ostenta*) would be reported to the authorities in great numbers. The information was carefully sifted and often some of it was rejected; the signs of divine wrath which were accepted as real were then expiated (*procurata*). Signs which occurred 'in privato loco' or 'in loco peregrino' were not admitted.² The *haruspices* had a great part in these expiations.

It was also foreseen that, apart from such special indications, the community would continually contract pollution from the imperfect or erroneous performance of religious duties, so that provision was made for a general clearance of offences at regular intervals. The *lustrum* (literally 'washing') with which the proceedings of the census concluded was a clearance of this kind. The annual perambulation of the city (*amburbium*) was another. An ancient body of priests, the *Fratres Arvales*, annually performed a *segetum lustratio* at Rome. Similar, though not regular, was the *lustratio* of the army, when it was overcome by some superstitious dread. Scipio had to pause before crossing into Asia, in order to free his force from the sense of pollution. Similar was in part the purpose of the *supplicatio* which after a victory was held in honour of the whole body of divinities, in order to get rid of the taint of blood-shedding. The procession took place round all shrines ('circa omnia pulvinaria') and provided the population with an enjoyable holiday. The ancient temple was not freely open to be seen; there were no recurring services such as take place in a modern church. In most instances there was but one festival in a year at a temple. Therefore, as many contained wonderful monuments and precious treasures dedicated by Roman heroes of former times, there was great eagerness to survey them. The *supplicatio* took place in early times on one day only. Later, generals pressed to have the importance of a victory emphasized by repeating the *supplicatio* on succeeding days, and in the age of Cæsar the number of days might extend to forty or fifty. The triumphal procession also doubtless belonged to the same class. Both it and the *supplicatio* were probably of Hellenic origin. Similar was the procession of twenty-seven virgins, round the city, singing a sacred hymn, which was sometimes ordained.³ All *ludi* were in one aspect religious performances, offered to some divinity. The gladiatorial *ludi* came from Etruria, and were intended to appease the partly divine spirits of the dead, which were reinvigorated by the blood which was shed. Even at the end of the Republic, these *ludi* were always, as a matter of form, declared to be held in honour of some deceased person con-

¹ XL. xxxvii. 5.

² XLII. xiii. 23. 25.

³ Livy, xxvii. xxxvii. 7.

¹ Gellius, xvi. xiii. 9.

nected with the exhibitor. It is in connexion with the *ludi* in general that we hear most of the practice called *instauratio*, the repetition of a ceremony because of the discovery of some flaw which vitiated its effect. In the time of the later Republic, when men ambitious to obtain high office paved their way to it by vast expenditure on *ludi*, these flaws were artificially created in order to justify additional lavishness.

Rules relating to sacrifice were elaborate. Particular deities called for particular offerings, and the accompaniments of sacrifice were very various. The separation between the divinities of the under and the upper world was in this respect specially important. Thus to Varro is attributed the view that *altaria* were appropriate to the *di superi*, *arae* to the *di terrestres*, and *foci* to the *di inferi*.¹

Public and private cults to some extent were parallel. For example, the worship of Vesta was as important for the family circle as for the State, which, like the family, had its own *lares* and *penates*. Many cults were indeed adopted from patrician families by the community. Rites in honour of the dead were extensively rendered by private persons as well as by the magistrates and priests of the community. Almost every regularly constituted group within the State had its own special cults. Thus every *collegium*, whatever might be the principal bond of union between its members, had its own special form of worship. Some groups within the city of Rome, which had survived from very primitive times, such as those called *pagani* and *montani*, maintained down to a late date their special religious usages. The *sacra* attached to families occupied an important place in the *ius sacrum*, the policy of the religious lawyers having been to prevent, so far as possible, the extinction of these *sacra* by the dying out of the families. To the *gens* as well as the *familia* also appertained its own *sacra*.²

Among important public ceremonies to which reference has not been made above may be mentioned the *lectisternium*, certainly borrowed from the Greeks, and the *ludi sacculares*, which originated from the *ludi terentini*, a ceremony connected with departed spirits, celebrated at an altar of Dis pater. These *ludi* and the *ludi sacculares* which succeeded them were supposed to occur at the end of a *saeculum*, which was first assumed to comprise a hundred years, but in later times the period was fixed at 110 years. The ceremony is best known from the records of the celebration ordered by Augustus in 17 B.C., for which Horace wrote his *Carmen Saeculare*. This series of celebrations went on until A.D. 314, and another series, theoretically to celebrate the end of each century from the foundation of Rome, ran parallel with it.

The observances due annually to the gods were prescribed at settled dates on the calendar, published yearly under the supervision of the college of *pontifices*.

6. Ritual proper to groups.—Among celebrations (*feriae*) connected with groups of men may be noted the *Quinquatrus*, observed by the *artifices* in honour of their patron divinity Minerva, and the *Quinquatrus minuscula*, held by the flute-players (*tibicines*). There were many similar festivals. One was carried out by the *mercatores*, on the foundation-day of the temple of Mercurius by the Circus, another by the workmen where trade depended on the use of water (*aquatores*). The date for this was 11th Jan., a day sacred to Inturna, a goddess of springs and fountains, fabled by Virgil to have been sister of Turnus, king of

the Rutuli. Not all persons were qualified to be present at all services; from some women were excluded, and men from others.

7. Religious officers.—Along with the *pontifices*, the *augures*, and the keepers of the Sibylline oracles (*Quindecimviri sacris faciundis*) were the great priestly colleges; membership of these was a great object of ambition to men engaged in public life. The *haruspices* had not the same distinction; they did not really constitute a college, like the other bodies. Until a late date they were Etruscans, summoned by the Senate from time to time as occasion required, to expound the peculiarly Etruscan lore of means of expiation, chiefly for the evil sign of the thunderbolt. Later, *haruspices* trained in Etruria were settled in Rome and employed publicly and privately.

8. Minor collegia.—Real standing *collegia* of minor importance, but great antiquity, were those of the *fetiales*, the *Salii*, the *Luperci*. In order to assure itself that a war was correct in the eyes of heaven, the early State employed the *fetiales* to make a demand on the opposing power, according to a certain fixed form, and if the demand was not conceded, instructed the same priests to announce in another fixed ceremonial fashion to the opposing power that peace had been replaced by war. On the conclusion of the war, the same *fetiales* supervised ceremonially the conclusion of a treaty (*foedus*). No compact was a *foedus* unless its conclusion had been so carried out by the *fetiales*. The *ius fetiale* has often erroneously been regarded as a sort of international law. But the *fetiales* were not concerned with policy, or with questions of right and wrong. A *iustum piumque bellum* was not one which was morally correct, but one which was ceremonially flawless, having been opened with some forms on which the gods had looked with favour from immemorial time. The *Salii* were priests who specially served Mars. Priests bearing that name existed in a number of ancient Italic cities besides Rome. At Rome itself these priests were, even in late time, patricians. There were really two *collegia* which bore the name, one with a sanctuary on the Palatine hill, the other on the Quirinal. Each of the colleges must have originally represented a separate independent community, and both survived after the two had coalesced. The ceremonies, supposed to have been instituted by King Numa, were of the most archaic description. They sang hymns in honour of Mars as war-god, and danced in armour, in procession round the city, twice in the year, in March and October. They bore lances and the sacred *ancilia* (shields), preserved in shrines, from which they were taken on these occasions with great solemnity. The purification of the holy weapons (*armilustrium*) was performed with minute ceremony. Virgil¹ speaks with reverence of the ceremonial, but Seneca² allows himself to deal lightly with the *saltus saliaris*. The *Luperci* also had two distinct forms, like the *Salii*. One was connected with the Palatine hill, the other with the Quirinal. As in many other instances, it is clear that the State at an early time took the services out of the hands of particular families, for the two bore the names respectively of *Luperci Quinctiales* (from the Quinctii) and *Luperci Fabiani* (from the Fabii). In 44 B.C. Caesar's memory was honoured by the creation of a third *collegium*, the *Luperci Iulii*, but its duration was brief. The ritual of the *Luperci* (evidently connected with a primitive pastoral community) was directed to purification and reconciliation with the divinity honoured (Fannus or Silvanus). The *Luperci* ran round the foot of the Palatine hill, on

¹ Servius on Virgil, *Ecl.* v. 66.

² Cf. G. Wissowa, *Religion und Kultus der Römer*, p. 357.

¹ *Aen.* viii. 285.

² *Ep.* xv. 4.

the north-west side of which lay the sacred cave called Lupercal. The priests sacrificed goats, and ran their ceremonial course with the skins of the sacrificed animals round their hips, their bodies being otherwise unclad. They bore whips in their hands, made of strips of goatskin; with these they struck women who ran in their way, desirous to escape from the reproach of barrenness. The thongs bore the name of *februa*, a word connected (as in the name *mensis Februarius*) with purificatory ritual. It is no wonder that, as Plutarch says, the Luperci themselves were constrained to laugh at portions of the ceremonial.¹ The Lupercalia continued to be performed down to A.D. 494, when Pope Gelasius I. appointed the day for the ritual of the Purification of the Virgin. The worship of Fannus, the deity with whom the festival was concerned, was a cult almost peculiar to Rome and the country immediately round it.

Although the *Fratres Arvales* are only once mentioned in extant Latin literature² they are well known to us from inscriptions discovered on the site of the shrine of the brotherhood, a few miles from Rome on the right bank of the Tiber, in the direction of its mouth. The first discovery was made in 1570; afterwards fragments which had been removed from the site came to light, and then in the years 1867-71 excavations on the site greatly increased the number of fragments. The whole were carefully studied by a succession of scholars, especially by W. Henzen, who published the whole with a commentary (Rome, 1868, and Berlin, 1874); also (without commentary) in *CIL* vi. (1876). The inscriptions proved to be an important source for the earlier imperial history. They embody minutes of proceedings of the brotherhood from A.D. 14, when it was refounded by Augustus, to A.D. 238. The fact of the connexion of Augustus with the shrine seems to have given the brotherhood a special interest in events and anniversaries connected with the emperors and their families; on the suitable days offerings were made and recorded in the minutes. The inscriptions have preserved (in an entry relating to A.D. 218) a hymn in Saturnian metre which is the most ancient monument of the Latin language.³

One college of importance, that of the Vestal Virgins, was composed of women. The early Romans were conscious of a parallelism between the religion of the family, whose centre was the family hearth, and that of the great State family, for which the hearth was in the temple of Vesta. There, as in the separate families, the unmarried daughters had a great share in the family cults. The *rex sacrorum* stood in the same relation to the Vestals as the *paterfamilias* held with the maidens of his family; and this *rex* succeeded to some of the duties which had belonged to the old *reges* before the institution of the Republic.

Other brotherhoods subsisted, some from primitive days, like the *sodales Titii*, who traced their origin to King Titus Tatius, and were supposed to maintain a ritual borrowed from the old Sabines.⁴ Others were of late creation, such as the *sodales Augustales*, devoted to the imperial cult, that of the *divi imperatores*, the divinized emperors. The brotherhood consisted of twenty-one ordinary members, chosen (Tacitus says) from the very highest ranks, with four members of the imperial family. The first of these representatives were Tiberius, Germanicus, Drusus, and Claudius. Similar brotherhoods were established in honour of later emperors, Claudius, Vespasian, Titus, Hadrian,

Antoninus Pius, and others; but these never attained to the same importance.

Many separate priesthoods, to which the name *flamen* was attached, also existed; some, like the *flamen* of Jupiter (*flamen Dialis*), of Mars (*Martialis*), Quirinus (*Quirinalis*), from time immemorial, others of later creation and less consequence. The three just mentioned were *flamines par excellence*, sometimes called *maiores* in contrast to all others. The *flamines minores* were attached to the service of a great many divinities, and in later time were all of plebeian quality. The really ancient offices were concerned with ritual of a remarkably archaic type. The rigorous restrictions under which the *flamen Dialis* lived are well known. He and his wife (the *flaminica*) must be married by the very ancient form of *confarreatio*. If the *flaminica* died, the *flamen ipso facto* lost his office; he could originally undertake no civil duties, though he wore the distinctive robe of civil office, the *toga praetexta*, and sat on the chair of office (the *sella curulis*); could look on no armed array; could not absent himself from his house (the *regia*, attached to the temple of Vesta) without leave from the *pontifex maximus*. He was hemmed in by many minute rules of the nature of 'tabus'; for example, it was not permissible for him to have a knot anywhere in his clothing. The office of *flamen*, generally speaking, involved personal participation in certain definite sacrifices.

LITERATURE.—The course run by Roman religion during the time of the empire is brilliantly sketched by G. Boissier, *Religion romaine d'Auguste aux Antonins*¹, Paris, 1892, and *La Fin du paganisme*², do. 1894. For all the subjects mentioned in this article, the best work in English is W. Warde Fowler, *Roman Festivals*, London, 1899; in German the most useful are J. Marquardt, *Römische Staatsverwaltung*, vol. v. 'Das Sacralwesen,' Leipzig, 1875, and G. Wissowa, *Religion und Kultus der Römer*, Munich, 1902 (vol. v. pt. 4 of *Handbuch der klassischen Alterthumswissenschaft*, by Iwan Müller). Many valuable articles on separate topics are in Pauly-Wissowa, and also in Roscher.

WYCLIF.—I. LIFE.—i. Early years and parentage.—John Wyclif, or Wycliffe, 'drew his origin'¹ from the village of that name in Yorkshire on the southern banks of the Tees. The name of this village, the first syllable of which is *wy*, 'water,'² determines the spelling; the German form 'Wiclif' should be avoided. The manor of Wyclif was in the honour of Richmondshire, and the Wyclif family were undertenants of the Earl of Richmond. We first hear of the Wyclif family in 1253, when a certain Robert de Wyclif was granted a messuage in the manor; in 1263 he obtained the advowson of the church,³ and in 1287 held of the mesne lord, William de Kirkton, twelve carucates of land in Wyclif, Girlington, and half of Thorpe.⁴ In 1316 a Robert de Wyclif was lord of the manor.⁵ His son or nephew Roger⁶ married in 1319 Katherine, the Reformer's mother. At that time Roger's father or uncle, Robert, the lord of the manor, was still alive, and this may account for the uncertainty as to the birthplace of their

son. According to Leland,¹ he was born at 'Ipswell, a poor village, a good mile from Richmond.' But Hipswell is at a considerable distance from Wyclif village, nor is there any proof that the Wyclifs owned land there.² On his marriage Roger Wyclif would be assigned one of the smaller houses on the estate, possibly Thorpe, close to Wycliffe, for which he paid the relief in 1319 of 25s. for three carucates of land that he held.³ At what date Robert Wyclif died is unknown, but the Reformer's father Roger paid the subsidy for the whole estate in 1332-33⁴ and was still alive in 1347-49.⁵ The year of his death is also unknown, except that it was before 1362, for unfortunately the black letter inscription in the church at Wyclif over the tomb of Roger and Katherine gives no date.⁶

The date of birth of the son of Roger and Katherine is unknown. He is usually assumed to have been the eldest son, born shortly after the marriage.⁷ But it is probable that there was an elder brother William.⁸ Moreover, the date at which John Wyclif took his doctorate, in or about 1372, points to a later date of birth, nearer 1330 than 1320. Before 1362 Wyclif's father Roger died, and the Reformer became the lord of the manor. His mother was still alive in Oct. 1369, when John associated her with himself in a presentation to the living.⁹ The only other connexion of Wyclif with his family estate was his nomination on 17th May 1367 on a commission issued to seven Yorkshire gentlemen to see to the keeping of the statute recently passed prohibiting the taking of salmon in certain seasons in the Tees and other rivers.¹⁰ After Wyclif's death the estate passed to a Robert Wyclif, probably his brother, an energetic ecclesiastic who from 1390 to 1405 acted as chancellor to Walter Skirlaw, bishop of Durham. As such he took a prominent part in the trial at Bishop Auckland of the famous Lollard, Richard Wyche.¹¹ In 1412 Robert settled the estates on a John de Ellerton, who assumed the name of Wyclif¹² and from whom the later lords of the manor were descended. They were noted for their intense fidelity to Rome after the Reformation.

2. Early Oxford career.—At what date Wyclif went to Oxford is unknown. If he was born in 1330, it would be in or about 1345. Three colleges claim him. The claim of Queen's¹³ may be dismissed as due to a confusion with a John Wyclif, possibly the Reformer's nephew, an 'almonry boy' in the Queen's grammar schools for whom in 1371 we find the college buying Latin grammars, etc.¹⁴ The claim of Merton rests upon a catalogue of Fellows made in 1395 by Thomas Robert, still in the possession of Merton.¹⁵ This John Wyclif, a steward or seneschal,¹⁶ may be John Whitclif of

Mayfield († Nov. 1383).¹ Possibly John Wyclif was the rare exception, a northerner in a southern college, and a recent writer claims that he had 'been worked into Merton to pacify the Northerners,'² and was thus the seneschal of the week expelled in 1356, as the result of a college struggle.

Wyclif's connexion with Balliol is certain. That he was Master of Balliol in the spring of 1360 (and therefore presumably previously a Fellow) is clear from a document citing his taking possession as such of a property in Gresham St. E.C.³ His predecessor Robert Derby⁴ still acted in 1356.⁵ This gives the earliest possible date of Wyclif's Mastership. On 9th April 1361 Wyclif was still Master and took possession for the college of the living of Abbotsley.⁶ But on 14th May 1361 he was instituted to the college living of Fillingham, near Lincoln, value 'thirty marks,' and by the then statutes was forced to resign his Mastership. Some delay, however, occurred, for in the following July he still signed himself 'Master' in a legal document connected with the transfer to the college of Abbotsley.⁷ The restriction of the Fellowships at Balliol founded in 1340 by Sir Philip Somerville for those proceeding to a degree in theology to six in all will account for Wyclif leaving.

After his presentation to Fillingham Wyclif vanishes for a while from clear vision. But on 29th Aug. 1363 he obtained from his bishop, John Buckingham of Lincoln, a licence for non-residence at Fillingham 'that he might devote himself to the study of letters in the university.'⁸ In consequence he paid a short visit to Oxford in Oct. 1363, living in rooms in Queen's, and a longer visit between 21st March 1365 and 26th Sept. 1366, paying 40s. 'for the rent of his room for two years.'⁹ Meanwhile on 24th Nov. 1362 the University in presenting its annual 'roll of Masters' had petitioned Urban v. to provide Wyclif with 'a canonry and prebend in York, notwithstanding that he holds the church of Fillingham.' Urban granted instead the prebend of Aust in the ancient collegiate church of Westbury-on-Trim, near Bristol, worth £6, 13s. 4d. *p.a.*¹⁰ Wyclif accepted the prebend¹¹ but did not reside. He was, as we have seen, reading for his doctorate at Oxford. In the spring of 1366 William Wittlesey, bishop of Worcester,¹² visited Westbury. He found that all the five canons were non-resident, and that only one had provided a vicar to discharge his duties. 'Master John Wynkele' (for thus the bishop spells the name) is expressly mentioned among the delinquents; and on 28th June 1366 Wyclif was cited to appear before the bishop on 18th July. Meanwhile his 'fruits' were sequestrated. Of any further action by Wittlesey there is no record. Wyclif continued to hold the prebend to the day of his death.¹³

¹ *Itinerary*², 9 vols., ed. T. Hearne, Oxford, 1744, v. 112.

² The clerical blunder in Hearne's ed. of Leland, *Collect.* of 'Sprewell' has deceived many—e.g., G. V. Lechler, *John Wyclif and his English Precursors*, ed. 1884, p. 81. For this work (hereafter known as Lechler, *JW*) see Literature below, and for Hearne's blunder R. L. Poole, *Illustrations of the Hist. of Medieval Thought*, p. 285, n. 3. No such village ever existed (Whitaker, ii. 41).

¹¹ Rashdall's doubts in *DNB* lxiii. 205 are contrary to the evidence.

¹² *DNB* lvi. 158.

¹³ In most lives of Wyclif (e.g., *DNB* lxiii. 205) it is assumed that he resigned Aust in Nov. 1375. On 6th Nov., for reasons that are not clear, he was confirmed in this prebend, which on 15th Nov. was given by the king to Robert de Farrington. On 22nd Dec. 1376 this grant to Farrington was revoked on the 'information' of John of Gaunt as given in error under the

but of any discharge of duty there is no evidence.¹

One other matter in connexion with Aust should be mentioned. By the constitution *Horribilis* of Urban v., 3rd May 1366, a return was demanded of all pluralities. Wyclif's return, which should have been made to Bishop Buckingham, does not exist, whether through his neglect or because now lost cannot be determined.²

While these matters were in dispute at Aust, Wyclif was nominated by Archbishop Islip³ in a deed dated at Mayfield, 9th Dec. 1365, to be the warden of Canterbury College, Oxford, founded by Islip in 1361. Islip intended it to be a joint college of eight seculars and of four regulars from Christ Church, Canterbury. The college was started on 13th March 1363, Islip selecting as head Henry Wodehull, a monk of Abingdon. On 9th Dec. 1365 Islip dismissed Wodehull and substituted 'John de Wyclive.' The regulars were driven out and three seculars from Merton introduced. Not content with this, Islip furthermore changed the statutes and altered the whole character of the college. While accepting the position, Wyclif did not choose to give up the rooms at Queen's. Wyclif's tenure of the office was brief. On the death of Islip (26th April 1366) the monks of Canterbury lodged an appeal. Islip's successor, Simon Langham,⁴ deprived Wyclif of his office (30th March 1367), sequestrated the revenues, and finally expelled Wyclif and his three secular colleagues. Wyclif thereupon appealed to Urban v., but meanwhile for two years, if his opponents may be trusted, still lived on at Canterbury, spending freely the college goods. Wyclif's proctor, Richard Benger, one of his associates at Canterbury, failed to put in an appearance when summoned at Viterbo, and on 23rd July 1369 Cardinal Androin de la Roche, to whom Urban had referred the case, gave his decision at Monte Fiascone, though, owing to his death, it was not published until 15th May 1370. The action of Langham was upheld in every detail and Wyclif's appeal dismissed. The costs, however, were thrown upon the estate. There is no doubt that this decision was right. Islip had acted illegally in altering the trusts, upon which the royal licence in mortmain had been secured,⁵ and for the condonation of this offence the monks of Canterbury were condemned on 8th April 1372 to pay a fine of 200 marks.⁶ Urban evidently had some sympathy for Wyclif, for in 1369 he reserved for him a prebend in Lincoln, which, however,

belief that 'the prebend was vacant' (see H. J. Wilkins, *Was John Wyclif a Negligent Pluralist?*, Bristol, 1915, p. 33; *Cal. Pat. Rolls Ed. III.*, xvi, 121, 195).

¹ For Wyclif and Aust reference should be made to the researches of H. J. Wilkins, *op. cit.*, and *An Appendix to John Wycliffe*, London, 1916.

² A. H. Thompson's note in Wilkins, *Negligent Pluralist*, p. 86.

³ *DNB* xxix, 74.

⁴ *Id.* xxxii, 99.

⁵ *Cal. Pat. Rolls Ed. III.*, xii, 139.

⁶ The identification of the warden of Canterbury with the Reformer has been a matter of much controversy. It was accepted by N. Harnpsfield in his *Historia Wiclefiana*, printed in his *Historia Anglicana ecclesiastica*, London, 1622, p. 668; then by A. Wood, Lewis, Vaughan, Lechler, Poole (*Med. Thought*, p. 287 n.), Milman, Matthew. The best arguments in defence are by Canon Wilkinson in *Church Quart. Rev.* v. [1877-78] 119-141; and Cronin, pp. 55-76. The main documents have been printed by Pratt in his ed. of Foxe, *Acts and Monuments*, 1870, ii, App. 922 ff. (hereafter cited as Foxe, *AM*). Doubts were first cast by W. Courthope in *Gent. Mag.* xvi. [1841] 146, followed by Shirley, *FZ*, pp. 513-528, H. Rashdall (*DNB* lxiii, 2031, *Universities of Europe in the Middle Ages*, London, 1895, ii, 498 n.), and others (e.g., *Vict. Co. Hist. Oxford*, ii, 68), who identify the warden with John Whitclif, vicar of Mayfield, for whom see above. This identification should be rejected, for the scanty arguments in its favour cannot outweigh the evidence of contemporaries—e.g., William Woodford in his *Septuaginta Questiones de sacramento altaris* (in *FZ*, p. 517), of the *Chronicon Angliæ* (Rolls Ser., 1874), p. 115. The present writer suspects also a reference in Netter, *Doctrinale*, ed. F. B. Blancioti, Venice, 1757, iii, 485. In his *de Ecclesia*, p. 371, Wyclif makes a singularly impersonal reference to the matter.

Wyclif never obtained or, if he obtained it, soon resigned.¹

While the controversy over Canterbury College was still unsettled, Wyclif's licence for five years for absence from his cure expired. So on 13th April 1368 he obtained an extension 'for two years.'² In the following autumn he exchanged Fillingham for Ludgershall in Buckinghamshire, where he was instituted on 12th Nov. 1368. The nearness to Oxford would compensate for loss of income (10 marks instead of 30).³ In Nov. 1371 Wyclif was one of the executors of the will of William de Askeby, archdeacon of Northampton, who in 1369 had been appointed chancellor of the exchequer.⁴ Towards the close of 1372 Wyclif completed the long course of nine years and a term after Mastership necessary for taking his doctorate⁵ and shortly afterwards entered the king's service.

3. In the king's service.—We date Wyclif's entrance into the civil service as about 1372. Possibly it may have been a little earlier, for Wyclif gives us a report of a speech which he himself 'heard' in the parliament which met in Westminster on 24th Feb. 1371.⁶ At once he seems to have allied himself with John of Gaunt and his faction, altogether unconscious of the unscrupulous ambition and selfishness which underlay the duke's politics. But Wyclif's first appearance as a publicist was as the representative of the nation in resistance to papal exactions. On 6th June 1365⁷ Urban v. had demanded the payment of the King John's annual tribute of 1000 marks together with arrears since the last payment made on 7th July 1333. Edward laid the matter before the parliament of May 1366, which indignantly refused.⁸ Until recently it was believed that 'this solemn declaration set the question at rest for ever,'⁹ and the older historians have all dated Wyclif's public life from 1366.¹⁰ But there is evidence that the question of tribute was reopened by Gregory XI. in 1374, and it is in connexion with this later event that we would date Wyclif's first political tract. To consider this and other demands of Gregory a council was held at Westminster on 21st May 1374,¹¹ at which a prominent part in defence of papal claims was taken by a monk, John Ughtred of Boldon,¹² assisted later by William Binham, a monk of St. Albans. The debate and consequent controversy led to the publication by Wyclif,

¹ *Cal. Pap. Letters*, iv, 193.

² *Mem. Ep. Buckingham*, f. 50 d.

³ *Reg. Buckingham Instit.* x. f. 419; cf. f. 130 d.

⁴ A. W. Gibbons, *Early Lincoln Wills*, Lincoln, 1888, p. 25 f.; also in *Gent. Mag.* xxii. [1844] 136; Foxe, *AM* ii, 946.

⁵ Knowledge of this important date, usually given, e.g., by Shirley in *FZ*, p. 527, F. D. Matthew, *Eng. Works of Wyclif*, p. vi (hereafter cited as *EW*), as 1366, can now be inferred from *Cal. Papal Letters*, iv, 193, from which we learn that Gregory XI. in a provision dated 26th Dec. 1373 (not Jan. 1373, as *DNB* lxiii, 206, copied by many) states that Wyclif recently became 'master of theology.' The date given by Bishop Bale, in the margin of *FZ*, p. 2, of 1372 is thus accurate. This date is of fundamental importance for the chronology of Wyclif's life and works, the earlier date leading to disastrous results. Unfortunately in many of the prefaces to the works of Wyclif printed by the Wyclif Society this earlier date is taken as a basis.

⁶ *De Civ. Dom.* ii. c. 1. The idea of Lechler (*JW*, p. 130 f.) that Wyclif was a member of parliament either at this time or later should be dismissed. The speech in question is merely a tale taken from the contemporary *Vade mecum in tribulatione* written in 1349 by the Spiritual Franciscan, Jean de la Roche-taillade, and will be found in E. Brown's ed. of Ortuin Gratius' *Fasciculus rerum expectandarum*, London, 1690, ii, 496-507.

⁷ *Cal. Pap. Lett.* iv, 16; not 13th June, as Raynaldus, xvi, 116, followed by most historians.

⁹ J. Lingard, *Hist.*, London, 1849, iii, 255.

¹⁰ E.g., R. L. Poole, who is thus led as editor to date Wyclif's *de Dominio Divino* as shortly after 1366 (pp. xxiii-xxiv), following Shirley in *FZ*, pp. xvii, xxi n.; Lechler, *JW*. But see below, p. 819.

¹¹ Reported only in *Eulogium Historiarum*, iii, 337-339; in *DNB* lxi, 159 treated as fiction.

¹² For whom see *DNB* lviii, 17, or J. Loserth, 'Die ältesten Streitschriften Wiclifs,' in *SWAW*, 1903, pp. 7-23.

though possibly not until two years later, of his *Determinatio contra unum monachum* (i. e. Binham).¹ Special reference is made in the tract to the question of the tribute. Wyclif replies to Binham by giving the answer 'which I heard recently was given by secular lords in a secular council,' and reports seven so-called speeches. On analysis the speeches resolve themselves into the various 'conclusions' of Wyclif condemned by Gregory XI. in 1377, while the sixth lord gives us a brief outline of Wyclif's views of 'lordship.' To suppose that we have in them 'the earliest instance of a report of a parliamentary debate'² is absurd. They are all reflexions of Wyclif's own views, written, probably, eighteen months after the council.

Wyclif's services had already been rewarded by his presentation by the Crown to the rectory of Lutterworth (7th April 1374).³ On 26th July 1374 he was appointed a member of a small commission, with John Gilbert, bishop of Bangor, as the head, to meet at Bruges a commission from Gregory.⁴ For his travelling expenses Wyclif received 42s. 3d., and for his other expenses 20s. a day.⁵ On the day before his departure Wyclif took some legal steps on behalf of his former proctor Richard Benger. Along with Ralph Strode, the Common Sergeant of London,⁶ he went bail for him that Benger would not at Avignon attempt to obtain any papal provisions, etc.⁷

The conference at Bruges effected nothing, and by the middle of September Wyclif was back in Oxford, living in rooms at Queen's, which needed much repair, in that month.⁸ In Aug. 1375 another deputation was appointed to go to Bruges to confer with Gregory's nuncio. In this deputation, though most of his former associates were retained, Wyclif was left out.⁹ This omission (usually overlooked by historians, who have in consequence exaggerated his influence at Bruges) probably shows that he was too unbending for Edward's purpose. As a result on 1st Sept. 1375 a concordat between Gregory and Edward was struck.¹⁰ Wyclif had thus no complicity in a great sham, in its main provisions a victory for the papacy.

As a result of the conference several of the actors in it received preferments. In after years Wyclif's enemies invented the story that he expected to obtain the bishopric of Worcester.¹¹ The story is worthless. Months before Wyclif sailed to Bruges a nomination had been made to the vacant see by Edward III.¹² That Wyclif, however, expected to receive the prebend of Caistor in Lincoln has more basis.¹³ Wyclif returned from Bruges a disillusioned man. He formed the idea of writing a *Summa* of his doctrines, the introduction to which should deal with the philosophical positions which underlay the recent dispute. For the two years, Sept. 1374–Sept. 1376, he probably resided at Lutterworth, but with frequent visits

¹ For this tract, first imperfectly printed in Lewis, *JW*, pp. 363–371, we have now Loserth's ed. in *Op. Minora*, p. 415 f. The tract should be distinguished from the *Determinatio ad argumenta Outredi*, published at the same time (*Op. Minora*, p. 405 f.).

to Oxford (Queen's). During those two years he developed his theory of 'lordship,' expanding his tracts against Ughtred and Binham into the two great political treatises *de Dominio Divino* and *de Civili Dominio*. He was probably engaged upon these writings during the meeting of the 'Good Parliament' (28th April 1376–6th July 1376). It is difficult to explain Wyclif's action in the autumn of 1376. John of Gaunt packed a parliament, which met on 27th Jan. 1377, with his followers, who at once proceeded to annul all the acts of the Good Parliament, while Wyclif, 'running about from church to church' in London, denounced the episcopate, who under the lead of Courtenay and Wykeham were the duke's chief opponents.¹ Wyclif's protest against the wealth, luxury, and worldliness of the clergy fell on willing ears; but nevertheless he unconsciously played the duke's reactionary game. The parliament of Jan. 1377, with its iniquitous poll-tax,² its restoration of Alice Ferrers, and the aggrandisement of the duke by the creation of Lancashire into a county palatine,³ is one of the worst on record.

The bishops, powerless in parliament, struck at the duke through Wyclif, and summoned the latter to appear before Convocation in St. Paul's on Thursday, 19th Feb. 1377.⁴ The duke took up the challenge and, together with Earl Percy, the king's marshal, accompanied Wyclif to the trial. The proceedings ended in a riot. Wyclif was carried off by his supporters, while the London mob, on the following day, burned the duke's palace of Savoy.

Meanwhile some of Wyclif's old opponents at Oxford had accused him at the papal court. On 22nd May 1377⁵ in S. Maria Maggiore in Rome Gregory issued a series of bulls directed against the Reformer.⁶ With these bulls Gregory forwarded a schedule of nineteen erroneous 'propositions and conclusions,' culled from Wyclif's political and politico-ecclesiastical writings. These Gregory identified with the 'opinions and ignorant doctrine of Marsiglio of Padua and John of Jandun' condemned by John XXII.⁷ An examination of the pope's schedule shows that the theses concern the status or polity rather than the doctrines of the Church.⁸

Before Edward could receive the bulls, he had passed away at Sheen (21st June 1377). His death caused delay, and the bulls were kept back until after the meeting of parliament on 13th October. This parliament was in no mood to truckle to Rome. By a writ dated 12th Dec. 1377 the bishops were ordered to make a return of all aliens, including cardinals, who held benefices.⁹ To stop the drain the Council asked Wyclif for his advice 'whether the kingdom of England may lawfully . . . keep back the treasure of the kingdom.' Wyclif replied in a state-paper,¹⁰ in which he advocated not only the stopping of all the drain to Rome but the 'prudent distribution to the glory

¹ *Chron. Anglie*, 116.

² *Rotuli Parl.* ii. 304.

³ Rymer, iii. 1073.

⁴ For the events that follow the chief authority is the full *Chron. Anglie*, 117–134, copied by Foxe, who had access to it, in *AM* ii. 800 f. Narratives written before the publication in 1574 of this long-lost *Chron. Anglie* often go sadly astray.

⁵ Not 30th May, as *FZ*, p. xxviii.

⁶ For these bulls see Walsingham, *Hist. Ang.* i. 345–353; Wilkins, *Conc.* iii. 116–118, who omits those to Oxford and to Edward III.; Lewis, *JW*, pp. 46–49, 254–264, or Foxe, *AM* iii. 4–7.

⁷ From a study of Wyclif's works the present writer is of opinion that Wyclif knew nothing of Marsiglio first hand.

⁸ The schedule is best studied in Wyclif's *Protestatio* (see below), or in *FZ*, pp. 245–257. The first eight theses are taken almost verbatim from Wyclif's *de Civ. Dom.*

⁹ *Rotuli Parl.* iii. 19; E. Powell and G. M. Trevelyan, *The Peasants' Rising and the Lollards*, London, 1890, p. 57 f., gives the return.

¹⁰ For this see *FZ*, pp. 258–271; partly translated in Foxe, *AM* iii. 54–56.

of God' of the goods of the Church. At this point 'silence was imposed upon him by the king.' Wyclif had probably been consulted by the Crown because of a paper recently published by him on the question of the oath sworn by the papal nuncio, Arnould Garnier, on 13th Feb. 1372 that he would do nothing to the hurt of the kingdom.¹ Wyclif printed the oath and asked whether there was not a contradiction between its terms and the permission to collect monies for Rome.²

No steps had yet been taken to publish the bulls, though Thomas Brunton, bishop of Rochester,³ told Wyclif in the hearing of many members of parliament that he had been condemned.⁴ About this time Wyclif entered into controversy with a 'motley doctor' of Oxford, probably his accuser at Rome. This tract⁵ is remarkably bold in tone. Wyclif calls upon 'the soldiers of Christ, especially the professors of evangelical poverty,' to rouse themselves against the claims of the papacy. On 28th Nov. parliament was dismissed,⁶ and probably Wyclif returned to Oxford.⁷ On 18th Dec. a mandate was issued to the chancellor of Oxford enclosing one of Gregory's bulls. The mandate ordered the chancellor to ascertain whether Wyclif had taught the theses in question, and to cite him to appear within thirty days at St. Paul's.⁸ As the pope's bull demanded that Wyclif should be arrested,⁹ the Oxford authorities were in a dilemma, for to obey 'would seem to give the pope lordship and regal authority in England.' So the vice-chancellor contented himself with ordering Wyclif 'to stay in Blackhall and not to go out.' Wyclif's theses were sent to the masters regent in theology, who 'all handed to the chancellor their conclusions.' They 'declared publicly in the schools that Wyclif's theses were true, though they sounded badly to the ear.' Wyclif replied that catholic truth should not be condemned because of its sound.¹⁰ A few months later, on the occasion of a student-row, the vice-chancellor, who was a monk, was thrown into prison on the pretext 'that he had imprisoned John Wyclif at the mandate of the pope.'¹¹ About this time Wyclif published an edition of his *Protestatio* in a shortened, popular form.¹² The tract is really an appeal to the educated public against the pope's decisions. He also published an appeal to the nobility, in defence of disendowment, entitled *Speculum Secularium Dominorum*.¹³

The imprisonment by the Crown of the vice-chancellor of Oxford seems to have been intended as a warning to the papal commissioners that the Crown would not recognize papal penal jurisdiction. About the same time Wyclif appeared at Lambeth. The date is fixed by a statement of Walsingham¹⁴ that it was shortly before the death of Gregory XI., *i.e.* before 27th March 1378, probably at the end of February, which would fit in with the summons given to Wyclif at Oxford to appear at St. Paul's. The queen-mother, Joan of Kent, sent a message to the bishops ordering them to abstain from pronouncing any final judgment. But the trial proceeded, and Wyclif put in a paper

that he called a *Protestatio*¹ in which he expanded more fully the meaning of his theses. At the same time the citizens broke into the archbishop's chapel and tried to stop the trial. So the bishops contented themselves with prohibiting Wyclif 'from canvassing such theses in schools or sermons because of the scandal thereby given to the laity.'² Wyclif replied by publishing *Conclusiones Triginta tres de Paupertate Christi*, dealing with his idea of poverty and disendowment.³

In the autumn of 1378 Wyclif was seen, for the last time, in alliance with the Crown. On 11th Aug. 1378 by the order of the Government the sanctuary of Westminster was violated in order to capture two English knights between whom and the Government there had been a struggle over a Spanish captive, the count of Denia, and his ransom. One knight, Shakyl, was arrested—he had been enticed outside; the other, Haulay, was chased twice round the chancel and killed 'beside St. Edward's shrine.' Excommunications followed; and, as the outrage was popularly attributed to the hated John of Gaunt, London seethed with excitement. On 20th Oct. 1378 parliament met at Gloucester, and Archbishop Sudbury at once demanded satisfaction. The court retorted by claiming the right of arrest. The privilege of the Church was not denied, but the matter, it was pleaded, was one of debt, for which there were no rights of sanctuary. 'And on this there came into parliament doctors of theology and civil law who made argument against the prelates by many colourable and strong reasons.'⁴ Among the doctors was John Wyclif, who interrupted the writing of his *de Ecclesia* to lay before parliament a defence of the Crown's action.⁵ He claimed for the Crown a right to absolute obedience in all matters not contrary to God's law and, while admitting sanctuary for accidental homicide, subjects the right in general and of Westminster Abbey in particular to severe criticism. Shortly after this incident Wyclif finished his great treatise *de Ecclesia*. This was followed by a companion work, *de Officio Regis*, the two forming a complete exposition of his views on the relations of Church and State.

4. Break with the Mediæval Church.—The Great Schism in the autumn of 1378 flung Wyclif into complete antagonism to the papacy. Hitherto Wyclif had not disputed the spiritual primacy of the popes, though ready enough to attack papal pretensions and to speak ill of individual popes.⁶ His position had been this: we must obey the pope as the vicar of Christ, but the vicar of Christ, who could have no temporal sovereignty, must be the holiest, the most God-enlightened man in Christendom. Moreover, 'no pope is to be believed unless he is teaching by the inspiration of God, or founding his utterances on Scripture.'⁷ The whole authority of the office was thus determined by the pope's character as one of the elect, and, inasmuch as this knowledge was beyond human ken, could only be judged from his deeds. Obedience to the papacy was thus a matter of convenience and church order—a position in which Wyclif unconsciously closely followed Marsiglio in his *Defensor Pacis*.

The schism drew Wyclif from this standpoint. He had hailed the election of Urban VI. (8th April

⁵ Wyclif's defence of the Crown and his general attack on sanctuary was expanded by him into six chapters which he incorporated in his *de Ecclesia*, pp. 142-274.

⁶ *De Eccl.* p. 358; cf. *ib.* p. 366.

⁷ *De Apostasia*, pp. 65, 173. Wyclif's middle views on the papacy can best be studied in his *de Potestate Papæ*, ed. J. Loserth, 1907.

1378) and had 'thanked God for providing our mother church with a catholic head, an evangelical man.'¹ But the tactlessness of the new pope, the breaking out of the schism by the election at Fondi on 20th Sept. of the French pope, Clement VII., and the subsequent conduct of Urban drew Wyclif into a fierce antagonism, the more bitter because he acknowledged that Urban had been lawfully chosen. This antagonism became complete when on 6th Dec. 1382 Richard II. authorized Bishop Despenser² to proclaim a crusade on Urban's behalf against the antipope.³ The later development of this crusade,⁴ its disgraceful attack upon Dunkirk, its defeat at Ypres, and the return to England in Oct. 1383 of the discredited host infused into all Wyclif's later writings a deadly hatred to the papacy itself. At first he attempted to save his position by maintaining that 'our Urban' was innocent of this 'crime,' which was really the work of the friars.⁵ But, when this argument was cut away by Urban's deeds, he averred that the cardinals had no right to choose a man who acted contrary to God's will.⁶ All his theories were wrecked by the spectacle of two popes each claiming to be the sole head of the Church, each labelling the other as antichrist 'like dogs quarrelling for a bone,' 'like crows resting on their carrion,'⁷ each seeking to bring about a general Armageddon for the destruction of his rival. The writings of his last years, especially in 1383, are full of this theme.

Wyclif's break with the papacy might have been passed over as an extreme form of the Gallikanism of the age which culminated in the Council of Constance. But his anti-papalism developed side by side with his attack upon the central doctrine of the mediæval Church, transubstantiation. Wyclif's attack flung Oxford into an uproar, and the new chancellor, William de Berton,⁸ in the autumn of 1379 or early in 1380,⁹ called a council of twelve doctors, of whom six were friars, to consider Wyclif's heresies. Their verdict, published late in 1380, was a foregone conclusion.¹⁰ It was read unexpectedly in Wyclif's presence while he was sitting in the schools of the Augustinians and 'determining the contrary.' On hearing the condemnation Wyclif was 'confused,' but he recovered himself sufficiently to say that 'neither the chancellor nor any of his accomplices could alter his convictions.'¹¹ He might have appealed to the Congregation of Regent Masters and from their decision to the Great Congregation of the University;¹² characteristically he appealed instead to the king. John of Gaunt hurried down and urged him to be silent.¹³ Wyclif refused. He had done with his entanglement in the Lancastrian alliance, and on 10th May 1381 published a Latin defence of his views called the *Confessio*.¹⁴ This

was followed at Oxford by a series of determinations against him, three of which have come down to us.¹

After the publication of his *Confessio* Wyclif left Oxford for ever, and retired to Lutterworth. To those last months at Oxford must be assigned the familiar tale of his illness and of his declaring to certain friars who came to counsel him: 'I shall not die, but I shall live and declare the works of the Lord.'² To this period also we assign the commencement by Wyclif and his assistants of his translation of the Bible, and the full organization of his Poor Priests, who, however, had already been at work for some years.³ The Poor Priests were not laymen, as is so often assumed, but 'unauthorised preachers,' i.e. without a bishop's licence, who moved from place to place, carrying Wyclif's tracts and sermons with them. Clad in russet robes of undressed wool, without sandals, purse, or scrip, for a few years they became a power in the land until crushed out by the legislation of Archbishop Arundel and Henry v.

Meanwhile at Oxford on 30th May 1381 Berton was turned out of the chancellorship, and Robert Rigg⁴ took his place. Rigg allowed full liberty to teach the condemned doctrines, and during the winter of 1381-82 feeling ran high. The flames were fanned by the Peasant Insurrection of the summer of 1381. Both parties sought to fasten upon the other the opprobrium of this revolt. The regulars accused Wyclif and brought forward alleged confessions of John Ball.⁵ Nicholas of Hereford⁶ and the Lollards retorted by accusing the friars. On 18th Feb. 1382 the friars appealed to John of Gaunt through Stephen Patrington.⁷ As the duke returned no answer, the friars appealed to Courtenay. On 7th May 1382, when parliament assembled,⁸ Wyclif laid before it a memorial. He claimed that England should obey no prelate unless such obedience agreed with Christ's law, that money should not be sent to Rome unless it could be proved from Scripture to be due, that the Commonwealth 'should not be burdened with new tallages' until the endowments of the clergy be exhausted, that the king should employ neither 'bishop nor curate' in secular business, that the temporalities of any bishop 'living notoriously in contempt of God' should be confiscated, and that no one should be excommunicated until it is proved that the sentence is according to 'God's law.'⁹

Along with this formal petition Wyclif prepared an English *Complaint*, which has come down to us in an incomplete form.¹⁰ In this *Complaint* he deals with four only of the seven matters of his petition, but includes the request that 'Christ's (hereafter quoted as *SEW*), iii. 500, which Knighton, *Chron.* ii. 157, avers was by Wyclif, put in by him as a disavowal at the Blackfriars Synod (see below).

¹ *FZ*, pp. 133-241. ² Foxe, *AM* iii. 20.

³ The Poor Priests undoubtedly preceded the Peasants' Rising, in the organization of which they were accused of playing a part. See T. Wright, *Political Poems*, in *Rolls Series*, 2 vols., London, 1859-61, ii. 23-56; *Rotuli Parl.* iii. 124 f.; *Eulog. Hist.* iii. 351; Matthew, *EW* v. p. 444; Walsingham, i. 324.

⁴ *DNB* i. 53.

⁵ *FZ*, p. 273 f.; repeated in J. Stow, *Annales*, London, 1615, p. 294. For Ball see *DNB* iii. 73.

⁶ *DNB* xl. 418.

⁷ *FZ*, pp. 292-295; for Patrington see *DNB* xlv. 47; J. H. Wylie, *The Reign of Henry the Fifth*, Cambridge, 1914, i. 230 f.

⁸ *Rotuli Parl.* iii. 122.

⁹ For this petition, which Wyclif called *Imprecationes*, see Wyclif, *de Blasphemia*, p. 270 f. It is also found in Walsingham, ii. 51 f. where no. 4 really forms the last clause of no. 3. Walsingham or his editor, H. T. Riley, mistakenly calls it *Interpretationes*. Lechler, *JW*, p. 406, following R. Vaughan, *John de Wycliffe*, London, 1863, p. 289, wrongly dates as presented after the Blackfriars Synod to the parliament which met 6th-20th Oct. (*Rotuli Parl.* iii. 132). There is no mention of the Petition in the records of parliament.

¹⁰ Printed by T. James in 1603; also very imperfectly by Lewis, *JW*, p. 83 f. and with rectification of the order of the text by Arnold, *SEW* iii. 507-523.

² *DNB* xiv. 416.

³ Rymer, iv. 157; Knighton, *Chron.* ii. 201-203; Wyclif, *Polem. Works*, 2 vols., London, 1883, ii. 600.

⁴ There is a sketch in English by G. M. Wrong, *The Crusade of 1383*, London, 1892; for the Flemish account see J. Meyer, *Commentarii sive Annales rerum Flandricarum*, Antwerp, 1561, p. 193 f.

⁵ *Polem. Works*, ii. 574, 593.

⁶ *Ib.* ii. 613.

⁷ *Ib.* ii. 591.

⁸ *DNB* iv. 411.

⁹ The date of Wyclif's attack is usually placed later (Matthew, *Eng. Hist. Rev.* v. 328-330, in the summer of 1380, and most writers later still), following *FZ*, p. 104. The date will depend upon that of the Council of Twelve, usually placed (e.g., *DNB* lx. 229) as early in 1382. But this date is too late (see *DNB* iv. 412). Berton was chancellor from 1379 to 1381 (*Eng. Hist. Rev.* v. 329), and the council must have been held within these limits and before the publication of Wyclif's *Confessio*. According to a note on the MS of *FZ*, p. 115, this was published on 10th May 1381.

¹⁰ *FZ*, pp. 110-113.

teaching concerning the Eucharist, that this sacrament is very bread and also very Christ's body,' 'may be taught only in churches.'

To these attacks the new archbishop, William Courtenay, replied by summoning a committee to meet on 17th May in the Blackfriars. Nine bishops, sixteen doctors of theology, eleven doctors of laws, seven bachelors of theology, and two bachelors of laws were selected by Courtenay.¹ Of the sixteen doctors of theology all but one, and he a monk, were friars, several of them noted opponents of Wyclif.² Wyclif himself was not summoned to appear,³ nor was his name mentioned. Twenty-four conclusions from his writings were produced which were deemed 'heretical' or 'erroneous.'⁴

On Wednesday 21st May the Committee met again. Between two and three in the afternoon a terrific earthquake shook the city. Courtenay pointed out that it was the effort of the earth to purge itself, 'though not without violence,' of heresy. Courtenay's happy interpretation saved the Committee, and Wyclif found it necessary to publish an interpretation in an opposite sense. 'The earth-din,' he maintained, was the outcry of the world against the heretic prelates and friars.⁵ Henceforth Wyclif always called it in contempt 'the Earthquake council,'⁶ so much so that Netter complained that Wyclif treated the earthquake as a miracle wrought for his benefit.⁷

On the day after the Earthquake Synod Courtenay persuaded Richard to admit into the final statute of parliament a chapter ordering sheriffs, upon certification from the bishops, to arrest and imprison all itinerant preachers. The ordinance had never received the consent of the Commons.⁸ This was followed on 26th June by letters patent from Richard directed against the itinerant preachers.⁹ When parliament reassembled on 6th Oct., protest was at once made against the pretended statute,¹⁰ but to no avail, for in after years it was treated as still valid.¹¹ Action more constitutional was taken by Courtenay when on 30th May, a week after the Blackfriars Synod, he forwarded a mandate to the bishops bidding them publish Wyclif's condemnation 'with all possible speed.'¹²

5. Last years.—After the Blackfriars Synod Wyclif took no further public part in controversy at Oxford. On 30th July 1382 his followers, Nicholas of Hereford and Repingdon,¹³ were excommunicated, but Wyclif's name was not inserted.¹⁴ Possibly he owed his immunity to John of Gaunt. The idea that Wyclif, when summoned in Nov. 1382 before a Synod at Oxford, made a recantation¹⁵ may be dismissed. In the minutes of the Synod¹⁶ there is no such record. The whole story

rests upon a blunder of Knighton,¹ who has confused an uncompromising defence by Wyclif of his views² with a recantation.

Nothing in fact more emphatically marks the hold that Wyclif still had upon the nation than the reluctance of Courtenay to push matters to the extreme. Wyclif was left to close his days in peace at Lutterworth. In the autumn of 1382 he was stricken with paralysis³ and thereafter was largely dependent on his curates, John Horn and Purvey. But his pen was never more prolific than in these latter days. He published polemic after polemic, as well as finishing the *Summa* of his doctrines in thirteen volumes. With tireless energy he repeated all his old attacks, dwelling especially on the need of disendowment—this he carried to the extreme of demanding even the confiscation of the revenues of Oxford colleges⁴—holding up to ridicule the misdeeds of the friars and the unapostolic character of the papacy, and defending at length his views of the Eucharist, to the need of which sacrament he attached less importance than formerly.⁵ In matters of Church organization he became completely critical and destructive. He seems to have been occupied with many works at once, dictating the main lines of thought and leaving to his disciples the necessary copying of material, a method which led to repetition and frequent inconsistency. In two of his *Sermons* on the same Gospel we have a totally different translation.⁶ Several of his works, including the important *Triologus* and his *Opus Evangelicum*, were still unfinished when the end came.

Wyclif's English writings form one of the special features of these last years. Abandoning Oxford and the appeal to the Schoolmen, he became a popular pamphleteer, trusting to his Poor Preachers to scatter the tracts broadcast. To this period also we must ascribe the publication of his English *Sermons*. Wyclif's last works are also marked by an extreme bitterness of tone, especially in his attacks against the friars.⁷ To this he was aroused by the part they had taken in 1383 in Bishop Despenser's blundering crusade in Flanders, and by their attacks upon his Poor Preachers. Despenser's crusade also completed the break between Wyclif and the papacy. No words became too strong with which to express his detestation of the whole institution.

There are grounds for believing that the friars in their anger appealed to Rome and that Urban replied by citing Wyclif to appear before his court. All we know, however, is deduction from a reply or letter of excuse which Wyclif addressed to Urban VI., in reality a keenly ironical statement of his attitude towards the papacy. He excuses himself from obeying 'this unskilful summoning' because of his physical infirmities, for the 'king of kings has willed it that he should not go.' The reference is to a stroke of paralysis from which he suffered 'for two years before his death.'⁸

The account of Wyclif's death has been handed down by John Horn, his curate at Lutterworth after his stroke. In 1441 Horn gave his evidence to Dr. Thomas Gascoigne. He stated on oath that on 28th Dec. 1384 'as Wyclif was hearing mass

in his church at the time of the elevation of the host he fell down, smitten by a severe paralysis especially in the tongue so that neither then nor afterwards could he speak to the moment of his death.¹ Three days later, Saturday, 31st Dec. 1384, he passed away.²

On 4th May 1415 the Council of Constance, acting on the request of an English Synod under Arundel held in the early spring of 1411,³ condemned 260 propositions in Wyclif's writings and ordered 'his bones to be dug up and cast out of the consecrated ground, provided they could be identified from those of Christians buried near.'⁴ After some years of delay the decree was carried out by the ex-Lollard Richard Fleming, bishop of Lincoln,⁵ acting on the peremptory orders of Martin v. (9th Dec. 1427).⁶ On 16th Dec. letters were sent by Martin v. to various mayors to assist.⁷ So shortly after 25th March 1428 'his vile corpse they consigned to hell and the river (Swift) absorbed his ashes.'⁸

II. *TEACHING AND WRITINGS.*—I. *Philosophical.*—Wyclif's philosophical writings were written in his earlier Oxford career, when he was the 'flower of Oxford' Scholasticism. At a later date they were collected into a *Summa*. Some of the works have come down to us—*c.g.*, *de Compositione Hominis*—rather as notes for lectures or disputations than as mature treatises. All his works abound in quotations, often vague and inaccurate, from the accepted authorities of his day, including the great Arabians.

Judged as a Schoolman, Wyclif belonged to the moderate realists. He had learned much from the criticisms of Ockham,⁹ of whom he speaks with respect. But the Platonism to which he leaned he had derived from St. Augustine, though in his method he bowed, as did all Schoolmen, to the authority of Aristotle. To Wyclif nominalism in any form was an impossible creed. He held that names stand for realities.¹⁰ He therefore held, as his many writings on the subject show, that the most important question in metaphysics was that of universals.¹¹ As with all realists, Wyclif was at times in danger of pantheism. When he states that body and soul are united eternally, it is because he considers man as *materia prima*, 'in consequence created in the beginning of the world,' whose individuality therefore as distinct from the common 'form' of humanity becomes unreal and phenomenal, or at any rate hard to explain.¹²

2. *Political and social.*—(a) *His theory of 'dominion.'*—Shortly after his return from Bruges Wyclif commenced the expansion of his *Determinatio* into two large treatises, the *de Dominio Divino*—which work was intended to serve as an introduction to the *Summa*—and the *de Civili Dominio*. In both we note the influence upon Wyclif of Richard Fitzralph, archbishop of Armagh.¹³ Wyclif 'has added no essential element

¹ Leland, *Collect.* ii. 409. In Lewis, *JW*, p. 286, there is a slightly different version from Cotton MSS A. 14, said to be in Gascoigne's own handwriting.

to the doctrine which he read in the work of his predecessor.¹ Wyclif commences his *de Dominio Divino* with a distinction between 'lordship' and 'use,' in which he followed, through Fitzralph, the views of William Ockham, and the Spiritual Franciscans to whom the distinction had been fundamental in their struggle with John XXII. 'Lordship' is the prerogative of God and is never separated from possession. The possession of the creature is always held subject to due service to the lord in chief; it is but the possession of a steward. Thus Wyclif works out by use of feudal ideas the same belief in the duties of property which modern reformers attempt to reach by other means. From this fundamental position it is an easy transition to the corollary that dominion is founded on grace and that mortal sin is a breach of tenure and so 'incurs forfeiture.'²

Wyclif's doctrine would have led to anarchical consequences, as indeed was pointed out to Hus at Constance,³ had it not been for Wyclif's careful distinction between 'dominion,' which belongs to the righteous man alone, and power, which the wicked may have by God's permission. From this main thesis 'that every righteous man is lord over the whole sensible world' it was an easy step to Wyclif's doctrine of communism.⁴ But Wyclif always insists that the righteous must in no wise attempt to acquire their inalienable rights by force. He had yet to learn, through the Peasants' Revolt, that a smouldering fire and a powder magazine are dangerous neighbours. When the blaze came, he was, in consequence, charged with being responsible. The charge was unjust; the two movements were coincident.⁵ The confessions of John Ball were fictitious; nevertheless the Peasants' Revolt (1381) was but the rude translation into the world of practice of a theory of 'dominion' that destroyed the 'lordship' of the wicked. 'It is to Wyclif's credit that, when the Peasants were defeated, he dared to own his sympathy with their wrongs and to put in a plea for mercy.'⁶ But sorrow for the woes of the poor runs through all his English writings like a wail of love and redeems his fiercest denunciations, his most impossible dreams. 'Poor men,' he cries, 'have naked sides, and dead walls have great plenty of waste gold.'⁷

(b) *Church and State.*—His theory of 'dominion' drew Wyclif into an examination of the limits of obedience⁸ and of the prerogatives and duties of the kingly office in his *de Officio Regis*, in reality his most complete treatise on the relations of Church and State. The dignity of the king, he held, was derived immediately from God. The king represents the glorified and therefore ruling Christ, the priest the suffering and submissive Christ; the king represents the will, the priest the love of God.⁹ As God's vicar the king has supremacy over the clergy.¹⁰ Episcopal jurisdiction is derived from the king,¹¹ and the king may inquire into all sins¹² and must withdraw temporalities from those in sin—a duty which Wyclif soon widens into that of general disendowment. By His obedience to Pilate Christ has shown that even tyrants must be obeyed.¹³ Henry VIII. could have asked no more thoroughgoing defence of Erastianism or of the divine right of kings against

Church and pope than this treatise, with its claim that it is lawful to pull down a church to build a (military) town, or to melt chalices to pay for soldiers.¹

3. Theological.—(a) *Doctrine of the Church.*—Wyclif's realism lay at the root of all his views of the Church and its sacraments. It led him to warn his hearers against the nominalist heresy that there was no Church before the incarnation of Christ.² It drew him into an extreme determinism. Above all it brought him into collision with the prevailing nominalist heresies concerning the Sacrament. For the nominalist, who held that the universal name was but a mere *fatus vocis*, found it easy to believe in the Scotist doctrine of the annihilation of the substance of the elements. To Wyclif such an idea was an absurdity; his whole philosophical system fell to the ground with its mere possibility. If in one case accidents can exist without substance, why postulate substance at all?³ Hence his realism is a protest against any doctrine of illusion. So, in the interpretation of his ideas, we must remember that, when Wyclif speaks, as he sometimes does, of the host as a 'sign,'⁴ he does not use the word in any Zwinglian sense. With him every figure is a reality, with its own real though ideal existence, while every real is also of necessity universal. To this philosophic basis we may also attribute Wyclif's complete repudiation of the nihilism as to the humanity of Jesus which through Peter Lombard's *Sentences* had infected the mediæval Church. He identifies Christ, especially in his early scholastic treatise, *de Benedicta Incarnatione*, with the *communis homo*, or universal man, who is identical with all His brethren.

Wyclif's views on the Church are best studied in his *de Ecclesia*, written about Easter 1378.⁵ The key to the whole is his rigid predestinarianism, in which he shows the influence upon himself of Archbishop Thomas Bradwardine's *de Causa Dei*.⁶ Like Bradwardine, he bases everything upon the all-conditioning absolute will of God. The Church Militant he defines as the whole number of the elect, containing 'only men that shall be saved,' and who cannot as predestinate cease to be such even by mortal sin, for theirs is the grace of final perseverance.⁷ He adds that no man, not even a pope, 'wots whether he be of the church or whether he be a limb of the fiend,'⁸ nor will he allow that 'the church can ever be called the whole body (*universitas*) of faithful travellers.' In this narrower view Wyclif shows a marked contrast to Marsiglio. He refuses therefore to allow that 'Christ is the head of all men, both of the faithful and unfaithful,' but claims that this is restricted to the predestinate.⁹ Nevertheless he guards his doctrine from some of its dangers by his warning that, 'as each man shall hope that he is safe in bliss, so he should suppose that he be a limb of holy Church.'¹⁰

From this basis of the Church certain conclusions followed. The pope is not necessarily the head of the Church, for it is not certain that he is a member of it. His position is therefore deter-

³ *De Euch.* p. 69 f.

⁴ *Ib.* p. 16, *de Apost.* p. 228.

⁵ Wyclif published in 1883 a compressed version which he called *de Fide Catholica in Op. Minora*, p. 98 f. This was widely disseminated in Bohemia.

⁶ For Bradwardine, who is not mentioned by Ueberweg, see *DNB* vi. 188, and the preface by H. Savile in his ed. of T. Bradwardine's *de Causa Dei*, London, 1618. Wyclif differed considerably from Bradwardine in his definition of free will (*de Ente*, p. 152 ff.).

⁷ *SEW* iii. 447; *de Eccl.* pp. 74, 111, 140.

⁸ *De Eccl.* pp. 3, 5, 29, 130, 464; cf. *SEW* iii. 339.

⁹ *De Eccl.* p. 57 f.; cf. *SEW* iii. 395; *EWV*, p. 198.

¹⁰ *EWV*, p. 350.

mined not by his institutional status but by his conformity with the tests of the predestinate, especially harmony with the teachings of the Bible.¹ Much also of the Catholic system as then believed was swept away as needless for the predestinate and useless for the foreknown—*e.g.*, prayers for the dead, the cult of saints, absolution—nor is he clear as to the value of the priesthood, the sacraments, or even of prayer which 'standeth in good life' and 'holy desire to do God's will.'² We may note that Wyclif's theory of spiritual values grounded in worthiness, resting on the absolute Divine Will, was logically one with his theory of dominion grounded on grace, and led to a sweeping doctrine of disendowment.

(b) *Doctrine of the Eucharist.*³—In the mediæval theory of the Eucharist there was at consecration a twofold movement: the cessation of the bread and the creation of the Body. Wyclif's difficulties lay with the former of these. It was acknowledged that as regards the cessation of the bread the movement was not complete, for it did not extend to the accidents. The *nomen* was changed, but the *phenomena* remained. Explanations of this mystery varied. Thomas Aquinas answered the question by his conception of *quantitas*—or, as we should now term it, 'subsistence' as distinct from 'substance.' 'Quantity' is not extension or a mere abstraction or a mere mode of being. It may be defined as the force which makes extension, *vis extensiva materie*. At the words of consecration 'quantity' takes the place of the substance of the bread and upholds the accidents, and therefore whatever the bread can do, even to feeding the body, is performed by the 'quantity' that remains.

The same question was answered by Duns Scotus, following Ægidius Romanus,⁴ by his doctrine of absolute accidents, maintained, on the annihilation of the substance, by the unconditioned will of God. The Eucharist is thus the constant repetition of a stupendous miracle. To Wyclif as a realist the annihilation of anything was inconceivable.⁵ At first he fell back in his defence of the Real Presence upon the Thomist idea of 'quantity,' then prevalent in Oxford, though he subjected it later to considerable criticism.

It is not possible out of Wyclif's later writings to deduce a consistent system. Of the Real Presence he had no doubt, and looked upon its denial as a renewal of the heresy of Berengarius,⁶ but he lost himself in trying to explain his position. He was driven by his nominalist opponents from position to position until he put forth a theory practically identical with consubstantiation, full of hair-splitting distinctions. He regarded as

¹ *De Eccl.* pp. 34, 88; *de Apost.* p. 200; *SEW* iii. 505.

² *EWV*, pp. 76, 274; *SEW* iii. 219, 425.

³ Wyclif's earlier views are best summed up in *FZ*, pp. 104–109, 115–132. The last is of special importance, and should be studied by all. His later and larger Latin works add little but expansion and repetition to the above, and may be passed by save by the specialist. But the reader should not neglect Loserth's Introduction to the *de Eucharistia*, London, 1892, or M. H. Dziewicki's Introduction to the *de Apostasia*, do. 1889. (Of the body of the *de Apost.* chs. xv. and xvi. are the most valuable; of the *de Euch.* pp. 15, 16, 18, 53, 83, 84, 85, 90, 93, 99, 111, 113, 123.) Cf. also Dziewicki's Introduction, *de Simonia*, London, 1898, xvi–xxi. His views in English are best summed up in *SEW* iii. 426, 403–410, 502. This last is practically identical with the *Wycket*, which, if written by Wyclif, represents a very late phase, almost Zwinglian in outlook. The present writer inclines to ascribe it to his followers. For other important passages of Wyclif dealing with the Eucharist, see *EWV*, p. 465, *SEW* ii. 358, 386, 404, iii. 484, 500, *de Blas.* 26–30, 287, *Trial.* iv. 247–255, *Serm.* ii. 453 f., 458 f., 461–463. For the relation of Wyclif's doctrines of space and time to his doctrine of transubstantiation see M. H. Dziewicki, *Johannes Wyclif Tractatus de Logica*, London, 1893–96, iii. Intro. vii–viii. The withholding of the cup from the laity, which played so important a part in Bohemia, did not trouble Wyclif.

⁴ *Theoremata de Corpore Christi*, Venice, 1502, prop. v. 38 f.

⁵ *De Ente*, p. 288 f.

⁶ *De Apost.* p. 79.

beyond question 'that Christ lies hidden in the elements,' that we can 'see' Him there 'by faith,' and receive Him in the host as the sun's fire is received through a sphere of crystal, and that Christ is in every part of the host, as when you break a glass and in every part 'thou mayest see thy face, and thy face not parted' or 'as a man may light many candles at one candle.' But the words of consecration 'make the occasion only' of Christ's presence, who is there 'not identically according to substance,' but 'really and truly according to His whole humanity.' On the logical side Wyclif never wearied of pouring scorn upon the idea of 'accidents without subject.' Such a doctrine seemed to him to strike at the root of all being, including that of the saints, and by throwing a doubt on the testimony of our senses to discredit all science.¹ Unfortunately in his abhorrence of all Scotist annihilations he used language that easily became twisted, especially by his more ignorant followers. That which is not or which is mere phantasm is necessarily less perfect than that which is, especially that which has life. Hence the unfortunate comparisons of the host to 'rat's bread,' 'spiders,' and the like,² especially by the later Lollards—e.g., John Badby.

Along with this main position Wyclif advocated other doctrines that seemed to him corollaries. In his earlier years he insisted on the sacramental function of the priest,³ though regarding it as inferior to the duty of preaching, in Wyclif's view the highest duty of all clerics.⁴ In his later developments he allowed that under certain circumstances the Eucharist might be consecrated even by a layman.⁵ Nor did he always make clear even to himself the relation of sacramental grace to character and to foreknowledge. At one time he maintained that the foreknown even when in actual sin can administer the sacrament with profit to the faithful, though to his own damnation, Christ supplying all the defects of the priest;⁶ but later that the value depended on the character of the priest and the nature of his prayers—in a word, on the priest 'being consecrated by God.'⁷ But he is careful to redeem this last conclusion from perilous uncertainty by pointing out that the sanctity, which comes from Christ's presence, is always the same.⁸

4. **Wyclif and the Bible.**⁹—Even in his earlier days Wyclif, following Ockham, appealed to the Bible as the primary, unconditional, and absolute authority, of universal range and entire sufficiency. He differed from Ockham in distinguishing between the Bible and the teaching of the Church, which Ockham had regarded as in harmony. He further asserted the right of every man to examine the Bible for himself. This was a corollary from his theory of 'dominion.' Every man was God's tenant in chief holding direct under 'God's law,' Wyclif's usual title for the Scriptures. He had a right therefore to know on what conditions he held. Nor would he allow that the tradition of the Church is the standard of interpretation. He sweeps away therefore the whole mass of tradition, doctrine, and ordinance, whether papal or conciliar, which had claimed to be of equal or superior value

to Scripture. Nor has he any place for a doctrine of development.

Wyclif's appeal to the Scriptures was followed by the translation under his inspiration of the whole Bible from the Vulgate into English.¹ The first form of this translation would seem to have been a translation of the Sunday Gospels, still extant in his English *Sermons*. Independently of this his followers brought out a version of the whole Bible. The exact share that Wyclif took is uncertain, and probably was slight. But the fact of this translation is beyond doubt, though recent research has shown that the so-called Wyclif version, the first of the complete Bible, had been preceded by other partial versions. Translation of the Bible was in the air. Wyclif's first version, a large part in whose production was taken by Nicholas of Hereford, was very unsatisfactory—a verbal, almost gloss-like, rendering into a midland dialect, without clearness of expression or idiomatic use of language. Accordingly before 1388 the revision of Wyclif's version was begun by John Purvey, Wyclif's secretary at Lutterworth, who smoothed out the harsh literalness of the original, changed its dialect to the uninflected type common at that time at Oxford, and contributed, about 1395, a notable General Prologue.² The two versions of Wyclif and Purvey have often been confused, and the influence of Wyclif's translation upon the development of the English language has been exaggerated. In later years the existence of Wyclif's version became almost forgotten, and its authorship unknown, though the translation of Purvey's version into Scots by Murdoch Nisbet, about 1520, proves the latter's continued influence.³

III. **INFLUENCE.**—I. **In England.**—During his lifetime Wyclif's influence passed through marked changes. At Oxford there was a time when he was acknowledged by his enemies to be supreme,⁴ and in 1378 he bade fair to lead the nation in his own direction. But after that year, with the promulgation of his doctrine of the Eucharist, his influence rapidly waned both at Oxford and in the nation at large. Men woke up to find whither he was leading them, while the growing violence of his views estranged his more moderate adherents. Moreover, his influence was local rather than national. South of the Thames and north of the Trent it scarcely existed. Scholasticism also proved fatal to him. His prestige as a Schoolman, which first secured him a hearing and gave weight to the movement he started in Bohemia, ultimately reacted against the success of his reforms. When driven out of Oxford, he found no suitable environment for the spread of his ideas, and his intellectual type of piety lacked that

¹ The older views on Wyclif's version are set forth in Forshall and Madden's great ed. (1850) of Wyclif and Purvey's versions. For recent research on the partial versions of R. Rolle of Hampole and others see *Camb. Hist. Eng. Lit.*, Cambridge, 1908-16, ii. 43-48; A. C. Paues, *Fourteenth-Century English Version*, Cambridge, 1902; a less valuable reprint in 1904; H. R. Bramley, *Rolle's Psalter*, Oxford, 1884; M. J. Powell, *The Pauline Epistles contained in MS Parker 32* (E.E.T.S.), London, 1917, and, above all, M. Deanesly, *The Lollard Bible and other Medieval Biblical Versions*, Cambridge, 1920. Cardinal Gasquet's scepticism (*The Old English Bible*, London, 1897) has been answered by F. Matthew, *Eng. Hist. Rev.* x. 91-99, *Church Quart. Review*, li. [1900-1901] 158, 266, and Miss Deanesly. For early references to Wyclif's version see Knighton, *Chron.* ii. 152; Wilkins, *Conc.* iii. 350, 498; Lyndwood, *Provinciale*, ed., Oxford, 1679, p. 286; and *Hist. et Monumenta J. Hus*, Nuremberg, 1558, i. 168. Gasquet's scepticism originated with Sir T. More, *Dialogus* (*Works*, London, 1557), i. 233, 241.

² Deanesly, p. 275 f.; and for the proofs of Purvey's authorship, *ib.* pp. 260-267, 376 f. Gasquet's arguments were founded on failure to note the Lollard of this General Prologue.

³ *The New Testament in Scots*, ed. T. G. Law, 2 vols., Edinburgh, 1901.

⁸ *De Euch.* p. 114.

⁹ Wyclif's views on the authority of the Bible can be briefly studied in his *de Veritate Sacre Scripturae*, 3 vols., ed. R. Buddensieg, London, 1905, *Op. Evang.* i. 79, 368, *Trial.* p. 64, or, in English, *SEW* i. 225, ii. 343, iii. 186, 362.

personal magnetism which might have drawn the people to him.

To the end of his life Wyclif 'stammered out many things which he was unable clearly to make good.' He wanders about in worlds not realized. Like other men who have ventured on the great task of forming a scheme of religion for themselves, Wyclif often is and must be inconsistent. All attempts to hammer out of his writings a symmetrical body of doctrine must fail because they ignore the successive, contradictory stages of his own development.

Considered as a statesman, Wyclif was unfortunate in that there was no deep national movement with which he could ally himself. If he could have had in England the same conditions as in Bohemia, his success might have been equal. But in England the national movement lost itself in the follies of the Hundred Years War with France, and Wyclif mistook the selfish John of Gaunt for a leader. If in this Wyclif showed an unfortunate opportunism, at other times he lost much by mental detachment. In his idealism he even regarded the loss of Oxford with indifference, fatal though it proved to his cause. Like most Schoolmen, he trusted too much in his logic, and allowed it to lead him too far. We see this in his proposal to include the universities in his scheme of disendowment, and in his advocacy of a system of voluntarism which would have reduced the clergy to beggars, to the level, in fact, of the mendicant friars whom in his last years he ceaselessly denounced, but with the spirit of whose founder he was always in more sympathy than he knew. Another illustration will be found in his demand that the life of the priests should be purely spiritual. He wished to narrow down their studies at the university to theology merely; 'the lore that Christ taught us is enough for this life; other lore,' even mathematical studies, should be 'suspended.'¹ Thus Wyclif destroyed his influence among the educated and reduced his movement to an illiterate sect² which in the hundred years after his death slowly lost balance and influence, though surviving, in spite of persecution, to the dawn of the Reformation. Nor did he know how to gain the reform that lay next to hand by keeping back ideas not immediately practicable. He failed also to see the injury he did his cause by mixing himself up with doubtful transactions, as in the affair of Shakyl and Haulay. He allowed his hatred of the false to get the better of his judgment, while by the violence of his language he estranged many. But the vehemence of his temper was not without its advantages. A calmer spirit would have counted the cost or awaited the future; Wyclif, who felt deeply the needs of the present, placed himself at the head of a forlorn hope.

We believe that the failure of Wyclif's premature reformation was, on the whole, for the good of the Church. His conception of the Church was too Erastian, his claim for the royal supremacy too absolute, and would have made the Church a mere department of the State. The unscrupulous pillage of the Church by Henry VIII. and Edward VI. was but slight compared with the disaster that would have followed an immediate acceptance of Wyclif's schemes and theories.

Finally, Wyclif's revolt was too negative. He swept away rather than established, though in his assertion of the supreme authority of Scripture he laid the foundation upon which a later age should build. But his teaching, though containing the principles of the 16th cent. Protestants, lacked the definiteness of their theological reconstruction.

¹ *Op. Minora*, pp. 324 f., 439 f.

² *SEW* ii. 71, iii. 122; cf. i. 225, 310, iii. 326.

He abolished existing forms of Church government without devising, like Calvin, any scheme that should take their place. As his crude views on the marriage of brothers and sisters show, he was an individualist without the social instinct.¹ Viewed as an evangelist, he lacks the consciousness of the reality of sin. His doctrine that sin is a negation, 'that it has no idea,' linked on Wyclif the realist with the philosophers and St. Augustine, but proved a poor substitute for conversion. He identifies knowing and being, and in consequence his theology is intellectual and ethical and, unlike St. Augustine's, lacks a sufficient foundation in grace.²

2. In Bohemia.—It was in Bohemia that Wyclif's influence was greatest and, if the Moravians be included, most abiding. The marriage of Anne, the sister of Wenzel, king of Bohemia, to Richard II. of England on 14th Jan. 1382 led to much Czech intercourse.³ On 4th March 1388 Adalbert Ranco founded in his will scholarships at Oxford for Czech students.⁴ By these students the philosophical works of Wyclif were introduced into Prague shortly after Wyclif's death. In 1401 Jerome of Prague brought back from Oxford Wyclif's *Dialogue* and *Triologus* together with some lesser works,⁵ and introduced the writings to Hus, who had previously known only the philosophical works, five of which, written out in his own hand in 1398, are now at Stockholm.⁶ Under the influence of Hus the influence of Wyclif soon became a dominant force in Bohemia, and large sums were given for corrected copies of the works of the English doctor.⁷ Hence often the only MSS of works of Wyclif are now in Prague or Vienna, whither they were carried after the Thirty Years War. Of Wyclif's *de Ecclesia*, for instance, only one small fragment is found in Dublin; the MS at Vienna was 'corrected' at Oxford on 1st Feb. 1407 by two Czechs, and the only other MS of any value is at Prague.⁸ The Vienna MS of his *de Officio Regis* belonged to a Czech student who took his degree in 1395. Other illustrations of the intercourse between English Lollards and Bohemia are found in the correspondence between Sir John Oldcastle, the most prominent Lollard of the generation after Wyclif,⁹ and the Czech leaders in 1410, and Hus and Richard Wyche.¹⁰ Hus's dependence on Wyclif is very complete. His *de Ecclesia* is taken almost word for word from that of Wyclif—with the omission of the incident of Haulay and Shakyl. By a strange historical injustice the doctrine of the Plagiarist, because linked with a national consciousness, came to be regarded as almost the original, while Wyclif, from whom Hus had borrowed, receded into obscurity, especially after the failure of Oldcastle's rebellion. No doubt this may be explained by the troublous wars and crusades which the doctrines caused in Bohemia.¹¹

¹⁰ *Eng. Hist. Rev.* v. 530-544; H. B. Workman, *Letters of John Hus*, London, 1904, pp. 32-33.

¹¹ For Hus and the Hussites, and the dependence on Wyclif, see *ERE* vi. 886 f. This dependence is often exaggerated. See Workman, *The Letters of Hus*, pref. p. ix, who points out that both Wyclif and Hus were alike copying from Gratian's *Decretum*.

LITERATURE.—(a) *Contemporary records*.—The most important of these is the collection of documents bearing on Lollardism made by the famous Carmelite, Thomas Netter of Lollard or possibly by Stephen Patrington (*FZ*, pref. p. lxxvi), with additions by Netter, about the year 1428. Of this work, entitled *Fasciculi Zizaniorum*, the only existing MS, now in the Bodleian, bearing date 1439, was freely annotated by Bishop Bale, and from Bale was borrowed by Foxe. In 1858 it was published by W. Shirley in the Rolls Series. Another work by Netter of great value for the study of Wyclif's doctrines is his *Doctrinale Antiquitatum Fidei Ecclesie Catholice* (best ed. by F. B. Blanciotti, 3 vols., Venice, 1757, with valuable introduction and life of Netter), written by him in 1426–28. Other records published in the Rolls Series of great importance are the *Chronica Anglie*, ed. E. M. Thompson, London, 1874; Thomas Walsingham, *Historia Anglicana*, ed. H. T. Riley, 2 vols., do. 1869; Henry Knighton, *Chronicon*, ed. J. R. Lumby, 2 vols., do. 1889–95 (the last is of special value for matters connected with Leicester, of whose abbey Knighton and his unknown continuator were inmates); also, in the same series, the continuation of the *Eulogium Historiarum*, ed. F. S. Haydon, 3 vols., London, 1858–63. The usual sources of history, *Calendar of Patent Rolls*, *Calendar of Close Rolls*, *Calendar of Entries in Papal Registers*, *Kotuli Parliamentorum*, must not be neglected, while *Piers Plowman* (ed. W. W. Skeat for the E.E.T.S.) is indispensable for the knowledge of the age. D. Wilkins, *Concilia Magna Britannie et Hibernie*, 4 vols., London, 1737, iii., though badly edited, is of great value. The bishops' registers, which might throw much light, for the most part have not yet been printed—e.g., the registers of Lincoln. For extracts from those of Courtenay we are still dependent on Wilkins. Wyclif's own writings are strangely impersonal and give little assistance to his biographer.

(b) *Wyclif's writings*.—Wyclif's voluminous writings have only recently become accessible in print, and some are still unpublished. The MSS of the Latin works for the most part were in Prague or Vienna, while the English works in British libraries, especially at Dublin and in Corpus Christi, Cambridge, were neglected. The earliest work of Wyclif to be printed was his *Trilogus* (under the title *Dialogorum libri quattuor*) at Basel on 7th March 1525, probably by Frobenius, reprinted in 1752 by J. G. Vierring, Frankfurt and Leipzig, under the inspiration of P. W. Wirth. An English tract on the Eucharist, *The Wycket*, usually ascribed to Wyclif, was printed at Nuremberg in 1546, reprinted by Coverdale, London, 1548, 1550. In 1608 Bodley's first librarian, Thomas James, published at Oxford Wyclif's *Two Short Treatises against the Orders of the Begging Friars*, and in 1612 the *Wycket* was reprinted at Oxford. Apart from the publication in his appendix of a few short pieces by J. Lewis in 1720 and of Purvey's *New Testament* by J. Lewis in 1731 no other original work of Wyclif either in Latin or in English was printed for over two centuries, unless we may count the reprint of Purvey's *New Testament* by H. Baber, London, 1810, and S. Bagster, do. 1841. With his customary ill-luck, the first sign of revived interest was the publication of a spurious fanatical tract, probably the work of some Spiritual Franciscan, entitled *The Last Age of the Church*, and attributed by its editor, J. H. Todd, to Wyclif (Dublin, 1840; republished by Wilmot Marsh, *Biblical Versions of Divine Hymns*, London, 1845, p. 221 f.). This work deceived many and did not conduce to a higher estimate of the Reformer. In the same work Wilmot Marsh also published one of Wyclif's sermons on the Annunciation (pp. 91–93). The long neglect of Wyclif and Purvey's English versions of the Bible was broken by Lea Wilson's ed. of Wyclif's *New Testament*, London, 1848, and by the publication at Oxford in 1850 of the fine edition of the whole by J. Forshall and F. Madden in 4 vols. Of the Old Testament no part had hitherto been printed except Purvey's tr. of the Song of Songs, by Adam Clark in his *Commentary*, London, 1808. In 1851 Todd printed at Dublin *Three Treatises of John Wyclif*, namely, 'Of the Church and her Members,' 'Of the Apostasy of the Church,' and 'Of Antichrist and his Meynee.' In 1863 G. V. Lechler published at Leipzig Wyclif's *de Officio Pastoralis*, and in 1869, at Oxford, his *Trilogus*. In 1865 W. Shirley pointed out what had yet to be done by his *Catalogue of the Original Works of John Wyclif*, Oxford. Though many of its details need correction, it is still of great value and superseded the inaccurate lists in J. Bale, *Scriptorum illustrium Majoris Brytannie Catalogus*, 2 vols., Basel, 1557, i. 451 f.; J. Bale, *Index Britannicæ Scripturæ*, ed. R. H. Poole and M. Bateson, Oxford, 1902; or T. Tanner, *de Scripturis*, London, 1748, p. 761 f. Between 1869 and 1871 Thomas Arnold edited for the Oxford University Press *The Select English Works of John Wyclif* in 3 vols. Several of the works included are by disciples and not by Wyclif himself.

On this matter of authorship no decisive opinion is yet possible. The student should note the able paper of E. D. Jones in *Anglia*, Halle, xxx. [1906] 261 f., and J. E. Wells, *Manual of the Writings in Middle English*, Yale, 1916, ch. 12. The approach of the fifth centenary of Wyclif's death brought home to English scholars the disgrace of their continued neglect. In 1880 F. D. Matthew brought out for the Early English Text Society *The English Works of Wyclif hitherto unprinted*, but much that is here included should be rejected. In the same year R. Buddensieg published at Gotha Wyclif's *Tractatus de Christo et suo adversario Antichristo*. At last in 1882 the foundation of the Wyclif Society led to the publication of Wyclif's more important Latin works. With but indifferent support from the public the society has brought out

some 30 volumes of Wyclif's Latin works. To the more important of these reference has been made in our text. Their various prefaces are of great value, though often the works are dated too early owing to ignorance of the date of Wyclif's doctorate.

For the literature and views of the later Lollards reference should be made to the *Twelve Conclusions* presented to parliament in 1394. For this document, probably the work of J. Purvey, see *FZ*, pp. 360–369; Wilkins, *Concilia*, iii. 221–223; and H. S. Cronin, in *Eng. Hist. Rev.* xxii. [1907] 292–304. For the reprobation by Boniface ix. see *Cal. Papal Letters*, iv. 615. To Purvey has also been assigned the *Ecclesie Regimen*, published in 1851 by J. Forshall with the title *Remonstrance against Romish Corruptions . . . in 1395*, London, 1851. The work is really of composite origin, its kernel consisting of the *Thirty-Seven Conclusions* of earlier date, the authorship of which is assigned in the flyleaf of the only existing MS to Wyclif. For this work see *Eng. Hist. Rev.* xxvi. [1911] 738–749. A work of considerable interest is *The Lantern of Light*, written after 1408, ed. 1917 by L. M. Swinburne for the E.E.T.S. This work is far more restrained in its judgments than Wyclif. About the same time there was brought out *An Apology for Lollard Doctrines*, ed. J. H. Todd, Dublin, 1842, and assigned to Wyclif. But the most interesting Lollard document is the *Examination of Master William Thorpe*, written by himself in 1407. This valuable autobiography was first edited from a text copied out and corrected by Master William Tyndale by Foxe (*AM* iii. 249–285). It is also found in *The Select Works of John Bale* (Parker Soc.), Cambridge, 1849, pp. 62–133; in E. Arber's *English Garner*, 8 vols., London, 1895, vi.; and in A. W. Pollard, *Fifteenth Century Prose and Verse*, do. 1903, pp. 97–167.

(c) *Lives of Wyclif*.—The first life of Wyclif was that of Foxe in his well-known *Acts and Monuments* (best ed. by J. Pratt, 8 vols., London, 1877). Though the work of a partisan, it is still of value for its many official documents. From Foxe and Bale all other 'lives' were compiled, including that of T. James, *An Apologie for John Wycliffe*, Oxford, 1608. The prejudiced references of Anthony Wood and T. Hearne culminated in the publication of *The Pretended Reformers*, by Matthias Earbery, London, 1717. This scurrilous work was really a translation of A. Varillas, *Histoire du Wiclefianisme*, Lyons, 1682. Its only importance lay in its leading John Lewis, 'minister of Margate' (for whom see *DNB* xxxiii. 188 f.), to write his valuable *History of the Life and Sufferings of the Reverend and Learned John Wycliffe*, Oxford, 1720, 1723, and 1820. Its collection of documents made it for over a century the only life of Wyclif of value. In 1754 the first German biography of Wyclif, *D. Johannes (sic) Wiclef wahrhafte und gegründete Nachrichten von seinem Leben, Nachsetzen und Schriften*, was published by P. W. Wirth. In 1828 Robert Vaughan brought out *The Life and Opinions of John de Wycliffe* in 2 vols., London, a work superseded by the writer's more mature judgments in *John de Wycliffe, D.D. : a Monograph*, do. 1853. Vaughan's work showed industry and sympathy, but suffered from his limited acquaintance with Wyclif's writings and with English history. Passing by as of little value C. W. Le Bas, *Life of Wyclif*, London, 1832; S. A. J. de Ruever Gronemard, *Diatribe in Johannis Wyclif reformationis prodromi, vitam, ingenium, scripta*, Utrecht, 1837; O. Jäger, *John Wycliffe*, Halle, 1854; A. Jeep, *Gerson, Wiclefus, Hussus inter se comparati*, Göttingen, 1857, we come in 1858 to W. W. Shirley's valuable study in his introduction to his *Fasciculi Zizaniorum*. In the same year G. V. Lechler published at Leipzig an inauguration thesis, *Wyclif, als Vorläufer der Reformation*. This was followed by his *Johann von Wyclif und die Vorgeschichte der Reformation*, 2 vols., do. 1873. Lechler's knowledge of English mediæval life and history is very imperfect, and much has come to light since he wrote. But no student, except possibly J. Loserth, has ever surpassed Lechler in his intimate knowledge of Wyclif's writings and theological system. Though in many places misleading, Lechler's is still the only authoritative life of Wyclif (tr. into English, abridged, by P. Lorimer, *John Wyclif and his English Precursors*, 2 vols., London, 1878, new ed. 1 vol. in 1881, 1884; to this ed. the references in the art. have been made). The following, some written with a view to the quincenary, should also be mentioned: the excellent introduction by F. D. Matthew in his *English Works of Wyclif hitherto unprinted*, London, 1880; M. Burrows, *Wyclif's Place in History*, do. 1882–84; R. Buddensieg, *J. Wyclif und seine Zeit*, Halle, 1883, 1885, Eng. tr., *John Wyclif, Patriot and Reformer*, London, 1884; V. Vattier, *J. Wycliff, sa vie, ses œuvres, sa doctrine*, Paris, 1886, with good catalogue of Wyclif's writings; R. L. Poole, *Wycliffe and Movements for Reform*, London, 1889. Poole has also given a valuable study of Wyclif's doctrine of 'dominion' in his *Illustrations of the Hist. of Mediæval Thought*, London, 1884, ch. 10. L. Sergeant, *John Wyclif*, New York, 1893, is popular and often inaccurate. Its first chapter on the birthplace of Wyclif contains some material of value, previously printed in *Athenæum*, 1892, pp. 344, 405. The opposition views were given by J. Stevenson, a Jesuit, in his *The Truth about Wyclif*, London, 1885. The best sketch of Wyclif is undoubtedly H. Rashdall's in *DNB* lxiii. 202–223, especially if read with G. M. Trevelyan's study of Wyclif's environment in his *England in the Age of Wycliffe*, London, 1899, or J. H. Wylie's valuable *History of England under Henry iv.*, 4 vols., do. 1884–93. A short work by the present writer, *The Dawn of the Reformation*, 2 vols., vol. 1, 'The Age of Wyclif' (London, 1901), will shortly be brought out as a comprehensive study.

H. B. WORKMAN.

X

XAVIER.—St. Francis Xavier was the son of Juan de Jassu, a hidalgo and formerly a high official at the court of the last kings of Navarre. The name Xavier was that of the castle (*castillo*), some thirty miles from Pampeluna, which belonged to the family of his mother, Maria de Azpilcueta, and in which he himself was born (7th April 1506). Francis apparently counted himself a Basque, for he said that Basque was his native tongue, but the language is now no longer spoken so close to the borders of Aragon. Whilst his brothers followed the career of arms, Francis, as the youngest son of an impoverished family, was driven to seek a livelihood in the profession of letters. His abilities were remarkable, and, on coming to the University of Paris in 1525, he seems to have been regarded as a student of exceptional promise. He took his degree of licentiate in 1530 from the Collège Ste. Barbe, and was then made reader in philosophy at another college of the University, known as the Dormans-Beauvais. While still at Ste. Barbe, he fell under the influence of Ignatius Loyola (*q.v.*), a man some fifteen years his senior. Ignatius (who was then feeling his way towards the organizing of a band of followers pledged to labour for the greater glory of God in whatsoever form the summons might come to them), discerning a conflict in Xavier's heart between worldly ambition and the call of grace, plied him again and again with the gospel warning: 'What is a man profited if he shall gain the whole world and lose his own soul?' In the end Xavier surrendered, and he was one of the seven who, on 15th Aug. 1534, took vows of poverty and chastity at Montmartre, thus laying the foundations of the Company of Jesus or Jesuit Order.¹ Their original intention was that, after completing their theological studies and receiving ordination, they should all make their way to Palestine and take up the preaching of the gospel in the very spot where Christ Himself had lived. However, it was foreseen that it might be difficult to execute this plan, and they decided that, if after waiting a year in Venice, where they expected to arrive in Jan. 1537, it was found impossible to obtain a passage to the Holy Land, they should go to Rome and place themselves at the disposition of the pope. It was the latter alternative that was forced upon them. They were ordained priests at Venice in June 1537, spending their time in preaching and serving the sick in the hospitals; but in 1538 they all met in Rome and offered their services to Pope Paul III. It seems that already at this time Xavier had some strange presentiment of what his future career was to be, for in his dreams he thought he was carrying an Indian on his shoulders under whose overwhelming weight he cried out so loudly that he awakened his companions. It was not, however, Xavier who was first nominated when King John III. of Portugal in 1539 instructed his ambassador at Rome to obtain some of Loyola's followers from the pope to serve as missionaries in the Indies. The choice fell upon Rodriguez and Bobadilla, but the latter became ill, and his place was taken by Xavier.

During a long delay at Lisbon such wonderful results followed from the preaching and example of the fathers that the king wished to retain both in Portugal. Finally, by the decision of Loyola, Xavier alone set sail (7th April 1541), bearing with him briefs from the pope appointing him apostolic nuncio in the Indies. The voyage occupied more

than a year. He reached Goa on 6th May 1542, and it was not until October that he began missionary work in a strict sense by preaching to the natives of the Fishery coast in the extreme south of the Indian peninsula. In this region, including Ceylon, he remained for over two years, interrupted only by one visit to Goa. The continuous strain of the work was almost beyond human endurance, but its manifold consolations buoyed him up. His letters to Europe give a most vivid picture of his methods, more particularly of his care to have the elements of Christian doctrine translated into the vernacular, so that they could be learned by heart and even sung by young and old alike. It was always characteristic of him to take immense pains with the children. He went about ringing his bell and apparently had a wonderful power of attracting and impressing the little ones. No doubt a large proportion of those whom he baptized were quite young children, the families of adult converts.

'Often,' he wrote on 15th Jan. 1544, 'my arms are weary from baptizing and I cannot speak another word from having so repeatedly recited the prayers to the people, one after another, and given instruction in Christian doctrine to them in their native tongue.'¹

So again in a letter, written a year later from Cochin (27th Jan. 1545), in which he supplies much detail regarding his methods of instruction, he states that in the space of one month he had baptized more than 10,000 persons. The *Exposition of the Creed*, of which a good English translation is provided by Edith A. Stewart,² and which is by her rightly stated to be 'more characteristic of Xavier than anything else he has left except the letters,' may probably be accepted as representative of all the elementary instruction, to whomsoever addressed, which he made the foundation of his missionary efforts.

A contemporary letter from Portugal (dated 22nd Oct. 1545) reproduces the description of Xavier brought back by one who had known him well in the Indies:

'Father Xavier goes about with bare feet; his garments are shabby and torn. He is called the "great father," and all love him well. A rajah has given orders throughout his kingdom that all are to show obedience to his brother the "great father," as though it were to himself; all who wish are free to become Christians. He also gave him much money, but Xavier distributed it all among the poor. Along the coast he has built 44 or 45 churches. He has four native-born Indians with him whom he has had ordained as priests. Six other Indians from the College of Goa are on the point of taking Orders. He carries with him two, three, four, yea six thousand men into the open country, climbs a tree and then preaches to them.'³

The creation of the College of Goa, here referred to, was one of the most far-seeing of the measures adopted by Francis to secure the permanency of his conquests. By his influence with the Portuguese authorities, he obtained ample means of support for this foundation, and here he was able to train a considerable number of natives, many of whom persevered and after ordination did excellent work in the missions which Xavier himself had started.

The three years from 1545 to 1548 were almost entirely spent in the Eastern archipelago, Malacca, Amboyna, and the Moluccas. He was shipwrecked three times, lost his slender possessions, was attacked by the Muhammadans, and was always cut off from all human sympathy and congenial companionship, and yet he could write of his stay at Moretai:

¹ *Monumenta Xaveriana*, i. 286.

² *Life of St. Francis Xavier*, pp. 242-251.

³ *Monumenta Historica Societatis Jesu* [Madrid, 1894], 'Epistolæ Mixtæ,' i. 231f.

¹ See art. JESUITS.

'I cannot remember having so much spiritual consolation anywhere else, nor more continuously. . . These islands ought to be called the "Isles of Hope in God."'¹

By the middle of January 1548 he was at Cochin, from which as a centre he revisited the Fishery coast. Thence he returned to Goa, but this was only to make preparations for a yet more adventurous expedition, with the idea of which he had been inspired by a meeting with a Portuguese merchant at Malacca who had brought in his company a native Japanese. This young man, called after his conversion Pablo de Santa Fé, was afterwards of great use. Even as early as 1547 Francis was convinced that in these newly discovered islands of Japan

'our holy faith might be spread with great success, and that there, more than any other country of the Indies, were great things to be hoped for, since the people of those islands were quick-witted and eager to learn.'²

Further intercourse with merchants returning from Japan seems only to have deepened the impression, and from that time forth Xavier's heart was set upon this new conquest, although it was not until April 1549 that he was able to carry out his purpose. He went by way of Malacca, making provision from there for the needs of his recent converts in the Moluccas. There seems, however, no ground for the assertion, which has sometimes been made, that Xavier ever landed in the Philippines. After many delays and inconceivable vexations Xavier eventually reached the port of Kagoshima in a Chinese junk on 15th Aug. 1549, accompanied by Father Cosmo de Torres, a lay brother named Juan Fernandez, and the Japanese convert Pablo de Santa Fé. As Kagoshima was the native place of the last-named, a kindly welcome was accorded to the missionaries by his relatives, and a breathing-space was found during which it was possible to learn something of the people and the language. Progress was at first slow, but three months after his arrival Xavier wrote most enthusiastically of the natural qualities of the Japanese, and two years later his admiration had not evaporated.

'This is the only country yet discovered in these regions,' he wrote to Ignatius on 29th Jan. 1552, 'where there is hope of Christianity permanently taking root.'

He planned an expedition to Meaco (the modern Kioto), then the residence of the mikado. The journey to and fro entailed terrible sufferings from cold and other causes. Owing to political disturbances, the visit was ill-timed and almost fruitless of results. But at Yamaguchi, and particularly in Bungo, many conversions were made, and there is good evidence of the steadfastness of these Christian communities.³ In Yamaguchi a formal document⁴ records the conveyance to the missionaries in 1552 of a former Buddhist monastery. The church founded in Japan by Xavier spread and prospered. Thirty years afterwards Father Coelho estimated the number of Christians there at 150,000, and James Murdoch, an unfriendly critic, while admitting that the estimate is reliable, remarks that this constituted a wonderful record for thirty years, when we consider the small number of missionaries engaged in the work.

It is Murdoch who informs us that 'in Hideyoshi's famous invasion of the Corea in 1592 the first and third divisions of the invading army totalling nearly 30,000 men were almost entirely composed of Christians,' while the great *daimyos* who commanded those divisions—Konishi, Kuroda, Otomura, Arima, Omura, and Sō—were also all converts with the single exception of Omura.⁵

Some thirty years after this Christianity in Japan

³ See *The Month*, Feb. and March 1905.

⁴ The text of this has been restored by Ernest Satow, *TASJ* vii. [1880] 140.

⁵ *A Hist. of Japan, 1542-1651*, Kobe, 1903, p. 362.

was exterminated literally by fire and sword; but even so, when Japan was again opened up to the missionaries in the middle of last century, some village communities were still found who retained the Christian beliefs and practices taught to their forefathers in the 17th century.

After two and a half years spent in Japan Xavier thought it necessary to return to his base at Goa, both to look after things there and to make better provision for a succession of suitable missionaries in the Far East. In a letter addressed to his brethren in Europe from Cochin in Jan. 1552 we find that a new field of labour had already attracted his attention. He had met a number of Chinese in Japan and had heard much of their country from merchants and others.

'Like the Japanese,' he wrote, 'they are acute and eager to learn. In intellect they are superior even to the Japanese.' 'I hope,' he added, 'to go there during this year, 1552, and penetrate even to the Emperor himself.'¹

In intermediate letters he refers to this great design again and again, being full of courage and hope. Before the end of April he was well on his way. After overcoming interminable opposition from the Portuguese at Malacca and Singapore he reached the little island of San Cian, opposite the mouths of the Si-kiang, on which Canton is situated, before the end of August. He could find no one who would take the responsibility of conveying him across to the mainland. The trading ships began to sail away. Xavier, prostrate with illness, was left with only a Malabar servant and a Chinese boy. After endless alternations of hope and disappointment he himself began to lose heart. On 13th Nov. he wrote, 'Shall I reach China? I cannot tell . . . everything is against it.' To the last, however, he strained every nerve to accomplish his purpose, but his illness grew upon him, and on 27th Nov. 1552 (not 2nd Dec., as often stated) he died, in sight of the land which he had fought so hard to reach.

If Xavier has found many indiscreet panegyrists, he has also been much criticized. Many of these criticisms will be found effectively answered in the brilliant pen sketch of the great missionary by C. C. Martindale.² Others are discussed in *The Month* for Feb. and March 1905 and Dec. 1912. A good deal of the criticism turns upon the miraculous incidents with which the life has been overlaid by later biographers. As Astrain remarks:

'In the case of a life so extraordinary as that of Xavier, a life spent in such far distant lands, the presence of a legendary element was inevitable, and, in point of fact, it manifested itself at an early date. Already in the second half of the 16th century Fathers Teixeira and Valignano, in passing judgment upon the Life of St. Ignatius written by Ribadeneira, protested against various miracles falsely attributed to Xavier, and reduced to their just proportions the magnitude of certain of his missions and apostolic undertakings.'³

Again, Xavier has been accused of 'restlessness,' but is it sufficiently remembered that his charge embraced the whole mission field of the Indies, and that it was his duty to look after the base at Goa as well as to establish those advanced posts for which he, more than any other man, had the necessary enterprise and capacity? Shall we blame him because in many cases he was content, like the great *conquistadores* of the New World, to take possession of a vast province, to hoist a standard and leave a tiny garrison, knowing well that years must elapse before the full tide of Christian life could pulsate through its arteries? Nor can we admit, as is often alleged, that the conversions effected by him were 'mainly nominal.' The evidence of the Calvinist Dutch *predikant* Baldæus, who spent many years on the Malabar

¹ *Monumenta Xaveriana*, i. 694f.

³ *Historia de la Compañía de Jesús*, p. 492, note.

coast and in Ceylon, a century after Xavier's time, goes far to prove the contrary, as does also the whole history of Japanese Christianity. Nor was the saint so fanatically intolerant as has sometimes been pretended. Xavier undoubtedly in his letters of Jan. 1548 to King John III. and to Simon Rodriguez speaks of forcing the governor to give the gospel to India. But, as E. A. Stewart remarks :

'The force, we have in fairness to observe, was not to be used towards the converts—he knew well enough that, with these southern tribes of which he was thinking, the Gospel had only to be preached in order to be received—it was the authorities who were to be forced to give opportunities of hearing the Word.'¹

And Xavier himself adds :

'In this way the injustices and robberies towards the poor Christians will cease, and those who are ready to become Christians will get good courage to do so.'²

If Xavier can in any sense be described as fanatical, it is only in the heroic self-denial and austerity of his life. No missionary has realized more perfectly than he the counsel of becoming all things to all men, resolute to see and develop

in every lawful way all the elements of good in those with whom he was brought into contact.

LITERATURE.—The sources, the most important of which are Xavier's own letters, are all, practically speaking, contained in the two volumes of *Monumenta Xaveriana ex autographis vel ex antiquioribus exemplis collecta* (forming vols. vi. and vii. of the *Monumenta Historica Societatis Jesu*), Madrid, 1899-1912. For English readers the most reliable biography is that of Edith A. Stewart, *The Life of St. Francis Xavier, Evangelist, Explorer, Mystic*, London, 1917; the most complete is that of A. Brou, *Saint François Xavier*, 2 vols., Paris, 1912. Other useful books are J. M. Cros, *Saint François de Xavier, sa vie et ses lettres*, 2 vols., Toulouse, 1900, *Saint François de Xavier de la Compagnie de Jésus, son pays, sa famille, sa vie*, do. 1894; H. J. Coleridge, *Life and Letters of St. Francis Xavier*, new ed., 2 vols., London, 1886; C. C. Martindale, *In God's Army*, vol. i. 'Commanders in Chief'; do. 1915; A. Astrain, *Hist. de la Compañia de Jesús*, vol. i.², Madrid, 1912; H. Haas, *Gesch. des Christenthums in Japan*, 2 vols., Tokyo, 1902-04; J. Stephen, *Essays in Ecclesiastical Biography*, 2 vols., London, 1849, and many subsequent edds., Essay no. 3, 'The Founders of Jesuitism'; A. Dickson White, *A Hist. of the Warfare of Science with Theology in Christendom*, 2 vols., do. 1896; H. Thurston, in *The Month*, Feb. and March 1905, and Dec. 1912.

YAKUT.—1. **Distribution.**—The northernmost branch of the Turkish race, the Yakut, live in the Yakutsk district, along the Lena as far south as the Amur and the Island of Sakhalin and to the north-west as far as the Yenisei.³ The region between the Lena and the Aldan is especially densely populated. This region was formerly occupied by the Tungus (*q.v.*), with whom the Yakut, who came from the south, had many fights before they succeeded in obtaining the best pastures. From their metropolis, the district of Yakutsk, the Yakut went to Olekminsk, down the Lena to its mouth, and spread along the Vilui, Yana, and Indigirka, and a very few reached Kolima. Meanwhile another immigration to the north went along the Yenisei as far as the Lower Tunguska, thence to Lake Chirinda, where they met the Yakut who migrated north through the Lena. Their original home may have been in Central Asia between the sources of the Yenisei and the Amur. N. A. Aristoff⁴ thinks that the Yakut are the remnant of a Turkic nation called the Sakha (Saka?). The Saka, who in the 2nd cent. B.C. were expelled from their home in the north of Syr Darya southwards by the Yuechi, migrated to India. Towards the end of the 2nd cent. A.D. they seem to have been driven northward again. On their way back they left one branch, now called the Kara-Kirgis, in West Tian-Shan. The Kara-Kirgis have a clan called Saka.⁵ Recently noticed linguistic evidence (tribal and clan names) makes the two routes of Yakut migration from Central Asia to the north something more than a hypothesis.

In 1897 the Yakut numbered 225,772; in 1911, 245,406.

2. **Physical type.**—The Yakut are now much mixed, first with the Neo-Siberians, *i.e.* Tungus,

Mongols, and Manchu, and then with the Russians. They seldom have any moustache or beard, their hair and eyes are dark, and their heads round. All these characters are Mongolian, but the setting of their eyes is not Mongolian. The Russian anthropologist A. A. Ivanovsky¹ thinks that he can distinguish a special Yakut group, but this group has more in common with the Northern Tungus and Astrakhan-Kalmuk than with other Turkish nations. They are of medium size with many tall individuals, broad-headed, but not pre-eminently so, and long-faced.

3. **Technique.**—Originally horse-breeders, the Yakut are now horse-breeders where the climate permits, and in the north reindeer-breeders; but, as far north as they can, they keep the horse for its meat and *kumys* (mare's milk). How highly the Yakut values his horse is shown by the fact that to the good gods he will sacrifice a horse, but to the bad gods only cattle. In matchmaking, to compare the girl to a mare and the youth to a colt is the greatest compliment that can be paid them. In their mythology the horse always appears as the adviser and friend of man, often wiser than man himself. The Yakut, many of whom have never seen a horse, trace the origin of man to a being half-horse and half-man. A horse must not be struck, nor even must unkind words be said to it. While cattle are used for heavy work, the horse is kept for riding. In the region where there are horses no longer, reindeer bucks are trained for riding—a custom known also to the Tungus, but not to the old inhabitants of the Tundra, as the Samoyed or Eskimo.

Where possible, the Yakut become seasonal nomads. Only the people south of Vilui, the agriculturists, are quite sedentary, and even these have a winter house (*balagan*) and a summer house (*urasa*, sometimes called *yurta*). The *urasa* is often covered with birch-bark beautifully engraved and painted, but the *balagan*, made of logs of wood and covered with earth and snow, is pre-

ferable in winter. Their most strenuous time is the hay-making season.

The Northern Yakut are hunters, fishermen, and reindeer-breeders. As net- and trap-makers they are much superior to the other natives. They are also known as iron-smelters. They place their ore in the fire hole and pile coal round it, then they keep the fire blazing by means of hand-bellows. When the coal is used up, they dig out the metal and hammer it into implements. They used the iron ore of the Aldan near Yakutsk long before it was known to the Russians.

Like the Azarbaijan Tatars in the Caucasus, the Yakut are the cleverest traders in Northern Siberia; their language became a *lingua franca* and till recently had to be known even by Russian fur-traders. As reindeer-breeders, however, they are not so clever as the Palaeo-Siberians or even as the Tungus. They are people of the Iron Age with all the characteristics which this age implies in Asia, pre-eminently horse-breeding. Since the clan crests are usually used as *tamga* (cattle or horse brands), it is possible to trace the Yakut's emigration and contact with other peoples by tracing the distribution of some particular *tamga*. The *tamga* usually represent an animal, but it would be an exaggeration to see in that any totemistic notions. Certain animals—*e.g.*, the bear, wolf, eagle, white crane, and goose—appear as the shaman's spirit assistants, but they are never called high gods.

4. **Sociology.**—The Yakut of to-day are grouped in clans (*aga-usa*), *naslegs*, and *uluses*. A clan is composed sometimes of only a few individuals, and sometimes of several hundred. A *nasleg* comprises from one to more than thirty clans. The *ulus* often includes several *naslegs*. The Yakut reckon as descendants of a clan only as far as the ninth generation. Of course at the present time the blood-relationship within the clan is hardly more than a tradition. When the Russians first came into contact with the Yakut, their clan system was quite highly developed, and the head of a clan had his power limited to that of a judge and leader in war.

All economic questions were decided by a council of elders, *i.e.* fathers, uncles, and elder brothers. Thus *aga* ('elder'; fem. *agas*) is the name for the father, *abaga* for other of his relatives older than himself, *ini* (fem. *balys*) for a father's younger brother and any other younger relative who was not his son. Relatives in the third degree are called *sian*. The name for mother is *yä* (literally 'embryo'), for wife *oyokh*, while there is no specific name for the husband, who must be called by his wife *är*, 'man,' or *ogonior*, 'old man.' The term *aga* used for the father really means 'older'; thus one asks about a person, 'Is he *aga* or *balys* ['younger'] than yourself?' There are special terms for the wife to use when addressing her husband's relatives (*e.g.*, *toyon*, 'chief,' for the husband's father), and for the husband addressing his wife's relatives (*e.g.*, *aga-kyllyn*, 'wife's father'). The terminology of relationship takes into consideration primarily sex and degrees of age. Thus the Yakut clan is divided into two main groups: (a) men and women of the paternal and maternal line born earlier, and (b) men and women of the paternal and maternal line born later.

Clans sometimes made alliances. All the traditions testify to the great solidarity of these alliances between the chiefs of clans and also to their independent attitude to one another. Superior to them all was the council of the confederation.

(a) **Marriage.**—The Yakut are exogamous, so the wife must be taken from another clan (*aga-usa*) and another settlement (*ulus*). In their marriage

ceremonies several stages may be distinguished: (1) the matchmaking, (2) the compact, (3) the betrothal, (4) the bringing home of the bride. Children are betrothed when only one or two years old, but the bride cannot leave her father's house till all the *kalym* (bride-price, called by the Yakut *suwu*) has been paid. Serving for a wife is often met with instead of the *suwu*. The young man has the rights of a husband after he has paid the first instalment of the *kalym*. After the betrothal the young man remains in the bride's house. At the head of the bed the first night a meal consisting of flour and melted butter is placed. If the bridegroom is not pleased with the bride, the meal is left untouched, and this is considered a great disgrace to the girl. This points to the fact that chastity is required of the bride.

The custom of avoidance is especially strictly observed in relations called *kinitti*—*i.e.* the bride to her father-in-law and all other older male relatives. Thus she must not show her hair or her bare feet, step in front of them, address them directly, or call objects of common use by their real names (a paraphrase must be used).

(b) **Birth.**—According to W. Sieroszewski,¹ Yakut marriages are generally fruitful, averaging ten children to a woman, but becoming less so in the northern districts, although the Yakut are everywhere more prolific than the Tungus. Lack of children they attribute entirely to the woman, as their proverb says, 'If there are no children, the woman is to blame.' According to Jochelson, the women of the north have very difficult deliveries. The Yakut regard the pains of childbirth as a sickness caused by evil spirits, and therefore, if the assistance of a midwife or the goddess of fertility, *Ayisit*, is of no avail, a shaman is called in to fight the evil spirits. No consideration is shown to either mother or child, for women possessed of evil spirits are regarded by the Yakut as no less perilous to society than those infected with germs of an epidemic. This accounts for the entire absence of compassion and for the cruelty manifested towards women suffering from the pains of labour. When a child is born, the Yakut make holiday on the first and after the third day. On the first day they prepare a large quantity of fat which they melt and drink, sacrificing a portion to the fire. After the third day the friends and relatives visit the mother and child, and it is customary for the former to serve the guests herself. Nowadays it is not fat but meat that forms the principal dish. The birth of a foal is accompanied by ceremonies slightly less important.

(c) **Burial.**—The only thing that the Yakut really cares for before death is to be certain that an animal will be slain directly after he dies in order that, accompanied by this animal, his soul may make its journey to the abode of the departed. On the death of a man a bullock or a horse is killed, on the death of a woman a cow or a calf. If the deceased is rich, the animal is fat and able to be ridden, otherwise the soul must drive it in front of him or drag it by the horns. The flesh of the dead animal is eaten by the gravediggers and all the funeral company. When a man dies, the body is clothed in a rich garment and placed in a corner of the dwelling, where it lies for three days; on the third day it is placed in a wooden coffin, which is drawn to the grave by a horse or bullock. No one accompanies it but the gravediggers, and even they hasten to complete their work and return home; on their way back they do not stop or look behind, and, when they enter the gate of the village, they and the animal must pass through a fire made from

¹ *The Yakut*, St. Petersburg, 1896

the straw on which the dead man lay and the wood left from the making of the coffin. Other things which have been in contact with the dead, such as the shovel, are also broken and burnt. On the death of a child its cradle is left on the grave and its toys hanging on the nearest tree. The Yakut have great fear of a corpse (especially that of a shaman) before it is buried; it is supposed to be able to disturb the forces of nature, producing great storms. A great wind is held to be favourable, as it will smooth out the tracks on the way to the place of the funeral; otherwise many of the living will follow the dead. There is another form of burial among the Yakut, which consists in abandoning the dead in the house with all the utensils belonging to him.

The custom formerly existed that an old or very weak person should request his relatives to bury him. All the villagers were invited to a three days' feast, at which the old man, attired in his finest garments, occupied the chief position. On the third day his relatives took him to the forest, where a grave had been prepared, and one of them would suddenly strike him down. Food and his weapons were placed with him in the grave. Until the corpse is buried the soul remains near the house and endeavours to remind the relatives of its existence.

Some souls never leave the earth and are never quiet; such souls are called *yor*. The souls of those who have died an untimely or a violent death, or who were buried without ceremonies, and those of shamans and great people become *yor*.

5. **Soul.**—Like other Turks, the Yakut believe in the existence of several souls all more or less material. *Kut* seems to be one of the most important of these. Thus they think that the *buor-kut*, 'earth soul,' is communicated to the infant at the moment of birth from the earth; *salyn-kut*, 'air soul,' it receives from the air shortly afterwards; while the third element, *yä-kut*, 'mother soul,' comes to the child from the mother. *Kut* is a physical conception of the soul, while *sür*, although in some degree a material conception, has a more psychical character. After death *kut* is devoured by the *abassylar*, though there is a belief also that the *kut* remains for some days near the body of the deceased, and then departs to the other world. *Sür* is a kind of 'soul shadow' common to men and animals; it is even possessed by fishes.

6. **Gods and spirits.**—Although most of the Yakut are now officially reckoned as Christians, belief in the good old gods and shamanistic ceremonies is still alive. The gods are divided into nine *agas* (clans) or *bis*, and the malicious gods into eight. The natives are quite ready to give information about the clan arrangement of the kind gods, but it is very difficult to get similar information about the gods of the under world west and north, since few of the ordinary people know anything about them and the shamans are afraid of betraying the secrets of these formidable beings.

According to Sieroszewski, the chief of the sky-gods is Art-Toyon-Aga, the powerful ruler of light and life, speaking in the storm and thunder, somewhat indifferent to human affairs, and appealed to only in exceptional circumstances. In his honour are celebrated the great clan ceremonies, *ysakh*, in which the sacrifice of *kumys* is made to him. The *kumys* festival is a ceremony performed very regularly. Its object is to secure fertility for the family and for the herd. Lads and girls are placed opposite one another and sprinkle the *kumys* on one another as a sacrifice to the god. In the north, where horses cannot live, reindeer milk is used, though it is still called *kumys*.

The chief of the dark spirits is called Ulutuyer-Ulu-Toyon, 'omnipotent lord.' He is always described as living in the western sky, and, in contrast to the indolent Art-Toyon-Aga, he is the

personification of action and of the passions. Ulu-Toyon is not always harmful to men, for he gives to them one of their souls, *sür*, and defends them from the attacks of *abassylar*. The *abassylar* are divided into 'upper,' living in the western sky, 'middle,' living on the earth, and 'lower,' inhabiting the subterranean world; but, wherever they live, they are all harmful to man.

Ichchi, literally 'owner,' signifies the 'owner-spirit' of various objects. Every river, lake, stone—and even parts of these sometimes—has its own *ichchi* controlling it. Movable objects and those which can produce sounds also have their *ichchi*.

The Yakut divide the universe into seventeen stories. They have also a horizontal division comprising two parts—east and south, the habitation of good spirits, and west and north, that of evil spirits. The great evil spirit, Allara-Ogonür, 'underground-old-man,' lives in the far north.

7. **Shamanism.**—The study of Yakut shamanism, which is one of the most developed forms of northern shamanism, can be limited to the study of the shaman (*oiun*), his ceremonial coat (*tanara*; same word for 'sky') and ceremonial drum (*tünür*). The preparation of his official garment is accompanied by ceremonies no less important than the shamanizing itself. Even those who, like the smith, prepare the metal symbolical adornments attached to the shaman's leather coat occupy a half-magical position, being credited with 'peculiar fingers.' The smith is often approached for assistance if there is no shaman to be found in the neighbourhood. The smith in the ninth generation acquires certain supernatural powers and can without harm to himself prepare the iron symbols of the shaman's costume and especially the *ämyägat* (a metal plate representing a human figure sewn on the ceremonial coat over the heart and symbolizing the special shaman's ancestor, i.e. the spirit of some dead shaman).

There are 'black' shamans and 'white' shamans; the duties of the latter are not clearly defined, for in cases of great urgency, as in sickness, it is the black shaman who is called in to fight the spirits of disease. At the spring festivals, however, performed in daylight and called *aiy-ysyakh*, it seems that white shamans always officiate, while the autumn festivals, *abassy-ysyakh*, performed in the darkness, are conducted by black shamans. Troshchanski,¹ who made an exhaustive study of Yakut shamanism, believes that the duties of the black shaman were originally in the hands of women, and that the Yakut black shaman even now assumes some women's characteristics: (a) two iron circles on his apron represent women's breasts; (b) he braids his long hair like a woman; (c) the place on the right side of the tent, covered with horse skins, is forbidden to shamans and women; (d) when he does not use the ceremonial dress, he wears that of a young girl; (e) he is allowed to visit a woman after childbirth before the three days are over and men are allowed to approach her. As the office of hereditary smiths became powerful, the duties of the black shamans passed to them. Seeing that the family among the Yakuts, as among the other Turks, is patriarchal, this theory seems very improbable. The women's characteristics adopted by the shaman point to something else, viz. that, being a person with supernatural powers, the black shaman is supposed to have both female and male qualities; whether sexual abuses follow this conception it is difficult to ascertain.² Generally speaking, women, being more nervous and suffering more often from the Arctic forms of hysteria (*menerik* and *amürakh*)

¹ *The Evolution of the 'Black' Faith*, Kazan, 1912.

² See M. A. Czaplicka, 'Shamanism and Sex,' in *Aboriginal Siberia*, London, 1914.

than men, are more successful as shamans.¹ The shamans, especially the black shamans, form a professional class, and a period of preparation under the guidance of an old shaman is necessary. The initiation into the shamanistic office is finally accomplished by the clothing of the novice in the ceremonial coat and presenting him with the drum and stick.

The shamanistic ceremony, as elsewhere,² is divided into the following parts: (a) preparations for the shaman's journey, (b) songs, which among the Yakut are unusually rhythmical and are answered by the chorus, beating the drums and dancing, (c) the going out of the fire, when the shaman is supposed to have gone away, (d) a period of silence, after which he comes back and relates his experiences.

8. Ceremonies.—There are among the Yakut two kinds of sacrificial ceremonies, bloody (to the *abassy*) and bloodless (to the *aiy* and *ichchi*). Although bloody sacrifices are not made to Urun-Aiy-Toyon, yet it is customary to dedicate certain animals to him; *i.e.*, such animals are not to be used for work, and mares so dedicated are not to be milked. Formerly it was the custom to dedicate in this manner all mares which had foals; they were let loose to wander on the tundra. The offerings to *abassylar* have the character of a compromise or bargain. The evil spirit wishes to have the *kut* (one of the souls) of a man, and the shaman gives instead the *kut* of an animal.

There are two tribal festivals: a spring festival, *aiy-ysyakh*, and an autumn festival, *abassy-ysyakh*. As the name shows, the first is celebrated for the good spirits in general, and for Urun-Aiy-Toyon in particular. After the sacrifice, which is followed by certain sports and games, a dramatic representation of the struggle between spring and winter is given. One man, called the *aiy-uola*, is dressed in white and mounted on a white horse to represent spring, while another, *abassy-uola*, represents winter, being dressed in black or reddish garments and mounted on a horse of corresponding colour. The *abassy-ysyakh* is held in autumn, and in the open air like the first festival, but at night. It is dedicated to the black spirits, and especially to Ulu-Toyon. While the first festival is conducted by the clan-father, the second is under the direction of nine shamans and nine shamanesses.³

9. Legends.—The Yakut possess the richest mythology, in both form and conception, of all the natives of Siberia. The richness of imagination shown in their oral compositions is only comparable to that of the Iranians, and one can indeed find some traces of Iranian mythology, probably brought from Central Asia. They are not lacking in the humour for which the Tungus legends are justly famed. The legend of creation bears witness.

The evil spirit wished to show the good spirit that he had the greatest power, so he dived into the water and came up with a mouthful of clay. From this the good spirit created the earth, but, not having sufficient clay, he made it flat. He then noticed that the evil spirit had not given him all the clay; therefore he struck him on the neck so that he had to spit it all out. It fell on the earth and so mountains were formed.

The origin of grass is explained by a more romantic legend.

The god Yassagai-Toyon directs the movements of all migratory birds. His seven daughters, in the form of seven white cranes, also often come down to the earth. Once Yassagai-Toyon commanded his most beautiful daughter to help and serve the Yakut. (The crane is always considered a sacred bird by these people.) The girl begged to be excused, and as a punishment the father cut off her wings and she became a blade of grass to feed the animals of the Yakut.⁴

These ætiological myths form but a small part of

their literature, for it is the heroic stories that are the longest and the most elaborate.

The Yakut do not possess a written character, but the few who have been educated in Russian schools write in Russian.

YASNA.—See AVESTA.

YAWNING.—1. The primitive conception of the soul.—The conception of the soul among the lower races has been described as follows:

'It is a thin unsubstantial human image, in its nature a sort of vapour, film, or shadow; the cause of life and thought in the individual it animates; independently possessing the personal consciousness and volition of its corporeal owner, past or present; capable of leaving the body far behind, to flash swiftly from place to place; mostly impalpable and invisible, yet also manifesting physical power, and especially appearing to men waking or asleep as a phantasm separate from the body of which it bears the likeness; continuing to exist and appear to men after the death of that body; able to enter into, possess, and act in the bodies of other men, of animals, and even of things.'¹

J. G. Frazer likewise maintains that the savage explains the phenomena of life by supposing the living body to be animated by some power within.

'If an animal lives and moves, it can only be, he thinks, because there is a little animal inside which moves it: if a man lives and moves, it can only be because he has a little man or animal inside who moves him. The animal inside the animal, the man inside the man, is the soul. And as the activity of an animal or man is explained by the presence of the soul, so the repose of sleep or death is explained by its absence; sleep or trance being the temporary, death being the permanent absence of the soul. Hence if death be the permanent absence of the soul, the way to guard against it is either to prevent the soul from leaving the body, or, if it does depart, to ensure that it shall return.'²

2. The escape of the soul through the mouth.—The soul is commonly supposed to escape by apertures of the body, especially the mouth and nose.

The Marquesans used to hold the mouth and nose of a dying man, in order to prevent his soul from escaping; the same custom is reported of the New Caledonians. . . . The Itonamas in South America seal up the eyes, nose, and mouth of a dying person in case his ghost should get out and carry off others'; and the people of Nias, who identify the spirit of the deceased with the breath, tie up the jaws of the corpse to confine the vagrant soul.³ The Hindus always snap their thumb and finger and repeat the name of some god, as Rama, when a man yawns in their presence, believing that by so doing they prevent the soul from escaping through the open mouth. To neglect this is a sin as great as the murder of a Brahman.⁴

Great care is taken at the time of a birth lest the soul of the child should escape and be swallowed by a gaping mouth.

To prevent this calamity, the Alfors of Celebes, when a woman is about to be delivered, 'tie up the mouths of all animals inside and outside the house'; and 'all persons present in the house, even the mother herself, are obliged to keep their mouths shut the whole time the birth is taking place.' Noses are not similarly secured because the breath is exhaled through the nostrils, and therefore 'the soul would be expelled before it could have time to settle down.'⁵

⁴ I. W. Shklovsky, *In Far North-east Siberia*, London, 1916, pp. 43, 227.

Even in sleep it is possible for the soul to escape through the sleeper's mouth if it is not kept tightly closed, its departure being sometimes indicated by snoring.¹

Mary H. Kingsley tells of a Kruman who 'for several nights had smelt in his dreams the savoury smell of smoked crawfish seasoned with red peppers. He became anxious, and the headman decided some witch had set a trap baited with this dainty for his dream-soul, with intent to do him grievous bodily harm.' For the next few nights, to prevent his soul from straying abroad, he lay in the heat of a tropical night under a blanket, his nose and mouth tied up with a handkerchief.²

The legend of King Gunthram shows that this belief long survived in Europe. As the king lay asleep in the wood with his head in his henchman's lap, his servant saw as it were a snake issue from his mouth and run to the brook. His progress being hindered, the servant laid his sword across the water and the creature ran along it and up into a mountain; after a while it came back, and returned into the mouth of the reposing king, who, upon waking, told him how he had dreamt that he went over an iron bridge, and into a mountain full of gold.³

3. Possession through the open mouth.—As the human soul is considered to enter and leave the body by the mouth, so it is with other spiritual beings, particularly such as possess people with evil intentions.

According to the Ewe-speaking peoples of the Slave Coast, when the indwelling spirit has left the body, 'it behoves a man to be careful about opening his mouth, lest a homeless spirit should take advantage of the opportunity and enter his body. This, it appears, is considered most likely to take place while the man is eating.'⁴ The Zulus, like the Persians, regard repeated yawning and sneezing as a sign of approaching spiritual possession,⁵ and in N. Africa men constantly keep the lower part of their face veiled, even while eating and sleeping, in order to protect themselves against evil spirits.⁶ The same reason may explain the custom observed among Arab women of muffling their faces.⁷ In Samoa a man whose family god was the turtle was obliged to wear a bandage tied over his mouth if he were taking any part in the cutting up or cooking of the animal, lest an embryo turtle should enter his mouth and grow up within him.⁸ In S.E. Australia a newly-initiated youth must always cover his mouth with a rug in the presence of a woman,⁹ just as in W. Timor 'a man holds his right hand before his mouth in speaking lest a demon should enter his body,' and lest the person to whom he is speaking should harm his soul by magic.¹⁰ To prevent the soul of a fox killed in the chase from escaping and revenging itself on the hunters or warning its fellows of their approach, the Ainu, in former days, took care to tie up the mouth of the animal tightly.¹¹

From this brief survey of the part played by the open mouth in primitive cult it will readily be understood how the act of yawning has come to be associated with the exit of the soul and the entrance of evil spirits. This ancient belief still survives in the polite custom of putting the hand before the gaping mouth, thereby (it was originally supposed) impeding the flight of the soul, and barring the way to a spiritual foe. Even to this day, when a man yawns, the Muslim puts the back of his left hand to his mouth saying, 'I seek refuge with Allah from Satan the accursed,' just as in the Tyrol the sign of the cross is made to prevent the entrance of an evil spirit when a person gapes. The Jewish proverb, 'Open not thy mouth to Satan!' shows that the Hebrews associated the devil with a gaping mouth—a conclusion supported by the story narrated by Josephus,¹² describing how Eleazar, a Jew, cured demoniacs in Vespasian's time by drawing out demons through their nostrils by means of a ring containing a root of mystic virtue mentioned by Solomon. It was probably supposed that the evil spirits entered through the

mouth and were exhaled through the nose, much in the same way as the Alfoors regard the wandering soul of a child as expelled with the exhaled breath, after having entered the body of a bystander through the mouth.

It will thus be seen that the folk-lore of yawning has arisen from the primitive doctrine of the separable soul and the notion of possession by spiritual beings. It is not surprising that the uncultured races should thus think of the relation of the human body to the spiritual world, since they are ignorant of the very rudiments of science and can only explain the phenomena of life, consciousness, disease, and death by what the senses seem to tell. In sleep, trance, and death the soul appears to leave the body. To the rude philosopher this is the only possible interpretation of the facts which his senses can give. The most natural means by which these exits and entrances are made is through the mouth, and therefore the opening and closing of this organ—especially in an involuntary act like that of yawning—is beset with no small danger. If the soul were to escape, it might never return, and, in consequence, death to the body would ensue. Likewise, when the mouth is open, a homeless spirit is liable to take up his abode in the body. To prevent this calamity, the entrance has to be carefully guarded.

YENISEIANS.—See OSTYAKS.

YEZIDĪS.—The name of Yezidis has been given to a religious sect numbering about 50,000 persons, scattered from Mossul to the Caucasian region (districts of Mossul, Van, Diarbekr, Bitlis). They call themselves Dasni and speak a Kurdish dialect.

At the head of the community is a *khalīfah*, who is a descendant of Shaikh Adi. Under him are *shaikhs*, *kavvals*, and *faqirs*. Priesthood is hereditary. Morality is above the average in that part of the world. They are brave and shrewd. Their temperament is cheerful but calm. They have cleanly habits. Their women are not veiled and may receive strangers. They feel great repulsion for the colour blue. Being completely illiterate, they handed down their traditions orally. Their greatest festival is on 10th Aug., when a procession of flagellants takes place in the village of Ba'adri. There is the grave of their great saint, Shaikh Adi ben Musafir, who died in A.D. 1155. All around fires of naphtha and bitumen are kept burning.

The Yezidis have been often persecuted by the Turks. During the 19th cent. efforts were made repeatedly to force them into the Turkish army. They have stubbornly resisted that pressure.

The origin of the word Yezidi has been much discussed. Most probably it is related to Av. *Yazata*, 'deity,' Pers. *Yazdān*, 'God.' It was given to them in contrast either to the Zoroastrians or to the Muhammadans. Although their priesthood is of the Muhammadan type and they recognize Muhammad and Abraham as prophets, they are far from being a Muhammadan sect. Nor are they Nestorians, although they have baptism and regard Christ as an angel in human form. In fact, they perpetuate with various admixtures a doctrine of the Magian type, combining Iranian and Assyrian elements. Their cult of fire is Iranian. They profess that the devil is a creative agent of the supreme God, inasmuch as he produced evil. Hence he deserves our adoration.

These ideas resemble closely Mazdaean cosmogony.¹ Zoroastrianism regarded the worship of the evil spirit (Ahriman) as an abomination, but this did not apply to all Iranian sects. The Mithraists used to offer sacrifices 'deo Arimano,' and Plutarch² reports that the Magians invoked Hades and Darkness in a sombre place, with libations of the *haoma*-plant juice and of the blood of a wolf. No doubt, the devil-worship of the Yezidis is a survival of the Magian sects who in those districts could resist orthodox Mazdaism.

The doctrine is supposed to be contained in a sacred book called *Yalvah*. It is said to be hidden on a mountain-top where nobody can go and see it. In fact, the real book, in the form in which it exists at present, is written in an obsolete dialect of Kurdish that apparently was in use in the time of Shaikh Adi. Particulars about the Yezidi books, their authenticity, and their contents are given by Bittner,³ Mingana,⁴ and Horten.⁵

Although the publication of these books has been on the whole disappointing, it has made more certain that Yezidism is an offshoot of Mazdaism. It is, in fact, simply an effort to bring unity in dualism. It secures that result through presenting darkness as a mere absence of light, and evil as imperfection the positive element of which is good in the eyes of God, whose plan it serves although, to our insufficient knowledge, it seems to be bad. The book literally says: "I [the Spirit of Good] am active in all events which the outsiders regard as bad because they do not answer to their wishes while they answer to mine." Sin therefore can only be a deficit which is to be made good through the wandering of the soul. The Good Spirit or First Principle is conceived in a pantheistic way as the light radiating from God and a kind of *λόγος*. It is compared to a white pearl in the sea of Chaos out of which everything has arisen. In this conception we recognize the White Hōm of Pahlavi books, a sacred plant growing in the sea Vourukasha and in which the creative power of God is contained. This white pearl is also a bird, a peacock, the most revered symbol of the Yezidis (Malak-Tāus). It is also an old Iranian symbol. On the Gaokerna (another name of the White Hōm) growing in the cosmic sea roosts the marvellous bird Simūrgh (Av. *saēna*), who, under the name of Vāregha, is said to have seized the godly glory (Old Pers. *farnah*) that rested on Yima, the primeval king (also on Zoroaster). The *λόγος*-bird of the Yezidis was also supposed to incorporate himself in prophets. They believe him to have manifested himself both in Christ and in Shaikh Adi. The Aryans often compared the sun to a bird. Preference is given to the peacock on account of its way of spreading out its tail like a wheel (the wheel is a still better known symbol of the sun). The same symbol has been found on a Coptic coffin, and in the sacred books of the Mandaites. To what extent the Yezidi doctrine is permeated by that old symbolism can be shown by a quotation from their books: "Before heaven and earth arose, God rested on the seas. He had made for Himself a boat and was sailing on the waves, glorifying Himself alone. Then emanated out of Him a white pearl, and He reigned upon it forty thousand years till He threw it off out of anger." This mysterious language is very much in the manner of the Iranian Bundahishn. It is clear only to those who know that the Iranians compared the sun not only to a bird but also to a ship.

YGGDRASIL.—See NATURE (Teutonic).

YOGA.—The word *yoga* has two meanings in India: (1) contemplation raised to a formal art, and (2) the system to be treated below, which is entirely taken up with it, gives it a philosophical basis, and ranks as one of the six systems of Brāhmanic philosophy. Contemplation exercises for the attainment of higher states of consciousness and faculties are very old in India. It has been shown, especially by Hermann Beckh (*Buddhismus*², 2 vols., Berlin and Leipzig, 1916), that they were of great influence at the foundation of Buddhism. The Yoga system had its rise at a later period, which cannot be determined with certainty. Nor is there absolute certainty yet about the age of the *Yogasūtras*, i.e. the text-book in which the system was first set forth by Patañjali. The Hindus unanimously regard Patañjali as the founder of the system and as identical with Patañjali, the grammarian, the author of the *Mahābhāṣya*, who lived in the 2nd cent. B.C. But Hermann Jacobi (*JAOS*, xxxi. [1911] 24 ff.) has made it probable on philosophic-historical grounds that the *Yogasūtras* were composed after A.D. 450 by another man of the same name. On the other hand, Bruno Liebich (*Zur Einführung in die indische einheimische Sprachwissenschaft*, i. 'Das Kātantra,' Heidelberg, 1919, p. 7 ff.) has asserted noteworthy philological-critical grounds for the identity of the two Patañjalis. The question therefore still awaits the final solution. But in any case the Yoga system is in the main essentially older than the *Yogasūtras* of Patañjali. We find almost completely developed in the *Maitrī Upaniṣad* the technique prescribed in the *Yogasūtras*.

In Indian literature the Yoga system is rightly regarded as a branch of the Sāṅkhya (*g.v.*). For all the doctrines of the Sāṅkhya on cosmology, physiology, and psychology have been simply adopted by the Yoga. So, too, the doctrine of emancipation is the same—not merely the conception of emancipation itself as a complete separation of the soul from matter, but also the theory that this emancipation is effected solely by means of the clear distinction drawn between matter and spirit. The characteristics of the Yoga philosophy, apart from points of less importance, are—(1) the rejection of the atheistic views of the Sāṅkhya, and (2) the treatment of the doctrine of absorption as the most effectual means for the attainment of the knowledge that secures emancipation. The technical detail of the theory of absorption forms the proper contents of the Yoga system, and has given to it its own name; for *yoga* signifies originally 'yoking,' then 'diversion of the senses from the external world, and concentration of thought within.'

The object of the Yoga system in inserting the conception of a personal God into the Sāṅkhya is merely to satisfy the theists, and to facilitate the propagation of the theory of the universe expounded in the Sāṅkhya. The idea of God, far from being organically interwoven in the Yoga system, is only loosely inserted. In the *Yogasūtras* the passages that treat of God stand disconnected, and are, indeed, in direct contradiction to the contents and aim of the system. God neither creates the universe, nor does He rule it. He does not reward or punish the actions of men, and the

latter do not regard union with Him (at least according to the older doctrine of the Yoga) as the supreme object of their endeavour. God is only a 'particular soul,' not essentially different from the other individual souls which are coeternal with Him; the distinction consists solely in the manner of His connexion with matter. God cannot in this philosophy be conceived as existing unrelated to matter like an emancipated soul, for then He would be without consciousness. It is assumed, therefore, in the Yoga doctrine that the divine soul stands in an eternal and indissoluble connexion with the noblest and most refined constituent of matter, *sattva*, which is completely purified from the lower material elements; and that this soul is in consequence from and to all eternity endowed with supreme power, wisdom, and goodness. Being free from entanglement in worldly existence, which is full of misery, or in the cycle of births, God lives in eternal bliss, without merit or guilt, unaffected by all the impulses and fatal dispositions with which all other living beings are burdened.

It is evident that this is no God in our sense of the term, and that we have to do with perplexing speculations the aim of which is to conceal the originally atheistic character of the system, and to bring the assumption of God into bare accord with its fundamental teaching. Assuredly these speculations prove, were there any need at all for proof, that in the real Sāṅkhya-Yoga there is no room for a personal God. The two systems are frequently thus joined together in India, in order to emphasize their unity. The idea of God, however, once having been received into the Yoga system, it became necessary to establish a connexion between God and the world of mankind, for God could not continue to exist for His own sake alone. A relation between God and man was found in the fact that, while God does not bestow earthly or heavenly felicity (for this is to be obtained only by individual merit and springs necessarily from it), He in His mercy aids the man who is entirely devoted to Him to remove the hindrances which stand in the way of the attainment of deliverance. But even this slight relation dependent on human devotion to God and on divine favour is with difficulty intelligible as combined with the doctrine of the Yoga.

Nevertheless, in the later Yoga literature, especially in the numerous more recent Upanisads which are founded upon and develop the Yoga doctrine, the conception of God takes a much more definite place. God gradually becomes more personal, and the relation between God and man closer. Here also, therefore, the universal need of the human heart has proved stronger than the logical reasonings of philosophy.

The true subject of the Yoga is the doctrine, discussed at great length in the text-books, of *yoga*, or concentration of thought. These texts describe how the senses may be withdrawn from the objects of sense and reduced to inactivity, so that their natural tendency is reversed, and they assume altogether the character of the inner central organ, whose emanations they are; how, in the next place, the activity of the organ of thought, in which all the functions that are dependent upon the influence of the external world are suppressed, is wholly centred upon the *ātman* (the self, the soul); and how, finally, in the last stage of absorption, thought and its object completely coincide. By regular observance of the Yoga praxis the hindrances arising from our natural disposition, which make the attainment of saving knowledge so difficult, are most successfully overcome. When absorption has risen to such a height, or rather has penetrated so deep,

that no wandering of thought towards other objects is any longer possible, when that disposition of our organ of thought which is prone to go astray can no longer manifest itself, the knowledge of the essential difference of soul and matter is revealed in the form of an intuitive perception, and therewith the final goal of human endeavour is reached.

The Yoga praxis consists in a series of stages which have to be traversed, in which external aids play a large part. Various bodily attitudes, named *āsana*, are prescribed, the counting of the inhalations and exhalations, but especially the holding of the breath, and the concentration of the gaze on a definite point—on the tip of the nose, the navel, etc. One result of these external Yoga practices is the loss of consciousness, the so-called Yoga-sleep (*yoganidrā*), which is considered to be a stage preceding emancipation, in those cases especially in which during the Yoga-sleep the life becomes extinct. That this Yoga-sleep, which naturally among Indians is regarded as a supremely marvellous phenomenon, is none other than the hypnotic sleep scarcely needs formal demonstration. In fact, the Yoga texts describe a whole series of hypnotic devices which have been effective at all times. Under the name of *trāṭaka*, for instance, Yoga texts which are themselves late, but rest upon an older tradition, enjoin the concentration of a steadfast gaze upon a small object until the eyes begin to shed tears. The result of such practices is declared to be that the body becomes as stiff as a piece of wood, *i.e.* becomes cataleptic. One method, which is especially significant in view of the artificial production of apparent death by the Yogins (see art. YOGIS, and cf. James Braid, *Observations on Trance or Human Hibernation*, London and Edinburgh, 1850), is the so-called *khecharī*. This consists in artificially extending the tongue, bending it round and inserting the tip in the hollow of the throat, while at the same time the gaze is steadfastly directed on the spot between the eyebrows. Even among ourselves in recent times it has been noticed that the persistent turning upwards of the eyeball at a certain angle induces the hypnotic sleep.

When employing these methods the Yogi, according to the *Hathayogapradīpikā* and other texts, before completely losing consciousness hears within his body (in the heart and throat, between the eyebrows, and in other parts) various sounds, *viz.* those of a drum, the roaring sea, the thunder, a bell, a shell, a reed, a lyre, and a bee. There can be no doubt that as a result of self-suggestion such sounds were actually heard.

The Yoga praxis when correctly and perseveringly observed has, according to the Indian view, therapeutic effects, and other consequences of various kinds. In particular, according to the belief universally held in India, the practice of Yoga procures for a man the miraculous powers often mentioned in Indian literature. When the authors of the Yoga texts hold out the promise of these supernatural powers, it must not be forgotten that these authors were men who regarded very seriously their task of expediting the final attainment of the supreme goal. They certainly did not intend consciously to deceive. They have simply given expression to the conviction of the Yogis, who believed themselves by means of suggestion in the hypnotic state to be in possession of such powers. These alleged miraculous powers are, in fact, partly the same as our mesmerists think that they possess. Only a few of the many powers that are enumerated can here be named. Among them was the ability to become infinitely small or invisible; to swell to an

immense size, so as to reach even to the most distant objects—e.g., to the moon with the tip of the finger—or to be transported anywhere by the simple act of will. There is mentioned also such an intensification of the perceptions that the most remote things, even though separated by intervening walls or the like, come under the cognizance of the senses, and the processes going on in the minds of other men become known in the same way (thought-reading). Other faculties obtainable are the knowledge of the past and future, especially of the hour of one's own death; or the ability to make the dead appear, and to hold converse with them. Many more are cited. That these miraculous powers may be gained by means of the Yoga praxis the most enlightened Brāhmins of the present day are themselves immovably convinced. The reason why such powers of the Yogī are not openly exercised is attributed to the preliminary condition of their attainment, viz. to the absolute indifference of the Yogī to the things of this world.

The conditions of ascetic contemplation practised in the Yoga are the final result of a long development, which takes us back to primitive times, to the ecstatic rites of savage peoples, of which we find traces also in the Veda. Following the analogy of primitive peoples of the present day, we may confidently ascribe to that early period the belief that it was possible by ascetic practices to win the power to hold intercourse with the spirit world, and in a marvellous way to change the ordinary course of nature. In ancient India the name for asceticism was *tapas*. This word signified in the first instance 'warmth,' 'heat,' 'fervour,' in the literal sense; then, 'the sweat generated by self-mortification,' and 'the condition of internal heat thus caused,' i.e. 'ecstasy.' As at the present day the conjurers among the Indians of America and among the Negro peoples are wont to proceed in a similar way, so according to the ancient Indian ritual the offerers of the Soma juice prepared themselves for their task by prolonged fastings, while, clad in dark skins of wild animals, and 'speaking in a stammering voice,' they tarried by the magic fire. The fact that the word *tapas* in its metaphorical meaning is found first in the later hymns of the Rigveda proves nothing against the extreme antiquity of the above-mentioned ideas or their practical application; for the circle in which the thought of the Rigveda moves has few points of contact with ascetic practices. *Tapas* meets us more frequently in the Yajur- and Atharvavedas, and very often in the literature of the Brāhmanas and Upaniṣads. Since *tapas* occupies here the position of a cosmogonic power, by means of which the creator of the universe produces living beings and inanimate objects, it is evident that already at that period no less influence was ascribed to asceticism than in classical Sanskrit literature, in which the ascetics appear as all-powerful magicians. While, then, originally the ecstatic condition, in which man believes himself capable of rising to higher spheres, was sought mainly by fasting and other self-mortification, in India, owing to the increasingly introspective character of the spiritual life, stress was laid more and more on meditation and absorption. The conception of *yoga*, therefore, was developed out of that of *tapas*. In this meaning the word *yoga* is first met with considerably later than *tapas*. But the existence of the peculiar Yoga doctrine is certified already, as stated above, as early as pre-Buddhist times.

The attempt was made by A. E. Gough¹ to trace the origin of the Yoga praxis back to the influence of the dark-skinned races with whom the incom-

¹ *Philosophy of the Upaniṣads*², London, 1891, p. 13 f.

ing Aryans mingled. For proof he relies upon Tylor's *Primitive Culture*,¹ where it is shown that the ecstatic conditions excited by meditation, fastings, narcotics, stimulants, or disease are held in high esteem among savage peoples. According to what has been stated above, there is no need to subject Gough's opinion to a more searching examination; for what he regards as a borrowing in historical times is, in fact, an inheritance from the most hoary antiquity of the Indo-Germanic race.

Mention must be made finally of a subordinate doctrine, which had its origin among the grammarians, but which then came to form a subject of discussion in the text-books of the Yoga system. This was a philosophical and philological theory on the relation of word and meaning. We read of a 'supersensible word' (*spṛṣṭa*), which is said to inhere in the word as formed by the letters, but to be distinct from it. That which thus conveys the meaning contained in the word as apprehended by the senses is explained to be an indivisible imperishable element which 'breaks forth,' i.e. manifests itself on the articulation of the sounds that form the word. It will be seen that a true thought is here presented, though obscurely expressed. This obscurity, however, will not appear strange to any one who considers that here for the first time a difficult problem is touched which since then has occupied many minds; for that 'supersensible word' is, of course, no other than the idea which is expressed by the combination of the letters.

YOGIS.—*Yogī* is a term denoting in India a follower of the Yoga system (*q.v.*). The word is used especially as a name of the Brāhman ascetics, who devote themselves to the practice of *yoga* as laid down in the rules of the system, and seek thus to gain in the first instance the possession of miraculous powers, and finally deliverance from the cycle of existence. The *yogīs* in India are frequently, in consequence of the *yoga* exercises, plunged in hypnotic slumber, the so-called *yoga*-sleep; and several have been able to remain for a lengthened period in a cataleptic condition without any indication of life, thereby acquiring a reputation for sanctity. A few individuals, by virtue of peculiar disposition and constant training, have succeeded in so prolonging the cataleptic state that they have been able to allow themselves to be buried alive for several weeks without suffering any immediate injury to life and health.² In Indian story *yogīs* appear as wizards and all-powerful magicians. The feminine *yoginī* denotes a kind of witch in the train of Śiva and his wife Durgā. The most important of the Yogī sects are the Kānphaṭā Yogis. See the following article.

² Cf. James Braid, *Observations on Trance or Human Hibernation*, London and Edinburgh, 1850; Ernst Kuhn, as quoted in R. Garbe, 'Sāñkhya and Yoga,' in *GIAP* iii. 4; R. Garbe, 'Über den willkürlichen Scheintod indischer Fakirs,' in his *Beiträge zur indischen Kulturgeschichte*, Berlin, 1903, p. 199 ff.

peculiar custom of slitting their ears (*kān*, 'ear,' and *phatā*, 'slit') and inserting huge earrings in the holes. They are also known under the names of Darśanis for their earrings (see below), and Gorakphanthis or Gorakhnāthis from their founder Gorakhnāthi (*g. v.*).

Their origin is involved in great obscurity. They trace their tenets to a much earlier period than Gorakhnāth's, and consider the latter as merely the reorganizer of the doctrine and the founder of the sub-sect. Gorakhnāth himself is said to have been a pupil of Machchhendarnāth (Skr. Matsyendranāth)—the Nepalese local deity¹—who in his turn is represented as the pupil of Ādināth, and in some accounts the list is still more prolonged. A tradition current in N.E. Bengal (Rangpur District) identifies the Kānphaṭās with Sankarāchārya's disciples, who, having taken to drinking, were consequently disowned by their teacher.² In the Tibetan tradition Gorakhnāth is recorded as a Buddhist thaumaturgus, and his Yogis are accused of having passed from Buddhism to Śaivism simply to please their heretic rulers and to gain political favours.³ What seems to be most likely, amidst the general confusion of the various accounts, is that the Kānphaṭā sect came from the north of India, where it was probably already in existence during the prevalence of Buddhism, but it grew to power only when the latter religion began to lose ground and Brāhmanism to make its reconquest. It is possible that, while Buddhism prevailed, the Yogis could not help being in some way attracted into its sphere, and that Gorakhnāth was the man who rallied them out from the ranks of the Buddhists and brought their principles into harmony with the philosophy of the *Upaniṣads*; and he was not much posterior to Sankara; at least he certainly acted under the influence of the Brāhmanic renaissance.

The particular tenets of the Kānphaṭās are also clad in darkness, not only for us, but even for their present adepts, who seem to have long forgotten them. Little light can be derived from the *Hathayogapradīpikā*, a Yoga treatise,⁴ which is said to be one of the books of the sect,⁵ or from the *Gorakhnāth-ki Goṣṭhī*, a kind of controversial dialogue between Gorakhnāth and Kabir concerning their respective doctrines.⁶ All that can be gathered from the above sources is that the Kānphaṭās recognize Śiva as Supreme God, and hold that emancipation from worldly existence lies in the union of the individual soul with him, and recommend Yoga as the means of achieving this end. A short poetical composition, bearing the title *Gorakhnāth-ke Vacan*, is included among the works of Banārsī Dās,⁷ a Digambara Jain poet, who flourished in the first half of the 17th cent., and who for some time in his youth had also been a follower of Śaivism (probably of the Lingāyat sect); but that too is of little help. The most important source of information, which has remained unedited to the present day, is, therefore, the *Gorakhbodh*, a work written in an old form of Hindi and reported to date from the 14th century.⁸ The work is in rhymed prose, sixty stanzas in all,

⁸ The present writer was made acquainted with it through the kindness of Sir George Grierson, who lent him his own copy of the original MS, which is in the Darbār Library of Jodhpur.

and is in the form of a conversation between Gorakhnāth and his *guru* Machchhendarnāth, the stanzas being a question and an answer alternately. Unfortunately the extreme conciseness and difficulty of the text and the particular character of the exposition make this source only partially utilizable; yet there seems to be sufficient ground in it for concluding that the system here expounded is a combination of Śaivism with the Yoga philosophy, and apparently closely related to the Śaivism comprehended by Mādhavāchārya under the name of *Saiva*,¹ though different from it. The close alliance of the Kānphaṭā system to the Yoga both of Patañjali and of the *Upaniṣads* is visible from the prominent part given to the Yoga praxis as well as to the mystical theory of the circles in the body (*chakra*, *kausala*), arteries (*nāla*), vital air (*prāna*), and breaths (*haṁsa*).

According to the authority of the *Gorakhbodh*, the vital air resides in the circle of the navel (*nābhi*), and is supported by the void (*śūnya*), which is spread everywhere. In its turn, the vital air vivifies the *manas*, which resides in the heart. The *manas* is open to the influence of the moon (*chandra*), which resides in the sky, the vital air to the influence of the sun (*sūrya*), and the void to that of the time (*kāla*). There is, further, another element, the word (*śabda*), which resides in form (*rūpa*). Before the coming into existence of heart, navel, form, and sky, the *manas* was contained in the void, the vital air was shapeless (*nirākāra*), the word was unformed, and the moon resided in the intermediate space between heaven and earth. The void is of four kinds: *sahaja*, *anubhava*, *parama*, and *atita-śūnya*, and it is to it that the vital spirits (*prāna*) resort during sleep or death. There are five principles (*tattva*), one of which seems to be *nirvāṇa*, and ten *dvāras*, or means of attaining perfection, which are not named.

From this it would seem that Gorakhnāth too resorted to a symbolism of the kind found in many of the *Upaniṣads*, especially the later ones,² to account for such metaphysical problems as cannot be solved by reason. The phrase *yato vācho nivartante*, occurring in the *Taittirīya* and *Brahma Upaniṣads* to signify incapability of definition, is also found in the *Gorakhbodh*, 50-51 (*vācha nivartai*). Contrarily to what had been asserted on the authority of the *Hathayogapradīpikā*,³ a Kānphaṭā Yogi is not necessarily obliged to remain within a monastery, the second stanza in the *Gorakhbodh* allowing him to live in market-places and roads, and under the shade of trees. One of the most important features of the doctrine of Gorakhnāth is, no doubt, its universality, it being open to all castes and being not very particular in regard to food, in both respects bearing an analogy to the Vaiṣṇava system of Rāmananda. The affinity between the two systems is increased by the adoption of the same term *avadhūta* for the designation of their respective ascetics.⁴

The present Kānphaṭās are more or less spread all over India, and their customs are substantially the same in all places. They have no caste prejudices and freely eat flesh, with the exception of beef and pork, and indulge in spirits and opium, whenever they can afford it. They bury the dead. Those who take to secular callings are mostly money-lenders, weavers, cultivators, peddlers, or soldiers. They are said to be good soldiers, and

¹ *Sarva-darśana-saṅgraha*, vii.

³ Wilson, p. 216 n.; G. S. Leonard, 'Notes on the Kānphaṭā Yogis,' *IA* vii. [1878] 300.

⁴ Throughout the *Gorakhbodh* Gorakhnāth is addressed by Machchhendarnāth as *avadhū*, a corruption of *avadhūta*, and in the *Gorakhnāth-ki Goṣṭhī* he calls himself 'Yogi Gorakha avadhūta.'

their military fame seems to be of an ancient date.¹ In some parts of India they live by singing cyclic poems² or religious songs.³ They are generally believed to be soothsayers and sorcerers, and to have the power of curing children and protecting them from the evil eye.⁴ Marriage is common among them.⁵ Those who live by begging smear their bodies with ashes and wear a waist-cloth and an upper-sheet dyed in ochre, a woollen string (*jāncu*, *saili*) round their neck with a horn-whistle (*nād*) attached to it, a wallet (*jhōli*) hanging from their left shoulder, and a hollow gourd, in which to receive alms, in their right hand. But the great characteristic of the Kānphtaṣ is the huge earrings (*darśana*, *mudra*) which they wear in their slit ears. These earrings are generally made of agate, horn, or glass, about 2½ ounces in weight, and are conferred on the Kānphtaṣ at the time of their initiation. They are worn as a kind of fetish and are regarded by them as the symbol of their faith.⁶ The initiation takes place as follows:

First there is a preparatory ceremony, in which the neophyte, after having been shaved and smeared with ashes, is invested with the woollen string and horn-whistle and is appointed to serve his *guru*. After a period of six to eight months, during which his conduct is strictly watched, the novice is admitted to the ear-slitting ceremony, which is performed before the head *guru* or the god Bhairava, with the novice sitting with his face turned to the north. The slit is made with a double-edged knife and is about three-fourths of an inch to an inch in length; in the wound a *nimb* stick is inserted and the cure is made by a treatment of *nimb* oil and daily bathings with pure water.⁷ When the ear is well again, the earrings are conferred on the neophyte, and he has his name changed into a new one ending in *-nāth* and becomes a regular *Yogi*.

Of all Kānphtaṣ of India the best known to us from trustworthy accounts are those of the west. These generally trace their origin to Dharamnāth, who is said to be one of Gorakhnāth's disciples, who went from Peśāwar to Kāthiāwār and Kachchh to perform penance and turned the sea between the two peninsulas into the present Ran. The Western Kānphtaṣ live in monasteries, the most celebrated of which are that of Dhinodhar in Kachchh on the edge of the Ran, which claims to have been founded by Dharamnāth himself on the spot of his penance,⁸ and that of Gorakhmadi in Kāthiāwār.⁹ The characteristic of the Western Kānphtaṣ is charity; they make it a rule to distribute provisions, twice every day, to any who ask for them;¹⁰ they can well afford to do this, as they are rich and have been endowed with lands by more than one of the former Rāos. The monastery (*math*) of Dhinodhar Hill is the most important; it is a large fenced and turreted establishment, comprising dwelling-houses, temples, tombs of the former *pīrs*, halls for the treating of guests, etc. The *pīr*, or abbot, is held in great honour by the Rāo himself, who after his election invests him with a dress and installs him on his seat. Both the *Yogis* and the *pīr* of Dhinodhar are said to observe the strictest celibacy, but in the

case of other monasteries the abbot (who takes also the name of *mahant* or *bāvā*) is allowed to marry and, failing issue, to adopt one of his disciples.¹ The chief object of worship of the Dhinodhar Kānphtaṣ is Dharamnāth, whom they habitually call by the term *dādā*, 'father.'

The Kānphtaṣ of Bombay and Belgaum are peculiar in so far as they carry a trident (*trisūl*)—the emblem of the god Siva—when they go for alms.² In Bombay they also carry a drum (*daur*), whence their name of Dauri Gosāins. These marry freely and are said to bury their dead in a sitting position. In most of Northern and Eastern India the Kānphtaṣ still appear to perform some sort of sacerdotal functions, to officiate as priests in the temples of Bhairava, and even to offer sacrifices to the village-gods.³ In Gorakhpur, where Gorakhnāth is said to be buried, they worship, besides Bhairava, a goddess called Bālā Sundarī,⁴ which is probably another form of the Tripura-sundarī of the Śaktas.⁵ The Kānphtaṣ of Benares have the temple of Kāl Bhairo as their headquarters and bury their dead in their own houses. The most depraved of all the Kānphtaṣ of India seem to be those of the hills, who are said to follow the ritual of the *Tantrics* and to indulge in the orgies of the left-hand Śakta cult.⁶ These too, like the Kānphtaṣ of Kachchh, trace their origin to Dharamnāth.

LITERATURE.—This is given in the footnotes.

L. P. TESSITORI.

YOUNG MEN'S CHRISTIAN ASSOCIATION.—The Young Men's Christian Association (Y.M.C.A.) was founded on 6th June, 1844, by George Williams. Twelve young men were present at the first meeting, which was held in his bedroom in St. Paul's Churchyard, London. Years afterwards it was discovered that of the twelve gathered in that upper room three belonged to the Established Church of England, three were Congregationalists, three Baptists, and three Methodists. It was the day of small things, and half a crown only was the weekly rent of the first headquarters of the movement. Organized Bible Classes became an important feature of the work in 1847, and in the following year the famous series of Exeter Hall Lectures was inaugurated. In 1851 Lord Shaftesbury became President, and in the following year a Y.M.C.A. was formed in Paris and another in Holland, whilst farther afield the movement took root in Adelaide, Calcutta, Montreal, and Boston, U.S.A. An epoch-making World Conference was held in Paris in 1855, when what is known as the Paris Basis was adopted, and on this simple statement of faith the Associations of the world, through their national organizations, are still affiliated. It reads:

'The Young Men's Christian Associations seek to unite those young men, who, regarding the Lord Jesus Christ as their God and Saviour according to the Holy Scriptures, desire to be His disciples in their doctrine and in their life, and to associate their efforts for the extension of His Kingdom amongst young men.'

In 1863 the aims of the British movement were defined in the following words:

'The one great aim of the Association is to win young men for the Saviour.'

and that note has been dominant ever since. Educational features were adopted in 1864, and the Central International Committee as the executive of the World's Alliance was formed in 1873 with headquarters in Geneva. The jubilee of the movement was celebrated in London in 1894, and on that occasion the founder, George

¹⁰ According to the Kachchhi legend, this liberal distribution of food was enjoined on the monks of Dhinodhar by Dharamnāth himself, as a reaction against the uncharitable character of the inhabitants of Kachchh.

Williams, received the honour of knighthood from Queen Victoria. The official figures issued by the World's Committee show that on 1st Jan. 1920 the Y.M.C.A. was represented in 8789 centres, of which 6250 were in Europe, 32 in Africa, 2098 in America, 386 in Asia, and 23 in Australasia.

The Association has thus been in existence for three-quarters of a century, and in all parts of the world has proved the friend particularly of the young man away from home. The exceptional conditions of the Great War have brought it into the limelight and gathered round the Y.M.C.A. a host of new friends and naturally not a few critics. On the one hand, it has been urged by many that there is no need for the Y.M.C.A., and that the Churches can do all that is necessary as far as Christian work among young men is concerned. Many Christian people have gone even further and said, 'Drop the "Christian" out of your title and confine your efforts to social service, and you can count on our cordial support.' In like manner it was often said, even during the Great War, by certain Army people who had no sympathy with the higher aims of the Association: 'We have our own canteens, and, therefore, we do not need the Y.M.C.A.'—forgetting that the Association is something far more than a canteen and seeks to introduce through its programme that inspiration and uplift which men so greatly need.

Many have accused the Association of being too broad, and others have withheld sympathy and support because in their judgment it is administered on too narrow lines. Then, again, during the War many have accused the Y.M.C.A. of being too much commercialized, though, on the other hand, they insist on the work being self-supporting. The fact is that, if it was to meet the real need of the men during the War, it was compelled to trade, though never for trading's sake or for private profit, and indeed all the profits were spent for the direct and immediate benefit of the men.

The Y.M.C.A. commenced its work on somewhat narrow lines. It had a definite objective which it kept always before its members—to win men for Christ and to enlist them in His service. The story of the movement has been a story of gradual but steady and constant evolution. It has gradually extended, and to-day it stands for a broad progressive programme of Christian and social service. To appreciate the importance of the service it has rendered during the past seventy-five years, and the programme it is gradually evolving for the future, certain facts must be borne in mind concerning the Association.

1. Its functions are those of the pioneer.—It does not seek so much to build upon the foundations laid by others as to find new methods of serving and enlisting men. As an emergency organization it appealed to the imagination of the public in August, 1914, when, through its mobile machinery, it was able to meet a definite national emergency with unexpected rapidity. Long before the adaptation of the Labour Exchanges to meet the needs of discharged men, the Y.M.C.A. in London had its own employment agency, through which it found work for more than 20,000 ex-soldiers and sailors. Before the Armistice it had its own training workshops in London, Manchester, and other centres, and the little farm colony it has established in Dorset for tubercular ex-service men has been regarded by the authorities as one of the best things of the kind, though to meet the need fully the machinery of no private organization would be adequate. The Y.M.C.A. was the pioneer of the present Army system of education, and more than £140,000 was spent by the British

movement on educational work among the soldiers in France. As the War went on, many other societies and private individuals organized recreation huts and tents on the lines mapped out by the Y.M.C.A., but it was the pioneering work in the early days of the century in volunteer and territorial camps that provided the experience upon which all this work in war-time has been built up.

2. It is essentially an auxiliary movement.—It does not profess to be an educational authority, but in a hundred ways it supplements the work of school, university, and educational committee. On the battlefield it supplemented the work of the official R.A.M.C., attending to the needs of the walking wounded, and in the base camps caring for the relatives who visited their loved ones when dangerously ill in hospital. So in like manner it seeks to supplement the work of the Churches, and has always resisted the temptation to develop into another denomination, whatever it may be called, or to take to itself functions that rightly belong to the Churches, or to supplant or in any way supersede their work.

3. It is interdenominational rather than undenominational.—It holds that the first duty of the member is to his Church. A recent official declaration states:

'(1) The Y.M.C.A. does not come on the scene to teach the Churches how to do their work, much less to supplant them. It desires to help and serve the Church as the permanent Divine Institution designed by God to help and save the world.

(2) It believes it is called of God to serve our soldiers, sailors, and airmen until demobilisation is complete, and then to continue to serve them when demobilised or disabled, and, as far as possible, all the young men and boys of the Nation in town and city, camp and barracks, village and hamlet, East End and West End, guiding and befriending them as they move from place to place, and looking after their interests when in response to the call of commerce or vocation they travel in search of health or wealth to the most distant parts of the British Empire, or to the utmost parts of the earth.

(3) It regards the whole world as its parish, believing that the work done during the war has demonstrated that the Red Triangle has a message for the men of every creed and nation. It believes it can help the Churches to find the key to the solution of one aspect of the Missionary problem, and that the "Hut" will prove as helpful to the young men of missionary lands as to those of our own country.

(4) It believes that the very success of its war service constitutes a challenge to undertake work on an adequate scale for the men and boys of every class.

(5) It holds that it is of more importance that the need should be met, and the work done, than that any particular society or organisation—even the Y.M.C.A.—should do it. It recognises that the field is so wide that there is ample scope for the activities of all societies that have the same end in view, and it earnestly desires that over-lapping and consequent waste of energy should be avoided, and all such work co-ordinated.

(6) It seeks to provide a rallying centre for those who, irrespective of distinctions of creed or party, desire to engage in social service and to work for the extension of the Kingdom of God.

(7) It would state definitely and categorically that, whilst fully recognising its position as an agency of the Christian Church, it regards as the primary aim of the movement the winning of young men for our Lord Jesus Christ, and the leading of them into the fellowship and service of the Churches.'

4. It is missionary in its outlook.—The mission of the Y.M.C.A. is to the man outside, and it seeks to touch him at every point and, as far as possible, in every place. It seeks to form a half-way house, a kind of communication trench, between the men of the nation and the Churches. It has always placed emphasis upon the work of the member in the sphere of his daily calling. Meetings for prayer and for the study of the Bible have ever held a prominent place in the programme of the Y.M.C.A., and it seeks through its members to proclaim the message of the Evangel in the language of the times. It has always made a feature of meetings in the open-air and in unexpected places. It counts more upon atmosphere than meetings, and depends, more than upon any other single factor, on the personality of its workers.

As may be inferred from the foregoing, the

Association has spread to non-Christian lands, where it has speedily become an indigenous movement. In India, China, and Japan it has been proved that the countries of the Orient can themselves provide leadership that will compare favourably with the best that the Western nations can produce.

5. It is essentially a layman's movement.—Possibly the greatest service the Association has rendered to the cause of Christianity has been in winning men when young for Christian discipleship and providing them with their first training in Christian service. Such training must often have been crude, but it has been practical and effective, and has provided the incentive to further study and an earnest longing for fuller knowledge. It will probably be conceded that the greatest weakness of many of the Churches to-day is to be found in their failure to fire the imagination of their male members and to enlist their co-operation in the work of winning men. This lack, to a certain extent, has been supplied by the Y.M.C.A.—to how large an extent has not been fully realized. Leading ministers of every denomination have told the story of the help and training the Association gave them at a critical period of their careers. It is true that many a branch of the Y.M.C.A. does not live up to the high ideals of the movement, but no Association is regarded as really efficient from the Y.M.C.A. standpoint unless it aims at keeping first things first and inspires young men to help their fellows in the daily fight against temptation. Emphasis is placed, too, on the importance of the voluntary worker. In the great city Association the General Secretary is the key to the situation. The work must be built up largely around his personality, but his business is to inspire men and work through his members. The very last thing to be desired is the development of a professional class of men, however able, who will do the work themselves rather than through others.

In the early days of the Great War the Y.M.C.A. had to face a serious crisis with regard to personnel. Hitherto it had been regarded as 'a work for young men by young men.' The very men on whom it relied for its ever-expanding war work were needed for the Army and Navy, and their places had to be taken by men who, through age or health, were disqualified for active service. It was soon found, however, that there were many things women could do even in the work of a Young Men's Christian Association, and, as a matter of fact, later on there were in the war service of the British Y.M.C.A. alone more than 40,000 women workers as compared with less than 4000 men. There can be no doubt that the Y.M.C.A. woman worker has come to stay, and that to the great advantage of the movement.

6. Emphasis is laid on practical service.—In the early days of the War some people spoke sneeringly of what they termed 'canteen religion.' As the War years passed slowly by, the vast majority saw its utility and learned that it was not incompatible with the teaching and example of our Lord. He spoke of the 'cup of cold water' given in His name, and many a war-weary soldier saw the Master's hand in the hand that gave him a cup of hot coffee or cocoa when he was 'up against things' in the trenches. The Y.M.C.A. believes that the most effective way of combating intemperance is by providing an effective counter-attraction. Given the 'Hut' run by the right people and with a strong constructive programme, there will be little need to fear the wet canteen, the public-house, or the far more deadly drinking club. The Association seeks to promote purity of life, not only by education and precept, but also

by making provision for the sexes to meet amidst wholesome surroundings and by catering for the leisure of young people. A well-equipped hostel is an important feature of most of the large city Associations at home and overseas, and in a hundred practical ways the all-round needs of young men and boys are being looked after. It is the conviction of the leaders of the movement that it is possible to serve God acceptably in any one of the many activities of the Association. The Hut, or the Red Triangle Club, as it is usually called, with its big lounge or common room, is regarded as a centre to work from, and an object lesson in practical Christianity. It is recognized that

'Where Truth in closest words may fail,
Then Truth embodied in a tale
Shall enter in by lowly doors.'

7. It is a unifying force.—Sir George Williams always regarded the prayer of the Master—'That they all may be one'—as a call and a challenge to the Association which he founded and with which his name will for ever be identified. Through the whole period of its existence the Y.M.C.A. has been a unifying force, though it has talked little about unity. It has provided a common platform for Christians of all denominations, and has actually succeeded in bringing together and uniting in Christian service those who never otherwise found opportunity to move beyond their denominational barriers. We believe it is destined to play an important part in years to come in bringing together class and class, party and party, creed and creed, nation and nation. None will be asked to give up their special beliefs or convictions, but all will be invited to co-operate in the service of the Kingdom of God. In the War the Association was allowed to serve the Indian troops only on condition that there should be no religious work as men commonly call work religious. There were to be no hymns, no prayers, no addresses, no distribution of Bibles or Testaments. The leaders of the movement gave their promise and carried it out to the letter. It is doubtful if anything that has ever been done will have more effect upon the future of Christianity in India than the unselfish Christian social service carried out by consecrated men under the sign of the Red Triangle. Not only during the War, but before and since, the Association has had the privilege of serving men of every nation and creed.

8. It begins with the boy.—The hope of the future of the Y.M.C.A. is to be found in the fact that it begins with the boy, and it seeks to get him at the age when he begins to feel too big for the Sunday School. If we can only reach and influence the boy during the crisis of adolescence, the future is assured.

9. The significance of the Red Triangle.—During the War the Red Triangle had become almost as familiar as the Red Cross itself. It typifies the service the Association seeks to render. Its very colour signifies sacrifice, and its three sides speak to the Association man of the needs of body, mind, and spirit, all of which may be consecrated to the service of the living God. Nothing that can be used to the glory of God is regarded by the Association as common or unclean. Its programme is ever widening and its roots getting deeper down. For years the leaders of the Y.M.C.A. set their faces steadily against even the most innocent of games, and, when these were included, another running fight, which lasted for years, took place over the proposed inclusion of smoking rooms and billiard tables. These have now become almost universal in Britain, though there are still many of the great Association buildings in the United States where smoking is

not permitted. More recent agitation has been in favour of cards, dancing, and the drama, and almost imperceptibly the Association has seemed to modify its position to meet the new needs of a new generation. Emphasis is placed on proper supervision, right company and hours, a programme that is clean and elevating and in connexion with which there is no gambling. It is urged that these innovations can only be included as part of a well-considered constructive programme. In these days, when there is a more or less general tendency to kill time, everything that can be done is being done to build up in every Association centre a programme that will lead the members on to aspiration and achievement.

Critics have accused the Y.M.C.A. of attempting the impossible, of building on the apex of the Triangle. They gladly accept the criticism. They have attempted the impossible, and by God's grace the impossible has been achieved, for the secret of the Red Triangle is that it is upheld by invisible hands.

LITERATURE.—i. *Historical*.—E. W. Shipton, 'The History of the Y.M.C.A. in London,' *Exeter Hall Lectures for 1845-1846*, London, 1864, i.; G. J. Stevenson, *Historical Records of the Y.M.C.A. 1844-1884*, do. 1884; *The Jubilee of the Y.M.C.A. 1891*, do. 1894; *History of the Y.M.C.A.*, vol. i. (only vol. issued) deals with 'The Founding of the Association' (L. L. Doggett), New York, 1916; *Fifty Years' Work among Young Men* (a world survey), London, 1894; *The Association Handbook*, New York, 1892 (gives a chapter on 'The History of the Y.M.C.A.').; *Work for Young Men in N. America*, do. 1901; *History of the North American Y.M.C.A.*, do. 1913. A history of the whole movement is in preparation.

ii. *Biographical*.—J. E. Hodder Williams, *The Life of Sir George Williams*, London, 1906, re-issued as *The Father of the Red Triangle*, do. 1918; H. Begbie, *The Ordinary Man and the Extraordinary Thing*, do. n.d. (c. 1912) (a study of the founder and the movement); J. Kellett, *That Friend of Mine* (the Life of Miss M. McArthur, a pioneer of educational work with the Army in France), do. 1920; *Betty Stevenson, Y.M.C.A., Croix de Guerre avec Palme*, do. 1920 (the life of a lady transport driver); L. L. Doggett, *The Life of Robert R. McBurney*, Cleveland, U.S.A., 1902; R. C. Morse, *My Life with Young Men*, New York, 1918.

iii. *General and descriptive*.—*Handbook of the History, Organisation and Methods of Work of Y.M.C.A.*, New York, 1892; *The Army and Religion*, ed. D. S. Cairns, London, 1919, pt. ii. ch. 8; A. K. Yapp, *The Romance of the Red Triangle*, London, n.d.; E. W. Hornung, *Notes of a Camp-Follower on the Western Front*, do. 1919 (gives an account of the work of a Y.M.C.A. Librarian at Arras); G. Henderson, *The Experiences of a Hut Leader at the Front*, Paisley, 1918; J. W. Barrett, *The War-Work of the Y.M.C.A. in Egypt*, London, 1919; H. Boas, *The Australian Y.M.C.A. with the Jewish Soldier of the Australian Imperial Force*, do. 1919; K. Mayo, *That Damn Y*, Boston, U.S.A., 1920 (gives a racy account of the American Association's War-Work); Sherwood Eddy, *Everybody's World*, London, 1920; Conrad Hoffmann, *In the Prison Camps of Germany*, New York, 1920 (describes the work among prisoners right through the War); S. H. Baker, *Character Building Clubs for Boys*, London, 1919 (the text-book for the Boys' Department of the Y.M.C.A.); see also year-books and pamphlets issued by various departments, 13 Russell Square, London.

iv. *Periodicals*.—Every country has its own publications; for English readers the chief periodicals are: *The Red Triangle Magazine*, monthly, London; *Red Triangle News*, Scotland; *Young Men of India*, monthly, Calcutta; *Association Men*, monthly, New York; the trilingual quarterly, *The Sphere*, Geneva.

A. K. YAPP.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION.—I. *IN GREAT BRITAIN.*—The Young Women's Christian Association (Y.W.C.A.) has been a growth, not an organization, a creation rather than a manufacture; its very nomenclature denotes this. Quite naturally and gradually branches have grown up all over the world. A branch involves a living organism, so that the Y.W.C.A. has sometimes been compared to a tree with its central stem and spreading branches whose leaves have been for the healing of the nations. As in all human activities, the spirit has been too often lost in the letter, and life cramped by form and substance; there have in consequence been many failures, but its motto, 'Not by might, nor by power, but by my Spirit, saith the Lord of hosts,'

still binds the Y.W.C.A. together as an international federation; the British Y.W.C.A. was one of the first to join it.

i. *History*.—The history of the Association circles round three great events in the spiritual, social, and political realms which have in a special way affected women.

(1) First in 1855 began the spiritual movement which culminated in the revival of 1859-60 in Great Britain and Ireland, on the Continent, and in U.S.A. The idea that 'thy sons and thy daughters shall prophesy' was revived at this time, and it was then that women shared in the blessings which accrue from a fully developed spiritual ideal. To a daughter came the idea of forming a Y.W.C.A. worked as a prayer union for young women. Girls became anxious for the welfare of their friends, and, as the new tide of life began to flow, they were caught into it and began to realize their responsibilities. Up to that time it was not considered proper for a woman to attend even a missionary meeting, much less to go out as a missionary, or to take part in evangelistic work. The present writer remembers attending a meeting where no hymn could be sung, for it was not considered proper or right for a woman to raise the tune at a religious meeting, even when no man could do so. Emma Robarts asked ten friends to join her in intercession—a prayer union, as it was then called—and these women, filled with the spirit of revival, began to bring the names of others to be prayed for. A list of the first 27 members still remains in a tiny book, and a quarto sheet, of a few years later date, is in the writer's possession, containing a list of some 140 names, each undertaking some small piece of religious and social service. Gradually the list grew until 10,000 members were enrolled in different branches, each member being taught to realize her corporate as well as her individual responsibility. Thus the foundation of the Y.W.C.A. as a fellowship of service and prayer was laid.

(2) In 1887 came the social upheaval which followed the revelations of W. T. Stead. Wages boards were unknown, and few girls earned a living wage. The consequence was grave moral danger, and many indications of evil were discovered and made public at that time. It was an appeal to a Christian association of women. The London Y.W.C.A. made an appeal to the public which for the first time brought the Association into national prominence, and set it on its path of social as well as definitely religious work. Hostels were opened all over London and in other towns; the Travellers' Aid Society was inaugurated; the Park Mission for visiting in the London parks; and the Factory Helpers' Union, which has since developed into the Federation of Working Girls' Clubs, began its useful work under the Y.W.C.A., while the Association gathered educated girls into a 'Time and Talents' movement, quickly followed by the Guild of Helpers.

An association which belongs to the British Empire and has its part in the life of a nation which has ever offered hospitality to the people of all nations could not fail to extend beyond its own borders. The Y.W.C.A. was carried to India, with Bombay as its first centre, to S. Africa at Cape Town, to the Continent, and to Australia. The Provincial Council (as the South of England Council was then called) had its links in many lands. The Y.W.C.A. became the office in England for the 'International Union of the Friends of Young Women,' an organization which had spread all over Europe. 'Prevention and Protection' was its watchword, and its motto 'By love serve one another.' A visit of the then president, the present Lord Kinnaird, with his sisters Gertrude

and Emily Kinnaird, to the U.S.A. brought the British Association into touch with a similar movement among students, which was organized along the lines of the Y.M.C.A., and formed the student department of the Y.W.C.A., which has been adopted in many lands as an integral part of the national Y.W.C.A. work of the country. This led to frequent communication and inter-visitation until finally an entirely new policy was adopted. All the branches which had been started by the British Association and linked to it, but which were not in Great Britain or Ireland, were cut off gradually and formed into national groups under national committees; each could make its own rules and affiliate to the World's Y.W.C.A. office.

(3) The third national movement which brought a call to the British Y.W.C.A. was the Great War of 1914-18. On the first day of war, 4th August, some of the workers met, and within a week called together the National Council to consider the responsibility of a women's association in time of war; it established a War Emergency Committee in the first month, which eventually developed into a War Department with six different committees. The Association put itself at the disposal of Government for anything that might concern women. It was found that London had become a cosmopolitan city, and girls of all lands were working in it. Immediately they were anxious to get back to their own country, the Y.W.C.A. provided the necessary links, and thousands of girls found that the Association Directory could guide them and that its membership meant friendship and fellowship above national or denominational ties. The Blue Triangle, similarly to the Red Triangle of the Y.M.C.A., became the symbol of Y.W.C.A. activities. It was evident to the nation that a Christian association could be looked to to provide for the physical and social well-being of the soldier boy and the girl war-worker. The War Department gradually became responsible for establishing and expanding work along two lines—those of providing for the mental and for the physical needs of girls—and on a third line to carry on the religious work of the Association, thereby completing the triangle symbol. The three—physical, mental, religious—are equally dependent on the spiritual force which energizes and binds them together. The Blue Triangle is now seen in Government enclosures and controlled factories, in the centre of busy cities and in the lonely countryside wherever munition and aerodrome settlements were established. It denotes to the girl of to-day, as the letters Y.W.C.A. denoted to the girl of yesterday, that family life, community life, and the life of the State are better if animated by the spirit of Jesus Christ their Lord, which is the animating spirit of the Y.W.C.A. The Association also makes its contribution to the Kingdom of God on earth by remaining in close relation to all the Christian Churches; it is strictly interdenominational, and its service is rendered to all women irrespective of creed.

2. Organization.—(a) *National.*—The activities of the Association are carried out on certain well-defined lines under the direction of: (1) the National Biennial Conference elected by the membership, thus aiming at the development of democratic management; (2) a National Council appointed at the Conference and composed largely of national and divisional office-bearers, with co-opted members, representative of labour and Church, meeting at least once a year; (3) a National Executive, meeting monthly to direct and evolve any activities necessary for the growing needs of the girls of the land. The work is

directed by a president, four acting vice-presidents, a treasurer, a general secretary, and a staff of national secretaries.

(b) *Departmental.*—National, departmental, and sectional committees, meeting every month or in alternate months, are appointed for studying problems affecting girls, and thus a large body of women take part in and guide the activities of the Association. The Overseas and Foreign Committee seeks to interest members in Association work in non-Christian lands; secretaries are sent out to all parts of the world.

(c) *Basis and aims.*—All women taking up active work, salaried or honorary, on these councils and committees must agree with the basis and aims:

'Faith in God the Father as Creator, and in Jesus Christ, His only Son, as Lord and Saviour, and in the Holy Spirit as Revealer of Truth and Source of Power for life and service, according to the teaching of Holy Scripture.'

'The aim of the Young Women's Christian Association is:—To call young women and girls to the allegiance of Our Lord Jesus Christ, the fellowship of His Church and the service of His Kingdom.

To unite them in a fellowship of prayer, Bible study and service, through which they may make their contribution to the spiritual, moral and social progress of the world.

To make available for them all that will minister to character, mental capacity and physical health.'

(d) *Training of secretaries.*—The aim is to have a well-staffed training centre where students offering for home or overseas work can receive a year or more of training, so that the Association secretaryship may be looked on as a vocation as important as teaching.

(e) *Headquarters.*—The Headquarters of the British Y.W.C.A. are at 22, 25, and 26 George Street, Hanover Square, London, W.1.

(f) *Membership.*—Membership in the Association is open to women who desire, in fulfilment of the motto, to serve one another and the world by love in the spirit of Jesus Christ. There are also associate membership and club membership which do not involve membership of the Association.

(g) *Magazines.*—By its literature the Association seeks to carry its ideals to all sections of the community. Its magazines are: *Woman's Outlook* (monthly), *Our Own Gazette* (monthly, for younger members), *Home and Overseas Bulletin*, *The World's Quarterly*, *The Y.W.C.A. Almanack and Motto Card*, *The Monthly Letter*.

(h) *Territorial work.*—The activities are carried on through divisions, embracing a given number of counties: London, East of England, Midlands, North of England, South of England, West of England, Scotland, Wales. Each has its president, general secretary, and council, and directs the work of the local branches by grouping them into district councils.

3. Methods.—Along the lines of the physical, intellectual, and religious development of the young women of the land, and through its departments, the Association moves forward. The most important methods are:

(a) *Canteens.*—The Y.W.C.A. has the honour of starting the first women's restaurant, which is still feeding hundreds of working girls at 'Ames House,' Mortimer Street, London, W.

(b) *Hostels.*—The largest of these is Bedford House, London. Others are Ashley House, London; 4 Saville Place, Newcastle; 116 George Street, Edinburgh; Sherbrook House, Bristol, etc.

(c) *Clubs.*—Clubs are carried on under the direction of a club-leader, who organizes their operations with the help of committees consisting of members, and encourages Y.W.C.A. membership, so that club-membership may lead to national and international interest in all that concerns young women.

(d) *Branches.*—Groups in any locality where there are a sufficient number of girls needing Y.W.C.A. fellowship and protection are called branches.

(e) *Holiday Homes.*—In Holiday Homes and Holiday Camps (with Convalescent and Holiday Club Department) recreation, fellowship, and comradeship are promoted, and all classes meet together.

(f) *The Social Question Department* is continually watching the needs of working girls and spreading information as to legislation on questions affecting women.

(g) *The International and Emigration Department* works in

co-operation with the Immigration Departments of other lands and the Employment Bureau (foreign), and seeks to solve some of the problems of household work by establishing training hosts and rewards for long service. The Blue Triangle Household Orderly Corps is the newest development.

(h) *The Educational Department*, with its libraries and a growing staff of secretaries, seeks to fit the girl of labour for her future life, and to induce the girl of education and leisure to share her opportunities with those who have fewer advantages. In clubs, though they are mainly recreational and social, it encourages study by means of circles and lectures. Co-operation with the Y.M.C.A. is being arranged. A Working Women's College has recently been established.

(i) *The Reception Hostel and Moral Question Department* has for its aim to maintain a Christian attitude towards all moral questions, and by practical work to help every girl to attain it.

(j) *The Religious Work Committee* touches the very centre of Y.W.C.A. work. Its aims are to promote the spiritual life of workers and members by Quiet Days, Retreat conferences, Camps, and Summer Schools. There are special secretaries for promoting Bible study, evangelistic efforts, prayer and fellowship, home study, and co-operation with the Church.

II. *THE WORLD'S Y.W.C.A.*—At first looked on as undenominational, the Y.W.C.A. has proved itself to be interdenominational. In its earliest years avoided by some sections of the Church, and its position misunderstood, it held to its principles, which have been formulated into a truly catholic basis, and with a truly world-wide aim—the winning of the girls of the world to recognize the claims of Jesus Christ as a personal Saviour and Lord.

The basis was at first that of the British Association, but at the Stockholm Conference the following was adopted:

'Faith in God the Father as Creator, and in Jesus Christ His only Son as Lord and Saviour, and in the Holy Spirit as revealer of truth and source of power for life and service, according to the teaching of the Holy Scriptures.'

The first World's Committee met in London in 1894; Mrs. J. H. Tritton was appointed president and Mary Morley treasurer. A sum of £800 was guaranteed by the United States and Canada, which were then united, and by Great Britain and Ireland, also united at that time. It was agreed that the general secretary of the World's Association should be from another country than that in which the World's Office was located, and therefore Annie M. Reynolds, the first general secretary, came from the U.S.A. An executive committee was chosen, composed of women resident at Headquarters, to which is committed the work for the period between one World's Conference and another. On this committee women of several nationalities have served during residence in London. The office was located first at 26 George Street, Hanover Square, and has since been removed to 22 York Place, W. 1. Although at present in London, there is no rule as to which country the office of the World's Y.W.C.A. should be located in. It is at the choice of the Quadrennial Conference. Two other national Associations were sharers equally with Great Britain and the United States in their moral earnestness and desire to form a World's Association—those of Norway and Sweden.

In the two years which intervened between the conference held in London, 8th-11th April 1892, and the formation of the World's Committee in 1894 the committee appointed had been carefully drawing up a constitution, which, while it should leave entire freedom of control and direction to each national organization, should guarantee federation on the basis of the voting membership of all branches according to each national membership. The object of the new body is threefold: (1) to bring into closer mutual knowledge the national associations already existing that they may be more practically helpful to those of their members who go out from their own country; (2) to help countries having only scattered Associations to form such into self-reliant national committees; (3) to develop a greater spirit of responsibility among the young women of Christian countries

towards the young women of non-Christian countries.

The first four years—November 1894 to June 1898—had naturally to be spent in striving to attain the first object of the World's Association and in becoming mutually acquainted. The second object of the World's Association also had its place in the first year, when in May 1895 the Canadian Associations, through accredited representative and honorary secretary, made formal application for admittance. The American committee, under whose direction they had formerly been, appreciated their spirit of self-reliance and bade them God-speed. The year 1895 also saw a closer union established between the S. African as well as the Australian Associations. At the fifth regular meeting of the Executive Committee (9th March 1895), the third object, of greater interest in non-Christian countries, was foreshadowed by a note from Madras, India, recording that Agnes Hill 'has made a splendid start here and been greatly blessed in all her work since her arrival in India.' At the meeting of 18th Feb. 1897, formal notice was given of the organization of the National Committee of India, Burma, and Ceylon, with headquarters at Calcutta. Agnes Hill was asked to take the position of national secretary. China and Japan were not long in developing more purely Chinese and Japanese National Committees.

The first World's Y.W.C.A. Conference was held in London, 14th-18th June 1898. The basis of representation adopted was that each national committee should have the right to send ten voting delegates to the World's Conference, provided each national committee represented 100 or more branches; if it represented less than 100 branches it should have power to send only five voting delegates. Every five branches after that should have the right to send one delegate to the conference. It was recommended that a 'quarterly' from October 1898, called *The Women's International Quarterly*, be regarded as the official organ of the World's Y.W.C.A., that the second Sunday in November and the week following be considered as the International Week of Prayer for the World's Y.W.C.A., and that the Executive Committee be empowered to select a suitable international badge, which is now the Blue Triangle.

The first event of active importance after the conference was the application of the German national council for affiliation with the World's Association.

At the London conference eighteen countries were represented, at Geneva (1902) nineteen. At the London conference English had been the only language; in Geneva French was the prevailing language. The Geneva conference was privileged to welcome the Danish national committee to active membership in the World's Association.

All through the Great War, although no international work could be undertaken, there was no breach in the World's alliance, and most national associations developed on very similar lines. In June 1920 representatives of 28 countries met at Champeri, Switzerland, for a World Y.W.C.A. Commission to inquire into the social and industrial conditions which affect women so largely. It was followed by a meeting of the World's Y.W.C.A. Committee, the meeting of which had been suspended during hostilities. No affiliated country held aloof, and there were added representatives of South America and Central Europe, on which continents Associations are rapidly developing.

LITERATURE.—The work which the Y.W.C.A. is doing is recorded in its magazines. The chief of these are (1) *Our*

Own Gazette, (2) *The Y.W.C.A. Monthly Letter*, and (3) *The Y.W.C.A. Bulletin of Home and Overseas News*.

For further information the following publications may be consulted: *The Y.W.C.A. Overseas*; *The Y.W.C.A. in China*; *The Y.W.C.A. in Africa*; *The Woman's Movement in India*; *Social Service in South Africa*; *The Y.W.C.A. and Reconstruction*; *The Y.W.C.A. and Education*; *The Y.W.C.A. in the Twentieth Century*. These publications are all issued at the offices of the Y.W.C.A. in London and New York.

EMILY KINNAIRD.

YUAN-CHWANG, FA-HIAN, AND I-TSING.

—Yuan-chwang (Hsien-tsiang), the greatest Chinese traveller in India (A.D. 629-645), is also one of the most important figures in the history of the development of Chinese Buddhism. There were three pilgrims before him, among whom Fa-hian was the first to penetrate (A.D. 399-413) into the holy land of the Buddhists, and his return marks a step in the progress of the study of Buddhist literature, while the two others, Sun-yun and Hui-seng (A.D. 418) by name, left only a short narrative of their travel¹ and do not seem to have done any important work at home, though they brought back with them some 170 Buddhist texts. After Yuan-chwang in the T'ang dynasty there were so many travellers in India that those recorded by I-tsing alone amount to 56.² The recorder himself, who stayed for a prolonged period (A.D. 671-695) in India and the Malay islands, was by far the most prominent among them and the only scholar who could in any way be compared with Yuan-chwang himself.

The three, Fa-hian, Yuan-chwang, and I-tsing, are styled in Japan the 'three mirrors that reflect Indian Buddhism.' They are therefore treated together in the present article.

1. The routes.—There were from of old four principal routes into India, two through Central Asia, the northern and the southern. On his journey out Yuan-chwang took the northern road through Turfan, Kucha, Issik-kul, Tashkend, Samarkand, Kunduz, Kabul, and Peshawār, while on his way home he preferred the southern road, turning eastward from Kunduz and passing Pamir Kul, Kashgar, Yarkand, Khotan, and Nainshe (Ansi).³ The southern road is much shorter and the most direct way to India, and corresponds roughly with the route of Fa-hian and other predecessors. The third route to India was through Tibet, leading either to Bhutan or Sikkim or sometimes to Nepal. During the T'ang dynasty there were many who took this road, especially after the marriage of a Chinese princess to the Tibetan king Srong-tsan-gampo, who sent envoys to India in A.D. 632.

The fourth route was the over-sea one which was chosen by I-tsing, who embarked in a Persian ship from Kwang-tung to Sumatra, where he changed to a Malay boat, sailing through the strait to Tāmralipti near Calcutta. Fa-hian as early as A.D. 413 embarked in a Brāhman ship to cross the Indian ocean to Java, there taking another merchant ship for China. Thus the journey to India of the earliest traveller Fa-hian was over-land, and his return journey over-sea *via* Ceylon and Java. Yuan-chwang, on the other hand, confined himself to the over-land route, not even crossing over to Ceylon, while the last pilgrim I-tsing took the sea route both ways.

2. Records.—(a) *Fa-hian*.—As he himself says

¹ Samuel Beal, *Fo-kwo-ki by Fa-hien*, London, 1869 and 1884, pp. 174-208.

² Edouard Chavannes, *Voyage des pèlerins bouddhistes, mémoire composé à l'époque de la grande dynastie T'ang sur les religieux éminents qui allèrent chercher la loi dans les pays d'occident*, par I-tsing, Paris, 1894.

³ Tao-hsüan, in his geography of the region of the Sākya (Bunyu Nanjio, *Catalogue of the Chinese Translation of the Buddhist Tripitaka*, Oxford, 1883, no. 1470), calls this route the 'middle' and the Tibetan road the 'southern.' Hui-lin, in his *In-i* (vol. 81), describes the Tibetan route rather minutely (Tokyo ed., case 39, vol. x. fol. 45^a).

towards the end of his record, Fa-hian started in A.D. 399 from Ch'ang-an, the western capital of China, reached India after six years, and, staying there another six years, returned in A.D. 413, spending three years on the way. His record, which was finally revised in A.D. 414, was called sometimes *Fo-kwo-ki*, 'Record of the Buddhist Countries,' or simply *Fa-hian-chüan*, 'Record of Fa-hian.'¹ The word 'high priest' is often added before the title *Fa-hian-chüan*, so it is certain that this designation was not given by the author himself. At the beginning of the record we find a note, 'Fa-hien's own record of his travels in India,' which is in all probability the writer's original title. The work was rendered into French by A. Rémusat in 1836, into English by S. Beal in 1869 and 1884, and again by J. Legge in 1886, the last with the Chinese text as well.

His six years' travel, beginning from Peshawār and ending at Tāmralipti, covers almost all parts of India, 30 countries in all, except the Dekkan, which he himself says that he could not visit. From Tāmralipti he crossed to Ceylon, thence to return to China.

When he left China, he was accompanied by some ten priests, but a party of three went to Turfan in the second year with the intention of getting the royal patronage there, and another party of three retraced their steps from Peshawār to China in the fourth year for a reason not stated, while two others died in Peshawār and on the Hindu Kush. Fa-hian with his sole companion Tao-chêng visited Mathurā, Kanauj, Śrāvastī, Kapilavastu, Vaiśālī, and Kuśinagara, and, having made a pilgrimage to all the sacred spots of the Buddha, came to Pātāliputra, whence they visited Rājagṛha, Gayā, Kukkuṭapadā, and Benares. They returned to Pātāliputra, where they sojourned three years and collected and copied the sacred texts of various schools. Tao-chêng was charmed with the fine discipline of the Buddhist order there, and, having been disgusted with the ill-regulated manners of the Chinese Buddhists, he decided to live in India and never to return home. Fa-hian, whose desire was to enlighten China by his newly-acquired knowledge, took leave of his companion and travelled alone farther down the Gangā to Campā and Tāmralipti on his way home. He seems to have found Buddhism in general in a very flourishing state, as it was in the imperial Gupta period. Though the Mahāyāna and the Hinayāna are mentioned now and again, there are as yet no traces of a dispute between the two schools nor signs (such as we find in Yuan-chwang's record) of either being much more influential than the other.

(b) *Yuan-chwang*.—The record of the great traveller is handed down to us in three forms. The first is of course his own work, *Hsi-yü-chi*, 'Record of the Western Region,' in 12 volumes, translated by Yuan-chwang and compiled by Pien-chi, his pupil, A.D. 646.² The travels cover 138 countries in all—110 which he himself visited and 28 of which he gathered news from his informants, as we are told in an introduction by Ching-po.³ The characters and usages of the people and the state of Buddhist learning and practices are minutely described. The book is unique and in-

¹ Nanjio, no. 1496.

² *Ib.* no. 1503.

³ This introduction was not translated by Julien. The separate edition of Kyoto University has it. In the postscript of the record it is expressly said that the use of the word *hing* ('gone') indicates a country which was visited by Yuan-chwang himself, while the word *chia* ('arrive') shows a place which was described from hearsay. Thus we can easily distinguish the countries which the traveller did not visit, i.e. 21 countries in Central Asia (vol. i.), Nepal in the Himālayan district (vol. vii.), Ceylon and Persia (vol. xi.), and 4 countries again in Central Asia (vol. xii.), 28 altogether. It is strange that no scholar has hitherto called attention to this fact.

dispensable for the study of Indian history and the geography of the Buddhist period. In 1857 Stanislas Julien published his French translation with the title *Mémoires sur les contrées occidentales traduits du sanscrit en chinois, en l'an 648¹ par Hiouen-thsang, et du chinois en français par St. Julien*. An English translation by S. Beal followed in 1884 with the title *Si-yu-ki, Buddhist Records of the Western World, translated from the Chinese of Hiuen-tsiang*, 2 vols., London.

The second is a résumé of Yuan-chwang's travels contained in the *Record of the Region of the Sākya* in 8 books by Tao-hsian.³ It is interesting to note that the author was Yuan-chwang's pupil and one of his assistant translators, and that the work was compiled during Yuan-chwang's lifetime, i.e. A. D. 650.

There seems to have been another work in 10 books entitled *Hsi-yü-chüan*, 'Record of the Western Region,' by Yen-ts'ung, another pupil of the traveller. This record, it is said, treated more of the Indian life than the religion itself, whereas the traveller's own *Mémoires* paid more attention to the religion than the life. Tao-hsian says in his own preface that both of these were too minute and copious for general information and that this very fact led him to a fresh compilation of his own work. No European translation of it has as yet appeared.

The third is a curtailed form of the *Mémoires* given in the life of Yuan-chwang in 10 volumes, compiled by Hui-li and annotated by Yen-ts'ung, A. D. 665.⁴ Julien published it, at the same time as the *Mémoires*, in an abstract under the title *Histoire de la vie de Hiouen-Tsang et ses voyages dans l'Inde, 629-645*, London, 1853, and Beal has also given us a similar abstract.

So far as Yuan-chwang's routes and geographical names are concerned, Thomas Watters, a great Chinese scholar, did a great deal, and the result of his studies was published in 1904-05 by T. W. Rhys Davids and S. W. Bushell with the title *On Yuan Chwang's Travels in India, 629-645, by Thomas Watters*. His researches are accurate as usual, and, if he could have made more use of the results of the Indian and Central-Asian excavations and several old MSS of the record discovered in Japan, nothing would remain to be desired.

Yuan-chwang's record can be divided roughly into five parts: (1) a general introduction to Jambudvīpa and a description of Central-Asian countries along the northern route, i.e. Agni to Kapiśa (vol. i.); (2) a detailed introduction to India (name, geography, calendar, life, language, customs, religion, castes, products, etc.) and a description of countries in the Panjāb and in the north of the Ganga as far down as the valley of the Gandakī, i.e. Lāmpā to Nepal (vols. ii-vii.); (3) a detailed description of Magadha, including Nālanda (vols. viii-ix.); (4) the lower region of the Ganga, countries on the south sea coast, in the Dekkan and on the lower Indus, i.e. Irāna to Varāna (vols. x-xi.); (5) Central-Asian states along the southern route, i.e. Jāguda to Khotan (vol. xii.).

A résumé of the contents can be obtained best from Watters' work, which gives the travels in their shortest possible form. Further, a lengthy note on the itinerary was added by Vincent A. Smith at the end of the work.

When Yuan-chwang, as a young and brilliant scholar, expressed his desire to visit India, there seem to have been some willing to accompany him in his journey, but when he came near to the Desert he had only two companions, of whom one was sent back to China as he was thought unfit for the hardships of the journey, while the other started in advance to T'un-hwang and was heard of no more. Finally, when he took leave of his patron the king of Turfan, four novices were allotted to him as his attendants. The king helped

¹ This date must be a mistake. Yuan-chwang's own memorial to the emperor Tai-tsong on the presentation of the record is dated the 13th of the 7th moon in the 20th year of the Chéng-kuan period, i.e. 646. Julien's Chinese text probably did not include this memorial.

² Hiouen-thsang = Yuan-chwang. Seven different ways of spelling the name have been discussed by Rhys Davids (see T. Watters, *On Yuan Chwang's Travels in India, 629-645*, 2 vols., London, 1904-05, i. 17).

³ Nanjio, no. 1470.

⁴ *Ib.* no. 1194.

him with brotherly care and introduced him to many of the Central-Asian chieftains; consequently he was welcomed everywhere and travelled with great facility. In India too he was patronized by King Harśa of Kanauj and had opportunities of meeting many worthies and savants of his time. At Nālanda, the then centre of the Mahāyāna learning, he found an able teacher in Śīla-bhadra, the president of the university, and there he spent several years' learning Sanskrit and chiefly Buddhist idealism, occasionally discussing or disputing with sectarian teachers. The interest of the Buddhists of his time seems to have centred in the Mahāyāna, though the Hinayānistic schools too were followed in all India.²

(c) *I-tsing*.³—I-tsing's record was called *Nan-hai-chi-Kuei-wei-fa-chüan*, 'Record of the Buddhist Practices sent home from the Southern Sea,' in four volumes.⁴ The 'Southern Sea' means in Chinese the Malay islands (Sumatra, Java, and the neighbouring places). It is so called because he sent his record home while he was sojourning in Palembang (Bhuje), Sumatra, collecting and copying Sanskrit Buddhist texts. The record was translated into English by the present writer in 1896 and published at Oxford with the title *A Record of the Buddhist Religion in India and Malay Archipelago (A. D. 671-695) by I-tsing*. The text is entirely different from the two preceding ones, inasmuch as it records only the religious life and practices, especially discussing minute points of the Vinaya rules. The author does not describe his travels at all. The record will prove indispensable, however, when research into the Vinaya branch of Buddhist literature is seriously taken up. Further, it is very interesting that he limits his discussions of the Buddhist practices to the Sarvāstivāda (realistic) school. For it is a very difficult task definitely to class Vinaya practices of that epoch in various schools.

There is another record by I-tsing giving biographical notices of 56 Chinese priests who travelled in India before or during his stay abroad.⁵ This is practically a book of travels, and it is in this that he describes the incidents which happened on his journey to India, the chance return to China, and the second sailing to Sumatra to copy the sacred texts.⁶ E. Chavannes published his French translation of it in 1894, with the title *Voyages des pèlerins bouddhistes, mémoire composé à l'époque de la grande dynastie Tang sur les religieux éminents qui allèrent chercher la loi dans les pays d'occident, par I-tsing*. The two records of I-tsing should always be consulted together, for the whole of his life and work cannot be known without either one.

The biographer⁷ tells us that I-tsing was 25 years (A. D. 671-695) abroad and travelled in more than 30 countries. That he made a pilgrimage to all the sacred spots of the Buddha can be seen from his own narratives, but we cannot state with certainty that he travelled in so many countries as the biographer asserts.

As was the case with Fa-hian and Yuan-chwang, he had some five or six followers at the outset, but finally started with only a young priest, Shan-hing by name. In India he himself says that he lived ten years in the University of Nālanda (probably A. D. 675-685), chiefly studying the Vinaya. On his way home he stayed in Palembang, Sumatra, to collect and copy more of the Sanskrit texts.

¹ According to the life of Yuan-chwang (vol. iii.), he stayed there five years. Vincent Smith makes it two years (see Watters, ii. 325).

² *JRAS*, 1891, p. 420.

³ Otherwise spelt I-ching.

⁴ Nanjio, no. 1492.

⁵ *Ib.* no. 1491.

⁶ These facts are summed up in the present writer's introduction to *Life and Travels of I-tsing*, p. xxv.

⁷ Nanjio, no. 1495.

One day he wanted to send letters home and went on board a merchant ship, when a favourable wind began to blow and the ship set sail at once. He thus came back by chance to Kuang-tung, and, meeting his old friends, tried to obtain some new companions for his work abroad. At last he succeeded in finding four able assistants, Chêng-ku, Tao-hung, etc., with whom he set out once again in A.D. 689, when he was fifty-five years of age. He finally returned in midsummer A.D. 695.

3. Their work at home.—Buddhism was introduced into China in A.D. 67. The emperor Min-ti sent envoys to India and invited two Buddhist priests, Kāśyapa Mātāṅga and Fa-lan¹ by name, to come to China. They were stationed in a specially built monastery called the 'White Horse' and were kept busy translating. The following three centuries were a period of translation by foreign priests. This we can call the first period of translation (A.D. 67-414). Those foreign priests who came from India itself were surnamed 'Chu,' a curtailed form of 'Tien-chu' (=Sindhu, *i.e.* Indian),² while those from Yue-chi (Kuşana) were styled 'Chi.'³ Those surnamed 'An' are from An-hsi (=Arsak, Parthian),⁴ 'K'ang' from K'ang-chü (=Samarkand)⁵ and 'Po' from Kucha (for the royal family was so named).⁶ There were practically no Chinese priests who carried out translations by themselves, though there were a few who assisted in the work as subordinates.

The second period of translation (A.D. 414-645) was inaugurated by Fa-hian's return. He brought home the Vinaya texts of the Mahāsaṅghika and the Sarvāstivāda schools, the *Mahāparinirvāṇa Sūtra* of the Mahāyānists, and also the *Abhidharma-hrdaya Sūtra*; and he himself did the work of translating some of these texts⁷ with the assistance of Buddha-bhadra, an Indian priest. Almost at the same time Chi-yen⁸ and Pao-yun,⁹ his companions half-way to India, and Chi-mang¹⁰ and Tao-tai,¹¹ both of whom went to India soon after Fa-hian, followed the latter's brilliant example in independent translations. Many priests seem to have done the same, though some of their works are lost.¹²

This period of translation, though conducted by Chinese priests, was not without brilliant works achieved by gifted foreigners, such as Kumārajīva,¹³ who is said to have had 3000 pupils, Gunabhadra,¹⁴ Paramārtha,¹⁵ Bodhiruchi,¹⁶ and Jñānagupta.¹⁷

The above two periods are generally designated the old era of translation. The following period opens the new era of translation (A.D. 646-1127), which was begun by the epoch-making work of Yuan-chwang¹⁸ and was continued by I-tsing,¹⁹ the two being the most prominent figures in the Buddhist culture of the T'ang dynasty. Yuan-chwang brought home the Mahāyāna *Sūtras* (224 texts), the Mahāyāna *Sāstras* (192 texts), the

works of the Sthavira school (14), those of the Mahāsaṅghika school (15), those of the Saṃmitīya school (15), those of the Mahāśāsaka school (22), the Kāśyakiya texts (17), the Dharmaguptīya texts (42), the Sarvāstivāda texts (67), the Hetuvidyā (Logic) (36), and the Śabdavidyā (Grammar) (13), altogether amounting to 520 bundles and 657 different texts. What he specially laid stress on was the Vijñānamātra doctrine (idealism), and he may be deemed the founder of the Buddhist idealism in China.

The catalogue of I-tsing's collections is not given so minutely as his predecessor's. The Sanskrit texts of the *Tripitaka* collected by him during his stay of ten years at Nālanda were nearly 400 in number, amounting to 500,000 *ślokas*, which he himself says he had in hand whilst in Palembang.¹ What he considered most important was the Vinaya literature, and his translations in this branch of study are very full and minute, especially in the Vinaya of the Sarvāstivāda (realistic) school, which amounts to 19 texts in 209 volumes out of 56 texts in 256 volumes in all. His works in this line are generally called the 'New Vinaya,' while those of Tao-hsian, a pupil of Yuan-chwang, and of the other predecessors are styled the 'Old Vinaya.'

Thus he founded a new school in the study of this branch of Buddhist literature and made his own school the most influential of all. The work of translation in the T'ang dynasty was on a grand scale. All had to be done by the imperial sanction, so many officials and assistants being specially appointed. The completed texts had to be presented to the imperial court to be authorized for publication or to be incorporated into the Buddhist library.

This new era was further enriched by the works of Amoghavajra,² Dharma-deva,³ Dāna-pāla,⁴ etc., but their translations, numerous as they are, cannot be compared in nature and bulk with those of Yuan-chwang and I-tsing, for almost all of them are *dhāraṇīs*, *stotras*, or mystic texts of the kind.

With the Sung dynasty (A.D. 960-1127) the periods of translation which were so ably represented by the three travellers practically came to an end, Indian Buddhism gradually giving its place to Tibetan Lamaism.

Z

ZAIDI.—Zaidi (Zaidiyyah; in Arabia Zuyud) is the name of a Muhammadan sect, called after Zaid, son of 'Alī, son of Ḥusain, son of 'Alī, cousin and son-in-law of the Prophet Muhammad. This person came forward as a pretender in the reign of the Umayyad Hisham (121–122 A.H.) in Kufah, was defeated, and was put to death. His story is told with unnecessary prolixity by Ṭabari.¹ His sect survived, though doubtless in secret, in Kufah, where they were concerned in various risings of 'Alid pretenders, such as those of 151, 250, and 251 A.H.;² on the last occasion they are called 'men of wool,' *i.e.* ascetics, and the same historian casually mentions them after this time among heretical sects.³ If it be true that Harun al-Rashid employed one of the community to assassinate Idris, founder of the Idrisi dynasty of Fez,⁴ it is likely that they were tolerated by the legitimate khalifahs to the same extent and for the same services as were afterwards the Assassins by the Egyptian sultans.

1. **History.**—The first dynasty founded by a member of the sect was that of the Idrisids (172–362 A.H. = A.D. 788–973), called after Idris b. 'Abdallah, a descendant of Hasan, who, after a rising organized by a nephew of his in the Hijaz in the time of the 'Abbāsīd Mahdī had been suppressed, escaped into Africa and gained a following among the Berbers of Ulili (Volubilis) near one of the sources of the Sebou. After winning over or subduing a great number of tribes, he took the title khalifah, and was, as has been seen, assassinated by an emissary from Baghdad in A.D. 793. He was succeeded by his infant son, called by the same name, who founded in 803 the city of Fez, which became the capital of the dynasty. Its population was supplemented in 814 by some 8000 families exiled by al-Hakam from Cordova, but welcomed by Idris II., 'whose subjects, being for the most part nomads, showed an invincible repugnance to becoming citizens.'⁵ At the time of his death, in 828, his kingdom comprised the whole of the Farthest Maghrib and reached Mīna in the Central Maghrib. His successor Muhammad divided his territories (other than Fez itself and its neighbourhood) between eight of his relatives, reserving the capital and the suzerainty for himself; this act led to the permanent break up of the kingdom, which was left in a state of civil war at his death in 836. The princes who succeeded him in Fez were involved in wars with other sects, such as the Khārijis and the Fatimids of Africa, the latter of whom took Fez in 959. In 973 it fell into the hands of the Spanish Umayyads, and the last of the Idrisi monarchs, named Hasan, was compelled to abandon his fortress, 'The Vulture's Nest,' somewhere in the neighbourhood of Ceuta, on condition of his life being spared.⁶

The next and most important dynasty of Zaidites was that founded in S. Arabia by a descendant of 'Alī, Yahyā b. Ḥusain b. Qāsim Rassi; his grandfather Qāsim was a son of one Ibrahim Ṭabāṭaba, and brother of a Muhammad whose abortive rising at Kufah about 200 A.H. is described at length by Ibn Khaldūn.⁷ This Yahyā established a khalifate at Sa'dah in Yemen, taking as his imperial title al-Hādī ila al-ḥaqq (280 A.H. = A.D. 893). The story of this dynasty, as told by Ibn Khaldūn,⁸ is translated by H. C. Kay,⁹ who corrects some mistakes. The name Rassi, whereby this dynasty is known, is said to come from Rassa, a mountain in Najd, where Yahyā's grandfather Qāsim took refuge. Yahyā was himself the author of numerous works, among them refutations of the Shi'ah sect called the Imamiyyah, and of the views of the contemporary historian Ṭabari. The capital of the dynasty was sometimes Sa'dah, sometimes Ṣan'a, and the territory included within its dominions varied greatly at different times; the earlier geographers (of the 3rd and 4th Islāmic centuries), so far as they allude to these princes, call them 'resident in Sa'dah.' In the 6th Islāmic cent. they were driven out of Sa'dah by the Meccan Sulaimanis, but towards the end of that century a Rassi monarch resumed possession of the place with the title Maṣṣūr. He is said to have dispatched missionaries to remote parts of the 'Abbāsīd empire, such as

Jilan, and to have attracted the notice of the 'Abbāsīd Nāṣir (1180–1225), who, however, did not succeed in securing his person. In the year 1258 (about the same time as the fall of Baghdad) their imām Yahyā b. Ḥusain was killed in battle.¹ Their political power was for the time broken; but imāms continued to be appointed, and to maintain themselves in some regions till the date at which Ibn Khaldūn's narrative closes, 793 A.H. Probably this condition was maintained till 945 A.H. (A.D. 1538), when the Yemen fell under the domination of the Ottomans; but in 1597 one Qāsim, who claimed to be a descendant of the Rassi family, assumed the imāmate at a place called Hadid-qara, and found numerous adherents; after a long series of struggles with the Turkish pashas, with varying success, in 1619 he obtained recognition from the Ottoman authorities as ruler of a considerable portion of Yemen; he died the next year (1620), and was succeeded by his son the imām Muhammad the Mu'ayyad. In 1626 this person, owing to the execution of an agent of his by the Turkish governor Haijar Pasha, started a fresh revolt, and with the aid of his brothers conducted it so successfully that before the end of the year few places, besides Ṣan'a, Aden, and the ports, remained in Ottoman hands; everywhere else the Zaidi power was recognized in Yemen. In 1629 Ṣan'a, after a siege of two years, was surrendered to the Mu'ayyad; and in 1635 Yemen was definitely evacuated by the Ottomans, and the Zaidi ritual established in the mosques. These details are taken from the Turkish *History of Yemen and Ṣan'a*, by Ahmad Rashid,² who attributes the expulsion of the Ottomans chiefly to the incompetence, laziness, and corruption of the governor Haijar Pasha, who was exiled in consequence. The new Zaidi ruler, as has been seen, took a title in the style of the khalifahs, and similar titles were taken by his successors, of whom the first was his brother Ismā'il, called the Mutawakkil, who captured Aden in 1640, and extended his rule into Hadramaut and other regions neighbouring Yemen. From this time till 1750, though there were numerous wars of succession and local revolts and insurrections, the Zaidi realm remained intact; after 1750 it split up into numerous petty governments, of which the most important continued to be that of Ṣan'a. To the list of imāms given by Stanley Lane-Poole,³ after Niebuhr, we should add Mutawakkil, who ascended the throne on the death of his father Maṣṣūr in 1514, and Mutawakkil's son Mahdī, who succeeded in 1820–21, and after whose demise in 1830–31 there was a period of anarchy, which ended in 1846 with the restoration of the Ottomans, one Tewfik Pasha being installed as governor in that year at Ṣan'a. Since that time, however, there have been numerous revolts and internal dissensions.⁴

Besides the Zaidites of Fez and Yemen there were in the 3rd and 4th Islāmic centuries those of Tabaristān and Jilan. Various pretenders of the family of 'Alī, entertaining the Zaidi system, established themselves, though ephemerally, in these regions, where they are thought to have made converts among the till then pagan populations.⁵

2. **Characteristics.**—In the Diplomatic Encyclopædia of Qalqashandī called *Subh al-A'shā*⁶ some notices of the Zaidi court are collected from various authors. According to these, the imām lived in Arab simplicity with no attempt at magnificence or display. He claimed, however, to be the supreme sovereign, the usurpers of whose rank (such as the 'Abbāsīd khalifahs) would be punished in the next world for their rebellion. His followers looked forward to the time when his supremacy would be generally acknowledged, and expected that his family would produce the Mahdī who is to appear at the end of the world. His prayers were regarded as intercessory; his hand was laid on the sick; and at times of drought it was his business to procure rain. The emirs of Meccah (in the 6th Islāmic cent.) were supposed to favour his claims secretly. The imām was thought to possess a secret store of knowledge, handed down from his predecessors, and going back ultimately to 'Alī and

the Prophet (a common Shī'ah notion). He maintained agents who travelled over all Islāmic countries, associating with those who were already adherents and winning others. These were all on the look-out for the collapse of the khalifate (in 732 A.H. that maintained by the Egyptian sultans) and the exaltation of the imām. In the effects of a man who had died in Aleppo (somewhat before this time) letters had been found addressed to him and to his ancestors from the imāms soliciting information about the Shī'ah in that country and also aid. There were different accounts of the number of the imām's armed followers, but there was no question of their valour. The Rasulids, who from 1229 to 1451 A.H. were the chief power in Yemen, ordinarily treated the imām with respect; during the reign of Nāṣir in Egypt (1293-1340) an imām had sent a proposal to form an alliance for the purpose of ousting the Rasulids, which had been rejected.

3. *Doctrine.*—The Zaidis in doctrine come between the Shī'ah (*q. v.*), to whom they technically belong, and the Sunnah (see SUNNITES). They maintain that the imāmate is inherent in the house of 'Alī and Fātimah; but they revere the memory of the first two khalifas, holding that, though 'Alī had a right to the office, there were political reasons which rendered his appointment undesirable. Their theory is known as *tafḍīl*, meaning the legitimacy of the appointment of the *mafdūl*, i.e. the person whose claims are inferior, while the *fādīl*, or person with superior qualifications, is accessible. Copious extracts from their literature on this subject are given by R. Strothmann.¹ The imām Hādī, as has been seen, compiled a treatise on the subject. In normal times the imāmate in their system belongs to the fittest person among the descendants of either Ḥasan or Ḥusain, the grandson of the Prophet whose duty it is to 'come out.' To rebel against an iniquitous ruler (*al-bāghī*) is in their opinion a duty. This, according to the author of *al-'Alam al-shāmikh* (Sālih b. Mahdī, † 1108 A.H.), is their most distinctive tenet and that which separates them from the other schools.

'Otherwise,' he says, 'there is little that is distinctive about them; in the articles of religion they agree with the Mu'tazils, whereas with respect to the Branches (i.e. the religious and civil code) they differ; with some of them the system of Abu Hanifah prevails, whereas with others that of Shafī'i, though this is not a case of following, but of agreement; some however are not of this sort, but are like other independent enquirers (*mujtahidūn*); only fanaticism makes people anxious to differ from others. Thus the Expiatory Prostration (*sujūd al-sakw*) has become a kind of badge of the Zaidites; the followers of the four Sunni systems are abandoning it altogether, indeed we have never seen them practise it; the reason being the anxiety of the Zaidites about it, which is like their caution in other matters, e.g. the Minor Ablution. Damaghani [perhaps Muhammad b. 'Alī Dāmaghāni, † 478 A.H.] found fault with them for over-ablution, which he rightly said is contrary to the Sunnah.'²

Of their law-books the first part of one called *Muntazī al-Mukhtār* ('The Abstract of the Select'), based on the *Kitāb al-Azhār* of the imām al-Muhdī li-din Allah Ahmad b. Yahya (775-840 A.H.), was published at Cairo in 1328, but has up to the present date remained unfinished. It deals only with ceremonies, and differs in minute points from the law-books of the Sunni schools. Many other law-books of the Zaidis are contained in MSS. A *Corpus Juris* of Zaid b. 'Alī, edited by E. Griffini, Milan, has been issued.

4. *Divisions.*—The classical heresiologists, 'Abd al-Qāhīr³ and Shahrastani,⁴ divide the Zaidis into three sub-sects—the Jārūdiyyah, the Sulaimāniyyah or Jarīriyyah, and the Butriyyah, with whom the

latter of these writers couples the Ṣālihiyyah. The three names Jārūdiyyah, Sulaimāniyyah, and Butriyyah are given in the *Mawāqif* of 'Adud al-Din Ijī († A.D. 1355).¹ The second are called after one Sulaimān b. Jarīr; the third, according to this work, after Butair al-Thūmī, but, according to the *Firaq*, after Kuthayyir called Abtar and Ḥasan b. Salih b. Ḥayy. In the *Ghunya*² of 'Abd al-Qādir al-Jilāni, who is but slightly later, they are divided into six sub-sects—Jārūdiyyah, Sulaimāniyyah, Butriyyah, Nu'aimiyyah, Ya'qūbiyyah, and a sixth. In the Persian *Bayān al-achyān*,³ which is about a century earlier (A.D. 1092), the number of sub-sects is said to be five—Jārūdiyyah, Dhākiriyyah, Khashabiyyah (the followers of Sarhāt Ṭabari, who used wooden weapons at the time of their rising), and the Khalafiyah. The questions about which they differed were mostly concerned with the imāmate, or aspects of it—e.g., whether Muhammad had appointed 'Alī as his successor or not; whether he had also appointed his grandsons or not; it is asserted that the Jārūdiyyah (called after one Abu'l-Jārūd Ziyād) denied the death of Muḥammad b. 'Abdallah, a pretender of the time of the 'Abbāsīd Maṣṣūr, and looked forward to his return as Mahdī (though some of them looked forward to the return of some other pretender); further, that they call the first two khalifas 'unbelievers,' and in consequence are execrated by the rest of the Zaidis, who in turn execrate them. The only claim of this sub-sect to be called Zaidis would then lie in their recognizing the imāmate of the Zaid after whom the sect is named. The doctrine mentioned above is usually regarded as characteristic—e.g., by the Spanish traveller Ibn Jubair, who indeed does not expect his readers to have heard of the sect.⁴ A traveller of a century earlier (1035-1042), Nāṣir-i-Khusra, who found them in Yemamah, apparently expects his readers to know their name, but not to know that they were of the Shī'ah.⁵ It is probable that the names of the sub-sects were little known.

LITERATURE.—A few works emanating from Zaidi theologians are mentioned in the *Kitāb al-Fihrist*, ed. G. Flügel, Leipzig, 1871-72, i. 193. Their literature is, however, very copious, and there is a large MS collection of it lodged in the Ambrosiana of Milan, of which notices have been given by E. Griffini, in *Rivista degli Studi Orientali*, i-iii, Rome, 1908-10; many Zaidi MSS are also to be found in the Berlin Library. A treatise on rhetoric called *al-Firaq*, by the Zaidi khalifah Yahya b. Ḥanzah (729-749 A.H.), was published in Cairo in 1914.

D. S. MARGOLIOUTH.

ZANZIBAR AND THE SWAHILI PEOPLE.

PEOPLE.—The name Zanzibar, now applied only to the town of that name and the island in which it is situated (both called in Swahili *Unguja*), anciently designated the whole coast, from the Juba River to Sofala.⁶ Originally Zangibar (Zengibar, Zanguebar), from the Persian زنگی, 'negro' and بَر, 'region,' it was modified by Arab and Portuguese pronunciation into Zanzibar and Zanzibar. The town is said to have been founded by settlers from Shiraz, in the 8th or 9th cent.,⁷ but there is less definite information available as to its early history than in the case of Kilwa, Lamu, and Pate. Sacleux⁸ suggests that the Wahadimu (the early inhabitants, whose chief, of the *Mwinyi mkuu*, ruled the island up to the time of Sayyid Barghash) may have been a colony from Kilwa. The coast

is also known by its Arabic designation of ساحل (*sahil*, 'coast'—hence the term 'Swahili coast' is a pleonasm, like 'Lake Nyasa,' etc.), and its inhabitants as سواحلي, 'coast-people'—in African pronunciation 'Swahili.' (They are spoken of in their own vernacular as Waswahili, pl. of Mswahili; the language as Kiswahili.) They are called by the 'Nyika' tribes Adzomba (Wajomba), by the Pokomo Watsawaa or Wadzawaa, and by the Galla Hamara.

The name 'Swahili'¹ does not belong to any one indigenous African race: it connotes the descendants of Arab settlers by native women of various tribes, chiefly Bantu. There are also traces of Persian descent, and possibly their pedigree includes other ethnic elements.

1. Distribution of the Swahili.—The territory inhabited by the Swahili is the strip of coast defined in 1886 as the Sayyid of Zanzibar's dominions—viz. from Warsheikh on the Somali coast to Cape Delgado. This, however, does not include all, as distinct dialects of Swahili are recognized for Ibo and the Kirimba Islands, nearly two degrees south of Cape Delgado, and for the Angoshi Islands, half-way between Mozambique and the mouth of the Zambesi. The people themselves—at any rate those of the northern parts—limit the expression 'Swahilini' (=the Swahili country) to the coast north-east of the Tana mouth, though some extend it as far south as Malindi. This fits in with the assertion made by various writers that the dialects of Lamu and the adjacent coast are reckoned the purest,² or, as Krapf says,³ that 'the real home of the Swahili language is considered to be in the islands of Patta [Pate], Lamu, and in the country opposite to those islands.' Swahili, however, is spoken and understood far beyond the confines of its proper home: it has been carried half-way across the continent by traders and caravan porters and is current, in debased forms, both on the Congo and in Sindh.⁴

2. Physical characteristics.—There is probably no uniform Swahili type, and this is scarcely surprising when we consider, not only the composite origin of the people and the various sources whence their race has from time to time been recruited, but the fact that there are many persons calling themselves Swahili who have not the slightest claim to Arab descent. These may be the descendants of imported slaves, or they may be members of inland tribes who have adopted Islām and settled on the coast. Consequently shades of complexion (the darker and lighter being broadly distinguished by the people themselves as 'black' and 'red') and types of feature vary indefinitely; and we must remember that the compound factors are not merely the Oman Arab (with the possible, or indeed probable, Persian) and the Bantu native, but the tribes of Hamitic or 'Helot' stock, of whom the Wasanye and Dorobo are present-day representatives, and the various Galla, Abyssinian, Somali, and even Georgian or Circassian women who have at different times found their way into the harems of wealthy Arabs. Characteristics are apt to vary greatly, even within one and the same family; e.g., a member of the 'I Batawi (Arab) clan, living at Mombasa, has decidedly negroid features

¹ This is the commonly accepted spelling, though some French writers still cling to 'Souahéli'; and 'Suaheli' is the form current in Germany. Salt has 'Sowauli' and 'Sowaiel,' Owen, 'Sowhylese'; see Cust, *Modern Languages of Africa*, ii. 345.

⁴ Burton, *Sindh, and the Races that inhabit the Valley of the Indus*, p. 233.

and woolly hair, while his sister, as dark as himself in complexion, has fine, silky, and perfectly straight hair. As Baumann says:

'Gar leicht kann man schliesslich zur Ansicht gelangen, dass es überhaupt einen Swahili-Stamm nicht gebe, dass das Wort keine andere als die ursprüngliche arabische Bedeutung "Küstenbewohner" habe.'¹

Burton's description² is too sweeping, as regards both appearance and character, though he appears to have chiefly in view the island of Zanzibar—perhaps the least favourable ground for observation.

3. Origin.—It is uncertain at present whether there were any Arab or Persian settlements in pre-Islamic times; and the vexed question of the Zimbabwe mines cannot be discussed here; but it is worth noticing that the Karanga language of Rhodesia has some words in common with Swahili, which do not seem to occur in languages geographically intermediate.³ There was, however, commercial intercourse at a very early period. The first Arab settlement to which a definite date is assigned is that of Pate, in A.D. 689;⁴ the colonists are said to have been Syrians. Native tradition says they found Waboni and Waemezi hunters living in the island.⁵ They intermarried with these people, though their descendants have tried to suppress the fact. Vague traditions (which the present writer has never been able to verify) of pre-Islamic people worshipping a golden idol (a calf or bull?) at Kau may point to some early Persian or Hindu settlement of which no other record survives. Contact with the Bantu was probably, in the first instance, with the Pokomo, who, according to native tradition, were settled in the Tana valley long before the southward migration of the 'Nyika' peoples in the 16th century. The Pate colonists are said to have come from Syria; and some ascribe the same origin to Malindi, Zanzibar, Mombasa, Lamu, and Kilwa;⁶ though the Kilwa Chronicle states that the founder of this city came from Shiraz. The settlement of the 'Emozeids' (Ummu Zayd), somewhat later than that of Pate,⁷ seems to have introduced a considerable Persian element. Baumann says:

'Der Name Swahili ist bei den Angehörigen des Stammes selbst nicht sehr verbreitet; am liebsten hören sie sich *Schirazi* nennen und leiten ihre Abkunft von Shiraz her.'⁸

This probably applies to Tanga and neighbourhood: it is certainly not true of Mombasa or the coast north of it, where the present writer has never heard of the slightest objection to the name Swahili—not even on the part of some men at Jomvu who said their ancestors came from 'Shirazi.' In fact, the people of Jomvu are known to have emigrated thither, not more than three or four generations back, from Shirazi, near Vumba, which was originally a colony from the Persian Shiraz. Shaka, near Kipini (celebrated in connexion with Lioongo Fumo, and possibly the 'Jaca' of the Portuguese inscription on the Mombasa fort), was also a Persian colony.

4. History.—The sources are: native tradition, Portuguese records and historians, and Arabic documents, of which only two have been published, viz. the Chronicle of Mombasa, printed in Owen⁹ and also as an appendix to Guillaïn's first volume, and the *History of Kilwa*, edited by S. Arthur Strong.¹⁰ This seems not to be quite identical with the *Chronica dos Reys*

de Quiloa, of which the substance has been fortunately preserved by Barros.¹ Another Arabic MS, known as the *Book of the Kings of Pate*, after being preserved at Pate for some time, was carried to Witu when Ahmad Simba fled thither (about 1856) and was finally destroyed in the bombardment of 1890; no other copy is known to be in existence. Some Swahili MSS, written down in recent times at Lamu, preserve what has hitherto been handed down orally; one of these was published in the *Journal of the African Society*, 1913-14. Similarly, the second chapter of Stigand's *Land of Zinj* embodies the result of conversations with the oldest living authority, 'Bwana Kitini' (Muhammad bin Fumo Umari) of Lamu. The scattered notices of E. Africa in the works of Greek and Roman geographers and other ancient writers, as well as in those of the mediæval Arabs, have been well summarized by Guillin in his first volume. The Arab geographers have also been carefully studied from this point of view by Gabriel Ferrand.

Intercourse between Arabia and the east coast of Africa seems to have taken place from very early times. Indonesian influence is also probable, and by Stuhlmann² is made responsible for the introduction of the coco-nut palm and the outrigger canoe; he assigns a similar origin to the curious kitchen implement (*mbruzi*) used for scraping coco-nuts. One of the Lamu MSS above referred to says that seedlings of coco-palms (*mite ya unazi*) were brought by certain Arabs from 'Kalhindi'—but there is no clue as to what is meant by this name. Ferrand³ places the Indonesian colonization of Madagascar (which has notable Malayo-Polynesian affinities) not earlier than the Christian era; but it by no means follows that this was the earliest contact.

Pate was founded (A.H. 69, A.D. 689) by colonists of the il-Batawi tribe (or clan?)—hence, say some, the name (Ar. Bata or Batta). The royal house of these Batawi continued in power till A.D. 1204 (A.H. 600), when a fugitive from Maskat, Suliman b. Suliman of the house of Nabhan, landed there, was hospitably received, and ultimately married the daughter of the last Batawi chief. The Nabhans remained sultans of Pate till 1866.

About 740 the followers of Zaid, great-grandson of the 4th khālif, 'Alī, escaping from the persecution of the Umayyads, fled to E. Africa and became the ancestors of the people now called Wagunya (or Watikuu) who inhabit the mainland north of Lamu, speak a peculiar dialect of Swahili, and are regarded as in some respects a distinct people by their southern congeners. They are known in history as 'Emozeids' (Ummu Zaid). Makdishu and Barawa are said to have been founded about A.D. 909 and Kilwa in A.D. 975; but the Kilwa Chronicle quoted by De Barros and that published by Strong show some discrepancy with regard to these two migrations. Both agree in saying that Kilwa was founded by 'Alī ibn Hasan of Shiraz. One of his brothers is said by the latter authority to be the founder of Mombasa; but elsewhere⁴ its origin is ascribed to Muhammad, son of 'Alī ibn Hasan. Zanzibar does not figure conspicuously in the early records; it was long tributary to Mombasa, though by some said to be equally ancient. The various small city-states were originally independent of one another, and, though one might, for a time, establish a sort of precarious hegemony—as was the case, in turn, with Kilwa, Mombasa, and Pate—no empire or permanent confederacy was ever established. Lamu differed from the rest in being ruled, not by a sultan, but by a council of elders (*wazee*).

The Portuguese arrived at Malindi in 1498 on their way to India, and established friendly relations with its ruler, who asked for help against his rival, the shāikh of Mombasa. Mombasa was burnt by Nuno da Cunha in 1529 (it had been previously in 1505 sacked and burnt by Almeida, who took Kilwa in the same year). By 1530 the whole coast, from Barawa to Cape Corrientes, was under Portuguese dominion, and this continued intermittently (one town or another being usually in a more or less successful state of revolt) until 1652. In that year an Arab fleet arrived from Oman, the Swahili towns having some time previously entreated the help of the *imām* in order to drive out the Portuguese, and the war thus begun culminated in the fall of Mombasa, 12th Dec. 1698, which was followed by the occupation of Kilwa, Zanzibar, and Pemba. Thenceforward, except for the short time during which they held Mombasa and Pate, retaken in 1728, the Portuguese were restricted to their present possessions, south of the Rovuma. It is curious that Pate, where their rule was far less continuous than at Mombasa, seems to keep the most vivid traditional memories of them. 'Violent for 'proud' as a Portuguese' is still a proverbial saying; and the townsmen of Pate point out, in the bed of the tidal creek, the remains of the causeway by which, as they affirm, the invaders dragged their cannon up from the anchorage at Shindakazi. It is im-

possible to assign a date for the destruction of the towns whose ruined sites occur almost every few miles between the Juba and Mombasa. Some may be accounted for by the invasion of the Zimbas, a warring people not yet certainly identified, in 1586-89.¹ Later came the Galla raids which (probably during the 18th cent.) reduced Malindi from a flourishing city to the heap of ruins found by Kraft in 1846.²

From 1729 onward the coast was supposed to be under the suzerainty of Maskat, and the *imām* placed governors in Mombasa and Zanzibar, but apparently not at Pate, which was frequently at war with both Lamu and Mombasa. The reigning family of Maskat, in the early part of the 18th cent., was that of Ya'arubi, and the first Liwali who administered Mombasa under him was Muhammad b. Said 'I Maamiri;³ but in 1739 the appointment was given to Muhammad ibn 'Athman of the Mazrui clan, afterwards so famous. Shortly after this, in 1741, the imamate was transferred from the Ya'arubi to the house of 'I Bu Said (Albunseyidi), from which the present sultan of Zanzibar is descended. One result of this change was the virtual independence of Mombasa under the Mazrui, which lasted till 1837. The Mazrui attempted, in 1823-24, to place themselves under British protection;⁴ but their request was refused, owing to the representations of the Indian Government, who considered it important to keep on good terms with Maskat; and Mombasa was ultimately reconquered by Sayyid Said, who had, in 1832, removed from Maskat to Zanzibar and thenceforth made the latter his principal residence. Details of events subsequent to that date will be found in some of the works already referred to; also in those of Charles Eliot, Lyne, Craster, and the Blue Books.

5. Religion.—The Swahili are, almost without exception, Muslims and of the Shāfi'i sect.⁵ The Sayyid's family and most of the Oman Arabs are Ibadis.⁶ The people in general, especially the women—so far as the present writer came in contact with them—seem better instructed than some writers admit.

E.g., Burton says: 'The Wasawahili calling themselves Moslems know little beyond the Kalma, rarely pray, and fast only by compulsion';⁷ and Baumann: 'besonders jüngere Leute stehen dem ganzen Islam auffallend gleichgültig gegenüber und können oft nicht einmal die Fatha hersagen. Noch mehr ist diese Indifferenz bei Weibern zu beobachten.'⁸

This did not seem to be the case at Jomvu, Mambrui, or Lamu, where there is comparatively little contact with Europeans. It is quite true, however, that there is a marked absence of fanaticism. Strangers are admitted, even invited, into their mosques. Women do not as a rule go to the mosques, though 'some of them are as well or better read in the Koran than the men.'⁹ Each town—even small ones of a few hundred inhabitants—has one or more schools, where boys are taught to read (and sometimes to write) the Arabic character, and learn the Qur'an by heart. More advanced instruction is occasionally given by *mullims*, who hold evening classes at the mosque and explain the sacred text in the vernacular. The writer heard of schools for girls, both at Lamu and at Mambrui, though none were actually in existence at the time of her visit, and well-to-do parents, at least, engaged visiting teachers for their daughters.

¹ Among the pure Swahilis many of the women are well educated in reading and writing, while in the Lamu Archipelago they are often better than the men in versifying.¹⁰

A feature which has hardly attracted the attention it deserves is the wide diffusion of a considerable body of religious poetry in the vernacular. MS copies are handed down in families, and many men and women who cannot read know long passages by heart. Among the most popular are: a poem of 264 stanzas, relating the death of the Prophet, another on the history of Job, the *Utenzi wa Shufaka* published by Büttner, and *Qissat Sayyidina Isa*, which relates the life of Christ according to Muslim tradition and the Apocryphal

⁵ Barros says the assault began on 17th Nov. 1528—no date is given for the actual taking, and the operations do not seem to have occupied more than a few days. Da Cunha stayed till the end of the monsoon allowed him to sail for India, which he did (from Malindi) 3rd April 1529—having previously burnt Mombasa—evidently towards the end of March (see J. Barros and D. de Couto, *Da Asia*, dec. iv. pt. i. bk. iii. vol. 7, chs. v.-viii. [pp. 276-305]).

Gospels. A didactic and devotional poem known as the *Utendi wa Mwana Kuponu*, composed by a Lamu woman, some 60 or 70 years ago, was published in 1917, in the *Harvard African Studies*.

As in other cases where the Muslim religion has been superimposed upon a system of primitive beliefs, it has absorbed all sorts of extraneous elements. The Bantu cult of the ancestral ghost has passed into something like saint-worship at the graves of noted shaikhs—e.g., the shrine known as Pa Shehe Jundani at Mombasa. The diviner, instead of casting lots by means of the 'bones' or analogous objects (a practice still in vogue among the Giriyama, etc.), uses the sand-board (*kupiga ramli*) or writes texts from the Qur'an and the names of the four angels (Gabriel, Michael, Azrael, Israfil), on paper or parchment, to be used as charms.

¹ Descended from "devil-worshippers"—a designation based on a misapprehension—the Waswahili rather fear the "Shaytani" than love Allah, and to the malignant powers of preternatural beings they attribute sickness and all the evils of human life.¹

The word *shaitan* has been borrowed from the Arabs and is applied to the spirits haunting rocks, trees (more especially baobabs), etc., for which the genuine Swahili word is *vazimu* or *vazuka*. These are originally, in all probability, ghosts of the dead, but imported notions, such as that of the Arab *jinn*, have introduced some confusion. In Krapf's time every boatman who passed 'Makame's Rock' (on the landward side of Mombasa Island, almost opposite Frere Town) threw a lime into the sea; the custom is still remembered, but reduced to a mere symbolic act, like the throwing of a pin into a holy well in this country. Probably offerings were once made to propitiate the ghost of a man drowned there, but the story told to Krapf was that Makame was a fisherman who had been turned into a rock because he followed his occupation on a holy day.² Similarly, there are lonely spots in the bush, known as *kwa kibibi* ('the place of the little lady')—probably forgotten graves—where passing travellers are wont to lay down a stick, stone, leaf, or other trifle. Spirits haunting trees may at any time seize and possess passers-by; they are then known as *pepo*, and there are recognized and usually very elaborate formulas for exorcizing them. In fact, there is a whole hagiology of these *pepo*, and each one has his special *ngoma*, or 'dance'.³

6. Customs.—As may be inferred from what has already been said with regard to religion, we meet here with an interesting blend of imported and indigenous ideas. The reckoning of kinship in the male line cannot be counted as one of the former, as the transition from mother-right to father-right has already taken place in many Bantu tribes. But the prohibited degrees enumerated by Velten⁴ are those recognized by Muslim law, and the clan system, still in full vigour among Giriyama, Pokomo, Digo, etc., who may not marry inside their clan, has fallen into oblivion. (The so-called twelve 'clans' [*kabila*] of Mombasa, seem to be local associations, i.e. the Wapate, Wapaza, etc., are immigrants from the places denoted by their names.) The tabus (*miko*) observed in families⁵ would probably give a clue to former clan-relationships. All persons who have any claim to Arab descent keep the records of their genealogy with the greatest care, adding the clan name to their own—e.g., 'Ali ibn Muhammad ibn

'Umar 'l Batawi, or 'l Mandhiri, or 'l Auzii, etc., as the case may be. The Muslim rite of circumcision has been blended with the Bantu initiation-ceremonies (*kumbi*, *manyago*) and consequently takes place earlier than it would, as a rule, among the Bantu.¹ Girls are not operated on by the Swahili, though they are by some of the Arabs. Much valuable information, derived from native sources, is given by Velten; but it is by no means exhaustive and applies chiefly to the Mrima, the coast-land opposite Zanzibar. A native authority² says that, in all essentials, Swahili customs are the same from Lamu to Lindi—but this possibly needs some little qualification.

7. Language and literature.—Swahili is not, as some have thought, a mere composite jargon, comparable to 'Pidgin-English' or 'Kitchen Kafir'; but it is not the language of any indigenous African tribe—i.e., it did not exist before the Arab colonization. The Bantu groundwork may, as Krapf thought,³ have been Pokomo; certainly it seems to have taken shape in the Lamu archipelago and adjacent mainland, including the Tana delta. But other tribes may have exercised a modifying influence, especially in the southern dialects, where intervocalic *l*, elsewhere consistently dropped out, has a tendency to reappear (*fungula* for *fungua*, etc.). Arabic has contributed largely to the vocabulary (about to the same extent as Latin in English), but has not influenced the grammar to any appreciable degree. A few Persian and a few Portuguese words have been incorporated with the language—in the latter case, not nearly so many as might have been expected. It has been written (probably for some centuries, but at present it is difficult to procure evidence on this point) by means of the Arabic character, which, however, is by no means well adapted for the purpose; and even with the help of additional symbols such as are used in Persian—e.g., for *p* and *v*—a Swahili MS may be very difficult to read, even for a native. It is obvious that the vowel points are indispensable; they are only omitted in Arabic words which are easily recognized, such as the conventional phrases at the beginning of a letter. The oldest MSS examined by European scholars may go back to the 18th or possibly the late 17th century; perhaps some still older ones may exist in the archives of the mosques. The poems (there are no ancient Swahili prose-writings)—if not the actual copies—may be of considerable antiquity, but we have no certain data on this point. W. E. Taylor thinks that the *Inkishafi* (a religious poem edited by him and published as the appendix to Stigand's *Dialect in Swahili*) may have been written before Vasco de Gama's arrival in Africa (1498), and, if the poems assigned to Liongo Fumo are genuine, they must go back at least to the 16th, and possibly to the 12th cent., or earlier. Very few of these poems have found their way into print. Büttner, in his *Anthologie*, published three long poems, all of a religious character, and a charming selection of recent lyrics and folk-songs and a large body of minor verse has been collected by Velten, while the *Chuo cha Herkal* ('Book of the Emperor Heraclius'), of which a MS was brought to Europe by Krapf, was published by Meinhof in the *Zeitschrift für Kolonialsprachen* for 1912-13. With the exception of the *Utendi wa Mwana Kuponu* mentioned above, and the gnomic stanzas attributed to Liongo, in Steere's *Swahili Tales* (there is a MS of this poem in the British Museum), this is all that has been done so far in this direction. Swahili has eminent possibilities as a literary language, and some attempts recently made—notably the traditions of the Wakilindi (Usambara), written down by the late Abdallah ibn Hemedi Liajemi—promise well for the development of prose writing.

LITERATURE.—Salil ibn Ruzaik, *Hist. of the Imams and Seyyids of Oman*, tr. G. P. Badger [Hakluyt Soc., 44], London, 1871; Oscar Baumann, *Usambara und seine Nachbargebiete*, Berlin, 1891; M. W. H. Beech, *Aids to the Study of Ki Swahili*, London, 1918; *Blue Books: Africa*, no. 7 (1897): Report by Sir A. Harding on the Condition and Progress of the E. Africa Protectorate from its Establishment to the 20th July 1897 [C. 8633]; *Africa*, no. 3 (1899): Report . . . for the Year 1897-98 [C. 9125]; R. F. ZEALOTECS.—See MEXICANS.

ZARATHUSHTRA.—See ZOROASTRIANISM.

ZEALOTS.—1. Name.—The term 'Zealots' (i.e. 'the zealous') is derived from *ζηλωτής*, the Greek equivalent of the Hebrew *קנן*, *Qanna'*, pl. *Qanna'im* and the Aramaic *Qanna'i*, pl. *Qanna'im*.¹ The terms both in Hebrew and in Greek have a general and a specific usage. The former is naturally of most frequent occurrence in Scripture and Jewish literature.² The latter usage as a designation of the fanatic Jewish nationalists and opponents of Roman domination is rare. *Qanna'im* is not found in the Targum Onkelos.³

The adjectives *קנן*, *קנן*, *קנן*, and *קנן* are found in the Talmud and Midrashim, but the plural in a technical or quasi-technical sense occurs only twice: *Sanh.* ix. 11, 'Whoever steals a libation-cup, or curses one by the Holy Name, or has intercourse with a Syrian woman shall be struck down by the *Qanna'im*' (*קנן*, Zealots, apparently in a religious sense only); and *Abóth de R. Nathan*, vi.: 'And when the eueporer Vespasian came to destroy Jerusalem the *Qanna'im*⁴ attempted to burn everything with fire'—the only Talmudic passage mentioning the political Zealots.

How early the title *Qanna'im* was applied to the extreme anti-Roman political party is uncertain. According to Josephus,⁵ it was a self-designation. If this is so, it is impossible to determine whether 'Zealots' was a self-designation from the beginning of the movement under Judas the Galilaean and became generally known and recognized as their title under Gessius Florus because of their remarkable activity and increase then, or, on the other hand, whether these 'fanatics of Roman hate' had no definite appellation for the first sixty years (A.D. 6-66) of their history until the time of Florus, under whom Josephus first employs the term.⁶

The epithet 'the Cananean' in Mk 3¹⁸, Mt 10⁴ (for which 'the Zealot' is given in Lk 6¹⁵, Ac 1¹³), has been variously interpreted. The AV reads *Καναανίτης*, 'the Canaanite' (which is given in Mk by A and other second-rate uncials and later versions, and in Mt by κ and later authorities), but that would

require *Καναανίτης* = *קנן*. Jerome interpreted it as *de vico Chana Galilee*, and Holtzmann¹ as *קנן* = 'a man from (an unknown) Kanan,' both of which interpretations would require the Greek *Καναίος*. Dalman² considers *Καναανίτης* an error for *Καναίος* by assimilation to the more familiar 'Canaanite.' These explanations are superfluous. *Καναανίτης* is simply the Greek transliteration of *קנן*, i.e. *קנן*, with the post-positive article κ—and so = 'the *Qanna'* (Zealot), just as in Aramaic *כנען* = 'the king.' Luke has therefore rightly and literally translated it *ὁ ζηλωτής*.³ Whether Simon was an adherent of the Zealot party before he joined the company of Jesus, or the term was won subsequently through zeal in Jesus' service (as the brother of Andrew won the surname Peter, and the Zebedaeides that of Boanerges) may not be quite certain, but the probabilities point to the former view.

2. Origin.—As the oppression and Hellenizing policy of the Seleucids caused the Maccabean revolt and the rise of the Hasidim, the policy of Rome, especially from A.D. 6, caused the rise of the Zealots. The genealogical descent of the Zealots may be traced from the Hasidim through the Perushim (Pharisees), who appeared in opposition to the Hellenizing sympathies of the aristocratic Sadducees about the time of John Hyrcanus (135-105 B.C.). The Zealots thus combined the policy of the Hasidim (against foreign domination) with that of the original Pharisees (against liberalism towards foreign thought and manners and laxity towards the Law).

Although the Zealot movement dates from A.D. 6, there had been for years previous a growing discontent against both Idumean and Roman rule. The statement of Rabbi Kohler that 'the reign of the Idumean Herod gave the impetus to the organization of the Zealots as a political party' seems to go beyond our evidence. But the Zealots had forerunners in the 'robber' bands of Herod's reign. Ezekias 'the arch-robber' (*ὁ ἀρχιλοστής*) at the head of a strong 'robber' force caused great trouble to Herod, by whom he was finally captured and executed.⁴ His son Judas, after the death of Herod, made an insurrection in Sepphoris in 4 B.C.⁵ Even conspirators with concealed daggers banded together against Herod,⁶ the forerunners of the later Sicarii.

The Jews had come into contact with Rome in the days of the Maccabees. If Pompey captured Jerusalem in 63 B.C., and abolished the Hasmonæan kingship, he left the Jews in the enjoyment of a considerable independence and respected their nationhood. In A.D. 6 Archelaus, who for ten years as ethnarch had ruled Judæa, Idumæa, and Samaria, was accused before Augustus by a joint commission of Jews and Samaritans of intolerable cruelties, for which the emperor recalled and banished him. Judæa was then loosely annexed to the Roman province of Syria, to be administered under a procurator.⁷ From this date the Jews began to discover—what they learned better on the extinction of the Herodian dynasty in A.D. 44—that the sly half-Jewish Herods understood and respected their peculiarities and religious customs better than did the Romans. The Jews found the Roman administrators to be other than they had imagined. There was to be no return to the 'honours and alliances of the Romans and their emperors with our nation'⁸ of Maccabæan days, nor to the *δύγματα* of the great Julius in the years 47 B.C. and following, which bestowed upon the Jews all the privileges of Roman protection together with religious toleration and political home rule. These Julian decrees were regarded later by the Jews as their Magna Charta, and by them all subsequent Roman administration was appraised.

² *Grammatik der jüd.-palästin. Aramaisch*, Leipzig, 1894, p. 174.

³ Wellhausen and Schürer also interpret *Καναανίτης* as 'the Zealot,' but arrive at their interpretation in a way different from each other and from the above. Wellhausen (*Das Evang. Marci*, Berlin, 1903, p. 25) evidently regards the Greek as the equivalent of *קנן*; while Schürer (*GGV* 4 i. 437 f.) prefers to regard it as a Greek formation from *קנן*, plur. of *קנן*.

⁵ *BJ* iv. iii. 9: *ζηλωταίς τούτο γάρ αὐτοῦς ἐκάλεσαν.*

⁶ See § 4 below.

Roman interference had never been palatable to the masses of the people, and it was among the lower classes that the hatred of Rome now became intensified, though, as often in popular upheavals, many of the leaders were supplied from the aristocratic classes. The conflict began with the resentment caused by the census of Quirinius (A.D. 6-7) to which Judæa as a procuratorial province was subjected. The Jews at first resented the taxation, but were persuaded to submit by the high-priest Joazar. The Zealot movement began as a protest against this census when Coponius was procurator of Judæa.¹ The outbreak did not occur in Judæa, but in Galilee, which was not directly affected by the census. The insurrection was headed by Judas,² a Gaulonite of the city of Gamala (better known as 'the Galilæan'), who allied himself with a prominent Pharisee, named Sadduk, probably a member of the more nationalistic school of Shammai. Though Josephus speaks of Judas and Sadduk as joint authors of the Zealot movement,³ he more frequently represents Judas as the prime mover.⁴ Judas the Galilæan became leader of the fourth of these sects.⁵ The motives of the party were partly political and partly religious, but the political and the religious were always conjoined in Jewish history. In the closing scenes the political and secular far overshadowed the religious. The Roman taxation meant 'nothing else than downright slavery';⁶ it was a breach against the theocracy.⁷ The census was a sign to the people that the Romans designed to destroy the last trace of their liberties: it was a gross insult both to them and to Jahweh. The object of the Zealots was to preserve intact Jewish nationalism and cult-traditions, and, by force if necessary, to throw off the Roman yoke and restore the theocracy. Thus they would hasten the Kingdom of God. The Zealot party was a 'combination of noble and base elements; superstitious enthusiasts, and political assassins, the so-called sicarii, were conjoined with honest but fanatical patriots.'⁸

3. **Subsequent history.**—The history of Zealotism extends from A.D. 6-7 to the fall of Jerusalem, Sept. A.D. 70, or to the capture of Masada, April 73. The slighting reference of the Pharisee, Gamaliel, in Ac 5³⁷, might give the impression that the insurrection of Judas did not assume grave proportions, being suppressed immediately by the Roman authorities by the death of the leader and the scattering of his followers. Josephus does not chronicle either the fate of Judas or the history of the revolt, but affirms that it was the beginning of the end for the Jews.

'The daring plot made great headway. There is no evil that did not spring from these men [Judas and Sadduk], and the nation was filled with it to an incredible extent . . . whence seditions were engendered and as a result political bloodshed . . . and famine reducing us to extreme shamelessness, and the capture and sacking of cities, until finally this insurrection consumed the temple of God in the fire of the enemy.'⁹

Another proof of the importance of Judas's rebellion is the fact that his sons and descendants inherited his fanatical hate of Rome and became outstanding exponents of Zealotism until it was extinguished at Masada. Two sons of Judas, Jacob and Simon, were crucified by Tiberius Alexander.¹⁰ Another son, Menahem, was a protagonist in the rising of A.D. 66.¹¹ A descendant,

named Eleazar, was commander of the garrison of Masada and perished there, probably by his own hand.¹ The Roman question became the test question in political life and led to a fatal split in the Jewish nation. This internal division affected to a greater extent the Pharisaic party which had first resented the direct interference of Rome in the affairs of Palestine. The majority of Pharisees, however, were pacifists and fatalists; only a minority became extremists anxious to appeal to the arbitrament of the sword, and, under Sadduk, seceded to the Zealots.

After the first challenge of the Zealots to Rome was crushed, the Roman government seriously attempted to understand their Jewish subjects and in many ways humoured them. For a time the Zealot movement lost in numbers and influence, for lack of matters of complaint. Quirinius deposed the unpopular high-priest Joazar, who counselled compliance with the census.² The Jews were excused from Roman military levies: the auxiliary troops under the procurator were recruited from among the non-Jewish populations of Palestine.³ The first four procurators were friendly disposed towards the Jews. Roman authority, most tolerant of Jewish customs and religious beliefs, placed the Jewish cult on the status of a *religio licita*. The cult of the Cæsars, elsewhere established and even welcomed in the empire, was not forced upon the Jews except during the mad attempt of Caligula which led to fearful massacres in Alexandria and caused much heart-searching in Judæa. On this occasion the holy city was spared desecration, through the tactful and generous management of P. Petronius, the legate of Syria, who pleaded the cause of the Jews at the risk of his own life, for Caligula, offended at Petronius's hesitation, ordered him to commit suicide—a command which fortunately did not arrive until after the assassination of Caligula. King Agrippa I., a special favourite with Caligula, likewise used all his influence to secure the withdrawal of the offensive decree.⁴ The Romans, out of regard for Jewish scruples concerning the imperial image on coins, granted Judæa a copper coinage which bore only the name of the emperor and inoffensive symbols. When from time to time Roman troops marched into Jerusalem, they did so without the usual military banners which bore the image of the emperor—a considerable condescension on the part of the conquerors.⁵ Unfortunately, between Jewish demands and scrupulosity on the one side and Roman arrogance and ignorance of their subjects on the other, even this *modus vivendi* was not destined to succeed or to reconcile Palestine to accept the Roman yoke. Moreover, Roman practice did not always harmonize with Roman theory. The result was an ever-widening cleft between the pro-Roman and the anti-Roman parties in the nation, with increasing bitterness and recklessness among the latter. The pro-Roman or pacifist party was represented by the Sadducees and the Herodian rulers and the aristocracy generally, together with the more prudent of the Pharisees; the anti-Roman party was composed chiefly of the Zealots and the populace. The Pharisees, at first decidedly anti-Roman, after A.D. 66 generally sided with the Sadduceean aristocracy and the party of law and order against the extremists.

Under the first four procurators (Caponius, A.D. 6-9; Marcus Ambibulus, A.D. 9-12; Annius Rufus, A.D. 12-15; Valerius Gratus, A.D. 15-26) Judæa seems on the whole to have been equitably

administered, and there was little deflection to further the Zealot party. But the fifth procurator (Pontius Pilatus, A.D. 26-36) was a man of a different mind. He was, according to a letter of Agrippa I. to Caligula,¹ 'naturally inflexible and stubbornly relentless,' and guilty of 'acts of corruption, insults, rapine, outrages on the people, arrogance, repeated murders of innocent victims, and constant and most galling savagery'—a description quite in keeping with the impression given of him in the Gospels.² He defied Jewish religious prejudices by introducing a Roman garrison with the imperial ensigns into the city by night—an act which met with such opposition that Pilate was obliged to yield.³ Another offence was his confiscation of part of the Temple treasury (the Corban) to build an aqueduct for Jerusalem. To the Jewish protests against this sacrilege Pilate replied by commanding the soldiery to punish the mob, which they did so thoroughly that many lives were lost.⁴ Again, he set up gilt shields without the imperial image, but bearing his own and the emperor's name, in the palace of Herod within the city, 'not so much for the honour of Tiberius as to annoy the people.' He was ordered by the emperor to transfer them to the Augusteum at Caesarea.⁵ His last act of carnage was committed against the Samaritans, who laid their complaint before Vitellius, legate of Syria, by whom Pilate was sent to Rome to answer for his conduct, and Marcellus was appointed in his place.⁶ All Vitellius's conciliatory acts could not undo the anti-Roman feelings engendered by the late procurator. It was under this Pilate, when the spirit of the dead Judas of Galilee again inspired the people with a desire for liberty, that Jesus taught and suffered. One of His disciples was probably a Zealot. In Galilee especially Jesus came in contact with Zealot propaganda which, in its advocacy of violence, ran counter to His preaching concerning the Kingdom of God, and against which He raised His protests.⁷ Our Lord's death is also, possibly, linked with the history of Zealotism. It was the plots and violence of the Zealots which aggravated Pilate's apprehensions upon which the Jewish authorities played. At Jesus' trial before Pilate the multitude was granted the option between 'Jesus Barabbas' (Mt 27^{16f.}) and 'Jesus called Christ.' This Barabbas was a 'robber' (Jn 18⁴⁰) who had been 'imprisoned with the insurrectionists who in the insurrection had been guilty of murder' (Mk 15⁷). The word found in the Fourth Gospel (18⁴⁰), *λησστής*, is the word most frequently used by our chief historian of Zealotism (Josephus) as synonymous with Zealot; and Mark's account indicates that Barabbas was no ordinary highwayman, but one who had headed one of the numerous revolts (*στάσεις*) against Roman authority. Barabbas was, therefore, probably a Zealot leader.

The objection urged against this interpretation is that as a Zealot leader Barabbas would be in favour with the masses and likely to be preferred by the people, whereas Pilate hoped, by permitting the choice, that the multitude would ask for the

¹ Philo, *ad Galium*, xxxviii. (Mangey, ii. 590).

² Cf. Lk 13: 'the Galileans, whose blood Pilate mingled with their sacrifices.' It is quite possible that these Galileans were Zealots whose opposition would be aroused by the cruel régime of Pilate. In the list of heresies in Justin Martyr, *Dial.* 80, and in Hegesippus (Eusebius, *HE* iv. 6) the Zealots are called Galileans. The Zealot followers of John of Gischala are referred to as Galileans in *BJ* iv. ix. 10.

³ *Ant.* xviii. iii. 1.

⁴ *Ib.* xviii. iii. 2, *BJ* ii. ix. 4.

⁵ Philo, *ad Galium*, xxxviii. (Mangey, ii. 590).

⁶ *Ant.* xviii. iv.

⁷ Cf. J. Weiss, *Die Predigt Jesu vom Reiche Gottes*, Göttingen, 1898, p. 24; and A. M. Hughes, 'Anti-Zealotism in the Gospels,' *ExpT* xxvii. [1915-16] 152. The words in Mt 11¹² (from the Logia)—*ἡ βασιλεία τῶν οὐρανῶν βιάσεται καὶ βίασται ἀπάξουσιν αὐτήν*—may quite well be aimed against the Zealots. So Bousset, *Die Reliq. des Judentums*², p. 101; K. Kohler, art. 'Zealots,' in *JE*.

release of Jesus. But (1) the accounts are somewhat confused. According to the Fourth Gospel and Matthew, Pilate proposed the choice as a possible means of acquitting Jesus, while, according to the oldest account (Mark), the people reminded Pilate of his customary clemency at the feast. (2) The alternative was not between a popular Zealot and an unpopular Messiah. Both Barabbas and Jesus were popular. Pilate knew that Jesus was in such favour with the people as to be called 'King of the Jews' (cf. Jn 6¹⁵), but that by the authorities He was regarded with jealousy. Of these two popular prisoners Pilate was convinced that Jesus would be preferred by the multitude, which, however, partly under the influence of the high-priest, demanded Barabbas. It was not the first time that a procurator misunderstood Jewish feelings, nor the first occasion on which a ruler was misled by the psychology of the mob.

Little is known of the next two procurators—Marcellus (A.D. 36-37) and Marullus (A.D. 37-41).¹ Such was the Jewish national consciousness that the news of the bloody persecutions to which their brethren in Alexandria were subjected towards the close of A.D. 38 (and which continued fitfully until the close of Caligula's reign because of their opposition to the erection of the imperial image in the synagogues) would intensify the fanatical hate against Rome. The same demand for the recognition of the imperial cult was made upon Judaea the next year as a punishment for the act of the Jews of Jamnia in overthrowing an altar erected to Caligula.² After much hesitation the emperor yielded to the entreaties of the Syrian legate, Petronius, and Agrippa I. and withdrew the edict. The act of Claudius immediately on his accession, whereby he restored to Agrippa I. (the Herod of Ac 12) the dominions of his grandfather, Herod the Great, by adding Judaea and Samaria to his kingdom, was intended to placate Jewish nationalism. This arrangement continued in force till A.D. 44, when, on the death of Agrippa I., Rome passed over his twelve-year-old son and incorporated all Palestine with Syria under a procurator.³ This disappearance of the semi-Jewish Herodian dynasty, which had stood as a buffer between Rome and the Jews, formed a crisis in Jewish history and caused a renewed outbreak of Zealotism. The social peace and material prosperity of the few years under Agrippa I., together with bitter memories of Roman procurators, made a return under direct Roman administration repugnant to the masses. Fuel was added to the fires of fanaticism. From this important date till A.D. 66 seven procurators administered Palestine.

If the history of the Roman procurators, to whom Palestine was now entrusted, is reviewed, one might imagine that all, as if by some secret compact, systematically aimed at driving the people into revolt. Even the best of them—not to mention the others who trod all right under foot—had no idea that a people like the Jews desired above everything else tolerance toward their distinctive customs. Instead of practising mildness and caution, they opposed all the vital agitations (*Lebensregungen*) of the people with a pitiless severity.⁴

The régime of the first two procurators after A.D. 44 (Fadus from 44, and Tiberius Alexander, nephew of Philo, till 48) was mild compared with that of the subsequent five: 'by making no innovations in our ancestral customs they kept the nation quiet.'⁵ The misdeeds of Fadus recorded by Josephus are (1) his demand that the high-priest's vestment should be restored to Roman custody, which Claudius rescinded,⁶ and (2) his suppression of the 'magician' or prophet Theudas, an idol of the people.⁷ That Zealotism broke out with fresh vigour under Fadus's administration we may infer from the words of Josephus about the death of Tholomaïos 'the arch-brigand'⁸ and the clearance of all Judaea of 'robberies.'⁹ We are

not informed whether the motive of Fadus was an insight into the nationalist danger or merely to keep order. The fact that the next procurator, Tiberius Alexander, deemed it necessary to crucify the Zealot leaders, Jacob and Simon, sons of Judas, shows that there was an alarming recrudescence of Zealot agitation such as to require summary treatment.¹ Under Ventidius Cumanus (A.D. 48-52) the people were in a constant state of insurrection.² Their resentment was embittered by (1) an indecent act of a Roman soldier at the Passover leading to a tumult, in which 30,000³ Jews perished; (2) an order of Cumanus that whole villages be plundered in retaliation for the robbery of an imperial official by 'robbers' (probably Zealots): in the execution of this command a Roman soldier tore a copy of the Law to shreds with obscene language, upon which the people became so threatening that Cumanus beheaded the guilty soldier to placate them.⁴ (3) As a result of the refusal of Cumanus to do justice to the Jews in a quarrel with the Samaritans, the people, against the advice of their elders, called in the help of the Zealot leader, 'Eleazar, son of Dinaeus, a robber,' and Alexander, doubtless also a Zealot chief. Cumanus fell upon them and slew many. An appeal was carried to Unmidius Quadratus, legate of Syria, who referred the matter to Rome. Claudius, well-disposed through the offices of Agrippa II., condemned the Samaritans and banished Cumanus.⁵ The administration of Felix (A.D. 52-60) formed 'the turning-point in the drama which commenced in 44 and reached its bloody issue in 70.'⁶ 'The affairs of Judæa continued to grow steadily worse.'⁷ Felix intensified the revolutionary spirit by (1) his offensive marriage with Drusilla; (2) his treacherous capture of the Zealot leader, Eleazar; (3) the murder of the high-priest, Jonathan, which he perpetrated by means of the Sicarii; (4) the slaughter of 400 followers of the Egyptian prophet who led 30,000 men⁸ into the wilderness; (5) unfair treatment of the Jews of Cæsarea in their quarrel with their Syrian townsmen.⁹ He endeavoured to exterminate the 'robbers' (Zealots), who, nevertheless, became increasingly numerous and influential among the masses. His conduct rendered the nationalist party eager to bring the matter to the issue of arms. The sympathies of the people, now driven to desperation, were alienated from the pacifist leaders to the side of the Zealot party. Further, alongside, or within, the Zealot movement appeared a more extreme faction known as Sicarii, or 'dagger-men,'¹⁰ who from then till the end of the siege struck down indifferently pro-Roman and Roman. Under Porcius Festus (A.D. 60-62) the cancellation of the Jewish *isopoliteia* in Cæsarea roused bitter resentment. The imperial letter relative thereto 'furnished the causes of all the subsequent evils to our nation.' Another popular movement led by an 'impostor' (probably a would-be Messiah or a Zealot) was suppressed by Festus. The opposition of Agrippa II. and Festus to the erection by the Jews of the wall to prevent the Temple sacrifices from being overlooked from Agrippa's palace was another instance of blind neglect of Jewish sentiment.¹¹ Though Festus did not stain his office by the cruelties of his predecessor, the national party grew apace. The Sicarii who appeared under Felix became numerous. Festus

attempted to exterminate the Zealots; 'he captured the majority of the "robbers" and destroyed many.'¹ The last two procurators, Albinus (A.D. 62-64) and Gessius Florus (A.D. 64-66), acted as if they were resolved to provoke the Jews to rebellion. They reduced the country to anarchy. Josephus relates of Albinus: 'There was no species of wickedness which he left undone.'² He levied oppressive taxes, plundered privately and publicly, sold justice, and released all prisoners who could pay. He alternately connived at and punished the actions of the Sicarii and Zealots. Hearing that Florus was coming as his successor, he executed his most dangerous prisoners and released the others. As the released prisoners belonged mostly to the Zealot faction, 'the land was filled with robbers.'³ Josephus has left a terrible account of the villainies of the last procurator, Florus,⁴ by comparison with whom Albinus was upright. He flaunted his crimes publicly, took bribes, and wrung all he could out of the miserable people. On the one hand Bernice interceded, but in vain, for a more humane treatment of the Jews, while Agrippa II. attempted to appease the people. Florus desired war to cover his misdeeds, and the younger men, mostly Zealots, were likewise eager for war. The provocation was furnished on Florus's part by his seizure of part of the Temple treasury and by his brutal attack on the people when they resented the insolence of the two cohorts which they were ordered to welcome from Cæsarea; and on the part of the Jews by a jest of some Jewish wags who pretended to beg for the destitute Florus, by the seizure of Masada and the slaughter of the Roman garrison by the Zealots, and by the discontinuance of the daily sacrifice for the emperor. Even now the peace party—the Sadducean high-priests and the chiefs of the Pharisees—advocated conciliatory measures with the seditious Zealots, who refused to hearken.⁵

The insurgents under Eleazar, son of Ananias, allied with the Sicarii, attacked Agrippa's troops, upon whom the peace party relied.⁶ Menahem, son of Judas the Galilean, armed the Zealots, entered the city, and forced the capitulation of the soldiery of Agrippa and the citizens of the peace party. The war party further celebrated their victory by murdering the high-priest Ananias. Menahem's cruelty led to a quarrel with the other Zealot leader, Eleazar, which resulted in the death of Menahem. Eleazar celebrated his uncontested leadership by a shameful butchery of the Roman garrison under Metilius, which had capitulated on terms.⁷ The successful defence of the capital against Cestius Gallus, governor of Syria, and his defeat at Beth-horon inspired enthusiasm in the Zealot and war party.⁸ Many pro-Romans and moderates now abandoned the holy city. The war party came into control by violence or persuasion,⁹ and the moderates were much disheartened.¹⁰ As the die was now cast and an attack expected from Rome, the authorities proceeded to organize for war and appointed generals for Jerusalem and the provinces.¹¹ It should be noted that at this early stage those in authority were mostly members of the aristocracy—Sadducees and Pharisees—who considered it prudent to put themselves at the head of the popular revolution. The position of affairs was reversed after the misfortunes of the first year of the war, as fortress after fortress fell before the Romans. The revolution which unseated the native authorities and put provincial

radicals in power was brought about by the Zealot, John of Gischala, the enemy of Josephus, in the winter A.D. 67-68. On the fall of Gischala (Nov. A.D. 67) John fled to Jerusalem, gained over the youth of the city, and was abetted by the increasing numbers of provincial refugees entering the city.¹ The authorities were, with some truth, accused of lack of energy in the prosecution of the war and even of Roman sympathies. The Zealots believed that the safety of the nation lay in ousting the aristocratic native leaders and in taking control themselves. They began by imprisoning Antipas (one of the royal lineage and public treasurer) and other persons of rank, and elected a new high-priest from the proletariat. The native party of order strenuously opposed the provincials and their Zealot supporters. The former was led by Gorion, son of Joseph, Simon, son of Gamaliel, and the high-priests Ananus and Jesus, son of Gamaliel. A speech of Ananus roused a majority of the inhabitants against the Zealots, who, in self-defence, summoned the Idumæans on the pretext that the authorities of Jerusalem had made common cause with the Romans. The Idumæans on arrival were refused admission by the inhabitants, but were secretly introduced at night by the Zealots. The Idumæans signalized their entrance by the perpetration of intolerable cruelties, in which the Zealots heartily joined, against the bourgeoisie and the aristocracy. This reign of terror accomplished the utter collapse of the native party of order and ended in a victory for the Zealots and reactionaries. The high-priests, Ananus and Jesus, and a prominent citizen, Zecharias, son of Baruch, were put out of the way. When the Idumæans, satiated with the blood of the citizens, realized the falsity of the pretence upon which they were introduced by the Zealots, they withdrew, but assassination and *sabotage* were continued by the Zealots. John, at the head of the Zealots, now became undisputed dictator of the city, while the Sicarii and Zealots carried on their brigandage and murders throughout the country. The Roman civil wars delayed military operations for a time. Meanwhile Simon, son of Giora, at the head of a mixed following of slaves and Zealots, overran a large portion of S. Palestine (A.D. 68-69) and came into conflict with the Zealots under John. The Romans, under Cerealis, put an end to Simon's marauding by conquering all Palestine outside the capital, except the three fortresses of Herodeion, Machærus, and Masada, held by the Zealots (summer of A.D. 69). Simon now appeared with his army before the walls of Jerusalem, the inhabitants of which, groaning under the tyranny of John, invited, at the suggestion of the high-priest Matthias, Simon 'as a second tyrant' within the city. There were now two factions, each distinguished by the same Zealot hatred of Rome and the same indifference to the rights of the citizens. Vespasian had meantime ascended the throne and commissioned Titus with the reduction of the Jewish rebellion. While the Romans were preparing to invest the city, there appeared a third faction headed by Eleazar, son of Simon, who, with a large following of priestly Zealots, revolted from John's party.² The incessant bickerings of these three tyrants, John, Simon, and Eleazar, caused terrible misery to the city and led to the disastrous burning of vast stores of grain sufficient

to withstand a siege of many years.³ A bloody riot occurred at the Passover of A.D. 70, in which John vanquished Eleazar's party and thus reduced the three Zealot factions to two.⁴ As the Romans commenced to beleaguer the city, party faction was stilled. Eleazar with 2400 Zealots again united with John and his Zealots, while the Idumæans united with Simon.⁵ The two leaders, John and Simon, made such an heroic and strategically planned defence against the Roman beleaguering forces that, had it not been for the previous internecine strife, which lessened the defenders, and the mad destruction of the ample supplies of grain, it is improbable that the Romans would have succeeded. In spite of Titus's desire to shorten the campaign and spare the city, the appeals of Josephus to his countrymen, and the famine prevailing within, the peace party was silenced by the Zealots. On the capture of the city (Sept. A.D. 70) John and Simon fell into the hands of the Romans; the former was condemned to life imprisonment, the latter was spared to grace the triumph and then executed. Herodeion, Machærus, and Masada still remained in the hands of the insurgents, chiefly Zealots and Sicarii. Lucilius Bassus captured Herodeion, and compelled Machærus to surrender. The last stronghold of the Zealots was Masada, occupied by the Sicarii and Zealots early in the war under Eleazar, a descendant of Judas the Galilean.⁶ This place fell in April, A.D. 73, before Flavius Silva, who discovered to his chagrin that the defenders had by agreement slain each other and the last survivor had committed suicide, only two women and five children surviving. With the fall of Masada the history of the Zealots as a party ends. The Jews had ceased to be a nation; it was, however, the spirit of the Zealots that inspired the sanguinary insurrections in the reigns of Trajan and Hadrian.

There is much in the history of Zealotism which recalls the Highland devotion to hopeless causes. Zealot enthusiasm was doomed to failure because it was not guided by prudence. Their indiscretions, their separatist spirit, their disregard of the other parties in the nation, and their enormities led to the defeat of the cause to which they devoted themselves with such indefatigable heroism in a life-and-death struggle with the imperial might of Rome.

4. Relation to other Jewish parties.—The chief questions are those of the relation of the Zealots to the Pharisees and to the Sicarii.⁵ Josephus speaks of the Zealots as a fourth party alongside of the Sadducees, Pharisees, and Essenes.⁶ His description of the Zealot sect is:

'Of the fourth of these philosophies Judas, the Galilean, became leader. In all other respects they agree with the opinions of the Pharisees, but they are distinguished by an unshakable devotion to liberty, holding that God alone is Ruler and Lord (*ἡγεμόνα καὶ δεσπότην*). They consider it a trifling matter to endure extraordinary deaths and the tortures of relatives and dear ones, in their refusal to address any mortal as "Lord." And since multitudes have witnessed their immovable courage under such circumstances I do not dwell upon it in detail. For I am not afraid that anything related of them should be disbelieved, but on the contrary I fear lest the narrative may do less than justice to their contempt in enduring the misery of pain. The nation commenced to suffer from the malady of this madness through the reckless insolence of Gessius Florus, the procurator, in driving the people to revolt from Rome.'⁷

The Zealot movement arose in the bosom of Pharisaism and retained throughout its brief

¹ *BJ* iv. iii.

² Ewald (*Hist. of Israel*, Eng. tr., vii. 559 ff.) classifies these three Zealot factions into the learned Zealots (who came into power under John in spring of A.D. 68), the popular Zealots (admitted under Simon, April, A.D. 69), and the priestly Zealots (who seceded under Eleazar early in A.D. 70); *per contra* Jackson and Lake, *Beginnings of Christianity*, i. 423, who contend that the name 'Zealot' applies to John of Gischala's following and to no other.

³ Tacitus, *Hist.* v. 12.

⁴ *BJ* v. vi. 1.

⁴ *Ib.* ii. xvii. 9, vii. viii. 1.

⁵ Hippolytus in his *Ref. of all Heresies*, ix. 21, represents the Zealots or Sicarii as an extreme sect of the Essenes. His account disagrees with all the other accounts of Essenism given by Philo, Josephus, Pliny, Hegesippus, Porphyry, and Epiphanius, and with that of Zealotism given by Josephus.

⁶ See *Ant.* xviii. i. 31., *BJ* ii. viii. 2. In *Vita*, 2, he mentions only three parties.

⁷ *Ant.* xviii. i. 6.

history a striking resemblance to Pharisaism. The Pharisees represented generally the popular party, distinguished by their dislike of Roman overlordship and their zeal for the Law and the theocracy. The Roman question caused a split among the Pharisees into the majority of moderates and the minority of extremists or war party. The former were fatalists,¹ who viewed Roman domination as due to an act of the inscrutable will of God or as a punishment for the people's infidelity. While their ideal was national independence, their policy was passive resistance. The other party favoured war *à outrance*. The one party valued the liberal measure of tolerance granted by Rome for the exercise of their religion: the other believed that autonomous nationalism was requisite for the very existence of the theocracy. These extremists, led by Sadduk, gladly attached themselves to a nationalist like Judas. The Herodians² were probably not strictly a separate party, but belonged to, or for political purposes allied themselves with, the most pacific section of the Pharisees. Herodians and Pharisees would agree (1) in discountenancing everything which threatened to disturb the political *status quo*, while (2) preferring the Herodian dynasty (instead of a Roman procuratorship), which some Pharisees would view as a compromise for the fuller theocracy. The Zealots occupied, therefore, the extreme right of the Pharisees, and the Herodians the extreme left, on the question of the *status quo*.

Unfortunately our chief source for the history of Zealotism is Josephus—a moderate Pharisee and pro-Roman, with a decided penchant against the Zealots,³ probably due to the fact that he wished in the minds of the Romans to throw the blame of the rebellion upon a party which became extinct with the Roman victories, and partly to screen his own sect, which after the end of the Jewish nation became the guardian of its traditions. The excesses of which the Zealots were guilty furnished him a feasible excuse. The Zealot movement not only arose within Pharisaism, but throughout its course really stood for the ideals of the Pharisees, though adopting different means.

The latter [Zealot party] only drew the last practical conclusions out of the hate of the Pharisees against heathen domination. The Pharisees therefore never disapproved of their conduct until it degenerated into absolutely unlawful proceedings. Where this happened [BJ iv. v. 9], the doctors of the Pharisees broke loose from the Zealots, who now betrayed their connexion with the Pharisees by immediately falling upon the Sadducean aristocracy.⁴

The Zealots did not scruple to accomplish the death of Sadducean high-priests. Even Josephus cannot conceal the close relations between Zealots and Pharisees, the Zealots being distinguished only by their marked devotion to independence,⁵ though elsewhere⁶ he speaks of Judas as *σοφιστής ιδίας αἰρέσεως οὐδὲν τοῖς ἄλλοις προσεοικώς*. But from A.D. 66 the Pharisees, foreseeing the issue of a conflict with imperial Rome, withdrew more and more from the Zealots and joined the Sadducees in advocating conciliatory measures.⁷ Josephus generally speaks of the Zealots as 'brigands' (*λησται*). This nomenclature was due to (1) the absence for some time of any definite party name for these radicals, the title 'Zealot' being a self-designation of the party,⁸ and perhaps not definitely

chosen till the days of Florus, under whom Josephus first employs the term,¹ his ordinary designation up to this point being 'robbers' or 'assassins'; and (2) the fact that, being outlawed by the Romans and hated by and hating the pro-Romans, the Zealots in self-defence organized into bands and lived in troublous times by brigandage.

The Sicarii are thus described by Josephus:

'The Sicarii, as they are called (they are robbers), then grew very numerous. They use swords similar in length to the Persian *acinace*, but curved and very like what the Romans call *sica*, from which the robbers received their appellation because they destroyed with this weapon many victims. They mingled themselves at the festivals, as described elsewhere, in the multitude of those who had assembled from all quarters for worship and easily murdered whom they chose. And often they proceeded armed against the villages of their enemies pillaging and burning.'²

Josephus seemingly identifies the Sicarii and the Zealots.³ (1) He also indirectly identifies them by assigning to the Sicarii the same policy as that pursued by the Zealots⁴ and their refusal to acknowledge the emperor as *δεσπότης*;⁵ and (2) the Sicarii became prominent under Felix and Festus when the Zealots were a source of annoyance to the procurators.⁶ Elsewhere⁷ Josephus says that the Sicarii first appeared on the scene in the days of Quirinius synchronous with the rebellion of Judas the Galilean, the father of all Zealotism; he apparently regards the agents in that rebellion indifferently as Sicarii or Zealots. But Josephus sometimes uses language which would also suggest some distinction in his mind between Zealots and Sicarii.⁸ Originally the Sicarii were perhaps a separate group from the Zealots. As the Zealots were an extremist offshoot of the Pharisees, the Sicarii were originally an extremist offshoot from the Zealots. The Zealots were the soldiers of the theocracy and the Sicarii the *frances tirailleurs* of the Zealots. In the confused years following A.D. 66 the Sicarii increased in numbers and in frightfulness, and the line of demarcation between them and the Zealots, if remaining, became very faint. Whether the Sicarii remained the extremists of the Zealots or whether Zealots and Sicarii became ultimately synonyms (so Renan and Kohler) our sources do not determine with certainty.⁹

LITERATURE.—(1) *Ancient*.—The chief ancient source is Josephus, esp. *Ant.* xviii. i. 1, *BJ* ii. viii. 1ff., and iv. Cf. Tacitus, *Hist.* v. 1-13; Philo, *Leg. ad Gaium*; Dio Cassius, *Hist. Rom.* lxxi. 4ff.; Hippolytus, *Ref. Omn.* ix. 21.

ZIONISM.—1. **Title and object.**—Zionism is the designation of a modern nationalist movement among the Jews, the programme of which was definitely formulated at an international congress held in Basel, Switzerland, on 29th-31st Aug. 1897, in the following terms: 'The object of Zionism is to establish for the Jewish people a publicly recognized, legally secured home in Palestine.'¹

2. **The basis.**—The aim of Zionism, the re-establishment of the Jewish people in the land promised to the patriarchs as an eternal inheritance of the people of Israel, is a fundamental conception inherent in the religion of the Jews, and has actively asserted itself at various epochs since the destruction of Jerusalem by Nebuchadrezzar.

צִיּוֹן, the land *par excellence*, became to Israel a symbol of God's grace. The possession of the land was a sign of Israel's faith, as its loss was to be the result of disobedience. In the Tōrah this is a recurring theme, and the prophetic utterances ring its changes in every key. Concurrently with this idea the religious ordinances took shape in accordance with political circumstances—first in close attachment to the land, and then by reason of exile from it. Psalms 137 and 126 mirror the despair of those who were driven away from, and the joy of those who returned to, Zion. A special virtue or sanctity was ascribed to its very soil: 'For thy servants take pleasure in her stones, and have pity upon her dust' (Ps 102⁴). The Talmudic ritual and other legislation, which declares mere residence in Palestine, *Yishub Eretz Israel*, to be of the utmost merit, observes this standpoint throughout and contains special religious precepts, *Mizvoth ha-teluyoth ha-aref*, applicable only to those living in *Eretz Israel*, as Palestine came to be called in the language and literature of the Jews.

Of essential importance to the religious mentality of the Jews became the yearning for the departed glory of Israel, of which the sanctuary on Mount Zion was the sacred symbol, and the prayer for the restoration of the kingdom of the house of David, which was synonymous with the Messianic age, is a *leitmotiv* in the Jewish liturgy that is repeated in almost endless variety. The prophecies and incidents which accompanied the return of the exiles from the Babylonian captivity were applied to the ages and circumstances following the destruction of the Second Temple (A.D. 70). Even though in the course of time life proved stronger than ritual and the universalist aspirations of Judaism inspired a prophetic vision which turned the restoration of Israel into a far-off spiritual ideal, it nevertheless assumed concrete appearance at the first favourable opportunity.

The patriarchate and academies which maintained a Jewish spiritual centre in Palestine for centuries after the fall of the Jewish State, the pilgrimages to Judea from all parts of the Diaspora, and the continuous attempt to create Jewish settlements on what was always regarded as Jewish soil, testified throughout the ages to the intense desire of the Jews to regain a footing in their ancestral country. The succession of pseudo-

¹ The title 'Zionism' is said to have been used first in 1886 by Nathan Birnbaum (*nom de plume*, Matthias Acher) in his art. 'Selbst-Emanzipation,' *Ost und West*, 1902, p. 576. He subsequently, however, expressed his preference for the designation, 'Jewish Renaissance Movement,' as more comprehensive (cf. *Ost und West*, 1902, p. 526).

Messiahs, from Bar Kokhba († A.D. 135) to Shabbethai Šebi (1626-76), always appealed successfully to this Jewish passion.¹

Even non-Jews (such as Napoleon, in his manifesto to the Jews of Asia and Africa to re-establish themselves under his auspices in Palestine [1799]; Henry Dunant, the founder of the Red Cross, in his efforts to organize Jewish colonization there; Lord Shaftesbury, Lord Palmerston, and other Englishmen, in their sympathetic support; and Laurence Oliphant in his scheme in Gilead [1890]) realized the hold which the idea of a Jewish State in Palestine had on the Jews.

3. **The revival of Jewish nationalism.**—But it was only towards the middle of the 19th cent. that the sense of a national and political revival of the Jewish people assumed reality. The national resurrection of ancient Hellas, and the resurgence of national sentiment in Europe generally, proved a stimulus to Jewish hopes. The wave of Jewish solidarity that followed in the wake of the Damascus affair (1840) was a symptom, as the establishment of the Alliance Israélite Universelle (1860) was the first organized embodiment, of the re-awakened Jewish collective consciousness. Foremost in this direction was Sir Moses Montefiore (1784-1885), who, since his first visit to Palestine (1827), proved the forerunner in Western Europe of a keen, though none the less discriminating, interest in the Jewish future of Palestine. This inter-relation between Palestine and the Diaspora acted and reacted upon the general course of Jewish life, and eventually proved a measure of its vitality.

This was, however, the period of Jewish history when all the energies and resources of the Jews were wholly directed to their civil and political emancipation. This tendency, which derived its spiritual conception from the ideas of enlightenment and reform emanating from Moses Mendelssohn (1729-86) and his followers, received its most striking manifestation in the promulgation of the principles of the French Revolution, which, by the Napoleonic conquests, spread over Central Europe. The so-called Sanhedrin convened at the behest of Napoleon (1806) gave to the new orientation of Jewish life a formal sanction. It became an axiom of Jewish thought, at first in Western lands and then among the upper strata in the great communities in Eastern Europe and the Orient, that the Jews were no longer a nation but a faith, that the *beau idéal* of the Jewish future was a complete social and political adaptation to the dominant surroundings. Even in the religious sphere this process of 'assimilation,' as it is technically termed, came to be applied in an ever-widening measure. The national or particularist elements of Judaism were put into the background, and the universalist aspects emphasized. In the liturgy the references to the restoration and the rebuilding of the Temple were toned down, and in some prayer-books the words 'Zion' and 'Jerusalem' even eliminated; the vernacular began to rival, and gradually to supersede, the original Hebrew, and, while avoiding schismatic tendencies, this reform of Judaism assumed distinctive colourings adapted to the circumstances of time and place.

4. **The Chovevé Zion.**—While traditional and modernist conceptions of Judaism as a religion struggled for mastery on the question of the validity of ancient dogmas, forms, and ordinances, there set in a fermentation in the racial consciousness of the Jews that gave a new direction to their aspirations. True, in the West, the devoted efforts of Sir Moses Montefiore to bring his English co-religionists to a realization of Jewish potentialities in Palestine met with no effective response. The publication in 1862 by Moses Hess of *Rom und Jerusalem*, advocating the recognition of a distinctive Jewish nationality and a Jewish re-settlement in Palestine, also found no favour among the Jews of Germany, where it appeared. The publication of a pamphlet, *Auto-Emanzipation*, by Leo Pinsker, of Odessa (1881), definitely proclaiming the necessity for the establishment by the Jews of a country of their own marked, however, a definite stage in the emergence of a movement which was to captivate the imagination of the mass of the Jewish people.

The consequent rise of the movement of the Chovevé (חובבני) Zion ('Lovers of Zion') broke

¹ See art. MESSIAHS (Pseudo).

with the ideology of assimilation that had been taking hold of ever-increasing numbers of the Jewish people.¹

5. Jewish nationalist aspirations.—The outward events detailed in art. ANTI-SEMITISM² reinforced the trend of sentiment and thought that was proceeding within Jewry. A complete spiritual transformation took place, particularly in the outlook of the younger generation. The effort to turn the Jews into a mere religious denomination, distinguished from their neighbours only by their religion, and even in this approximating to the ideas and customs of time and place, was opposed by the affirmation that the people of Israel, though dispersed over the whole earth, was still one people, not only bound together by a common past, but consecrated by the hopes and aspirations of a common future. It was put forward that the Jews had indeed a distinctive mission in the economy of the world—as was claimed by those who would insist upon the universality of Judaism as a world-religion—but, while recognizing that only a part of the Jewish people would settle in Palestine, it was asserted that the spiritual purpose of Israel could be worthily accomplished only in its hallowed homeland, whence, as in the days of old, it would draw inspiration from its native soil, and give again of its own genius, unaffected by alien influences, its distinctive contribution to the religion and civilization of the world. It was particularly in the cultivation of the specific Hebraic spirit of righteousness and social justice that the Jewish nationalists saw the Messianic fulfilment of the destiny of the Jew in history.

6. Modern Hebrew literature.—The nationalist conception of Jewish life found in time a host of advocates in the Jewish literature of all languages, so that it is now, particularly in the press, the most potent intellectual force in Jewry. In particular the Hebrew language, hitherto confined to prayer and study as well as to religious and literary correspondence, proved both a means and an end in nationalist propaganda. Hebrew, adapted to modern needs, became the vehicle for the issue of original works and translations, and a Hebrew press fashioned the ancient tongue for everyday use. It became the medium of instruction in schools, and finally in Palestine the vernacular of the younger generation. In the course of a few decades modern Hebrew literature revealed an intellectual individuality of a high order. Perez Smolenskin (1842–85), by his Hebrew periodical *Ha-shahar* ('The Dawn'), was a nationalist pioneer among the intellectuals of his time. Ahad Ha'am (Asher Ginzberg) (born 1856) is a thinker of profound depth and endowed with extraordinary clarity of judgment and diction. He has given a philosophical content to Jewish nationalism, and the idea of a Jewish spiritual centre in Palestine is emphasized by him in contradistinction to an exclusively politico-economic conception of the movement. Haim Nahman Bialik (b. 1873) and Saul Tchernichowsky (b. 1875) stand out among those who in these latter days have revived the inspiration of Hebrew poetic expression. Nahum Sokolow (b. 1859) wields the Hebrew language with a versatility and grace reminiscent of the wealth of classical Greek and the elegance of French literature. The new Hebrew University in Jerusalem will give modern Hebrew the definite scientific canons of which it is still in need.

Modern Hebrew is based on the Bible, with its developments in the Mishnah, Talmud, and mediæval literature. A complete lexicon, with the latest terminology, is the *מילון* (*Thesaurus*

Totius Hebraicitatis) of Eliezer ben Yehudah, now in course of publication.

7. Jewish colonization in Palestine.—In its practical development the movement assumed the form of colonization in Palestine with the aspiration for the ultimate revival of the Jewish people, not only in its homeland but in the whole Diaspora. The work of agricultural colonization was initiated by Sir Moses Montefiore in 1854 by the settlement on the land of 35 families from Safed, and by Charles Netter in 1870 in the foundation of the still existing training farm Miqveh Israel, near Jaffa. There followed the establishment of the agricultural colony Petah Tiqvah in 1878 and of Rishon le-Zion and Zikhron Ya'acov in 1882. The movement of the Chovevé Zion had by then gathered sufficient force to hold in 1884 an international conference at Kattowitz, Silesia. The idea of the colonization of Palestine, which, amid exceptional difficulties, has been put into effect by men of high ideals but no practical experience (notably, in 1882, by the so-called 'Bilu' group, composed mainly of Russo-Jewish students), enlisted the sympathies of the Western Jews more out of philanthropic than nationalist motives, while in Eastern Europe the imagination of enthusiasts was stirred by visions of a Jewish national revival. Baron Edmond de Rothschild, of Paris (b. 1845), with an idealism equalled only by his princely generosity, provided the financial means by which alone the colonies could have been maintained. In 1889 the Russian Jews established the Odessa Committee for the colonization of Jews in Syria and Palestine, while in Western Europe benevolent efforts were made to further this object. But the disappointingly slow progress in Palestine and the gradual restriction of the horizon of the Chovevé Zion led to general disillusionment and apathy.

8. Herzl and Political Zionism.—It was in 1896 that the Jewish world was aroused by the appearance of Theodor Herzl, of Vienna (1860–1904), who, in his *Judenstaat*, promulgated the view that Jews should leave the inhospitable lands inhabited by them, and set out in detail a scheme for the creation of a Jewish commonwealth. Though this publication may be said to have been distinguished by its boldness and lucidity, it was only the magnetic personality of Herzl that made of this apparently utopian project a living reality to the great masses of his people. In other ages he might have been invested with Messianic claims. In the authority he wielded and the extraordinary fascination he exercised over those who came under his sway he stands beyond compare among the Jews since Moses Maimonides (1135–1204), and time has confirmed his position in modern Jewry as that of judge and prophet in Israel. He found many notable adherents, such as Max Nordau (b. 1849), who, though holding no office, enjoys the moral leadership of the movement, and Israel Zangwill (b. 1864), who, since his secession, has become the 'candid friend' of Zionism. A congress of Jews from various parts of the Diaspora took place in Basel, 29th–31st Aug. 1897, at which there was established the Zionist Organization with its fundamental programme:

'The object of Zionism is to establish for the Jewish people a publicly recognized, legally secured home (öffentlich-rechtlich gesicherte Heimstätte) in Palestine. In order to attain this object, the Congress adopts the following measures:—

1. To promote, in so far as it serves the above purpose, the settlement in Palestine of Jewish agriculturists, craftsmen and tradesmen;
2. To select and organize the whole Jewish people in appropriate local and general bodies in conformity with the laws of the land;
3. To strengthen Jewish national sentiment and self-consciousness;
4. Preparatory measures to obtain the sanction of governments required for attaining the object of Zionism.'

¹ But see art. ANTI-SEMITISM.

² *ERE* i. 593 f.

From the fact that this new development of the nationalist movement laid special stress on the thesis that the Jewish question could not be solved in the Diaspora by the prevailing methods of philanthropy, but only in Palestine on political lines, the adherents of the Basel programme came to be known as Political Zionists, in contradistinction to the former Chovevé Zion and those who claimed that all faithful Jews are Zionists in the spiritual sense. The Zionist Organization further assumed a definite nationalist attitude on Jewish public matters, as, indeed, it developed a Jewish *Weltanschauung* generally, and thereby aroused fierce and wide-spread opposition from the leading ecclesiastical and lay heads of the Jewish communities. Zionism, however, continued to gather force in most parts of the Jewish Diaspora, and became the largest organized body of Jews since the days of Jewish independence. Altogether it exercised an ever-increasing influence on Jewish life. In Jewish communal politics, in literature, art, and education, it endeavoured to create a specific national Jewish note. The hold which it has obtained over the numerous Jewish university students, particularly on the European continent, has secured for Zionism the intellectual leadership of the Jewish people.

The immediate object of Zionism, which was to obtain from the sultan of Turkey a legal concession or charter for the settlement of large numbers of Jews on a basis of local self-government, failed. Three personal interviews of Herzl with Sultan Abdul Hamid (1901 and 1902) proved fruitless. Impelled by the pressure of urgent circumstances in the general condition of the Jews, Herzl considered the advisability of acquiring from the Anglo-Egyptian Government the region of El Arish, on the Sinai peninsula, for a Jewish autonomous settlement (1901); but, owing to the lack of water for irrigation, the scheme was found impracticable. This was followed in 1903 by an offer to the Zionists by Joseph Chamberlain (then Secretary of State for the Colonies) of the Guas Ngishu plateau in the East Africa Protectorate, which was submitted to a Zionist congress, but the mere suggestion of any project outside Palestine aroused violent opposition. A commission of exploration was sent out, but on its report to a subsequent congress this so-called Uganda scheme was definitely rejected. The secession of a number of Zionists followed and led to the establishment of the Jewish Territorial Organization (colloquially termed 'ITO') in order 'to procure a territory upon an autonomous basis for the Jews who cannot or will not remain in the lands in which they already live.' After unsuccessful attempts to find a suitable territory, in Cyrenaica, Canada, Australia, Mesopotamia, and Angola, the Jewish Territorial Organization has ceased to function.

The death of Herzl (who, in 1905, was followed in the office of president of the Zionist 'Actions Comité' [central executive] by David Wolffsohn, of Cologne, and in 1911 by Otto Warburg, of Berlin) created a profound depression in the movement, which, in the absence of political success, attempted to develop the existing institutions in Palestine and—with a hope for better prospects—to cultivate as *Gegenwartsarbeit* the nationalist idea in the Diaspora.

9. **Organization and finance.**—The membership of the Zionist Organization consists of those who pay annually the shekel (one shilling [raised in 1919 to 2/6], or its nominal equivalent in other coinage), which gives the right to a vote in the election of delegates to the congress, the highest Zionist forum. Women have the franchise on the same terms as men. About 800,000 persons paid the shekel in 5681 (1919-21).

The Zionist Organization is composed of national federations of Zionist societies or other bodies all over the world (*e.g.*, the English Zionist Federation, the Federation of American Zionists, etc.), and, in addition, there are recognized international federations representing specific principles, as, *e.g.*, the Misrahi, which endeavours to promote Zionism on an 'orthodox' religious basis, or the Poalé Zion, which professes Socialist doctrines.

As a general rule, Zionism is in favour of traditional Judaism, at least in a spiritual sense, but recognizes complete liberty of conscience for the individual, in accordance with the official declaration at the second congress (1898):

'Zionism does not only aim at the economic and political but also at the spiritual regeneration of the Jewish people, and in this respect stands on the basis of modern civilization, with the achievements of which it identifies itself. Zionism does not undertake anything which conflicts with the religious law of Judaism.'

In 1899 there was established, as the financial institution of the Organization, the Jewish Colonial Trust Ltd., with an authorized capital of £2,000,000, of which about £380,000 was subscribed by December 1920. Over 100,000 persons were holders of single £1 shares, the largest number of shareholders of any joint-stock company. In 1903 the Trust established a subsidiary body, the Anglo-Palestine Co. Ltd., for the special purpose of transacting banking business in Palestine. The Jewish National Fund was created in 1897 for the purchase of land in Palestine as the inalienable possession of the Jewish people. The principle regarding the nationalization of the land and the co-operative experiments undertaken by the Fund will render it not only one of the most useful agencies in the Jewish colonization of Palestine, but, from the general economic and sociological point of view, valuable and interesting in its practical application. During the Great War (1914-18), and even more since its conclusion, the Jewish National Fund has received wide-spread support all over the world.

10. **Zionism since 1914.**—The outbreak of the Great War necessarily created a cleavage in the international Zionist Organization, which, for geographical reasons, had its central office in Berlin. The political, and, later on, the administrative, headquarters were transferred to London, which, by the registration of its financial institutions, was already the legal *locale* of the movement.

Zionism received its most powerful impetus by the recognition on the part of the British Government of the historical connexion of the Jewish people with Palestine and the claim which this gives them to reconstruct Palestine as their national home.

There are in England traditions, dating back to Puritan times, which favour the restoration of the Jews to their ancient country. It was also in England that the first society for the Jewish colonization of Palestine was formed by George Gawler in 1845. George Eliot's *Daniel Deronda* (1876) was in those days a remarkable revelation of the Jewish nationalist aspirations of a Gentle, while the romanticism of Benjamin Disraeli, with his strong Jewish sympathies, gave a glamour to the idea of the restoration of Israel, with which the English-speaking world is familiar through the Bible.

Since 1915 the diplomatic activities of the Organization have been centred in England and the United States. In the latter country the movement received its greatest impetus by the accession of Louis D. Brandeis, Justice of the Supreme Court (since 1920 President of the Organization). In England Chaim Weizmann, whose extraordinary gifts of eloquence and statesmanship have raised him to the leadership of the movement, and Nahum Sokolow (Chairman of the Executive), who combines the philosophical serenity of a man of letters with a keen judgment of men and affairs, were able to enlist the sympathies of British public opinion and ultimately the support of the British Government. Herbert Samuel (subsequently the first British High Commissioner for Palestine) ranged his Jewish influence, while in the Cabinet as well as out of it, definitely on the

side of Zionism, which found also convinced advocates among other British statesmen, notably Lloyd George, Arthur J. Balfour, and Lord Robert Cecil. Sir Mark Sykes (who in 1916 had acted for Great Britain in the Sykes-Picot Agreement with France) became the champion of Zionist interests in the settlement of the Palestine question.

On 2nd November 1917 Arthur J. Balfour, as Secretary of State for Foreign Affairs, addressed to Lord Rothschild a communication in the following terms:

‘His Majesty’s Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine or the rights and political status enjoyed by Jews in any other country.’

This declaration, which was hailed in the Jewish world as a counterpart to the edict of Cyrus, was followed in 1918 by similar statements from the Governments of France and Italy, as well as by the support of President Wilson, and the friendly acquiescence of the pope.

On 3rd February 1919 a delegation, headed by Sokolow and Weizmann, and including the Russian Zionist leader M. Ussishkin, who spoke in Hebrew, submitted to the Peace Conference in Paris the Zionist claims in Palestine with these proposals:

‘The sovereign possession of Palestine shall be vested in the League of Nations, and the government entrusted to Great Britain as the mandatory of the League, it being a special condition of the mandate that Palestine shall be placed under such political, administrative and economic conditions as will secure the establishment there of the Jewish National Home and ultimately render possible the creation of an autonomous commonwealth.’

Following the conquest of Palestine by the British under Lord Allenby, in which officially designated ‘Jewish troops’ took part, the above Zionist proposals to the Peace Conference were on 25th April 1920 adopted at San Remo by the principal Allied Powers and incorporated in the British Mandate for Palestine under the League of Nations, as was also the Balfour Declaration in the Treaty of Sévres. With this solemn international recognition of the Jewish title to Palestine there emerges after a millennial struggle the national revival of a people comparatively small in numbers but incomparable in endurance and faith.

LITERATURE.—There is an extensive Zionist literature in almost all the languages spoken by Jews, notably in Hebrew, Russian, German, and English. *Die Welt*, the official organ of the movement from its inception in 1897 till 1914, contains all official statements and current topics, while the Reports of the Congresses (in German) give a full reproduction of their deliberations. Among authoritative works on Zionism are Theodor Herzl, *Zionistische Schriften*, ed. Leon Kellner, Berlin, 1905; Leon Kellner, *Theodor Herzls Lehrjahre*, Vienna, 1920; Adolf Friedemann, *Das Leben Theodor Herzls*, Berlin, 1914; Max Nordau, *Zionistische Schriften*, Cologne, 1909; Marcel Bernfeld, *Le Sionisme*, Paris, 1920; N. Sokolow, *History of Zionism: 1800-1918*, 2 vols., London, 1919; Richard J. H. Gottheil, *Zionism*, Philadelphia, 1914; Abad Ha'am, *Selected Essays*, tr. Leon Simon, do. 1912; *Zionism and the Jewish Future*, by various writers, ed. H. Sacher, London, 1916; *Zionism: Problems and Views*, by various writers, ed. Paul Goodman and Arthur D. Lewis, with an Introduction by Max Nordau, do. 1916; *Zionist Work in Palestine*, by various writers, ed. Israel Cohen, do. 1911; Frank G. Jannaway, *Palestine and the Powers*, do. 1914; H. Sidebotham, *England and Palestine*, do. 1919; Albert M. Hyamson, *Palestine: The Rebirth of an Ancient People*, do. 1917; Norman Bentwich, *Palestine of the Jews*, do. 1919; Leon Simon, *Studies in Jewish Nationalism*, do. 1920; *Reports of the Executive of the Zionist Organisation to the XII. Zionist Congress*, do. 1921. There are numerous pamphlets published by the English Zionist Federation (official organ, *The Zionist Review*) and the Federation of American Zionists (official organ, *The Maccabean*, and, since 1921, *The New Palestine*). Views opposed to Jewish nationalism are to be found in the writings of Claude G. Montefiore, the leader of Liberal Judaism in England, and in America the Central Conference of American Rabbis (representing Reform Judaism) has repeatedly expressed itself in its *Year Book* and other publications against Zionism. Cf. also Laurie Magnus, *Aspects of the Jewish Question*, London, 1902; Morris Jastrow, Jr., *Zionism and the Future of Palestine: The Pallaces and Danvers of Political Zionism*, New York, 1919; Lucien Wolf, art. ‘Zionism’ in *EB*¹¹, and ‘The Zionist Peril,’ *JQR* xvii. [1905] 1 ff. On special subjects cf. *JE*. PAUL GOODMAN.

ZOHĀR. — From the 14th cent. the *Zohār* (‘Splendour’) has been the fundamental book of Jewish Kabbālā (*q.v.*), the fountainhead of all mystical inspiration. It has exercised a deep influence upon the spiritual and religious life of the Jews, and has extended its influence beyond the borders of Judaism. An ever-increasing literature has gathered round it; for from its first appearance it excited the curiosity of the scholar and the mystical philosopher. Its origin seemed wrapt in mystery, and to this day the problem presented by the *Zohār* has not been solved. It is a curious fact that only one manuscript prior to the first edition seems to exist. All the researches therefore start from the printed edition. And even then they have been limited to the *Zohār* alone, instead of being extended over the whole range of the Kabbālistic literature, of which this book forms only one, though a very prominent, portion.

1. *Problem of origin.*—The most widely accepted theory as to the origin of this book is the somewhat legendary report of the investigation which a certain Rabbi Isaac made in Spain immediately after the book became known.

Rabbi Isaac belonged to a school of mystics which had made its headquarters in Acco, and was one of the foremost representatives of the Kabbālistic interpretation of the Law in accordance with the system of Nahmanides; he himself composed a supercommentary on Nahmanides, *Meirat Enayim*, hitherto still in MS, a veritable mine of information on the pre-Zohārite phase of the Jewish Kabbālā. He is said to have travelled to Granada in Spain, and to have inquired of the widow of a certain Rabbi Moses de Leon what she knew about her husband’s activity in connexion with the book which he for the first time had circulated among the scholars. He offered her a very high price for the original MS, from which Rabbi Moses said that he had made the copies which he sold. The woman declared that she knew of no such copy and that Rabbi Moses used to write the things himself. On the strength of this curious report modern scholars have not hesitated to declare that this book was a deliberate forgery made by Rabbi Moses and palmed off on his contemporaries as the work of Rabbi Simeon ben Yoḥai, and that it was thus quite a modern fabrication by this obscure scholar of the 13th century. The reason assigned for ascribing this book to Rabbi Simeon ben Yoḥai (2nd cent.) was that, according to an ancient legend found in the Talmud, he and his son had taken refuge in a cave from the Roman persecution, and that he dwelt in it for thirteen years, giving himself up entirely to solitary meditation and mystical speculations. Proofs were then adduced to show the improbability of early origin, as the book teems with anachronisms. References made in it also to Talmudic laws and ceremonies of a later origin, and the author’s knowledge of the system of vowels and accents, also precluded the possibility of such high antiquity.

But the whole investigation was vitiated by the fact that it rested exclusively on the printed text, which, as will be shown, was of a composite character. But even in this form the *Zohār* is only a portion of a much larger mystical literature which has been preserved in part to this very day under various names. The relation of these independent treatises and works to the larger compilation commonly known as the *Zohār* has not yet been investigated, and thus the true character of the *Zohār* has remained obscure, and the legendary origin which ascribes it to an almost unknown scholar of the 13th cent. has most uncritically been accepted. It is utterly impossible to conceive that such a vast literature, containing elements of the most diverse and often contradictory character, should be the work of a single man. It is much more probable that the real *Zohār* was only one out of many treatises of a similar kind, which by fortunate accident had come into the hands of a diligent scribe, who could easily make copies of it and profit by the sale.

(a) *Evidence from contents.*—The mystical speculations contained in these writings can often be traced back to those of the Hellenistic period, intermingled with later developments, but all centring in the word of the Bible. We find in them almost every system—new Platonism, the teachings of the Stoa in its later form, the allegorical interpretation so prominent in Philo, the

gnostic theories—and very often in a distorted form. No less prominent are the apocalyptic visions of heavenly halls and heavenly glories of the temple in heaven, and of the terrors of hell. The ineffable name of God forms another centre of speculation, and the mystical value of letters and vowels, just as in the ancient magical papyri according to the school of the new Pythagoreans. The theories of dualism are not wanting in these schools, and often develop into a kind of trinity, consisting of father, mother, and son. The demurgos, the syzygies, and the archons have also found a place in them. They often dissolve the literal meaning of the words and rest upon fantastical etymologies, and apparent similarities in sound and form are often the only basis for these extraordinary speculations which never lead to a logical conclusion. Almost every principle or law or even every name in the Bible is subjected to this peculiar process of sublimation, and all the thoughts float and run into one another as so many nebulae which change their shape and form constantly, and which elude the grasp. It is all a world of mystical and fantastic imagery, in which only one principle is constant, viz. that the harmony of this world, and especially that of the celestial world, is dependent on carrying out these laws, and that Israel has the merit of being chosen to be the foremost representative of the Law, charged with its fulfilment, and thus guaranteeing not only the stability of the world, but its ultimate perfection.

The conception of God is just as vague as all the rest, for each school seems to have had its own theory, and these are all hopelessly blended. God is the *En Sôf* ('Infinite'), the Hoary Head, the Long Face (or, rather, the Long Suffering), Erech Appaim. He is the centre of various emanations, or rather manifestations. He is depicted as the head of the divine college, and very numerous are the anthropomorphic representations of the Shekinah, and just as vague and contradictory are the systems of creation and the many conceptions concerning the evil power (the other, or left, side) with its hosts of demons male and female, all wishing to join man for his destruction, to cover him, as it were, with so many *keliphim*, like invisible skins. There is also to be found the Platonic theory of Ideas, or divine prototypes for every earthly creature. In one separate treatise, also embodied in the *Zohâr*, the theory of metempsychosis is taught, the existence of which can be traced back to very early times in Syria and Palestine no less than in Egypt, and which later became one of the new principles carried by the Gnostic and Manichean sects into Europe. Two physiognomic treatises called 'The Secret of Secrets' have also found a place in this compilation.

It is obvious from this brief sketch that a work of such complexity cannot be the result of a single man's activity. The utmost that can be said is that Moses de Leon either pieced some of these treatises together or copied them from older MSS in a haphazard manner.

Interspersed throughout the book there are numerous tales and legends, some of which have parallels in the other Rabbinical literature, but a large number are quite independent and cannot be found anywhere else. Some apocalyptic visions are also recorded which have a character of their own, and the whole setting reminds one strongly of the literature of the monks and cenobites, or ascetics, in Egypt and Palestine—e.g., the *Lausiacæ* of Palladius and others. The sages are represented as walking together in the open, discoursing on metaphysical problems, when they are joined by an aged man, the Saba, almost equal to the Abba in the *Lausiacæ*, a Ta'yya, a travelling Arab, who explains the questions put and who afterwards

disappears, being either the prophet Elijah or some other heavenly personage, even God Himself. The whole picture is one which can only be conceived as drawn by one of these ascetics, given up to his meditations in the wilds of Galilee or in some part east of Jordan.

Some beautiful hymns of a very exalted type, almost pantheistic, have enriched this compilation and, together with these tales, have largely contributed to its great popularity among those who were unable to follow the mystical speculation contained in its pages.

(b) *Evidence from language.*—The book, as printed, is not uniform. The largest part of it is written in a peculiar Aramaic dialect, which is unquestionably Palestinian. It is not the classical form, but a popularly corrupted form, such as would be the living language of the people of Galilee between the Hellenistic and Arabic periods. It approximates partly to the language of the Palestinian Talmud, which is also of Galilæan origin, and in many ways reminds one of the Targum to Ecclesiastes. It is evidently the language spoken by the Jews in Galilee, who refused to adopt Greek and to whom this was the only language. Some parts are written more correctly, others show greater corruption, and a few of the technical terms the present writer believes to be of Greek origin. Other sections of the book are in Hebrew, also of a popular form. Corruptions in either portion, especially in the Aramaic, are probably due to a large extent to the fault of copyists not fully conversant with the Aramaic, to whom these new words appeared strange. No forgery was intended, and even the association with the name of Moses de Leon as author is out of the question, and, even as copyist, should perhaps be limited to that portion of the compilation which is specifically called the *Zohâr* (for it must be made definitely clear that only a portion of the book has a right to claim this title).

The problem thus presented can now be more easily solved. It must be once for all established that the book is a compilation of a large number of independent treatises which belong to a wider circle; out of them a certain number have been selected in a haphazard manner and pieced together not by any author who endeavoured to write what it appears now to be, viz. a commentary to the five books of the Pentateuch, but by the enterprising publishers and printers of the first editions. These men have collected and selected a certain number of books, one of which—the largest one—was the *Zohâr*, or, as it was called, the *Midrash Ha-Zohâr*, or the Midrash of Rabbi Simeon b. Yoḥai. They have deliberately and arbitrarily arranged these writings together, like a chain or *catena patrum*, as a continuous commentary to the Pentateuch in the same manner as an unknown author has pieced together various other Midrashim of a Haggadic character and made out of them the well-known *Yalkut*. These writings were not intended to form continuous commentaries, and the largest portion deals almost exclusively with the first part of Genesis, whilst originally there was no commentary at all to Deuteronomy. In order to obtain such a commentary the publishers and printers transferred wholesale portions from one section to another, and, whenever this was found impossible as the text had already been allocated to another section, they contented themselves with inserting a note to the effect that an appropriate commentary to these passages would be found in some of the preceding sections. They did not even keep the various portions carefully separated; but, when the fragments were too small, they printed them one after the other, often omitting even the name, sometimes, however, inserting in the text the

title, such as *Raza* ('Mystery'), which a reader could not now easily understand, being unaware of the fact that it was an interpolation. Thus it confuses still more the already difficult text.

The printers, however, endeavoured to make it clear that the book published by them was a compilation of various treatises pieced together by them, for they stated on the title-page that in addition to the *Sepher Ha-Zohār* they had included in this publication the following: *Sitre Tōrah* ('Mysteries of the Tōrah'), *Midrash Hanēlam* ('The Hidden Midrash'), *Tosefta* (additions to some sections), *Ra'ya Mehemna* ('Pastor fides,' 'The True Shepherd')—thus far in the Mantua edition, and in the Cremona edition the following are also added: the *Bahir*, *Midrash Ruth*, *Midrash Hazita* (on Songs), the section *Ta Hazi* ('Come and Behold'), *Hekhalot* ('The Halls of Heaven and Hell'), and again other additions, such as *Pikkudim* ('Ordinances'). This fact, hitherto entirely ignored, is of decisive importance for the history of the *Zohār*, inasmuch as it proves that in the very first editions both of Mantua and of Cremona we have only a compilation before us, and not a homogeneous work. All the investigators who have taken the *Zohār* to be a homogeneous compilation, the skilful forgery of an ingenious author, have been led completely astray.

Moreover, no notice was taken by the scholars of the other books belonging to the same cycle. Nor have the two editions, which appeared almost simultaneously, been compared—the folio edition of Cremona (1558), which already contains various texts printed side by side, and the other edition at Mantua (1558-60) with the introduction by Rabbi Isaac de Lattes, in three quarto volumes, which has since become the authorized edition, all subsequent editions being faithful reprints page for page of this edition. The Cremona edition has only been reprinted twice, once in Lublin (1623) and a second time in Sulzbach with the help of the famous Knorr von Rosenroth (1684). In all the other (quarto) editions Genesis and Exodus form each a separate volume. The third volume contains the *Zohār*, etc., of the remaining three books of the Pentateuch. Curiously enough, even before the *Zohār* appeared in Mantua, the *Tikkune ha-Zohār*, or 'Additions and Improvements to ha-Zohār,' appeared in Mantua in 1557. It consists of 70 chapters, all dealing practically with the cosmogony and with the first verse of Genesis. They are all written in the same style (except that they are arranged in a more systematic order) and show the same peculiarities as the chief portion of the *Zohār*. The language is also Aramaic, and there is scarcely anything to distinguish one from another. The same holds good of the *Zohār Hadash*, 'the New *Zohār*,' which appeared for the first time in Salonica (1597), compiled from MSS brought from Palestine. It contains, in addition to the new *Zohāric* matter on the Pentateuch, similar mystical commentaries to the five scrolls or *Megilloth*, i.e. Lamentations, Song, Esther, Ruth, and Ecclesiastes.

In addition it may now be mentioned that the present writer possesses separate MSS of those writings which have been incorporated in the *Zohār*, such as *Sitre Tōrah* and fragments of *Ra'ya Mehemna*, all corroborating the view that the book in its printed form is a compilation made in modern times of older material. A further and more decisive proof is now found in the MS of the *Zohār* (*Codex Gaster*, no. 747) in the present writer's possession, older than the print and of Spanish Oriental origin. It differs very considerably from the printed edition. It contains only parts of what is now called the *Zohār*, but none of the other texts which have been joined on to it in that

edition. With the help of this MS also one of the chief problems connected with the *Zohār* can now be satisfactorily solved. It is well known that the book is ascribed to Rabbi Simeon b. Yohai of the 2nd cent., and it was not very difficult for the critics to prove this claim untenable, inasmuch as the book in its entirety not only contains unquestionable anachronisms but also refers in sundry passages to and quotes from the Talmud and even from later forms of liturgy. But this wrong assumption of Simeon b. Yohai's authorship rests upon a mistake or a neglect on the part of the printers. The opening formula has been omitted, and this made all the difference, for it is a well-known fact in the Midrashic literature that many an ancient book is quoted by the first name which is mentioned at the opening of the book; it does not mean, e.g., that R. Kahana is the author of the *Pesikta* or R. Tanhuma of the *Midrash* which go under their names. The title is derived from the opening sentence where these two scholars are mentioned. There are other books of a similar character, such as *Midrash Hazita*, mentioned on the title-page of the *Zohār* and forming part of the compilation. It is the initial word of the book, and it is the same with the *Midrash Tadeshe*, etc., and the very title of the *Zohār* is probably derived from that name occurring in the opening sentence. In the MS, similarly, the opening formula is 'Patah R. Simeon b. Yohai,' which would thus explain absolutely the origin of the title *Midrash of R. Simeon b. Yohai*, by which this *Midrash* was quoted almost on its first appearance by the oldest authorities. This does not mean that R. Simeon was the author, but only that the book began with the mention of his name. Unfortunately the printers left out these initial words, for no obvious reason except perhaps in order to give prominence to that weighty mystical pronouncement which stands as a fitting introduction to this mystical book. Now there can no longer be any question of connecting this book with R. Simeon and considering him as the author. The anachronisms, on the other hand, are not general. The treatises embodied in the book may and probably do all belong to different periods. They represent a constant development which has been going on for a long time in various schools of Palestine. Each of these component elements must henceforth be studied separately, for we are dealing with a mass of material accumulated during centuries, much of which is evidently of high antiquity.

2. *History and influence.*—The history of Jewish mysticism has still to be written, for much of it which is very old has for some reason or other been declared to be of more recent origin. The *argumentum ex silentio* has been too often used to prove the non-existence of mystic speculations in olden times in spite of the apocalyptic and magical literature which flourished already in the early centuries before and after the destruction of the Temple. The mystics had very little in common with the scholars; they very seldom committed their speculations to writing—it was all secret lore; even that which they wrote down they hid away carefully. Yet the continuity was not broken, and the secret doctrine was handed down from generation to generation as *Qabbala*, i.e. oral mystic tradition. Thus old and new were constantly blended; to old systems of theosophic speculations newer were added, until it was found necessary to fix them in writing, and in this *Qabbālistic* activity must be found the origin and the explanation of the *Zohār* and the *Zohāric* literature. In it we find embedded, side by side, those old speculations from the time of Philo downwards, on to probably the 5th and 6th cent., when they were the object of concentrated meditations in Galilee and there pre-

served until the time when they became the common property of scholars and mystics alike. It would be easy to trace almost every phase and aspect of older mysticism which flourished in Syria, Palestine, and Egypt in one page or another of the books referred to; they will often stand together on one page. It is therefore futile to draw up the system of the *Ḳabbālā* contained in the *Zōhār*, and those systems that have hitherto been evolved out of that book are only partial representations of one section or another, far from exhausting even one of the many writings embedded in the *Zōhār*. Mystical commentators have felt this, and have therefore often singled out one portion as the object of their interpretation. Such has been the case with the so-called *Idra Rabba*, 'The Big Hall,' and *Idra Zutta*, 'The Small Hall,' in Num. and Deut., or again the *Siphra de Seniuta*, 'The Book of the Veiled Mystery,' in Exodus. These were treated either together with other treatises or published and commented upon separately.

The philosophic movement which found its highest expression in Maimonides' († 1204) *Guide of the Perplexed* led to a rationalistic interpretation of the Law, which by its very extravagance called forth the mystical reaction which succeeded in practically extinguishing it.

The *Ḳabbalistic* doctrine then received a great impetus through the works of Nahmanides (1263), especially through his widely read and highly appreciated commentary to the Pentateuch.

Mysticism flourished then. There were other great scholars who had been deeply impressed by the older *Ḳabbalistic* speculations by Nahmanides, Solomon b. Adrat, and others who had formed a school of mystics in Palestine, and especially in Acco. These schools were probably revivals of older schools and mystic circles which continued to flourish unobserved in the mountains and caverns of Galilee, and also on the banks of the Jordan, where from immemorial times schools of prophets, of ascetics and recluses, of Essenes and Hasidim, have continued their mystical speculations and contemplative life. The storm of the Crusade swept over those parts, destroyed the schools, and drove the adepts into other countries. The remnants of their literature were also carried far and wide, and that is, to the present writer's mind, the only explanation of the sudden appearance in the 12th and 13th centuries of such a large number of mystical writings; it is probable that some of these fell into the hands of Moses de Leon, if he is at all to be connected with it. They represent often divergent tendencies, and are the outcome of various schools of thought.

The *Ḳabbālā* entered into ever-widening circles, especially as men of the highest authority in Rabbinical learning confessed themselves to be students of it. No wonder, therefore, that the new mass of *Ḳabbalistic* material should overflow its narrower borders and cover practically the whole field of Jewish learning. The political persecutions to which they were exposed also drove the Jews more and more to an inner contemplative life. Soon after their appearance these mystical writings spread far and wide, and within a short space of time had conquered the mind of the people.

Menahem Recanati (1290-1330) already makes full use of this *Midrash of R. Simeon b. Yohai* in his commentary to the Pentateuch, in which he gives large abstracts—a few years only, as it were, after the death of Moses de Leon. And, if it could be proved that the author of the *Libnat Hasappir* (Jerusalem) had lived before that period, that would at once destroy the legend of de Leon's authorship, for he also quotes large portions from the *Zōhār*. Be that as it may, the *Zōhār* hence-

forth held undisputed sway, and it was universally accepted in the form of the Mantua edition which had the 'imprimatur' of R. Isaac de Lattes. All the other mystical writings, some of which, as shown, were of equal antiquity and of equal importance, were none the less considered of less value.

The influence of the *Zōhār* became still greater when a new mystical school rose again in Galilee in the middle of the 16th century. There R. Isaac Luria (1534-72) evolved a new system of *Ḳabbālā*, a further development of some of the leading principles found in the *Zōhār*, and founded a school in Safed. It became the ruling system, being further developed by his colleagues and pupils, Hayim Vital Calabreze († 1620), Moses Cordovero († 1570), and Meir Popers († 1662). The Jews became then so deeply immersed in the study of the *Ḳabbālā*, and so much intoxicated by the fumes of these mystical speculations, that they easily fell a prey to the Messianic claims of Shabbethai Šebi. The pseudo-Messiah, his prophet Nathan of Gaza, and most of his followers were deeply versed in the study of the *Zōhār*, and were able to manipulate its obscure wordings to further their own purposes. Real learning was sapped by this mystic teaching of the *Zōhār*, which superseded the study of the Talmud and of Rabbinical literature. A prominent place having been given to the efficacy of prayers and their mystical meaning, the whole character of the Prayer Book became almost totally changed by the introduction of mystical formulas, and by the interpolation of mystical names and symbols which almost entirely destroyed the sublime simplicity of the original diction. Through the influence of the *Zōhār* and the *Ḳabbālā*, a new mystical force was developed among the Jews. A spiritual love, an immersion in the Divine, was taught by the founder of the Hasidim to be of higher value, if possible, than the strict observance of the letter of the Law. Thus light and shadow, action and reaction, have succeeded one another with the spread of the *Ḳabbālā*, and notably of the *Zōhār* and the *Zōhāric* literature. Its influence is now greatly on the wane, and the time has therefore come when all the problems connected with that literature can again be taken up and studied in the light of independent scholarship.

The study of the *Ḳabbālā* and subsequently of the *Zōhār* was not limited to Jews alone. One has only to mention Pico della Mirandola, Reuchlin, Paracelsus, and even Luther to show the keen interest Christian scholars have taken in it. Many a Christian scholar found in the *Zōhār* proof of the dogmas of the Trinity, hence a large number of pamphlets c. 1650-1800. Especially meritorious was the work of Knorr von Rosenroth, whose *Kabbala Denudata* (i., Sulzbach, 1677-78, ii., Frankfurt, 1684) has remained the most reliable source for subsequent Christian scholars, down to the latest translation in *The Kabbala Unveiled*, by S. L. Macgregor Mathers (London, 1887).

Jewish commentators ever since the appearance of the *Zōhār* have been busy drawing up glossaries of its rare and technical expressions, and then explaining the text itself, or laying down rules of exegetical interpretation. Some attempted to draw up a system of the *Ḳabbalistic* teaching of the *Zōhār*, but these stood already under the influence of Luria and his school. Towards the middle of the 18th cent., and in Italy before that time, doubts began to be raised as to the genuineness of the authorship, and practically the whole controversy turned round the one question as to whether the *Zōhār* was written by R. Simeon b. Yohai or not. A commentary to the whole of the

Zohār, consisting of twelve folio volumes, the work of a modern scholar in Morocco, was seen by the present writer many years ago, in MS, but so far all traces of its whereabouts seem to have been lost.

LITERATURE.—The fullest bibliography on the *Zohār* and Zohāric literature down to 1863 is that given by J. Furst, *Bibliotheca Judaica*, iii. (Leipzig, 1863) 329-335. For additional bibliography see *JÉ*, s.v. 'Zohar', xii. 693, to which may be added the French translation by Pavly. M. GASTER.

ZOROASTRIANISM.—Zoroastrianism is the religious doctrine attributed to Zoroaster which gradually became the prevalent religion of Irān and notably was the State religion under the Sasanian dynasty (A. D. 211-640). It is still professed by the Parsis of Bombay and by some sporadic communities in Persia. Zoroastrianism is one of the most interesting religions of the world. Its doctrines and rites are well known either in their present form or as they are to be found in the Pahlavi books and in the Avesta (*q. v.*).

1. **Zoroaster (Zarathushtra).**—There is much obscurity concerning the person of the founder and the time and place of his preaching. Although the Avesta is the Zoroastrian Bible, it is quite certain that only a small portion of the book can with probability be regarded as the work of the prophet. That portion is the *Gāthās*, or versified preachings, written in a dialect slightly different from the language of the rest of the Avesta. The Gāthic dialect, the late Avestan dialect, and the language of the inscriptions of the Achæmenids are three closely related forms of Old Iranian.

In the *Gāthās* Zoroaster appears as a very real and human personality, devoid of all the marvellous features which surround him in later literature. He is presented there as the son of Pourushaspa of the Spitama family. For ten years he had only one disciple, *Maidhyoimaonha*, his cousin. At last he converted to his doctrine Vishtāspa, a local prince; but the *Gāthās* show that much resistance still was offered to the prophet, who, in some places, exhibits signs of anxiety. He had undertaken to reform not only the beliefs but also the social habits of the tribes of Eastern Irān among which he had settled. His desire was to deter them from nomadic life and to induce them to devote themselves to husbandry. According to tradition, Zoroaster had come from Western Irān (he is represented as a native of Raghæ in Media), a region which was more advanced in civilization. He was, so it seems, trying to introduce the Western customs into the wilder districts of the East. The names of Zoroaster and all the persons of his and Vishtāspa's families have nothing mythical about them, but refer to horses, camels, etc. In later tradition Zoroaster's birth has been surrounded with marvels. He was supposed to have inherited the *avarenañh* (= O. Pers. *farnah*), or 'glory,' of Yima, the law-giver of ancient ages. The *daēvas* repeatedly sought to kill him. Ahura Mazdāh and the *amesha spentas* entered into communication with him and revealed to him the tenets of the new faith. He is represented as having subsequently travelled in Bactria and in Seistan.

Vishtāspa's conversion took place after the prophet had given miraculous signs of his power. It was followed by a long series of wars against the unbelievers. During those battles Zoroaster was killed near an altar with a group of priests. There was all the time a conflict going on between the sage and sorcerers—a feature which is probably truer to the facts than most of the other elements of the legend. Zoroaster was a Magian who, no doubt, rebelled against the practices of the majority of the members of his corporation. As will be

shown later, Zoroaster's doctrine is a reform and an epuration.

The Magi (*q. v.*) are mentioned by Herodotus as a Median tribe, along with the Ἀπίαντοι ('the nobles') and a few other names which may have referred to groups of the population more or less similar to the Indian castes. In *Museon*, new ser., ix. 121, the present writer has interpreted the name 'Magi' as meaning 'the helpful, the curers or the averters of evil spirits' (cf. Gr. Μαχάων, μῆχαρ, μηάνη). This is quite consistent with what is known of their activities through the statements of the ancients. Astyages consulted them as oneiromancers.¹ They were astrologers, physicians, magicians. While there is little trace of those functions in the Avesta, two of their most characteristic customs have crept into Zoroastrianism—probably after Zoroaster's time: the giving over of dead bodies to the vultures and the next-of-kin marriages. The former of those practices is apparently borrowed from the populations of Central Asia, whose shamans are a kind of prototype of the Magians.

Although Zoroaster occupies a very special position among those Magians, he has been regarded by the Greeks as the Magian *par excellence*. Folk-etymology has connected Ζωροδότης with δότηρ and has contributed in associating Chaldean astrology with the Iranian sage. The Magi of Persia gradually adopted a form of Zoroastrianism combined with less exalted beliefs (cf. below). In this way the name of Zoroaster was attached to Magians and magic by the Greeks, who do not seem to have had—at an ancient period—any clear idea of the prophet's own teaching and real personality. In ancient as well as in modern times Persia was a country of religious thought. Moreover, the Aryans there were in contact with the ideas of Semites, Sumerians, Caucasians.² The unity of faith as it is found in Sasanian times is the final stage of an evolution and has resulted in the suppression of the records concerning the other forms of Mazdæism which existed in Media and Persia and of which some scanty trace seems to have been preserved in Armenian literature.³ Zoroastrianism ignores the Achæmenians. On the other hand, neither these kings nor Herodotus, their contemporary, mention the name of the prophet. This circumstance, of course, is not in favour of the opinion often given that Darius and his successors were faithful Zoroastrians.⁴

2. **His reform.**—Herodotus gives a description of the religion of the Persians which applies admirably to what we know of primitive Aryan religion.

'The Persians ascend the highest peaks of the mountains and offer sacrifice to Zeus, calling the whole vault of the sky Zeus, and they also sacrifice to Sun, Moon, Earth, Fire, Water and Winds. . . .'⁵

For many Persians this sky-god may still have been called Dyāus pitar. The Achæmenian inscriptions, however, show that Darius called his supreme god Auramazda, like the Zoroastrians, and this deity appears there with the lofty features which he possesses in the Avesta. He has an omnipotent will (*vashna*) and an absolute power (*zshathra*). There are representations of the 'confessions' (*fravarti* = Av. *fravashi*) or *genii* of the Mazdæans, an expression preserved also in the name of the Median king Phraortes. Names like Artaxerxes, Artaphernes, etc., show reverence both for *arta* (Av. = *asha*), 'truth,' 'justice,' and for *farnah* (Av. = *avarenañh*), 'supernatural glory of the kings.' Moreover, there is a solemn con-

demnation of *drauga*, 'lie,' which recalls the hatred of the Zoroastrian for the *druj*. On the other hand, the specific name of the spirit of lie, Angra Mainyu, is not mentioned, while much emphasis is laid on other gods (*amityā bagāha*), and especially on Mithra and Anāhita.

Now, it is precisely the originality of Zoroaster's reform to have rejected all the 'other gods,' including those two prominent deities who later found their way back into Zoroastrianism. The use of representations for the gods and the practice of burial are other un-Zoroastrian features, so that one is impressed equally by the striking resemblances and the essential differences between the two creeds. Darius's Mazdaism represents precisely the kind of *milieu* in which Zoroastrianism could have arisen as a special sect, under the influence of a reformer inspired by an exalted religious ideal. It is probable that Zoroaster's school, although it had not yet taken hold of Irān at large, had already existed for some time at that period. The name of Darius's supreme god, Auramazda, is a crystallization of Mazdāh Ahura, 'Wisdom, the Lord,' as it appears in the *Gāthās*. The language of those hymns is much more archaic than Darius's language. Both versification and expression in Zoroaster's sermons have a flavour of antiquity quite familiar to a reader of the Veda. The fact that the dialect is different from the normal form of the sacred language of the Avesta makes it almost certain that it was the vernacular actually spoken by the prophet. This obliges us to push the date of his publication back at least two centuries before Darius's reign. This impression can only be confirmed by the great phonetic adulteration in the names of the Mazdean religious terms as they appear in Pahlavi, the vernacular of Persia from 300 B.C. onwards.¹ While the Pahlavi translation of the later parts of the Avesta is not too far from the original, it gives a very poor rendering of the *Gāthās*, which have been misunderstood both in their expression and in their spirit. The translation of those hymns by J. Darmesteter, based mainly on the Pahlavi rendering, is a demonstration *ab absurdo* of the impossibility of understanding the *Gāthās* in the atmosphere of the 2nd cent. A.D. Darmesteter's great effort to place the composition of the whole Avesta in that period is no less of a failure. His argument is only secondarily based on a few passages of the latest parts of the Avesta which may show traces of Judaic or Buddhist literature. His main reason for placing the Avesta in Neoplatonic times is derived from resemblances between the religious allegories of the *Gāthās* and the *δυνάμεις* of Philo, and especially between Vohu Manah and the Logos. This circumstance has also struck Lagrange.² 'To suppose the gāthic system old,' he says, 'is to suppose the development of philosophy before the Greeks.' The fault of those scholars is that they have mistaken ethical abstractions or allegories for philosophical concepts and have ignored the fact that the antiquity of most of those very conceptions is vouchsafed by their presence both in the proper names of ancient Persia and in the Veda.

Asha (*arta*), 'justice,' 'truth,' the law of men, gods, and the universe is the Vedic *ṛta*. It appears in Artatama, the name of a Mittani king, and later in Artaxerxes, Artaphernes, Artachæes, etc. *Arnaiti*, 'prudence,' 'wisdom,' is the Vedic Aramati, 'prudence,' 'piety'; *Hauredatāt*, 'salvation,' 'health,' is Ved. *saureatātī*; *Ashathra Vairyā*, 'wished-for kingdom,' recalls the *ksātra* of Varuṇa, the great moral god of India, protector of the *ṛta*, in the same way as Mazdāh is the god of the *asha* (= *arta*). Varuṇa is called 'Wise Asura,' just as Mazdāh is 'Asura-Wisdom.'

The very name of Ahura Mazdāh, often regarded as characteristic of Zoroastrianism, has been found in a list of Assyrian gods published by Scheil³ in the form of Assara Mazaash. It is immediately followed by the seven *igigi*, or 'good spirits,' which suggests that the association of Ahura Mazdāh with the *amesha spentas*, 'immortal holy spirits,' may be an old one like that of Varuṇa with the *ādityas* in India.² There are many abstractions in the Veda. It is clear that Zoroaster has combined in a coherent ethical system data which he found around him, transmitted in the teachings of the sages of Irān as well as of India. By comparing the religion of the *Gāthās* with that of the oldest Vedic hymns and with what is known of the current beliefs of ancient Irān one can form an idea of Zoroaster's originality. The Vedas knew of two series of gods, (1) the *devas*: sky, light, storm, etc., i.e. gods as powers of nature (sensuous deities—*theoi*), and (2) the *asuras*, or gods in their relation to men as protectors of morality, inspiring awe, reverence, and fear (*dālmoves*). Varuṇa, the great *asura*, was the ethical god *par excellence*. In later times the term *asura* came to be used of dreaded deities and evil spirits (the moral aspect of divinity with the Aryans was mostly associated with the cult of the souls—e.g., in the Great Erinyses), while the *devas* became the real gods. The exaltation of Ahura Mazdāh in Irān, which is certainly older than Zoroaster, shows that there was a school there promoting the ethical side of religion. As Herodotus shows, however, the people remained attached to the *dāēvas* (= *devas*). Darius's religion is a combination in which the Magian ethical system is predominating. The same compromise eventually prevailed in later matured Zoroastrianism, which accepted Mithra (god of light, etc.), Anāhita (goddess of water, great mother), and the sacrifice of the *haoma* (= Ved. *soma*, 'the drink of life'). The old mythical apparel came back in the *yashts*, or hymns, addressed to the moon, Sirius, the god of victory, etc. But Zoroaster carefully avoids alluding to any of those deities and condemns the sacrifice of *haoma durausha*³ practised by the *kavis*. This very name, execrated in the *Gāthās*, is applied to the devotees of the *devas* in India and reappears in late Mazdaism as the name of a dynasty of legendary heroes. Zoroaster is evidently a radical reformer wishing to extricate the strict monotheism which existed potentially around him from all the concessions which it was making to tradition, and to rid man completely from all allegiance to deities implicated in magic.

The systematic character of his reform is even more clearly seen in his way of handling the moral abstractions. Much older than himself, they had had time to receive a materialization in the religion of the people, while their abstract meaning had not been lost by the priests. In Zoroaster's writings their moral meaning is always the real one, unmistakable for the initiated devotee, but at the same time there is in many passages an allusion to the material aspect of the hypostasis, so that sometimes the text has both an esoteric and an exoteric meaning.

So in Y's. xxxi. 10 the 'cattle-tending husbandman' is called 'the man that furthers Vohu-Manah,' 'Good Mind,' while for a simple devotee this would apply to Vohu Manah as the protecting genius of cattle. Xshathra Vairyā is the 'Kingdom to be wished for,' the 'reign of justice and of Mazdāh,' but it is also 'the genius of metals.' In Y's. xxx. 7 one sees how both conceptions are reconciled: 'By thy retributions through the metal, man may gain the prize.' That prize is often called *xshathra saconham* ('kingdom of blessings'). It is paradise, the kingdom of the righteous, which will follow the universal ordeal through the molten metal. Asha (= Arta) 'Law,' 'Right' is the genius of fire, and, in Y's. xxxiv. 4, it is easy to

¹ Οσλαγνο=Verethraghna, Μισρο=Mithra, Φαππο=Xvarenañh, Σαορσορ=Xshathra Vairyā, on the Indo-Scythian coins—Vohu Manah is rendered in Strabo by Ωμαρός.

find that the connexion existed in Zoroaster's times, although Asha in his writings always means 'Law': 'Of thy Fire, O Ahura, that is mighty through Law (Asha), we desire that it may be for the faithful (*ashavan*) delight . . .' And, indeed, the relation of fire to the great law of the universe is much older, since it already transpires in the Vedas in which *agni*, 'fire,' is called *prāhmanas rāsyā*,¹ 'primogenitus Legis,' *ṛtaprajāta*,² 'natus de Lege,' and very often *ṛtavan*, 'the faithful of Law.'

Armaiti, 'Good Purpose,' 'Prudence,' 'Devotion,' was at the same time a name of the earth, as shown, e.g., in a passage like Ys. xlvii. 3, which literally reads: 'Thou art, O Mazdāh, the Holy Father of that Spirit (Vohu Manah) that has created for us the Ox, bringer of blessings. Good Purpose (Armaiti) is his pasture giving him peace.'

Comparison with parallel passages shows that Xshathra, 'the Kingdom,' is compared to a meadow,³ that the Ox, bringer of blessings, is another name of the paradise.⁴ The passage, therefore, was quite spiritual, but, no doubt, the uninitiated were likely to find in it an invocation to obtain from Mazdāh, through the genius of cattle, that he bestow cattle, while earth would provide meadows and peace would reign. Similarly Haurvatāt, 'Perfect Happiness,' and Ameretāt, 'Immortality,' may express the blessings of future life, but they are also water and plants, and in Ys. li. 7 both meanings are present together: 'Give me, O Thou, the creator of cattle, water and plants, give me immortality and perfect happiness.'

In everything, thus, the reform of Zoroaster appears to us as a purification, a spiritualization of the beliefs current at the time among both the sages and the people. It is also a systematization. The preacher has built up a coherent religious doctrine out of elements provided by a tradition in which the ethical element was predominating.

3. His doctrine.—The substance of Zoroaster's doctrine is to be found in this sentence of Ys. xxx. :

'The two primal spirits who revealed themselves in vision as twins are the Better and the Bad in thought, word and action. And between these two the wise knew to choose aright, the foolish not so.'

This is the essence of Zoroaster's morals which developed later into a large cosmogonic system. By his right choice the man who obeys law (*ashavan*) helps in the final victory of the good spirit, the spirit of the wise lord (Ahura Mazdāh), over the spirit of deceit and treachery (*drug*, Angra Mainyn). Inspired by a right mind (Vohu Manah), he takes his stand against the whole world of the *drug*, its satellites (*daēvas*), its priests (*kavi*, *kara-pan*), its sorcerers (*gatu*) and fairies (*pairikā*), and its cult (sacrifices of living creatures and of the intoxicating drink, *haoma*). He repudiates with special emphasis nomadic life with brigandage and strife, the life of infidels (*dregvant*) and Turks. He leads with wisdom of purpose (*armaiti*) an orderly existence, according to law (*asha*), in obedience (*sraosha*) to the good spirit represented by a moral adviser (*ratu*). In this way he will realize in this world and hereafter the 'wished-for kingdom' (Xshathra Vairya), the kingdom of blessings, the kingdom of the best (Vahista manah), the good reward (*ashi*, *adō*) with perfect happiness (Haurvatāt) and immortality (Ameretāt), that will follow the last ordeal (*yāh mazishsta*) and the renovation of the world (*frashō-kereti*).

4. Mazdæism matured.—Although pure Zoroastrianism was not very mystical, it was fairly abstract and was very radical in its rejection of some essential elements of traditional Persian religion. The profound impression which the prophet made on some elements of the Iranian population has gradually secured the victory to the doctrine bearing his name, but only at the price of a compromise with the current beliefs. Dualism loses its strictly moral character. It is interpreted in terms derived from the old mythical contest found among both Babylonians (Marduk and Tiamat, Zu and Enlil,⁵ etc.) and Aryans (storm-myths in which some god of light or sky kills a dragon).

There were from the beginning two principles,

¹ *Rigveda*, x. v. 7.

² *Ib.* ii. xxiii. 15.

³ Ys. xviii. 11.

⁴ *Ib.* xlv. 6-12.

⁵ M. Jastrow, *The Rel. of Bab. and Assyri.*, Boston, 1893, pp. 538 ff.

independent, hostile, and essentially opposed to one another. The evil spirit (Pahl. Ahriman), spirit of darkness, having arisen from the abyss, has rushed to destroy the light and the creatures of Ormazd (= Ahura Mazdāh). The latter hits him with the *Ahuna-vairya* prayer as a weapon, but the fight is not concluded. There will be a period during which there will be some kind of equilibrium between the power of the two spirits. The good spirit will finally conquer. There are pure and helpful creatures in the service of Ormazd, and impure ones constituting the host of his opponent. The whole world is divided in that way. Any defilement of a good being by an impure one helps Ahriman, but the moral contest of Zoroaster is introduced into this system also, and by his 'right choice,' his good deeds, good words, and good thoughts, man is fighting for the victory of Ormazd.

Mazdæan dualism approaches monotheism closely, since Ormazd is to prevail ultimately and since the evil spirit is a mere negative entity. Moreover, serious efforts were made in Iran to reduce dualism to unity. The Zervanites placed *zervan akarana*, 'unlimited time,' at the beginning of things. Others presented *bakht*, 'fate,' as the ruler of everything. In that dualistic division of the universe the *daēvas* as a whole have remained the servants of Ahriman, and among them are even Indra and Nāsātya (= *Asvins*), who are among the most revered gods of the Indo-Iranians. Yet, under the name of *yazatas*, a few have been admitted into the host of Ormazd. Among them in particular is Mithra, god of contracts and oaths, eye of Mazdāh, the god that gives victory to the armies. His association with the sun, his part as a mediator, as a benefactor of mankind by his killing of the primeval bull, etc., are explained in art. MITHRAISM. The longest hymn of the Late Avesta (*Yasht* x.) is addressed to Mithra. It is one of the finest, with *Yasht* v., devoted to Ardvi Sūra Anāhitā (Y+5), the female member of the great Persian triad: Mazdāh—Mithra—Anāhitā. She is 'lady of waters' and 'lady of birth,' the Iranian equivalent of Ishtar and of the Sumerian Nin-Ellā.¹ She is sometimes identified with a mythical source on Mount Hara, from which all waters flow down in a thousand outlets, fertilizing the earth.

Another *yazata* enjoying a very special position is Atar, 'fire.' For Indo-Iranians fire was the most essential part of the cult. Their priests were *atharvan*, 'fire-priests.' Fire was conceived as a representative of divine essence on earth. It was the great source of life, burning in the bodies of men and animals (as *vohu fryana*, 'good friend'), in the stems of plants (*urvazishsta*), in air and ether, in paradise itself. As *Berezisavanh*, 'very useful,' it shoots up before Ahura Mazdāh and is kept with great care in the fire temples. The fire that represents the emanation of divine essence in kings is the famous *warenahh* (= O. Pers. *farnah*) mentioned above. It decides the fate of the kings. The Avesta preserves a curious myth in which Frangrasyan (Pers. *Afrāsiyāb*), a fiend, in a series of onrushes endeavours to catch hold of the *warenahh*, just in the same way as Zu on high battles for the tablets of fate in Chaldean mythology.²

As to Verethraghna, the genius of victory, he was destined to a brilliant destiny in some quarters—e.g., in Armenia, where, under the name of Vahakan, he usurped all the Herculean exploits of a dragon-killer attributed in turn in Iran to Thraëtaona (Pers. *Faridūn*), Keresāspa, and Rustam.

The *amesha spentas*, 'holy immortal beings,'

¹ Cf. *JAOS* xxxvi. 301.

² Jastrow, p. 537.

however, officially remain at the head of the Zoroastrian pantheon of good gods.¹ They form the court of Ormazd, and, although their moral aspect is not forgotten, their material functions have become paramount. Ahriman is able to neutralize those archangels with a host of archdemons which incarnate the opposites of the virtues represented by the *amesha spentas*. Among them is Aka Manah, 'bad spirit,' opposed to Vohu Manah, Aēshma daēva, 'violence' (the Asmodeus of Tobit's story), etc.

If the *amesha spentas* may be considered as archangels, protectors of the most important portions of creation, the *fravashi* (Pahl. *fravarti*) are like the guardian-angels of all individual persons.² They are a duplicate of the soul, existing before birth and uniting themselves to the soul after death. The name seems to mean 'confession,' 'conscience,' and may be an equivalent of *daēnā*, 'conscience,' 'religion,' which survives a man and is shaped after his conduct during life. In origin, however, the *fravashi* probably are *dii manes*, and their festival among the Parsis has all the characters of an all-souls' day. *Gēush urvan*, 'the soul of the ox,' is to be considered as the *fravashi*, the deified soul, of the ox, and as such the protector of cattle and of all the good things of which it is the symbol. The *fravashi* of all creatures existed already before creation proper. Moreover, the creation of all living things was dependent upon the production of a prototype. The 'tree of all seeds' and the *gaokerena*, 'ox-horn,' 'tree of life,' growing in the sea Vourukasha, are causing all plants to grow and thrive. The primeval bull contained the germs of all animals, and, as mentioned above, its soul nourishes and protects the animal world. The first man, Gaya Maretan, born from the sweat of Ormazd, perished, but his seed brought forth the first pair, Mashya and Mashyoi, from whom all mankind has descended. The soul of Gaya is invoked with that of the bull.

Against all those prototypes of good creation Ahriman spent his rage. Against the *gaokerena*-tree he formed a lizard in the deep water of Vourukasha, that it might injure the tree, but the marvellous *kar*-fish protected it. The primeval ox was also killed by Ahriman, according to the *Bundahishn*, while another myth represents Mithra as the slayer of the animal. Gaya Maretan was a victim of the demons. His seed only escaped, preserved by Armaiti as goddess of the earth.

The cosmogonic struggle is thus found in all aspects of the Zoroastrian creed. As said before, it is also the leading feature in the moral and religious life of the faithful. By the practice of virtue man places himself on the side of Mazda. By sin he makes himself a prey to evil spirits. The duties of the righteous are the upkeep of the worship of Ormazd and the *yazatas*, the preservation of the sacred fire, and the veneration of the dead.

Of personal virtues it is honesty and straightforwardness that are most highly valued. Scrupulous purity is demanded, and this consists not only in abstinence from adultery, rape, unnatural vice, and the like, but also in all manner of ritual performances relating to sexual relations and to all contact with ceremonially unclean persons or objects, especially corpses.³ Charity towards the poor and hospitality towards the stranger are likewise preached as virtues. In the sphere of social virtues, down from Zoroaster's time, the duty of the tillage of the soil and of cattle-breeding is exalted to the rank of a primary virtue. The tenderest care surrounds the ox and the dog.

This extremely moral code is marred to a certain extent by the childish character of some minute observances for which, in the *Vendidad*, sanctions are provided as grave as those which refer to genuinely criminal actions. Thus it is as grave an offence, *e.g.*, to refuse food to a dog as to allow a priest to die of starvation.¹ For a Western conscience the code is also disfigured by the canonization as a virtue in the Pahlavi books of the *khvetukh-dāh*, 'incestuous marriage.' This curious aberration was probably due to a custom of the nobility desirous to preserve purity of blood and breeding. Parsis to-day deny that the word in question is to be translated in this way at all.²

The penances imposed for the expiation of sins or the removal of pollution are manifold. They are indicated at length in the *Vendidad*, which enlarges especially on the number of blows with an ox-goad. Offerings later replaced those bodily penances. Certain crimes, such as cremation and sins against nature, cannot be expiated and make the guilty *pesho-tanu*, 'lost body,' *i.e.* irretrievably the prey of the *druj*. This should be understood to mean that no good acts could make up for those great sins, since Zoroastrianism in its doctrine of merits accepts the principle of compensation.

5. Zoroastrian worship.—The Zoroastrian temples contain the urn in which the holy fire burns. Over it perfumes are sprinkled from time to time. Five times a day a *mobed*, 'priest,' enters the room. The lower part of his face is covered with a veil (Av. *paitidāna*), preventing his breath from polluting the sacred fire, and his hands are gloved. He lays down a log of sandal-wood and recites three times the words *duzhmata*, *duzhukhta*, *duzhvarshata*, to repel 'evil thoughts, evil words, evil deeds.' Every Zoroastrian has, moreover, a sacred fire in his own house.

The liturgy includes the daily recitation of a few verses of the Avesta. For this purpose the sacred book has been divided into short portions which are arranged according to the date on which they must be recited, not according to their natural interrelation, exactly like the Gospels in a Missal. While he recites the prayers, the priest holds in his hands the *baresman*, or bundle of twigs.

Each month and each day has its patron. The chief feasts are the New Year (Pers. *navroz*), the equinoxes consecrated to Mithra, the *gahanbars* at the change from one season to another, the days of the dead at the end of the year, the days of full moon and new moon. The sacrifice consists of an oblation of bread and *myazda* (this term, applied originally to solid offerings, was later applied to milk). Besides this there was, despite Zoroaster's ban upon it, the sacrifice of the *haoma* (=Skr. *soma*), an intoxicating plant of which the stems were crushed in a mortar and the juice strained off; this was presented before the fire and drunk by the officiating priest (Av. *zaotar*, Pers. *zōt*) and his acolytes (*raspi*).

A child at birth has his lips steeped in *haoma*, but he does not become a full Zoroastrian until, between the ages of twelve and fifteen years, he receives the girdle (*kushti*), which he will always wear thenceforward except at night. The presentation of this girdle forms the centre of a ceremony which lasts nine days.³ On this occasion the young man makes choice of a director of conscience (*ratu*).

Marriage is a duty for the Zoroastrian, and its ritual, as celebrated to-day, is borrowed from Hindu customs. The customs and rites connected with death and the exposure of the corpse on *dakhmas*, 'towers of silence,' are described in artt. DEATH AND DISPOSAL OF THE DEAD (Parsi) and

¹ Cf. art. AMESHA SPENTAS.

² Cf. art. FRAVASHI.

³ Cf. art. PURIFICATION (Iranian).

PURIFICATION (Iranian). For three days the soul of the Mazdæan haunts his home, and then takes wing for the judgment tribunal (*ākā*), where it presents itself before Mithra, Sraosha, and Rashnu. Its merits and demerits are weighed in the balance. If neither scale sinks, the soul proceeds to the *hamēstakān*, 'equilibrium.' Otherwise it must take its way to the abode of bliss (Pers. Behesht = Av. *vahishita*, 'best,' or *garōnmāna*, 'house of songs,' home of eternal light, lovely dwelling of Vohu Manah, where the souls rest upon the rugs of gold), or, if it is to be damned, it falls from the bridge of Chinvat into the abyss of darkness with its great variety of torments described in the vision of Arta i-Virāf, the Persian Dante. But that hell is not eternal. There will be a general resurrection when the molten metal will have purified everything and everybody.¹

6. Influence of Zoroastrianism.—The teaching of Zoroaster, after having spread among the Magians, eventually took hold of the whole of Irān. Did it extend beyond the borders of the Persian world? There is still surprisingly great uncertainty on this point, due not only to the fact that few persons have a real knowledge of Mazdæism but also to the difficulty of drawing a line between direct borrowing from Zoroastrianism proper and the more subtle penetration of ancient thought by Iranian (or Magian) conceptions in general. As said above, the probabilities are that Zoroaster preached in Eastern Irān and that the ideas especially associated with him can hardly have reached either Jews or Greeks in a pure form. In the question of the relation of Judaism to Mazdæism one must distinguish between Gāthism, late Zoroastrianism, the doctrines which are transmitted only through Pahlavi books of Sasanian times, and the doctrines which are common to Magism and to the various sects of Irān. As Gaster, after Söderblom, Böklen, etc., shows, there is little in Judaism that can be shown to have been actually borrowed from Zoroastrianism.² Yet this does not exclude a mutual interpenetration—especially in exilic times—between the ideas of Jews who had gone far into the Persian empire and those of the Persians with whom they appear to have felt themselves in real sympathy. It is, however, impossible in our present state of knowledge to obtain any certainty on any particular detail. An important angelology and the idea of a resurrection and of a kingdom of God are found at an earlier period in Irān than in Israel, but the development of those conceptions among the Jews, according to most Semitic scholars, can be accounted for without Persian influence. It is, however, hardly doubtful that this cause acted at least as a ferment.

The only part of the Bible which is directly inspired by Mazdæan (not Zoroastrian) ideas is the book of Tobit.³

As to the similarities of all kinds existing between Christian or late Jewish eschatology and cosmogony and the Mazdæan accounts as found in Pahlavi books, they of course are explainable by the interpenetration of all religious ideas in the near East at the beginning of our era. The Jews here have probably given much to the Zoroastrians, while, in other cases, both may have been submitted to the same influences.

Greek philosophy offers an analogy. Here also up to Hellenistic times one is confronted with an evolution which does not seem to be dependent upon any external factors. Yet, although the originality of Greek thought—as a whole—can hardly be questioned, it is probable that, if we knew more about the movement of ideas in Asia

at that time, we should be able to discover various connexions which do not appear at present. As things are, one can only suspect the influence of the East in a general way on the old philosophers of the Ionian coast. Did Heraclitus, e.g., who was born in Ephesus, hear indirectly of some Magian conceptions? There is in any case a curious resemblance between the conception of *asha* (= *arta*), 'law of the universe,' 'moral law, which manifests itself in fire,' and Heraclitus's first principle, which is a fire, a law of order (*lógos*), a moral law (man's perfection is in his conformity to the law of the universe), and a manifestation of the godhead, opposed to darkness. He, moreover, believed in a world-conflict tending to greater order (*πόλεμος πάντων μὲν πατὴρ ἐστὶ, πάντων δὲ βασιλεὺς*). It is not without interest to point out the fact that Heraclitus's conceptions are recognizable in the complex system of the Stoics. It is admitted by all historians of philosophy that, although this doctrine has to a large extent been derived from the teachings of Greek sages, it has been seriously influenced by Eastern thought. Now the founders of the school, with very few exceptions, came from Cilicia (Chrysippus of Soli, Zeno of Tarsus, Antipater of Tarsus) or Cyprus (Zeno of Citium). Tarsus, a great commercial and intellectual centre, was perhaps the most cosmopolitan city of the Mediterranean. With Hittite and Assyrian antecedents, it became for centuries the capital of a province of the Persian empire. It had a Greek and a Jewish colony. In common with Iranian thought (although one can hardly speak of real borrowing), Stoicism has a prevalent ethical preoccupation, a striving for submission to the law of nature (*asha* = *arta*). *Φύσις* for the Stoics is identical with *λόγος*. This cosmic law is identified with fire, which is God. Men are either wise and good (*σπουδαῖοι*) or fools and bad (*φῶλοιοι*), just as Zoroastrianism only knows of *ashavan* and *dregvan*. Fire will finally consume the whole world in an *ἐκπύρωσις*, which is the exact equivalent of the *mazē yāh* of the Mazdæans. The ethical dualism of the Stoics is in contradiction with their cosmic pantheism, a fact that could be accounted for only by admitting that it has been imitated from an Eastern (Magian?) doctrine.

At Alexandria Hellenistic philosophy was in closer contact with Jewish than with Iranian conceptions. Philo, however, certainly heard of the Magian system. His *δυνάμεις*, or potencies, intermediary between God and the world, in spite of their Greek colouring, are reproducing the idea of the *amesha spentas*. Just as *asha*, 'law of the world,' is the greatest of the latter, the *λόγος*, who at the same time is a *σοφία*, is at the head of the *δυνάμεις*. In man the *νοῦς*, 'spirit,' works in the flesh to raise him through virtue to identify him with the pure spirit of God, just as Vohu Manah, the spirit of Mazdāh, brings man to salvation. This Iranian aspect of conceptions that were mostly Greek has struck Darmesteter to the extent of making him think that Zoroastrianism had developed out of Philonian philosophy. This, we have shown, is impossible, but there is some connexion in the reverse order.

The Neo-Pythagoreans have been most directly under Magian influence, although the fact does not seem to have sufficiently attracted the attention of the historians of philosophy. The fact had probably already struck the ancients, and this may be the origin of the tradition that represents Pythagoras as receiving at Babylon the teaching of the Magians. Although it would be impossible to verify this statement, the case is very different with those who in the 1st cent. B.C. tried to revive his teachings. They were Orientals, and the best

² See art. PARSISM IN JUDAISM.

³ Moulton, p. 332 ff.

known of them, Apollonius, was from Tyana, in that province of Cappadocia which received a peculiarly strong Iranian influence. A sharp dualism of spirit and matter was the fundamental postulate of their theory in the sense that the former was the good principle in life and the latter the bad, unholy principle. God is the *πνεῦμα* (cf. Spenta Mainyu).¹ Between Him and the world there are mediating *dæmons*. In substance they are Plato's *idéai*, but they are regarded as 'thoughts of the divine mind,' which makes them the equivalent of the *amesha spentas*. Man's spirit is in a corporeal prison and has to free itself through purification. It is immortal. Neo-Pythagoreanism is the first Greek system which expressed the principle of authority in the form of divine revelation,² and in this especially it is inspired by Zoroastrianism. Its saints are divinely favoured men who have had the intuition of the divine good mind (cf. Vohu Manah), like Zoroaster and in general all the *ratu*.

Gnosticism with its syncretic tendencies could hardly have escaped absorbing Zoroastrian ideas. There are many systems of *γνώσις*³ which have a dualistic theory of the world in which matter is eventually bad. They all have mediating potencies between God and the world (*alôves*). *Σοφία*, one of the *æons*, attempts a union with God. Now in Plutarch's enumeration of the *amesha spentas*⁴ *σοφία* is the translation of *Armaiti*, the genius of wisdom and the earth. There is a tradition of *Armaiti* as the spouse (or daughter) of Ahura Mazda and the mother of all creatures,⁵ which is nothing but a Magian interpretation of the old mythical marriage of 'heaven and earth.' Christ's 'æon' has joined corporal Christ in the manner of a *fravashi*.⁶ Christ saves the world through science (*γνώσις*) from ignorance and deception (cf. *drugj*).

As to Manichæism (*q.v.*), its relation to Iranian religion has never been doubted. The recent discovery of an important Manichæan literature in Eastern Turkestan, no doubt, will throw much light on the problems connected with that sect which had such a hold on the ancient world. Manichæan dualism is as radical and as cosmological as that of Mazdaism. It recognizes two principles eternally contiguous, distinct and separate. The kingdom of light is guarded by the *æons* (= good angels = *amesha spentas*). The good spirit has a series of virtues. The equilibrium is broken by an attack of the evil spirit, just as in Zoroastrian cosmogony. Man has to fight for the kingdom of God (cf. *Xshathra Vairya*). A great catastrophe (cf. *mazē yāh*) will restore the cosmic order. Jesus 'patibilis' is like a light diffused in the world (cf. *Mithra*). He is accompanied by a Jesus 'impatibilis' (*fravashi*). Salvation, as for the Gnostics, is operated by knowledge. In the ascetic rule of the Manichæan there is a threefold seal of mouth, hands, and bosom, corresponding to the Zoroastrian triad of good words, good works, and good thoughts. There is the same emphasis on purity as in Zoroastrianism, and the head of the society is supposed to represent Mani, just as the head of the *mobeds* was Zarathushtrótēma. Manichæism, in fact, should be considered as a Mazdaian sect contaminated with Christian ideas. Mithraism (*q.v.*) is another scion from the Iranian religious stem. It should be considered, however, as a rival to Zoroastrianism—even to Mazdaism—rather than to one of its aspects.

¹ Windelband, tr. Cushman, p. 344 ff.

³ The word *γνώσις* is the exact translation of Avesta and of Zend interpretation.

⁴ *De Is. et Os.* 47.

⁵ Cf. West, *SBE* xviii. [1882] 417, app.

⁶ The Gnostics, like the Mazdaians, gave two souls to man.

As to the doctrine of Mazda (*q.v.*), which was presented in the 6th cent., it was more social than religious. It advocated State socialism with a communism extending even to women. These theories were associated with asceticism.

Although this review of the influence of Mazdaism is necessarily superficial, and in some parts only tentative, it shows how important has been the part played by that doctrine in the elaboration of the syncretic religious mentality of the near East. The seduction exerted by the Iranian conceptions is to be found in the simple solution which they give to the problem of evil. While the philosopher finds himself almost invariably attracted by some form of a more or less radical monism, the ethical man will find a simple and inspiring background sufficient for practical purposes in the doctrine of the conflict between the good principle and the powers of darkness. Iranian religion is ethical and pragmatic. It furthers activity, productivity, industry. It is decidedly unfanatical. It stands in sharp contrast to Indian faith, which out of the very same original data developed in a metaphysical direction towards pantheism and mysticism.

On both sides popular polytheism has been absorbed into a much more exalted doctrine, which is for the wise men. The Mazdaian system is much less profound, but much more intelligible. It makes for piety and good conduct, while the other is better adapted to meditation and asceticism. The aim of the former is the 'righteous man.' The ideal of the latter is the 'holy man.' The principle of revelation and of spiritual direction, so essential in Zoroastrianism (Zoroaster calls himself *ratu*, 'spiritual director,' or *saoshyant*, 'the coming helper'), is another aspect of its practical nature. The Zoroastrian not only has a clear vision of life after death, and of the means of reaching eternal happiness, but he is striving for the immediate realization in this world of a social, ethical, and religious organization of a very concrete character. This explains both why his religion extended by proselytism and why it gradually became closely associated with one nationality. All the characteristics had prepared it to be a State religion, and so it was under the Sasanian dynasty.

Its religious literature during that period is extensive, but not very appealing. There is no philosophy in it, no poetry, no religious transport, no sentiment. It is a collection of didactic, moralizing, interpretative considerations in which some myths, genealogies, and cosmological and eschatological considerations are enclosed. The translations and commentaries to the Avesta form a large part of it.

On account of its simplicity of cult and doctrine, its lack of mysticism, its belief in a revelation made by a prophet and preserved in a book, Zoroastrianism did not differ enough from Muhammadanism to be able to offer to it the long resistance displayed during so many centuries by Christians in Turkish and Arabic lands. The history of the conversion of Persia is not very well known, because it is to a large extent the story of an adaptation of a religious mentality to new forms without giving up any essential elements of the previous creed. All the traditions of Iran were preserved in Persia under a thin cover of Muhammadanism. Moreover, Zoroastrianism never completely disappeared from Persia, where it is still practised by the Gabars around Yazd. Other orthodox Zoroastrians resorted to emigration and formed in Western India, especially at Bombay, the community of the Parsis which has survived up to the present time.¹

ZULUS.—See BANTUS.

ZUÑI.—The religion of the Zuñi in the town of that name in western New Mexico is, like the religion of the other Pueblos, a highly ritualized structure elaborated upon the primitively animistic religion of the American Indians generally. This Pueblo religion is perhaps the most complex and also most closely welded system of native cults north of central Mexico. Within its compass the Zuñi have evolved an organization even more intricate at some points than that of the Hopi, Keres, and Tanoan groups. Being nearer the heart of Pueblo civilization on the Rio Grande, their religion is more representatively Pueblo in its forms, and more sharply crystallized, than that of the peripheral Hopi. Less exposed, on account of comparative remoteness, to the pervading competition of Roman Catholicism and the inevitably disintegrating influences of Caucasian civilization, than the Keres and Tanoans, the Zuñi have preserved their cults in greater intactness. And their concentration under Spanish influence for over two centuries in a single large town has provided the occasion or stimulus for a special set of elaborations that would not have been feasible while they lived, as the other Pueblos still do, in smaller settlements.

This religion may be examined as to the beliefs upon which it rests, as to the ritual apparatus which it uses, and as to its machinery for relating individuals to the national cults.

I. BELIEFS.—1. Maize.—The most pervading concept in Zuñi religion is a group of ideas connected with the fertilization and growth of maize. This lends a strong symbolic value to all parts of the plant, but especially the pollen, the ripe ear, and the meal; to water, springs, streams, lakes, which promote the growth of maize; to animals associated with water, such as frogs, tadpoles, turtles, dragon-flies; to the mythical horned serpent, inhabitant of waters; to the squash blossom, as the most conspicuous of the fertilizing mechanisms of cultivated plants; to rain, mist, clouds, and therefore to their accompaniments thunder, lightning, rainbow; to the sun as generator and vivifier; and to the genital parts and functions and indications of the two sexes. A few random examples must suffice out of the thousands that might be cited.

The rooms where maize is stored are entered only after prayer and barefoot. Corn meal is sprinkled on altars, on dancers who impersonate gods, and as an offering generally; pollen enters as an ingredient into fetiches and medicines. Most flowing springs are shrines; the *kokko* gods and the Zuñi dead live in a lake; ceremonial objects are destroyed by burial in the Zuñi river. Yucca suds are raised by priests to denote and bring foam and clouds; their bowls bear tadpole and dragon-fly symbols. A whole series of summer dances, and of penitential retreats by the priests, is designed to bring rain. The squash blossom, lightning, and rainbow appear on masks and dancers' accoutrements. The *Oolowishkya* dance is a frankly phallic, though decent, representation referring to maize.

This wealth of symbolic ideas and acts, being organized into a definitely centred system, differs from the equally magical but much more miscellaneous beliefs and practices of most non-Pueblo Indians. The coherence goes far to indicate the developmental antiquity of Zuñi and Pueblo religion; for an unsystematized condition must have preceded the existing interconnected one.

2. Ancestor-worship.—The dead, at least those of them who were Zuñi and tribally initiated, are thought to become *kokko* gods; the first of these originated, long ago, from Zuñi children that fell from their migrating mothers' backs. The *kokko* are the *kachina* or *katsuna* of the other Pueblos—a large and varied class of gods impersonated by masked dancers, whose appearance is thought to bring rain and other benefits. The Zuñi therefore are ancestor-worshippers; but in general it is the undifferentiated mass of the dead that is prayed to or honoured, and there exist no cults of family and lineage.

3. Animal-gods.—The practice of deifying animals the Zuñi share with all other Indians, but work out in peculiar Pueblo form. Since they possess no true shamans, they do not as individuals dream of animals or pretend to receive supernatural potency directly from them. They do, however, associate animals with medicine. The curative fraternities are thought to have been instituted with the help of animal-gods. The fetiches which these societies employ on their altars comprise figures of beasts, especially beasts of prey.

4. Witchcraft.—The belief in black magic and witches is very deeply rooted in the Pueblo and Zuñi mind. Witches are members of the community, often whole families, who practise in secret to the harm and death of other Zuñi or even the entire community. There is some idea that they constitute a society parallel to the recognized curative societies, but of course meeting only in the deepest secrecy. Besides producing epidemics and individual sickness, they cause accidents, blast crops, and neutralize the efforts of the constituted priests to bring rain-clouds. Public sentiment often runs mutteringly against a witch for many years and then suddenly crystallizes. Once an open charge has been made, the victim is tried and often executed by the Bow Priests of the Warrior society. Usually an attempt is first made to extort a confession by suspension by the thumbs or other torture. Until the suspect is accused, he is avoided as much as possible without any open giving of offence, and takes part in public and ritualistic acts as if he were not under the most threatening of clouds. No non-Pueblo Indians possess beliefs as to witchcraft that are so standardized or that so enter into daily life as those of the Zuñi. Among other tribes the evil wizard and the beneficent shaman are often not seriously differentiated. An individual is believed to use the identical spirit or magical power according to circumstances: every shaman is a potential witch and every witch *ipso facto* possesses shamanistic power. This is the attitude of the Pacific Coast tribes. For the central and eastern portions of the continent there does not seem to be so complete a merging of the two sets of powers as this, but the antithetical differentiation which the Pueblos make is also lacking. The causes of the anomalous specialization of Pueblo witchcraft beliefs appear to be twofold: (1) they have outgrown the normal American belief in the shaman, medicine being practised by the heads of highly organized and ritualistic societies, whose leaders enjoy their faculties by virtue of election to their offices instead of receiving them in personal communication with the spirit world; as the beneficent shaman has been replaced by these society heads, so the

evilly-minded shaman has crystallized among the Pueblos into the more or less professional although concealed witch; (2) influence of Spanish civilization must be reckoned with. The whole cast of Zuni witchcraft suggests that of Europe a few centuries ago—the innate and persistent malignity of the witches, the complete secrecy of their operations, the legalized system of accusation, torture, and punishment. As yet there has been no demonstration of derivation from European sources. At the same time it is probable that, when the Spaniard settled among the Pueblos more than three hundred years ago, he was able to strengthen and solidify their beliefs as to witchcraft precisely because these beliefs were already tending towards a status more nearly resembling that of contemporary Europe than that of the other American Indians.

5. **Supreme being.**—Awonawilona has been described as 'the supreme life-giving bisexual power, the symbol and initiator of life pervading all space.'¹ The Zuni do seem to regard Awonawilona as a sort of ultimate power, but the word appears to mean 'those who hold the roads'—'of life' being understood. Awonawilona is therefore not so much a defined single chief deity as a group or class of vague powers.

6. **Origin beliefs.**—The Zuni have a long origin story. In the beginning of things there existed Awonawilona, Sun father and Moon mother, and Shiwani and his wife. *Shiwani* is the Zuni word for 'priest,' but in other Pueblo languages the word denotes 'lightning' or 'thunder,' and in the present connexion it appears to express a deification of the power of priests. Shiwani and his female counterpart are said to have been the parents of the Zuni, who were born in the lowermost of four subterranean worlds, called the fourth or Soot World. They were led out of this by a ladder cut from a pine-tree by two sons of the sun, Kowituma and Watsusi. From the third or Watermoss World they climbed by a spruce to the second or Mud World, and from this up an aspen to the first or highest of the subterranean levels, the Feather or Sunray World, where they first saw faint light. The two guides then led them by a silver-spruce to this world, the place of light of day, the spot of emergence, Chimikyanapkyatea, being located by the Zuni in the west or north-west. They already had priests and fetishes in the lower world and brought with them witches and maize. In fact it was the witches who carried the seeds of things with them, and the Zuni were forced to accept the death-bringers in order not to be deprived of maize. Kowituma and Watsusi appointed Yanowuluha as *pekwine*, or deputy of the sun—the spiritual leader of the nation. The people at first were human but with tails, long ears, webbed hands and feet, and a body-covering of moss. They travelled in a general easterly direction through a long series of places, staying in each four years (time periods), and were closely followed from the lower worlds by the Hopi, Havasupai, and Navaho tribes. Their first stop was at Awisho ('moss'), where their leaders cut their webbed hands and feet and organized the earliest of the ritual societies.

After long wanderings, the head priest sent out his son and daughter Siwulutsiwa and Siwulutsitsa to look for a new abode. The pair, however, committed incest, with the result that ten children of deformed appearance were born, nine of whom, together with their father, are impersonated by the Zuni of to-day as the *koyemshi*, clowns who wear knobbed masks, act as attendants on the other masked dancers, and perform interludes of buffoonery. Siwulutsiwa also made the Little

Colorado and Zuni rivers, and near their junction a lake and in its depths a town, Kotluwalawa ('god-town'), which became the home of the *kokko* gods and the Zuni dead.

In their farther journeyings, as the people crossed the river, the members of the *Tlewekwe*, or Staff society, preceding, the children scratched and bit their mothers' backs until the frightened women dropped them into the water. The children were transformed into tadpoles, turtles, frogs, and watersnakes, and then, swimming to Kotluwalawa, took on human form again and became the first of the *kokko*. The two divine leaders visited Kotluwalawa, found the children adult and masked, and returned to report that they had not really died.

Next Hantlipinkya was reached, where Kowituma and Watsusi assigned clan names to groups of the people. Their place as guides and directors now began to be taken by the diminutive war-god twins, Uyuwewi and Matsailema, sons of the sun and the waterfall. The war-gods soon led the Zuni and allied *kokko* into battle against a group of hostile gods known as the Kyanakwe, the conflict with whom is dramatized in a quadrennial ritual of the same name. Two survivors of the Kyanakwe who possessed fetishes and maize-seeds were adopted into the Zuni maize clan. Still continuing their search for the spot which was to be their ultimate home, the people finally reached the vicinity of modern Zuni, and, after several tentative settlements, found the sought-for middle-place when Waterskate stretched his legs to the ends of the four directions and declared the centre of the world to be beneath his heart. Here Zuni was built, which the Zuni still call indifferently Itiwanna, 'the middle,' or Halonawa, 'ant place,' or Shiwanakwe, 'Zuni place.'

The settlement of the people in this town was followed by the gradual completion of their religious institutions. The *kokko* came from God-town to organize the performance of the masked dances, including the great *shalako* ritual. Then the corn maidens—divinities who had brought maize with them from the lower world—were discovered, frightened and driven away, found again after witches had reduced the Zuni to famine, brought to the town, and induced to institute the *Tlakewe* ceremonial and leave their seed treasures. Kowituma and Watsusi visited Shipopolima, where lived Poshayanki, the great juggler. From him the existing societies received additional powers, and new ones were founded by him. The divine beings who had accompanied Poshayanki in his emergence from the lower worlds were converted into animals to preside over the six directions and to serve as fetishes in the society rituals. The twin war-gods, having taken the first scalp, instituted the victory dance and Warrior society.

Finally a flood drove the people to the summit of the mountain Towayalana until it was stayed by the sacrifice of the son and daughter of the high-priest. Redescending, the Zuni lived in a number of villages (as the Spaniards found them in the 16th cent.); but one after the other these were destroyed by divine anger, until only Zuni proper remained.

The striking elements and traits of this origin story are (1) the ideas of birth from the earth and wandering in search of a final abode; (2) the pseudo-historical cast of the entire myth; (3) the centring of its interest in the tribe as such, balanced by an indifference to speculations on the origin of mankind or animal life; (4) the fullness with which ritual institutions are explained and the contrasting lack of interest in non-ritualized divinities.

II. **APPARATUS.**—The concrete apparatus of Zuni religion, both physical and intangible, is exceedingly elaborate, and only a few of the more striking developments can be touched upon. The

¹ M. C. Stevenson, 23 *REWE* [1904], p. 22.

content of their religion is essentially that of the other Pueblos, but is modified in many details.

1. **Numbers, colours, directions.**—Number symbolism is introduced into every aspect of ritual with monotonous insistence, but is enriched by linkage with reference to colour and direction. The directions are always thought of in a fixed order: north, west, south, east, above, below, to which the middle or whole is sometimes (although usually by implication rather than explicitly) added as the seventh. The corresponding colours are yellow, blue, red, white, variegated, and black. There are prey animals, birds, trees, and a variety of other classifiable natural objects identified with these directions and colours. Maize is actually grown in an astounding variety of colours of the grain, but these are reduced in the Zuni mind and religious practice to the standard six varieties. Where six is not used, the ritual number is four, the above and below being in this case omitted. Periods of time are usually grouped by fours or multiples thereof. Thus certain ceremonials are performed quadrennially, and the number of days for which the priesthoods go into retreat is either four or eight.

2. **Prayers.**—Highly formalized prayers are much used by the Zuni. They are definitely standardized, couched in a language which may be more or less archaic and is certainly ritualized, and are recited in a rapid muttering drone. Certain prayers belong to the constituted priests alone, others are spoken by religious officials or laymen. The tenor is understood even when many of the words are difficult of explanation by the speaker.

3. **Feather sticks.**—The visible embodiment of prayer, and at the same time the most important form of offering, is prayer sticks (*telikyinawe*), short rods to which feathers are tied according to exact rules and which are then set out in shrines or buried in the ground. These feather sticks are 'planted' by every priesthood before every ceremony, by the officials of all societies, for the dead, and on regular occasions such as the recurrent year or moon. They have many slightly differing forms according to their purpose. They are always deposited privately.

4. **Altars.**—Altars of some sort enter into all major rituals. The most elaborate are those of the curing societies. These consist of a painting made on the floor in coloured earths, behind which is set up an elaborate screen of slats which is carved or painted with symbols; and of animal images, stone concretions, sacred corn ears, offerings in bowls, and similar paraphernalia deposited on or about the ground painting. Priests' altars are simpler: the screen is wanting and the sand painting is replaced by one of coloured maize meal. In general, altars are set up indoors for esoteric portions of ceremonies, and put away at their conclusion. Allied to altars are shrines—nearly always out of doors—at which offerings, especially of prayer sticks, are made. These shrines may be springs, clefts in the rocks, or small stone cysts on the summit of knolls. They are visited by priests, by society officials, and by dance impersonators.

5. **Masks.**—The most spectacular apparatus of Zuni ritual is the mask, which is made in enormous variety of elaborate and standardized forms. There are probably a hundred kinds, each with a name and definite place in cult. With a mask go a specific costume and style of body paint, although these are not as diversified as the masks. Every mask represents a deity, and the dancer who has donned one is himself called *kokko*, or god. These *kokko* being the *kachina* of the other Pueblos, many Zuni masks recur among the Hopi or on the Rio Grande. The names are sometimes the same in towns of different stock; at other times they

are as different as the masks themselves are similar. In some instances importation of a mask from one Pueblo to another can be traced by indirect evidence, or is admitted by the natives themselves. In this interchange the Zuni seem to have given and received about equally. Most of the masks are monstrous, some animal-like. This does not argue that the Zuni look upon their gods as terrifying rather than beneficent. It seems that limitations of technical skill prevented the Pueblos from making their masks representatively beautiful, but did not prevent their attaining effects that are grotesquely interesting and decoratively pleasing. In other words, their conceptions of the *kokko* are the result of the masks which it was within the powers of the Zuni to make. Manual ability directed beliefs more than the reverse. This comes out clearly in the fact that many of the masks representing goddesses are bearded. The beard simplifies the construction and allows the wearer's song to issue unimpaired while effectually concealing his identity. It may be added that masks are regarded as extremely sacred, and that the uninitiated children and younger women seem to believe the wearers to be true gods.

6. **Fetishes.**—The most sacred of all material objects in the Zuni religion are certain fetishes called *ettonne* (plural *ettowe*), and these they have developed to a greater extent than the other Pueblos. The *ettonne* shows a fundamental relationship to another class of fetishes called *mi'e* (plural *miwe*), 'maize ear,' which is the form more current elsewhere in the region. The *mi'e* is an ear of maize sheathed in feathers and otherwise specially prepared. It is the badge of membership in the curing orders of the societies. These *miwe* are individual property and are buried at the owner's death. The *ettowe*, on the contrary, are supposed to have been brought up in their present physical form from the lower world, and appertain to groups—priesthoods, societies, clans, etc. They are guarded with extreme care, 'fed' with offerings, never exposed except when ritual definitely provides; and even the room in which they are kept is tabu. They seem to consist of several reeds bundled together and filled with materials that are either precious in themselves or symbolic of the precious things of life: meal, pollen, seeds, turquoise, and the like. The *ettowe* are enclosed in native cotton and kept in wrappings. They number about fifteen each for the priesthoods, the societies, and the clans, besides a few of more special reference.

III. **ORGANIZATION.**—On the side of organization or hierarchy of functioning individuals, Zuni religion has developed in three principal directions: (1) there is a series of thirteen societies or fraternities whose most distinctive function is the religious curing of disease; (2) there is a communal organization which conducts the dances in which the *kokko* are impersonated; (3) there is a series of priests, or rather priesthoods, devoted to the spiritual welfare of the nation. The communal society and the priesthoods are linked by the fact that their objectives, such as rainfall for the crops and other general blessings, are the same. This does not of course imply that they are the historical result of the same impetus. They share, however, in native theory a devotion to the interests of the community at large, whereas the factor of individual benefit enters more definitely into the scheme of the fraternities.

1. **The fraternities.**—The fraternities are thirteen in number and are treated by the Zuni as full equivalents of one another. They are all organized on the same pattern, with membership by initiation, secret meetings, and esoteric rites; and in general they are open to men, women, and children

alike. The only exception is that one Hunters' and two Warriors' societies are entered by men only. These three bodies nevertheless are very similar in organization, rites, and paraphernalia to the curative bodies, thus evidencing the strong tendency of the Zuni to equate all societies, irrespective of differences in their origin or avowed purpose. For instance, the Cholla-cactus people are a Warrior society secondary to that of the Bow Priests. They admit men who have not yet scalped an enemy and thereby attained to membership among the Bow Priests, but who have fought in battle or been wounded. At the same time they resemble the curing societies in that they heal wounds.

(a) *Warrior societies*.—The most unique of all the societies is that of the Bow Priests, not only on account of the limitation of membership, but especially because the members are looked upon as the guardians and physical executors of the decisions of other religious officials. They are the soldiers, as it were, who enforce the decrees of the paramount theocracy and guard the masked dancers. At least one of their number—and if possible two—is chosen as a member by each of the other fraternities to protect the altar and keep out intruders. This is the only case of an individual being an active member of more than one society. The Bow Priest fraternity is also unique in that it alone possesses two heads. These two are the representatives of the twin war-gods, and in this capacity sit with the supreme council of priests as watchers and administrators. It is to them that the execution of witches, *e.g.*, or the taking away of his staff of office from a deposed governor would be delegated.

A Warrior society corresponding to the Zuni Bow Priests appears to have existed in every Pueblo, the development of the institution among the Tanoans and Keresans being very similar to that of the Zuni, whereas among the Hopi the organization was less important, probably because Hopi religion was less centralized.

(b) *Hunters' society*.—The *Saniakyakwe*, or Coyote society, spiritually fosters the hunting interests of the tribe and supervises the rabbit hunts which are a conspicuous feature of the *kokko* worship. It does not treat illness, but its organization and ritual are wholly of a pattern with that of the curing societies.

(c) *Curing societies*.—The remaining societies all heal. They are, however, diverse in origin, according both to Zuni belief and to comparative analysis. The oldest societies, according to native tradition, are the *Ne'wekve* and *Shi'wanakwe*, which correspond to the Clown and Dancing societies of the Rio Grande, the *Koshairi* and *Kwirana*. The *Ne'wekve* have kept the clown features of the *Koshairi*, and sometimes appear in public dances. They also cure, however; and the *Shi'wanakwe* have become purely a curing society, scarcely to be distinguished from any other. The *Ilewekve*, or 'Wood' (*i.e.* Staff-swallowing) society, with the two foregoing, and the Hunters, are the four earliest fraternities in native belief. The *Ilewekve* is given a special position in mythology (see above), and has particular rain-making functions. The Little Fire-brand and the Great Fire-brand societies are said to have originated later, the former being derived from the Hopi and the latter instituted in the period after the mythical Poshayanki began to instruct the societies in medicine. The *Uhuhu*, *Ant*, and *Shuma*' groups are also thought to owe their origin at least in part to Poshayanki. The first of these has no known equivalents among other Pueblos. The second seems to be a local equivalent of the Rio Grande Knife societies; and the *Shuma*' is the equivalent of a *Sayapa* or *Shumaikoli* society elsewhere,

which is distinguished by the possession of masks. The last two Zuni fraternities, the Rattlesnake-medicine-water and Bedbug, must be of comparatively recent origin, since tradition recalls that they arose as the result of splits within the *Uhuhu* and the Little Fire-brand bodies. A close parallelism of ritual confirms tradition on this point.

Each of these fraternities has a head or chief, a speaker or deputy to the chief, a medicine chief, and usually other functionaries. They are divided into orders, the most important distinction being between members who know medicine mystery and those who do not; in most societies only the former possess *mi'le* fetishes. There are special orders for fire-eating, staff-swallowing, and feats of jugglery which vary from society to society. Yet the orders recur: it is not only the Fire-brand societies that eat fire, and not only the Staff society that swallows.

Initiation into the societies takes several forms. The commonest is by sickness. A person seriously ill is 'given' to one of the officials and after cure by him remains almost in the position of an adopted child. If he can afford the necessary payments, he becomes a member. This idea that the purpose of the societies is to cure and that it is curing that constitutes membership is deeply impressed on Zuni consciousness. Another method of admission is by trespass: a man breaks into an esoteric ritual, has seen what he should not see, and can expiate the offence, in fact save himself from the consequences, only by learning the remainder of the mysteries. In practice admission by trespass seems to be a means of legal fiction through which adults can quickly enter a society while in good health. It is also a rule that a member of any society can transfer from one to the other with only a nominal re-initiation. Such transfers are numerous as a result of personal disagreements.

2. *The communal Dancing society*.—Dances, or, it would be better to say, ritualistic exhibitions by masked performers representing *kokko*, are very numerous, and there is scarcely a month when they cannot be witnessed in the streets and plazas of the town. An elaborate set of exhibitions begins at the winter solstice, when a sequence of gods not seen at other times appears. Shortly after follows a series of rites known as the 'cleansing the earth.' Thereupon comes a series of dances called *koyup-chunawe*, in which the members of the six *estufas* synchronously dance on six occasions for one to eight nights. A sort of aftermath are the 'little dances,' which continue irregularly for a couple of months. At about the same period, during spring, occurs the quadrennial initiation with the image of the sacred horned serpent. Towards the end of spring comes the rabbit hunt, participated in by masked performers and the people at large. At the summer solstice a visit is made to the sacred lake of the dead. The return from this is in masks and initiates the series of summer dances, six in number. In late summer and early autumn there fall three ceremonies: the *Owinawe*, a harvest festival under the direction of the Bow Priests, the *Tlahewe*, a maize ceremony performed quadrennially without masks, and the *Kyanakwe*, also quadrennial, which is an elaborate dramatization of a myth and introduces masks not worn on other occasions. The year is brought to a close in the month preceding the winter solstice by the *Shalako*, which from the exoteric aspect is the most sumptuous and elaborate of all Zuni rituals.

These ceremonies are performed by the adult, *i.e.* initiated, males of the Zuni nation, as constituted into the *Ko-tikyili*, or 'kokko fraternity,' *i.e.* God society. It is interesting that the Zuni name this organization as if it were a restricted curing society. Boys are initiated twice, in what

may be described as the involuntary and the voluntary initiations. After the second they wear masks in ceremonies. Women become members only under very exceptional circumstances. The membership is grouped into six sub-organizations about equal in numerical strength, each of which has its own *kiwitsine*, or 'estufa,' i.e. ceremonial chamber. Membership in these estufas is arranged on a criss-crossing plan. A man after initiation joins that estufa to which belongs the husband of the woman who first touched him at birth. This brings it about that estufa affiliation does not follow the lines of cleavage formed by clans, curing societies, or other groups, and normally puts father and son in different estufas. Each estufa makes its dances separately; and, even in what may be called strongly communal rituals, the mask allotment and other functions are on an estufa basis. The entire God society is under the direction of a 'god chief' and a 'god speaker' who must be members of certain clans. The whole organization is intricate, as is necessary for the continuous practice of so elaborate a ritual. At the same time it obviously is closely knit, as if designed to prevent its breaking apart into conflicting units. Even the competitive rivalry which the six estufas evince tends to make them feel themselves parts of a whole.

3. **Priests.**—Above and apart from the societies and the communal God society stand the 'rain priests,' *shiwani* (plural *ashiwani*), to whom is entrusted the spiritual welfare of the nation. They take as little part as possible in mundane affairs, do not dance, go into fixed retreats for fasting, penitence, and meditation, and by the blamelessness of their conduct, concentration of mind, and sacredness of office, are thought to keep peace, cause the community to prosper, and above all bring the rains upon which the crops and sustenance of the people depend. In Zuni theory public ceremonies are largely only an esoteric accompaniment to the still more important esoteric activities of these priests. They are organized into fifteen sets, each of which consists in theory of a priest proper, his associate and prospective successor, two assistants, and a female associate. The last, in spite of her venerability, is not properly a priest, but has special duties connected with the care of the fetish which is the vehicle of continuity of each priesthood through the generations. In practice the constituted membership of each priesthood is sometimes greater or less than this scheme demands.

The first four of these fifteen priesthoods, those which 'go in' first in the series of penitential retreats, and represent the north, east, south, and west, are the most sacred. Among these the first, the 'house-chiefs,' again have the primacy. The fifth priesthood is anomalous in consisting only of the *pekwine*, or 'speaker,' of the sun, who is the regulator of the calendar and the guardian of public sanctity, and is expected to be the individual removed above all others from worldly affairs. He typifies the 'above,' whereas the 'below' is represented by the two head Bow Priests, representatives of the war-gods. Strictly, neither *pekwine* nor the Bow Priests are priests like the others; but they are so reckoned by the Zuni, and, on occasions such as the retreats spoken of, function like them.

The source of government in Zuni is theocratic. There are a governor and other civil officials; the priests do not interfere in the affairs of men. The civil officials, however, are chosen or nominated and can be deposed by a supreme council of six priests—the 'daylight people,' as they are called. These consist of the chief priests of the four first sets, with two additional priests from the first

priesthood. The Bow Priests sit with the council as guardians and execute all its decisions. The head of the council, and in fact of the entire Zuni hierarchy, is the *kyakwemosi*, or house-chief proper, whose power is almost that of a pope.

4. **Origin of the hierarchical system.**—This intricate hierarchical organization has parallels among other Pueblos, but has nowhere else attained the same degree of elaboration. Its power and sanctity are so great as to leave a first impression that the hierarchy is the basis of all Zuni religious organization. Analysis and comparison, however, reveal that it is of secondary and probably rather late origin. The 50 or 60 priests represent an elaboration of a smaller number; probably this nucleus was the six 'daylight people,' since such a body functions on the Rio Grande without the accompaniment of additional priesthoods. The kernel of this group of six appears to be its primate, the house-chief, who in authority and sanctity corresponds to the *tiamoni*, or 'cacique,' of the Rio Grande Pueblos. There too he always has a speaker or deputy, has his decisions executed, if need be, by the heads of the Warrior society, and is aided in council by associates, who are normally the heads of the leading fraternal societies. This simpler organization of the Rio Grande obviously makes a less sharp distinction than the Zuni one between priests, curing societies, and the communal dance organization. The course of development at Zuni seems to have been that the concept of the cacique, or of the cacique *plus* deputy, was reduplicated first into a group of four or six priests; that then these were given associates and assistants; and that finally still other priests and associates were added, until the present large number had been attained. The luxuriance of this development led to such abundance of material for specific priestly purposes that the curing society heads became unnecessary in this connexion and came to withdraw from the hierarchical organization, restricting themselves almost exclusively to the functioning of their respective societies. The same process carried further probably led to a more complete separation of the communal, or *kokko*, society. As this grew in independence, it came to need more organization of its own. One result of this process of differentiations seems to have been the limitation of the estufas to the communal society—a condition which occurs only at Zuni. In general, then, the special traits of Zuni ritual organization are a greater functional differentiation and consequent greater elaborateness than elsewhere, but without loss of coherence.

The principal cause in this development is likely to have been the size of Zuni Pueblo. It may be suspected that, while this people lived scattered in half-a-dozen independent towns, the organization of each was more similar to that of the Keresans and Tanoans. When, however, under the influence of the Spaniards and perhaps of Navaho and Apache raids, the Zuni more than two centuries ago assembled in a single town, the concentration in numbers may have forced, and certainly stimulated, a tendency towards systematization. Where half-a-dozen ill-defined priests had sufficed for a population of a few hundreds, a larger number with more specialized functions would be called for in a closely compacted community of two or three thousand. It is also possible that the example of the ever-present Roman Catholic priest may have aided in this development, especially as regards the rain-priest as distinguished from the society heads and dance directors. It does not appear, however, that this influence was more than secondary at best. Both the nature of the priestly office in the Zuni mind and the fact that a similar development failed to take place on the Rio Grande,

where Roman Catholic influence was even stronger, point in this direction.

Nat. Hist.*, xviii. [1917] 39. There are dozens of brief studies, most of which are referred to in one or the other of the foregoing works. A. L. KROEBER.

ZWINGLI.—1. Early years.—Ulrich (Huldreich) Zwingli was born on 1st Jan. 1484, in the little township of Wildhaus—the highest village in the Toggenburg valley. He sprang from its most prominent family. His father was a leading farmer and the chief magistrate. His uncle Bartholomew was the parish priest, and afterwards (1487) dean of Wesen. The clerical traditions of the family on both sides determined the boy's career. His education, begun at Wesen with his uncle, was continued at Basel and Bern. In his school-days his progress in learning seems to have been less conspicuous than his proficiency in music. In fact, his musical gifts nearly made him a monk. At fourteen he was sent to the University of Vienna, apparently because it was a centre of the Humanists. He may have spent at least one term in the University of Paris.¹ But neither Vienna nor Paris was to be his real Alma Mater. In 1502 he returned to Basel. For four years he studied there, supporting himself by teaching, and graduated in 1504 as Bachelor and in 1506 as Master. So ended his school and university career, spent in Humanist schools and universities, but following the familiar Scholastic routine, for which there was as yet no substitute. It was not till later, during his first cure of souls, that the Humanist impulse was to become so strong that it burst the old bottles.

2. Early ministry.—Immediately on graduation he was appointed parish priest of Glarus, where he remained for ten years (1506-16). There his effective education began. He seems at first to have been absorbed in classical studies, in music, and in the history of his native land. Typical of those days is the *Fable of the Ox*, his first literary effort, a somewhat crude warning against the dangers that lurked in the popular mercenary service. But that his opposition was not irreconcilable is manifest from the fact that in the campaigns of 1513 and 1515 he served as chaplain with his own men from Glarus, being with them both at Novara and at Marignano. His experiences in Italy undermined some of his accepted tenets about the authority of the Church, and just at the moment when doubts and questions were jostling in his mind he came into contact with a whole new world of thought through Erasmus. Erasmus's programme of a 'restoration of Christianity' through the *philosophia Christi* fired his imagination. He caught at once his contempt for Scholasticism and his conviction that the true Christian philosophy was to be found only in the moral teaching of Jesus and of His great disciple, Paul. 'Ad fontes' became his motto. So in 1516, when Erasmus published his Greek New Testament, Zwingli was an early reader, and very soon most of it was transcribed into note-books to be learned by heart. Acquaintance with it revealed how far the Church which he had so lately imagined unchanged and unchangeable had really fallen away from the NT standard. With an alert and critical mind he began to study what traces he could find of the stages of this decline in Christian history.

¹ So W. Köhler, *Zwingliana*, Gedenknummer auf Neujahr 1919, p. 7.

Meanwhile his hostility to the mercenary service had been growing, and a second poem called *The Labyrinth* proved unacceptable to the warlike parish of Glarus. Zwingli, therefore, accepted the position of preacher at Einsiedeln, the great pilgrimage resort of Switzerland. Here he came to know at first hand superstition, saint-worship, relic-worship, and the abuse of indulgences. During his two years at Einsiedeln Zwingli was advancing steadily towards the Reformed position. Can we say further, with some of the early historians of the Reformed Church, and as Zwingli himself more than once asserted, that in those days at Einsiedeln he had already reached his full Reformed position, and that, in consequence, he anticipated Luther? We cannot. The papal pension (continued till 1520) and the pilgrimage to Aachen (1517) are conclusive. But it is clear that, if his conscience was not yet touched, his mind was awake, and the amount of Scriptural and Patristic knowledge he acquired during those two years is a real matter for wonder. Alike in moral life and in teaching he was still Humanist rather than Reformer.

3. Work in Zürich.—On 27th Dec. 1518 Zwingli removed to Zürich, which was to be henceforward the centre of his activities. He went as people's priest in the Great Minster. At the beginning of the year he announced his programme from the pulpit. He was going to expound the Scriptures, book by book and chapter by chapter. He began with St. Matthew's Gospel, the favourite book of the Humanists because it contained the Sermon on the Mount, the basis of the *philosophia Christi*. Then came the Acts of the Apostles, that in the primitive Church men might see after what pattern the Church ought to be. Then followed Galatians and 1 and 2 Timothy, to make Paul's teaching familiar; then the two Epistles of Peter, to show how Peter agreed with Paul. By 1525 Zwingli had preached through the whole of the NT. Long before that, however, the Reformation had been established. From the first his preaching was so fresh, so full of new ideas, that the services were thronged. Very soon he had to begin a market-day series, on Fridays, on the Psalms. One of the strongest proofs of his popularity and influence is that, in the very first year of his preaching (1519), a bookseller came to Zürich and placed his printing-press at the service of the new movement. This was Christopher Froben; round Zwingli and him there gathered at Zürich a literary circle comparable to that already assembled at Basel round Erasmus and Froben.

The year 1519 saw a deepening of Zwingli's convictions. This was due partly to the early works of Luther and partly to the coming of the plague, with which Zwingli, who had fearlessly returned to duty after its outbreak, was attacked. These two together seem to have hastened him along the road he was unconsciously travelling, from Erasmian to Reformer. Simplification of the liturgy and drastic action in regard to mercenary service were premonitory symptoms of the breach that was coming. The first definite move in the religious revolution came in the Lent of 1522, as a result of Zwingli's preaching, though he himself took no part in it. The form it assumed was a revolt against the law of the Lenten fast. Zwingli was not slow in justifying the action of his friends. In their defence he published his first Reformation tract *Von Erkiesen und Freiheit der Speisen* ('Concerning Selection and Liberty in Foods'). The City Council incurred the anger of the bishop of Constance by dealing, and dealing leniently, with the offenders. In August 1522 Zwingli issued his first Reformation treatise of any length, the *Archetyles*, which did in Latin and for the learned

what his next works, the *67 Articles*, and their *Exposition*, did in German and for the common people. In the beginning of 1523 took place the first Zürich disputation, of which the *67 Articles* formed the programme. It was a triumph for the party of reform, and a great personal triumph for Zwingli. At its close the Great Council pronounced its decision that the accusations of heresy against Zwingli were unfounded, and that he was 'to continue as before to proclaim the Holy Gospel, and the true, Divine Scriptures.' Further it declared that all other preachers and pastors in the city and the country were 'not to preach anything which they could not establish by the Holy Gospel, and the pure, Divine Scriptures'; and that they were to refrain from personal controversy and bitter names. The victory of the Reformation in Zürich was thus assured. But the practical steps remained to be taken, and these involved divisions of policy and further disputations. The monasteries began to empty. Better uses were at once found for them as hospitals and academies. The Great Minster was transformed into something not unlike a Theological College. The energy spent in the performance of innumerable masses was transferred to Biblical and Biblico-theological instruction. A vernacular ritual came into use, first in the Sacrament of Baptism. Change in the Lord's Supper was much slower. The old service held its place in Zwingli's own Church till April 1525.

Sporadic and unauthorized removal of images and the imprisonment of the offenders led to the second disputation in Oct. 1523. The programme of removal and the gradual change of ritual were put into the hands of a committee of laymen and ministers whose business was to devise means 'for moving forward the work of Christ.' The line along which they moved forward proved unacceptable to the few remaining adherents of traditionalism in Zürich, and their protest was the occasion of the third disputation, in Jan. 1524. Its decision was an order to these Scholastics to carry out loyally the line of action of the Council. The breach with the old order was complete, and the new order rapidly took shape. The temporary committee gave place, in 1525, to church courts for discipline and for marriage cases. By 1527 a synodical organization was complete. During all these revolutionary actions the pope pronounced no anathema. He was still not without hope of military help from Zürich. Zürich, in turn, encouraged the hope, for it was waiting for arrears of military pay. The Swiss mercenary service had made the path of Reformation much smoother than in Saxony.

4. **His varied activities.**—During the third decade of the 16th cent. there can have been few busier men in Europe than Zwingli. One might thus catalogue his manifold labours.

A. He had to think out his plan of Reformation, and to communicate the conclusions he had reached to a great host of active sympathizers in other centres by letter and to the general public in book and pamphlet.

In addition to the works referred to above, mention should be made of the *Short Christian Introduction*, the nature and intention of which are fully indicated in its extended title, 'A short Christian introduction which the honourable Council of the city of Zürich has sent to the pastors and preachers, living in its cities, lands, and wherever its authority extends, so that they may in unison henceforth announce and preach the true Gospel to their dependants'; *Der Hirt* (1524), or, as it is called in the English translation of 1650, *The Image of Both Pastors*, an expansion of a sermon preached to the pastors present at the second disputation; the *Commentary on the True and False Religion*, the most comprehensive summary of his mature teaching; the treatise *On Divine Providence*; and the *Confession of Faith* presented to the Diet of Augsburg (1530), generally known as *Ratio Fidei*.

B. From the pulpit and by private interview he

had so to educate the people of Zürich and, in particular, the members of its governing bodies, that they would be prepared to take action along the line of Reformation, no matter what it should cost.

Although Zwingli's official position from 1525 was that of head of the Carolinum, the theological college of Zürich, he continued his public expositions of Scripture, passing to the OT—especially the Prophets—when he had run through most of the NT.

C. In order that the Evangelical reforms might be firmly rooted in the intelligent sympathy of the people, it was necessary that the Bible should be put into their hands in the vernacular.

Here his task was lightened by the industry of Luther. Luther's NT, finished in the Wartburg in 1522, was being printed in Zürich in 1524. This was speedily followed by the historical books of the OT. But Zwingli could not wait for Luther's translation of the Prophets. So an independent translation was begun, and finished in 1529. A complete German Bible appeared in Zürich in 6 volumes by 1529, and a single-volume edition in 1530. Switzerland, therefore, had the Bible complete several years before Germany. Though the main burden of translation fell on his friend and colleague, Leo Jud, Zwingli's share in it is by no means negligible.

D. He had to defend his Reformation against radicals who thought that Zürich had not gone half far enough.

This radical element, which was to develop into Anabaptism, made its first public appearance at the second disputation. Conrad Grebel was their leader, and their point of view was that a clean sweep ought to be made at once of images and ritual and all the disastrous accumulations of fifteen centuries, and that this was Zwingli's esoteric teaching. In particular, they challenged Zwingli to produce any Scriptural warrant for tithes or infant baptism. In 1524 these dissidents were confirmed in their positions by two visitors from the Anabaptists of Germany, Thomas Münzer and Andreas Carlstadt. This widened the breach. Zwingli saw the Reformation movement slowly disintegrating into two, and saw some of his friends taken captive by what they felt to be the purer Biblicism of the new movement. He appealed to them not to form a separate body. The appeal was in vain. The separation took place. For the healing of the breach Zwingli proposed the inevitable public disputation. The first took place in Jan. 1525. The decision was against the Anabaptists. And it was followed by a decree that all unbaptized children must be baptized within a week, or their parents would be banished from Zürich. The council soon proceeded to severer measures. One of the leaders suffered death by drowning, and others were banished.

No movement could have given more trouble to Zwingli. As they took their stand on Scripture, and as Zwingli claimed to do the same, the controversy was the fiercest he was ever called upon to face. The impression left by his numerous treatises is that, to find grounds for condemning them and their practices, he was driven to exaggerate the non-essential peculiarities of the movement. It was not these writings, but the fate of the Peasants' Revolt in Germany, that eased the strain.

E. At the same time as he was called upon to encounter radicals within the movement he had to deal with champions of the old order. The most prominent phase of this was the disputation which, after long negotiation, took place at Baden in 1526. Ecolampadius of Basel and John Eck were the protagonists. Zwingli was not present. But

much of the work fell on him. Messengers were constantly coming and going. Thomas Platter's autobiography gives a vivid picture of the extent of his assistance. The disputation served Eck's purpose, in increasing Lutheran suspicion of the unsoundness of the Zwinglians in regard to the Lord's Supper. We note here also the more important of the relevant controversial works: the *Antibolon* (1524) against Jerome Emser, 'defender of the canon of the Mass'; and the *Answer to Valentin Compar* (1525).

F. He had to take a large part in the first phase of the prolonged controversy between Lutherans and Reformed concerning the Lord's Supper. For details see art. EUCHARIST (Reformation and post-Reformation period).

G. During those years Zwingli was drawn more and more into the main stream of federal politics. The rival confessions within the confederacy and their rival leagues created a situation which demanded the constant vigilance of a statesman. And it was on Zwingli that Zürich leaned.¹

H. In the midst of all these labours Zwingli maintained his Humanist studies. In 1526 there was published in Basel Ceporin's edition of the poems of Pindar, with a preface and a conclusion by Huldrychus Geminius.

I. But the main concern of Zwingli during the later 20's was to secure the Reformation in Zürich by introducing Reformation teaching and practice into every city and canton of the confederacy.

In Bern the value of the preparatory work of Berthold Haller was revealed by the thoroughness of the Reformed victory in its disputation in Jan. 1528, in which Zwingli took the leading part. This same disputation brought to a head the new movement in Basel, where Ecolampadius had long been actively at work. Vadianus was his correspondent in St. Gall, which, with Glarus, Schaffhausen, and Appenzell, followed Zürich's example in Zwingli's lifetime. A certain measure of success was attained in the allied Granbund, but elsewhere the results were meagre.

5. The last years.—Certain of the cantons were untouched by the Reformation, and were as keen to retain the 'common lands' as Zwingli was to win them. A cleavage within the confederacy appeared, and deepened into uncompromising hostility. The League of the Forest Cantons, formed at Beckenried in 1524, was soon faced by a counter-alliance. Both parties made a strong bid for outside help, but, before any effective assistance had been secured by either, the first Civil War broke out. It was short and bloodless. There was no battle. The two armies which came face to face at Cappel (1529), instead of fighting, negotiated terms of peace. The terms were a triumph for Zürich, but it speedily appeared that there were more than one possible interpretation of them. The civil war had only been postponed. The feverish search for outside alliances continued. The Marburg Colloquy, in Zwingli's mind, was no unimportant part of this quest. More time was spent by Zürich and by Zwingli in fruitless foreign negotiations than in independent preparation. Amid all this talk of help from outside it ceased to manifest the old self-help. The war began by a blockade of the Forest Cantons, which only served to rouse them to more vigorous action. They took the field in force. Zürich's improvised resistance was a failure. For Zürich the battle of Cappel (1531) was a veritable Flodden. Zwingli was among the slain. In his forty-eighth year this great pacifist and patriot fell on the field of battle. The second treaty of Cappel reversed the first. But under Henry Bullinger and his associates the

work of reformation continued, though the leadership of the Swiss Reformation soon passed into the hands of Geneva.

6. Appreciation.—Very diverse judgments have been passed on Zwingli's doctrine and work. Apart altogether from those who know him only from some inadequate statement of his doctrine of the Lord's Supper and who, in consequence, use the name Zwinglian almost as equivalent to rationalist, among those who are professed students of his teaching there is a sharp division of opinion. On the one hand it is said: 'His world of thought, as a whole, and also in its inner component parts, is more mediæval' [than Luther's].¹ The opposite is just as confidently maintained: 'Luther took up his station on the ground already occupied by the Latin church: his desire was only to purify; to put an end to the contradictions between the doctrines of the church and the gospel. Zwingli, on the other hand, thought it necessary to restore, as far as possible, the primitive and simplest condition of the Christian church: he aimed at a complete revolution.'² Now, without doubt, in the collected works of Zwingli, written at different times, out of the heart of widely different controversies, it would be easy to find material for justifying either of these conclusions, but not much progress is made by bandying about the word 'mediæval' as a term of reproach. In essentials Zwingli and Luther were nearer each other than they let themselves believe, as Martin Bucer saw. Having regard to its purpose, one must call the Marburg Colloquy a failure, but it did reveal how much at one the protagonists were. There was, certainly, a difference of emphasis. Zwingli had not the same all-transforming, world-renewing experience to drive him onwards. His theology was more Biblical than experimental. Even when he had caught the thrill of Luther's protest, it came to deepen rather than to change the direction of the impulse he had received from Erasmus, the desire to explore the sources, to get back to the simplicities of primitive Christianity, to the pure, untainted Church of the NT. It is significant that the Zürich Reformation followed hard after Zwingli's exposition of the Acts of the Apostles, interpreted as historically as the knowledge of that day would permit. It is significant also that the full programme of the *67 Articles* has this preface:

'The articles and opinions below, I, Ulrich Zwingli, confess to have preached in the worthy city of Zürich as based upon the Scriptures which are called inspired by God, and I offer to protect and conquer with the said articles, and where I have not now correctly understood said Scriptures I shall allow myself to be taught better, but only from said Scriptures.'³

Further, largely in consequence of this Biblicalism, the reformation he directed was more radical. What Zwingli specially detested in the later growths which had buried this early Christianity was anything that could be called 'the worship of the creature.' Worship belonged to God alone, 'the God and Father of our Lord and Saviour Jesus Christ.' He did not undervalue art or music in themselves—far from it—but, when they were so employed as to hinder an intelligent approach to the Creator, then to him they were anathema. The most conspicuous feature of Luther's protest against mediævalism was its anti-Judaic side—his hostility to its conception of work-righteousness; in Zwingli's it was the anti-pagan—his hostility to its idolatrous corruptions.

This note was dominant at the beginning, and, despite all alterations and deepenings, it remained dominant to the end.

¹ R. Seeberg, *Dogmengeschichte*², Leipzig, 1917, iv. i. 357.

² L. von Ranke, *Hist. of the Reformation in Germany*, London, 1905, p. 521.

³ S. M. Jackson, *Selections from Zwingli*, Philadelphia, 1901 p. 111.

¹ For these political movements see an excellent brief account in *Cambridge Modern History*, ii. 326 ff.

'Eight or nine years ago,' he wrote in 1523, 'I read a comfortable fiction written on the Lord Jesus by the learned Erasmus of Rotterdam: in which Jesus complains that men do not seek all good things from Him, whereas He is the fountain of all good. Then I thought if this be the case, why do we seek help from the creature? I began to search in Scripture, and the works of the fathers: whether I could find there any certain information with regard to prayer to Saints. In short I found nothing of it in the Bible at all; amongst the ancients I found it in some, and not in others. However, it did not much move if they did teach prayer to saints. For they always stood on testimony alone. And when I read the Scriptures which they quoted for this purpose, in the original, they had no such meaning as they wished thrust upon them; and the more I considered this doctrine of opinion, the less authority I found for it in Scripture, but rather more and more against it.'¹

This and similar autobiographic reminiscences can be too strongly stressed. We must ever remember that most of them are influenced by his claim to independence of, and priority to, Luther. But in them all there appears, undesignedly, this anti-pagan interest.

Zwingli's radicalism is perhaps most apparent in his keen eye for, and his strong detestation of, what the Scottish Reformers were accustomed to call the 'dregs of papistry.'

Still further, this difference of emphasis is apparent in the doctrine of God, not so much in its content as in the place it occupies in the system. Though Zwingli doubtless owed heresomething both to Seneca and to Pico della Mirandola, his doctrine, like Luther's, is accurately enough described as Pauline and Augustinian. No one, however, would be likely to seek in his doctrine of God Luther's fundamental conception: it is otherwise with Zwingli.

'While Lutheran Protestantism protested against the Judaizing righteousness by works, it asked the question, What is it in man that wins salvation? and gave the answer, Not works but faith, whereas the Reformed Protestantism asked, Who is it that saves, the creature or God?, and answered, God alone, salvation being referred to its ultimate source in the fore-ordaining and determining will of God.'²

This trend of Reformed Protestantism is not to be traced to Calvin alone; it goes back to Zwingli. Though not so evident in his earliest Reformation treatises, it began to be increasingly evident in the controversies with the Anabaptists. One of their strongest arguments against baptism as practised by the Reformers was that the infant was incapable of the faith which alone could give it meaning; to which Zwingli replied that baptism might easily precede faith, for election does: 'antedecti igitur electio fidem';³ indeed, 'ii qui electi sunt, filii dei sunt anteaquam credant.'⁴

From all this, leaving out of account their great divergence on the doctrine of the Lord's Supper,⁵ it is evident that Zwingli was no mere echo of Luther from the mountains of Switzerland, but that he evolved a type of reformation, pursuing a parallel path, which was determined largely before ever the news of Luther's heroic stand at Wittenberg gave it the momentum which carried it to victory. What Zwingli contributed to it was the Humanist training and the Humanist outlook.

³ *Werke*, Zürich, 1823 ff., iii. 426.

⁴ *iii.* 426.

⁵ For which see art. EUCHARIST (Reformation and post-Reformation).

Nor did he ever forget them. One of the things which made Luther doubtful if Zwingli were a fellow-worker or, indeed, a fellow-Christian was his continued regard for the heroes of classical antiquity, whom, in his very last writing, the *Fidei Expositio* (1531), addressed to Francis I., he placed along with the OT worthies and the saints and fathers of the Church in the heaven he hoped to reach.

'Denique non fuit vir bonus, non erit mens sancta, non est fidelis anima, ab ipso mundi exordio usque ad ejus consummationem, quem non sis isthic cum deo visurus.'¹

Humanist, Biblical scholar, Protestant, liberal, patriot as he was, Zwingli could never have been the main agent in carrying through an epoch-making reformation, even with the conditions to help him: he lacked the passionate earnestness and driving force of Luther; but, with the aid of Luther's work, he did accomplish a reformation to which many in our generation feel more strongly attracted than to either its great German counterpart or even its Genevan completion.

LITERATURE.—The best guide to all but the most recent Zwingli literature is to be found in G. Finsler, *Zwingli-Bibliographie*, Zürich, 1897. Later studies are fully dealt with in *Zwingliana*, do. 1897 ff.

i. *Works*.—The earliest collected ed. was that of R. Gualther, Zürich, 1545, which was superseded by the excellent ed. of M. Schuler and J. Schulthess, 8 vols., do. 1828-42 (Supplement, 1861), which in turn is now giving way to the ed. in progress in the *Corpus Reformatorum*, vol. 88 ff., ed. E. Egli, G. Finsler, and W. Köhler, Berlin, 1905 ff. An English tr. was begun under the editorship of S. M. Jackson, vol. i., New York, 1912, to whom also we are indebted for *Selections from Zwingli*, Philadelphia, 1901. An admirable summary of the contents of Zwingli's writings is that of P. Wernle, *Der evangelische Glaube nach den Hauptschriften der Reformatoren*, vol. ii. 'Zwingli,' Tübingen, 1919. A popular ed. in modern German of Zwingli's main writings is that of G. Finsler, W. Köhler, and A. Rüegg, Zürich, 1918. Mention should be made, too, of O. Farner's similar ed. of Zwingli's letters, Zürich, 1918.

ii. *Life and teaching*.—Among the older biographies and the more recent treatments the most valuable are: J. C. Mörikofer, *Ulrich Zwingli nach den urkundlichen Quellen*, 2 vols., Leipzig, 1867-69; A. Baur, *Zwingli's Theologie*, 2 vols., Halle, 1838-89; R. Stähelin, *Huldreich Zwingli; sein Leben und Wirken nach den Quellen dargestellt*, 2 vols., Basel, 1895-97; S. M. Jackson, *Huldreich Zwingli, 1484-1531*, New York, 1901; S. Simpson, *Life of Ulrich Zwingli*, London, 1903; T. M. Lindsay, *A Hist. of the Reformation*, vol. ii., Edinburgh, 1907; E. Egli, *Schweizerische Reformationsgeschichte*, ed. G. Finsler, vol. i., Zürich, 1910; A. Lang, *Zwingli und Calvin*, Bielefeld, 1913; W. Köhler, in *Unsere religiösen Erzieher*, Leipzig, 1917; O. Farner, *Huldreich Zwingli*, Zürich, 1917; P. Burckhardt, *Huldreich Zwingli, eine Darstellung seiner Persönlichkeit und seines Lebenswerkes*, do. 1913; W. Köhler, *Ulrich Zwingli und die Reformation in der Schweiz*, Tübingen, 1919, *Die Geisteswelt Ulrich Zwinglis*, Gotha, 1920.

iii. *Discussions on special points*.—W. Cunningham, *The Reformers and the Theology of the Reformation*, Edinburgh, 1866; A. Schweizer, *Zwingli's Bedeutung neben Luther*, Zürich, 1884; J. M. Usteri, *Zwingli und Erasmus*, do. 1885; E. Nagel, *Zwingli's Stellung zur Schrift*, Freiburg, 1886; C. von Kugelgen, *Zwingli's Ethik*, Leipzig, 1902; W. Hastie, *The Theology of the Reformed Church in its Fundamental Principles*, Edinburgh, 1904; J. Kreutzer, *Zwingli's Lehre von der Obrigkeit*, Stuttgart, 1909; G. von Schulthess-Rechberg, *Luther, Zwingli, und Calvin in ihren Ansichten über das Verhältnis von Staat und Kirche*, Aarau, 1909; J. I. Good, *The Reformed Reformation*, Philadelphia, 1916; E. Vischer, in *Zum Gedächtnis der Reformation*, Basel, 1917; P. Wernle, *Das Verhältnis der schweizerischen zur deutschen Reformation*, do. 1918; T. Pestalozzi, *Die Gegner Zwinglis am Grossmünsterstift in Zürich*, Zürich, 1918; O. Farner, *Zwingli's Bedeutung für die Gegenwart*, do. 1919; A. Lang, *Reformation und Gegenwart*, Detmold, 1918; and the special studies in the memorial volume, *Ulrich Zwingli, 1519-1919, Zum Gedächtnis der Züricher Reformation*, Zürich, 1919.

WORKS EDITED

BY

JAMES HASTINGS, D.D.

THE ENCYCLOPÆDIA OF RELIGION AND ETHICS
DICTIONARY OF THE BIBLE. (Five Vols.)
THE ONE-VOLUME BIBLE DICTIONARY
DICTIONARY OF CHRIST AND THE GOSPELS
DICTIONARY OF THE APOSTOLIC CHURCH
'THE SCHOLAR AS PREACHER' SERIES
THE GREAT CHRISTIAN DOCTRINES
THE GREAT TEXTS OF THE BIBLE
THE GREATER MEN AND WOMEN OF THE BIBLE
THE CHILDREN'S GREAT TEXTS OF THE BIBLE
THE EXPOSITORY TIMES

EDINBURGH: T. & T. CLARK, 38 GEORGE STREET
LONDON: AT STATIONERS' HALL

EDITED BY DR. JAMES HASTINGS.

A Dictionary of Christ and the Gospels

In Two Vols. Price per Vol., in cloth binding, 26s. net.
In half-morocco, gilt top (*Price on application*).

The purpose of this Dictionary is to give an account of everything that relates to CHRIST—His Person, Life, Work, and Teaching.

'A triumphant and unqualified success. Indispensable to ministers and Bible students.'—Sir W. ROBERTSON NICOLL, LL.D.

'The preacher's purpose is better served than it has ever been before.'—*Times*.

'No more useful present could be made to a young clergyman than a copy of this admirable work. The articles are by competent and scholarly writers, and are full of information and suggestiveness.'—*Guardian*.

A Dictionary of The Apostolic Church

In Two Volumes. Price per volume, 26s. net, in cloth binding.
In half-morocco (*Price on application*).

It has often been said that the 'Dictionary of Christ and the Gospels' is of more practical value than a Dictionary of the Bible. And from all parts of the world has come the request that what that Dictionary has done for the Gospels another should do for the rest of the New Testament. The 'Dictionary of the Apostolic Church' is the answer. It carries the history of the Church as far as the end of the first century. Together with the 'Dictionary of Christ and the Gospels' it forms a complete and independent Dictionary of the New Testament.

Dictionary of the Bible

COMPLETE IN ONE VOLUME

Crown quarto, 1008 Pages, with Four Maps, price 24s. net.
In half-leather binding (*Price on application*).

This Dictionary is entirely distinct from the Five-Volume Dictionary. It brings the contents of the Bible, in accordance with present scholarship, within reach of those who have not the means to buy or the knowledge to use the larger Work. It contains no Hebrew or Greek except in transliteration.

'A very fine achievement, worthy to stand beside his larger Dictionaries, and by far the most scholarly yet produced in one volume in English-speaking countries, perhaps it may be said in the world.'—*Christian World*.

'For presentation and library purposes the book outstrips all its rivals, and its closely packed pages are a perfect mine for teachers and ministers.'—*Sunday School Chronicle*.

Detailed Prospectus, with Specimen Pages, of the above Works free.

Complete IN FIVE VOLUMES

*'In its five volumes we possess a splendid—nay, an unsurpassed—
thesaurus of biblical learning.'*—RECORD.

Including the Biblical Theology.

WITH MAPS AND ILLUSTRATIONS.

Edited by

JAMES HASTINGS, M.A., D.D.,

WITH THE ASSISTANCE OF

JOHN A. SELBIE, M.A., D.D.

This great work has taken its place, as 'The Times' says, as the 'standard authority for biblical students of the present generation.' In this country and America, in the Colonies, and even among people of other languages and of various creeds, it is in constant and increasing demand.

The **Guardian** says: 'We have no hesitation in recommending Hastings' Dictionary to students of the Bible as the best work of its kind which exists in English.'

The **Methodist Recorder** says: 'It is far away in advance of any other Bible Dictionary that has ever been published, in real usefulness for preachers, Bible students, and teachers.'

The **Bockman** says: 'This Dictionary sprang into fame with its first volume, and its reputation has been growing ever since. For scholarship, temper, and judgment combined, we have nothing else equal to it in English.'

* * Full Prospectus, with Specimen Pages, free on application.

Published Price per Volume—In Cloth 26s. net.

Complete Sets may also be had in various styles of Half-Morocco Bindings.
Prices on application.

EDINBURGH: T. & T. CLARK, 38 GEORGE STREET.

The International Theological Library

'A Series which has won a distinct place in theological literature by precision of workmanship and quite remarkable completeness of treatment.'—*Literary World*.
